Subject: Please Reject Midwest Generation's Petition for a Variance (Docket No. PCB 2013-024)

Feb 6, 2013

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my health and our environment and I respectfully ask that you deny Midwest Generation's variance request.

Sincerely,

Harold Enstrom

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations, which my family can personally attest to.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my health, the health of my family and neighbors, and for our environment and I ask that you do your job and deny Midwest Generation's variance request.

Feb 6, 2013

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

Our two athletic children developed mild asthma problems when we moved in a few miles from this plant. When I drive by I see the huge plume of exhaust and I have seen some correlation between their asthma and the wind direction of these harmful pollutants blowing toward our house.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations.

Don't grant these additional delays. I have been hoping that installation of scrubbers on this plant will reduce our kids asthma symptoms and get them off medications. Don't disappoint us!

The Illinois Pollution Control Board is charged with protecting the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my families health and our environment and I respectfully ask that you deny Midwest Generation's variance request.

Sincerely,

Todd Nugent

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my health and our environment and I respectfully ask that you deny Midwest Generation's variance request.

Lake County is home to many families with small children. Please work to make our air healthier so that Lake County remains a smart choice for families to raise their children.

Sincerely,

Amy Shriberg

It is the responsibility and duty of the Board to protect Illinois residents from being taken advantage of by companies like Midwest Generation, which has delayed compliance with clean air laws for long enough and which has hidden behind threats to slash jobs and close plants. As you know from the Board's earlier experience with Ameren, a variance doesn't guarantee jobs or that plants will stay open.

The people of Illinois should not have to suffer from years of extra pollution. Midwest Generation should live up to their promise to install modern pollution controls on schedule.

Sincerely,

Ms. Sandra Rau

Subject: Please Reject Midwest Generation's Petition for a Variance (Docket No. PCB 2013-024)

Feb 6, 2013

Illinois Pollution Control Board Members

Dear Control Board Members,

Please reject Midwest Generation's request for a variance of the historic clean air standards Illinois adopted in 2006 (docket no. PCB 2013-024). Hold the company to its previous commitment, which is vital to protecting public health and the environment.

It is the responsibility and duty of the Board to protect Illinois residents from being taken advantage of by companies like Midwest Generation, which has delayed compliance with clean air laws for long enough and which has hidden behind threats to slash jobs and close plants. As you know from the Board's earlier experience with Ameren, a variance doesn't guarantee jobs or that plants will stay open.

The people of Illinois should not have to suffer from years of extra pollution. Midwest Generation should live up to their promise to install modern pollution controls on schedule.

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my health and our environment and I respectfully ask that you deny Midwest Generation's variance request.

Sincerely,

Amy Hellman
