January 17, 2013

Mr. John Therriault, Assistant Clerk
Illinois Pollution Control Board
100 W. Randolph St., Suite 11-500
Chicago, IL 60601-3218

Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs -- at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants -- such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,

NAME

Christina Hayward

January 17, 2013

Mr. John Therriault, Assistant Clerk
Illinois Pollution Control Board
100 W. Randolph St., Suite 11-500
Chicago, IL 60601-3218

Re: Support for Midwest Generation's Requested Variance, Docket No. PCB 13-24

I support Midwest Generation's request for temporary relief from Illinois pollution control regulations (Variance, Docket No. PCB 13-24).

Midwest Generation is a major provider of jobs -- at its plants and at Illinois businesses that supply them with products and services. Nearly 65 percent of its 850 employees are union members, and hundreds of union members in the building and construction trades also work on special projects in the plants -- such as installing new pollution controls.

Granting the variance can help sustain the positive impact of the company's operations on local communities and businesses and help preserve property tax revenues for education and municipal services.

Even if granted the variance, Midwest Generation would still hit the original state emissions targets by the end of the program in 2019, and will reduce emissions from 2013-2016 more than was expected when current regulations were adopted.

Thank you for considering and registering my comment.

Sincerely,
