

**IN SUPPORT OF MIDWEST GENERATION'S  
REQUESTED VARIANCE**

**ILLINOIS POLLUTION CONTROL BOARD  
DOCKET NUMBER PCB 13-24**

January 2013

Mr. John Therriault, Assistant Clerk  
Illinois Pollution Control Board  
100 W. Randolph St., Suite 11-500  
Chicago, IL 60601-3218

**Re: Support for Requested Variance, Docket No. PCB 13-24**

Dear Mr. Therriault:

I respectfully request that the Illinois Pollution Control Board approve Midwest Generation's request for temporary relief from comprehensive state regulations that have ensured ongoing reductions in air emissions from the company's plants from 2008 to 2019.

Midwest Generation is merely asking permission to reduce, not eliminate, spending on environmental improvements during two years in the middle of a 12-year emissions reduction program. The company has been meeting all of its environmental commitments under state regulations, and even with the variance, would meet all requirements by the time the state program ends in 2019.

I also would ask that the IPCB consider that it granted Ameren relief just a few months ago that went beyond what Midwest Generation is requesting.

Midwest Generation employs 845 men and women, 64 percent of them union members. It provides jobs for hundreds of additional workers, most of them members of the building and construction trades. It spends close to \$400 million on goods and services from Illinois companies and to support various Illinois organizations, and nearly \$5 million on local property taxes. And it provides energy to homes and businesses throughout our state. It is deserving of your support for the requested variance.

Thank you for considering my letter.

Chicago, IL 60601-3218

**Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24**

Dear Mr. Therriault:

I support Midwest Generation's request to delay investment in additional pollution controls. While granting the request will help the company deal with current financial constraints, the request also results in lower emissions than are currently required. Midwest Generation is a major provider of jobs in Illinois, both directly at its plants and indirectly through spending on supplies and services. Nearly 65 percent of its 850 employees are union members, and hundreds more men and women in the building and construction trades unions work in the plants on special contracting projects, often to install new pollution controls.

Midwest Generation has invested in environmental improvements since being established in 1999, sometimes even before new government requirements were in place. It operates its plants with the highest priority on safety for all workers at all times.

Midwest Generation is only seeking permission to reduce its rate of investment in new environmental controls for two years during a 12-year program of emissions reductions required by the State of Illinois. The company is trying to get in the best possible position to manage through its financial restructuring and protect jobs and revenues.

At the end of the day, even if granted the variance, Midwest Generation would still meet the state-mandated emissions targets from 2017 to the end of the program in 2019, and its emissions from 2013-16 would actually be less than projected when current state regulations were adopted.

Midwest Generation is not unique. Other coal-fired power generators are also facing depressed energy prices. For example, last year Ameren won approval from the Illinois Pollution Control Board for a similar variance.

I respectfully request that the Illinois Pollution Control Board grant Midwest Generation the time it needs, just two years during a 12-year program, to complete its corporate restructuring.

Thank you for considering my comment.

Sincerely,

  
Basil G. Constantelos  
Naperville, Illinois

Dear Mr. Therriault:

I respectfully request that the Illinois Pollution Control Board approve Midwest Generation's request for temporary relief from comprehensive state regulations that have ensured ongoing reductions in air emissions from the company's plants from 2008 to 2019.

Midwest Generation has a long history of environmental stewardship demonstrated by the industry leading mercury controls and nitrogen oxide control technology already applied to their generating units. The company is merely asking permission to reduce, not eliminate, spending on environmental improvements during two years in the middle of a 12-year emissions reduction program. The company has been meeting all of its environmental commitments under state regulations, and even with the variance, would meet all requirements by the time the state program ends in 2019.

I also would ask that the IPCB consider that it granted Ameren relief just a few short months ago that went beyond what Midwest Generation is requesting.

Midwest Generation employs 845 men and women, 64 percent of them union members. It provides jobs for hundreds of additional workers, most of them members of the building and construction trades. It spends close to \$400 million on goods and services from Illinois companies and to support various Illinois organizations, and nearly \$5 million on local property taxes. **Re: Support for Requested Variance, Docket No. PCB 13-24**

Dear Mr. Therriault:

I respectfully request that the Illinois Pollution Control Board approve Midwest Generation's request for temporary relief from comprehensive state regulations that have ensured ongoing reductions in air emissions from the company's plants from 2008 to 2019.

Midwest Generation is merely asking permission to reduce, not eliminate, spending on environmental improvements during two years in the middle of a 12-year emissions reduction program. The company has been meeting all of its environmental commitments under state regulations, and even with the variance, would meet all requirements by the time the state program ends in 2019.

I also would ask that the IPCB consider that it granted Ameren relief just a few months ago that went beyond what Midwest Generation is requesting.

Midwest Generation employs 845 men and women, 64 percent of them union members. It provides jobs for hundreds of additional workers, most of them members of the building and construction trades. It spends close to \$400 million on goods and services from Illinois companies and to support various Illinois organizations, and nearly \$5 million on local property taxes. And it provides energy to homes and businesses throughout our state. It is deserving of your support for the requested variance.

Thank you for considering my letter.

I also would ask that the IPCB consider that it granted Ameren relief just a few months ago that went beyond what Midwest Generation is requesting.

Midwest Generation employs 845 men and women, 64 percent of them union members. It provides jobs for hundreds of additional workers, most of them members of the building and construction trades. It spends close to \$400 million on goods and services from Illinois companies and to support various Illinois organizations, and nearly \$5 million on local property taxes. And it provides energy to homes and businesses throughout our state. It is deserving of your support for the requested variance.

Thank you for considering my letter.

Chicago, IL 60601-3218

**Re: Support for Requested Variance, Docket No. PCB 13-24**

Dear Mr. Therriault:

I respectfully request that the Illinois Pollution Control Board approve Midwest Generation's request for temporary relief from comprehensive state regulations that have ensured ongoing reductions in air emissions from the company's plants from 2008 to 2019.

Midwest Generation is merely asking permission to reduce, not eliminate, spending on environmental improvements during two years in the middle of a 12-year emissions reduction program. The company has been meeting all of its environmental commitments under state regulations, and even with the variance, would meet all requirements by the time the state program ends in 2019.

I also would ask that the IPCB consider that it granted Ameren relief just a few months ago that went beyond what Midwest Generation is requesting.

Midwest Generation employs 845 men and women, 64 percent of them union members. It provides jobs for hundreds of additional workers, most of them members of the building and construction trades.
