Subject: Please Reject Midwest Generation's Petition for a Variance (Docket No. PCB 2013-024)

Feb 7, 2013

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

Please do not allow this polluter to continue without making the necessary changes to protect our health. The health consequences and economic impact would be unfairly transferred to people like us.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my health and our environment and I respectfully ask that you deny Midwest Generation's variance request.

Sincerely,

Ted Lazakis

Illinois Pollution Control Board Members

Dear Control Board Members,

Please reject Midwest Generation's request for a variance of the historic clean air standards Illinois adopted in 2006 (docket no. PCB 2013-024). Hold the company to its previous commitment, which is vital to protecting public health and the environment.

It is the responsibility and duty of the Board to protect Illinois residents from being taken advantage of by companies like Midwest Generation, which has delayed compliance with clean air laws for long enough and which has hidden behind threats to slash jobs and close plants. As you know from the Board's earlier experience with Ameren, a variance doesn't guarantee jobs or that plants will stay open.

The people of Illinois should not have to suffer from years of extra pollution. Midwest Generation should live up to their promise to install modern pollution controls on schedule.

Sincerely,

Ms. VIOLETA CARMICHAEL

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

I grew up here. I'm the only one of four children who did not have respiratory problems. When the wind blows in off the Lake, the air here is just plain dirty.

I live in the shadow of the Waukegan power plant. It sits on the Lake Michigan shore, next to another highly dangerous polluter, the former Johns-Manville asbestos dump, which is another fine example of what happens when these giant profiteers are allowed to evade their responsibility.

DO NOT allow Midwest Generation to escape their promise to clean up their act right now. We cannot afford another Manville here. The shores of Lake Michigan are too precious to the entire country.

If you don't hold them accountable right now, they will find one excuse after another to keep polluting my hometown and the Lakeshore.

Eventually they will leave the State of Illinois holding the financial responsibility for cleaning up their mess, just like Manville and Outboard Marine have done. This has to stop.

They DO have the money to do this now. If you let them evade it now, they will find a way to hide their huge profits further and you'll never be able to hold them acceptable.

Don't go easy on big polluters! Act for the people of Illinois. Make Midwest act responsibly.

REQUESTED VARIANCE
ILLINOIS POLLUTION CONTROL BOARD
DOCKET NUMBER PCB 13-24

January 17, 2013

Mr. John Therriault, Assistant Clerk
Illinois Pollution Control Board
100 W. Randolph St., Suite 11-500
Chicago, IL 60601-3218

Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs -- at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants -- such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants -- such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,

NAME

Michael Mercado

Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs -- at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants -- such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs -- at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants -- such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,

NAME

Ryan M. Monahan
