RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Cynthia Givens  
1353 W. 76th St. Apt 15

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. If they had started budgeting for the pollution control back in 2007, they would have the money, which indicates that they never intended to live up to the agreement. Have you ever felt your respiratory system closing up in less the 5 minutes outdoors? I have! This stopped happening when local coal plants cut sulfur dioxide emissions. Sulfuric acid is produced INSIDE the human lung when inhaled sulfur dioxide dissolves in the moisture keeping the lungs functioning. Sulfuric acid is extremely corrosive. Sulfurous gases have been banned in warfare since their horrendous damage in WW1. Do let this company continue to wage war on the people of Illinois!

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Carolyn Massey
