**Subject:** Please Reject Midwest Generation's Petition for a Variance (Docket No. PCB 2013-024)

RECEIVED  
CLERK'S OFFICE

FEB 19 2013

STATE OF ILLINOIS  
Pollution Control Board

Dear Mr. John Therriault:

Dear Board Members,

Please reject Midwest Generation's request for a variance from the historic clean air Combined Pollutant Standard Illinois adopted in 2006 (Docket No. PCB 2013-024). I urge you to hold the company to its previous commitment to comply with all components of the Combined Pollutant Standard.

It is the responsibility and duty of the Pollution Control Board to protect Illinois residents from having their health harmed by companies like Midwest Generation, which has delayed compliance with clean air laws for long enough. Pollution from coal power plants has a direct impact on the health of our community; it exacerbates lung disease, increasing doctor visits, trips to the emergency room, and hospitalizations.

People should not have to suffer from two more years of extra pollution that will harm their health. Midwest Generation should live up to their commitment to install modern pollution controls on schedule in compliance with long established state air pollution regulations. I urge you to reject their request for a variance.

Sincerely,  
Barbara Harrison  
5550 S Shore Dr  
Chicago, IL 60637-5030

February 19, 2013

Mr. John Therriault, Assistant Clerk  
Illinois Pollution Control Board  
100 W. Randolph Street, Ste. 11-500  
Chicago, IL 60601-3218

Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24

Dear Mr. Therriault:

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs - at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants - such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,

George Metzger  
224 Linden Ave

CLERK'S OFFICE

FEB 19 2013

STATE OF ILLINOIS  
Pollution Control Board

Dear Mr. John Therriault:

Dear Board Members,

Geez, I am wheezing just thinking how a corporate entity is trying to weasle out from an agreement to give me and my neighbors cleaner air sooner rather than later. Keep them in line.

Reject Midwest Generation's request for a variance from the historic clean air Combined Pollutant Standard Illinois adopted in 2006 (Docket No. PCB 2013-024). Hold the company to its promise to comply with all components of the Combined Pollutant Standard.

Do your duty to protect Illinois residents and tell Midwest Generation to live up to their commitment to install modern pollution controls on schedule in compliance with long established state air pollution regulations. I urge you to reject their request for a variance.

Sincerely,  
Ira Shakman

Mr. John Therriault, Assistant Clerk  
Illinois Pollution Control Board  
100 W. Randolph St., Suite 11-500  
Chicago, IL 60601-3218

**Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24**

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs -- at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants -- such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,

**Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24**

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs – at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants – such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,

NAME
