Legal Notice

NOTICE OF PETITION BY PEORIA DISPOSAL COMPANY FOR MODIFICATION OF AN ADJUSTED STANDARD ORDER (AS 2008-010) BEFORE THE ILLINOIS POLLUTION CONTROL BOARD

This notice is published pursuant to 415 ILCS 5/28.1 and 35 Ill. Adm. Code 104.408 to inform the public of the submittal by Peoria Disposal Company ("PDC"), 4349 W. Southport Rd., Peoria, Illinois 61615, of a Petition for Modification of the Adjusted Standard Order ("Petition for Modification") for Electric Arc Furnace Dust Stabilized Residue (AS 2008-010) to the Illinois Pollution Control Board (the "Board") on September 21, 2017, docketed as Case No. AS 2018-001.

A listed hazardous waste currently being treated at PDC's waste stabilization facility ("WSF") is K061 electric arc furnace ("EAF") steel generated by steel mills that produce steel using electric arc furnaces. On April 25, 2008, PDC petitioned the Board for an upfront and conditional delisting for the stabilized residue generated by PDC from the treatment of K061 EAF dust utilizing PDC's proprietary stabilization technology at the WSF ("EAFDSR"). The Board docketed the case as AS 2008-010. After extensive briefing and public involvement, including a public hearing conducted by the Board, the Board granted the requested delisting with conditions, in its Opinion and Order entered January 8, 2009 (the "Adjusted Standard Order").

In this Petition for Modification, PDC requests that the Board remove one of the fifteen (15) testing parameters required in the Adjusted Standard Order, based on data generated during the past eight (8) years of PDC's operations under the Adjusted Standard Order. PDC requests that the Adjusted Standard Order be modified to remove any requirement that PDC test for dioxins/furans as a constituent of concern, and to remove the delisting level for dioxins/furans presently included in the Adjusted Standard Order. The testing for dioxins/furans is costly and time consuming, and has been shown to add no information to inform the decision on whether any particular batch of EAFDSR can be safely placed in a properly managed Subtitle D landfill. The remaining fourteen (14) constituents would continue to be analyzed for each daily sample.

In the Adjusted Standard Order, the Board expressly noted that PDC or the Illinois Environmental Protection Agency may petition the Board for modification of the Adjusted Standard Order "if future information indicates that this is necessary." In eight (8) years of conducting daily testing for dioxins/furans, there has not been a single instance of a confirmed exceedance that would have prevented a batch of EAFDSR from being delisted. In addition, even the largest of the apparent detections would have posed no incremental risk to human health or the environment. Consequently, PDC proposes that the Adjusted Standard Order be modified to remove TCLP dioxin and furan testing from the required daily analytical protocol.

Any person may cause a public hearing to be held in the above-described adjusted standard proceeding by filing a hearing request with the Board within twenty-one (21) days after the date of the publication of this notice. The hearing request should indicate the docket number for the adjusted standard proceeding, as found in this notice. The hearing request must be mailed to the Clerk, Illinois Pollution Control Board, 100 W. Randolph Street, Suite 11-500, Chicago, Illinois 60601, or filed electronically through COOL located on the Board's website (www.ipcb.state.il.us).
