 ENVIRONMENTAL PROTECTION AGENCY)
)

Preliminary Order of the Board (by Mr. Dumelle)

This is a petition for variance requesting permission to use copper sulfate in the City's water supply reservoir in order to limit algae growth therein. The petition, however, lacks certain information which would be essential to a final determination of the case. The needed facts are as follows:

1. Reservoir dimensions - surface area, average depth, volume.
2. Dosages of copper sulfate which would be necessary in pounds and frequency and the resulting copper concentrations.
3. Effect of previous copper sulfate dosages on the fish and other aquatic life in the reservoir.
4. Feasibility of alternatives to the use of copper sulfate.

It is herewith ordered that additional information as outlined above be filed with the Board and the Agency by September 8, 1972. The additional information shall constitute an amended petition and the petitioner shall include a statement that the 90 day period provided for in Title 9, Section 38 of the Environmental Protection Act shall commence as of the date of filing of the amended petition.

In the absence of the filing of an amended petition on or before September 8, 1972, the original petition will be subject to dismissal.

I, Christian L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Preliminary Order of the Board was adopted on the 15th day of August, 1972 by a vote of 5-0.

Christian L. Moffett, Clerk
Illinois Pollution Control Board
