Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24

Dear Mr. Therriault:

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs – at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants – such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,

richard oginski

Midwest Generation is a major provider of jobs – at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants – such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,

Anthony Walk

January 28, 2013

I represent members of the International Brotherhood of Boilermakers Local Lodge One, who are employed by various signatory contractors who perform repair and maintenance work at Midwest Generation sites. I have a fiduciary obligation as a trustee on the members Taft-Hartley trust funds, to be sure all monies owed on behalf of the members are accounted for and all the benefits due the funds are paid on the members behalf for all hours worked.

As a result of MWG filing Bankruptcy proceedings under Chapter 11, I have a concern that the Trust Funds are made whole during these proceedings.

The work they perform is of an on-going nature and therefore it is hard to calculate what is owed at any given point in time.

Respectfully Submitted,

Robert Schwartz
