Feb 6, 2013

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my health and our environment and I respectfully ask that you deny Midwest Generation's variance request.

Sincerely,

Stef Donato

Illinois Pollution Control Board Members

Dear Control Board Members,

Please reject Midwest Generation's request for a variance of the historic clean air standards Illinois adopted in 2006 (docket no. PCB 2013-024). Hold the company to its previous commitment, which is vital to protecting public health and the environment.

It is the responsibility and duty of the Board to protect Illinois residents from being taken advantage of by companies like Midwest Generation, which has delayed compliance with clean air laws for long enough and which has hidden behind threats to slash jobs and close plants. As you know from the Board's earlier experience with Ameren, a variance doesn't guarantee jobs or that plants will stay open.

The people of Illinois should not have to suffer from years of extra pollution. Midwest Generation should live up to their promise to install modern pollution controls on schedule.

Sincerely,

Mrs. Bernadette Payne

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Technologies to remove sulfur dioxide and other pollutants from stack emissions are well developed. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations. Furthermore, sulfur dioxide produces acid rain.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my health and our environment and I respectfully ask that you deny Midwest Generation's variance request.

Sincerely,

Deb Klein

Illinois Pollution Control Board Members

Dear Control Board Members,

Please reject Midwest Generation's request for a variance of the historic clean air standards Illinois adopted in 2006 (docket no. PCB 2013-024). Hold the company to its previous commitment, which is vital to protecting public health and the environment.

It is the responsibility and duty of the Board to protect Illinois residents from being taken advantage of by companies like Midwest Generation, which has delayed compliance with clean air laws for long enough and which has hidden behind threats to slash jobs and close plants. As you know from the Board's earlier experience with Ameren, a variance doesn't guarantee jobs or that plants will stay open.

The people of Illinois should not have to suffer from years of extra pollution. Midwest Generation should live up to their promise to install modern pollution controls on schedule.

Subject: Please Reject Midwest Generation's Petition for a Variance (Docket No. PCB 2013-024)

Feb 7, 2013

Illinois Pollution Control Board Members

Dear Control Board Members,

Please reject Midwest Generation's request for a variance of the historic clean air standards Illinois adopted in 2006 (docket no. PCB 2013-024). Hold the company to its previous commitment, which is vital to protecting public health and the environment.

It is the responsibility and duty of the Board to protect Illinois residents from being taken advantage of by companies like Midwest Generation, which has delayed compliance with clean air laws for long enough and which has hidden behind threats to slash jobs and close plants. As you know from the Board's earlier experience with Ameren, a variance doesn't guarantee jobs or that plants will stay open.

The people of Illinois should not have to suffer from years of extra pollution. Midwest Generation should live up to their promise to install modern pollution controls on schedule.

Sincerely,

Mr. Frederic Kuzel

Illinois Pollution Control Board

Dear Control Board,

I object to Midwest Generation's Petition for a Variance, Docket No. PCB 2013-024.

The Midwest Generation coal plants are some of the biggest emitters of sulfur dioxide in Illinois. Sulfur dioxide poses a serious threat to our health and our environment by contributing to asthma attacks, chronic pulmonary disease, and respiratory hospitalizations.

Granting these delays for Midwest Generation does not ensure the long-term stability of their workers' jobs and the company has provided no clear plan for how it will stay in compliance with the changes they have asked for. Like Ameren, they may well abandon operations in the near future.

The Illinois Pollution Control Board has an obligation to protect the health of Illinois residents and should uphold the agreement that was made in 2007 to reduce harmful pollution from Illinois' aging coal plants. This is critical for my health and our environment and I respectfully ask that you deny Midwest Generation's variance request.

Sincerely,

Eugene Sollo
