**RECOMMENDATION OF THE ILLINOIS ENVIRONMENTAL PROTECTION AGENCY**

The Illinois Environmental Protection Agency (“Illinois EPA”) hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board (“Board”), 35 Ill. Adm. Code 125.204.

1. On July 20, 2015, the Illinois EPA received a request from O’Leary Farms (log number TC-20-15, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
2. The facility’s address is: O’Leary Farms  
817 240<sup>th</sup> St.  
Viola, Illinois 61486

The following proposed water pollution control facilities in this request are located at Section 21, T14N, R2W of the 4th P.M. in Mercer County, at the above street address and consist of the following:

Livestock waste management facilities consisting of one concrete manure pit (approximately 257 ft. x 52 ft. x 8 ft.), a PVC perimeter foundation drain (4 in. diameter by approximately 678 ft. in length), with slotted floors over the pit.

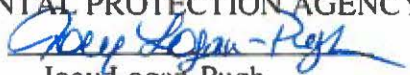

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application, and are further described in Exhibit A.

4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2014), and Section 125.200(a) of the Board's regulations, 35 Ill. Adm. Code 125.200(a), define "pollution control facilities" as:  

any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.
5. In order to receive preferential treatment in accordance with 35 ILCS 200/11-5, pollution control facilities must be certified as such by the Board 35 ILCS 200/11-20 (2014) and 35 Ill. Adm. Code 125.200(a).
6. Upon receipt of a tax certification application, the Illinois EPA must file a recommendation regarding the application with the Board, in accordance with 35 Ill. Adm. Code 125.204(a).
7. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Aledo, IL 61231  
Recommendation of Tax Certification  
Log # TC-20-15  
Property ID # 11-11-21-300-005

The Bureau of Water received a request on July 20, 2015 from O'Leary Farms for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

O'Leary Farms  
817 240<sup>th</sup> Street  
Viola, IL 61486

Section 21, T14N, R2W of the 4<sup>th</sup> PM in Mercer County

Livestock waste management facilities consist of one concrete manure pit (approximately 257 ft. x 52 ft. x 8 ft.), a PVC perimeter foundation drain for the manure pit (4 in. diameter, approximately 678 ft. in length), and slotted floors over the pit that collect livestock waste. These livestock waste management facilities are used to collect, transport, and/or store livestock waste prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Jenny Larsen at 217/782-0610.

Title: Owner

Date Control Devices installed: 12/2002

Provided Fair cash Value:  
\$407,000

Wastes:  Livestock waste is applied to cropland.  
 Agrichemical rinsate and spillage is recycled through the facility and/or land applied.  
 Other: \_\_\_\_\_

**Physical Description of Pollution Control Devices:**

This facility consists of one concrete manure pit (approximately 257 ft. x 52 ft. x 8 ft.) and slotted floors over the pit to collect swine waste. The manure is pumped out of the pits and applied to the fields as crop fertilizer.

08/12/2015- Spoke with James O'Leary. He confirmed that the two applications he sent in are for separate facilities but with identical dimensions on the pits and they were both installed in December of 2002. He also confirmed that he would like to get the perimeter foundation drain for the hog operation building certified as a pollution control. The perimeter foundation drain is 4" diameter PVC pipe that is approximately 678 feet in length.

The primary purpose for these structures is to contain livestock waste thereby preventing contaminated water runoff.

Recommended Action: Permit the above mentioned structures.

**Re: Facility ID#: LF1310140000**  
**2015 July Water Sample Reminder**

RECEIVED  
JUL 30 2015

Dear Facility Owner/Operator:

As noted in your "Initial Notice of Construction Plan Completion" letter, your facility's design included the installation of a perimeter foundation drain. **This letter is a reminder that a sampling event must be attempted during the month of July.** Analytical results and a discussion of those results need to be submitted to the Department within 30 days of the sampling event. If adequate water is not available, you are still required to provide the Department with written confirmation through fax, mail or e-mail. If you have already submitted this quarter's response, please disregard this letter.

Please make sure your response includes the following information:

- ✓ Facility ID# (see above)
- ✓ Date sampled
- ✓ Date analyzed by laboratory
- ✓ Results for Nitrate-nitrogen, Phosphate-phosphorus, Chloride, Sulfate, & Ammonia-nitrogen
- ✓ Unit of measurement (ppm, etc.)
- ✓ A discussion of the results as compared to initial and previous samples

**Note: Sites with multiple Facility Identification Numbers must send a response for each number.**

If you have any questions or comments, please contact us at 217/785-2427.

Sincerely,

ILLINOIS DEPARTMENT OF AGRICULTURE

Sec. G INSTRUCTIONS	INSTRUCTIONS FOR COMPILING AND FILING APPLICATION			
	General: Separate applications must be completed for each control facility claimed. Do not mix types (water and air). Where both air and water operations are related, file two applications. If attachments are needed, record them consecutively on an index sheet.			
	Sec. A	Information refers to applicant as listed in the tax records and the person to be contacted for further details or for inspection of facilities. Define facility location by street address or legal description. A plat map location is required for facilities located outside of municipal boundaries. The property identification number is required.		
	Sec. B	Self-explanatory. Submit copies of all permits issued by local pollution control agencies. (e.g. MSD Construction Permit)		
	Sec. C	Refers to manufacturing processes or materials on which pollution control facility is used		
	Sec. D	Narrative description of the pollution control facility, indicating that its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility. State permit number, date, and agency issuing permit. A narrative description and a process flow diagram describing the <u>pollution control facility</u> . Include a listing of each major piece of equipment included in the claimed fair cash value for real property. Include an <u>average</u> analysis of the influent and effluent of the control facility stating the collection efficiency.		
	Sec. E	List air contaminants, or water pollution substances released as effluents to the manufacturing processes. List also the final disposal of any contaminants removed from the manufacturing processes. Item (1) - Refers to pollutants and contaminants removed from the process by the pollution control facility. Item (2) - Refers to water pollution but can apply to water-carried wastes from air pollution control facilities. Submit drawings, which clearly show (a) Point(s) of discharge to receiving stream, and (b) Sewers and process piping to and from the control facility. Item (3) - If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value in dollars reclaimed by sale or reuse of the collected substances. State the cost of reclamation and related expense. Item (4) - State the date which the pollution control facility was first placed in service and operated. If not, explain. Item (5) - This information is essential to the certification and assessment actions. This accounting data must be completed to activate project review prior to certification by this Agency.		
	Sec. F	Self-explanatory. Signature must be a corporate authorized signature.
