RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Gary Joplin

RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance. Given global climate change, production of NOx, CO2, global warming's secondary releases of methane from uncovered tundra and polar coastlines, plus the global warming gas effect of the increased water vapor (that accompanies increased temperature), we have allowed vicious cycles to catalyze climate changes faster than the worst predictions scientists have made. We should add to this the even more abysmal problem of mountain-top mining. Over all, the coal industry is way over the line. Why allow them to make things even worse? Accordingly, we need to get PAST coal. Until we do so, at the very least, we can prevent emissions of sulfur dioxide and mercury from coal-fired power plants. These are significant health risks and delaying controls is unwise and irresponsible. We are told often by the coal industry how affordable it is. Maybe they should put less money into such advertising and more into pollution control technologies. RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Phyllis Keun
