**MIDWEST GENERATION, LLC'S OBJECTION AND APPEAL FROM HEARING  
OFFICER'S RULING TO ADMIT COMPLAINANTS' EXHIBITS 204G-209G,  
210H-215H, 222J – 228J, 236L – 241L, AND 261**

Pursuant to 35 Ill. Adm. Code 101.502(b), 101.518 and 101.626, Respondent Midwest Generation, LLC (“MWG”), by its undersigned counsel, submits to the Illinois Pollution Control Board (“Board”) this Objection and Appeal from the Hearing Officer’s Ruling to Admit Exhibits 204G-209G, 210H-215H, 222J-228J, 236L-241L, and 261, as duplicative and cumulative evidence that is prejudicial to MWG. In support of its Objection and Appeal, MWG submits its Memorandum in Support and states as follows:

- 1) On October 25, 2017, the Complainants moved to admit into evidence Exhibits 204G-209G, which are groundwater data for the Joliet 29 Station taken pursuant to the Federal Coal Combustion Residual Rules, 40 CFR 257 (“CCR Rules”), from the first quarter of 2016 through the second quarter of 2017.<sup>1</sup>

---

<sup>1</sup> As Exhibits 204G-209G, 210H-215H, 222J-228J, and 236L-241L consist of groundwater data that is voluminous, MWG has not attached the exhibits to this motion. If the Board requests, MWG will submit the exhibits for the Board’s review.

- 2) The Joliet groundwater data in Exhibits 204G-209G is collected from the same wells and collected at the same time as the groundwater data MWG collects pursuant to Illinois Environmental Protection Agency (“Illinois EPA”) Compliance Commitment Agreements signed with Illinois EPA in 2012 (“CCA Data”). The Joliet CCA Data was separately admitted into evidence as Exhibits 243M through 246M.<sup>2</sup>
- 3) On October 25, 2017, the Complainants moved to admit into evidence Exhibits 210H-215H, which are groundwater data for the Powerton Station taken pursuant to the CCR Rules from the first quarter of 2016 through the second quarter of 2017.
- 4) The Powerton groundwater data in Exhibits 210H-215H is collected from the same wells (except for monitoring wells 17, 18 and 19) and collected at the same time MWG collects the CCA Data at the Powerton Station. The Powerton CCA Data was separately admitted into evidence as Exhibits 256O through 260O.
- 5) On October 25, 2017, the Complainants moved to admit into evidence Exhibits 222J-228J, which are groundwater data for the Waukegan Station taken pursuant to the CCR Rules from the first quarter of 2016 through the second quarter of 2017.
- 6) The Waukegan groundwater data in Exhibits 222J-228J is collected from the same wells (except for monitoring wells 11, 14 and 16) and collected at the same time MWG collects the CCA Data at the Waukegan Station. The Waukegan CCA Data was separately admitted into evidence as Exhibits 267P through 270P.

---

<sup>2</sup> As Exhibits 243M-246M, 256O, 260O, 267P-270P, and 278Q-281Q consist of groundwater data that is voluminous, MWG has not attached the exhibits to this motion. If the Board requests, MWG will submit the exhibits for the Board’s review

- 7) On October 25, 2017, the Complainants moved to admit into evidence Exhibits 236L-241L, which are groundwater data for the Will County Station taken pursuant to the CCR Rules from the first quarter of 2016 through the second quarter of 2017.
- 8) The Will County groundwater data in Exhibits 236L-241L is collected from groundwater monitoring wells 5, 6, 9 and 10 at the Will County Station at the same time MWG collects the CCA Data. The Will County CCA Data was separately admitted into evidence as Exhibits 278Q through 281Q.
- 9) MWG objected to the admission of Exhibits 204G-209G, 210H-215H, 222J-228J, and 236L-241L, because the groundwater data taken pursuant to the CCR Rules ("the CCR Data") is duplicative of the CCA Data, constitutes cumulative evidence, and is prejudicial to MWG. (PCB13-15 Hearing Transcript, Oct. 25, 2017, p. 60:14-62:14, 65:7-10, 68:7-11, 71:12-19) (attached as Attachment A).
- 10) Complainants' own expert stated that the results from the CCA Data and the results from the CCR Data were the same. (PCB13-15 Hearing Transcript, Oct. 26, 2017, (afternoon session), p. 71:10-14, "My opinion is that the -- you know, having looked at many, many-super many, over 50 years of ground water quality data, that the total recoverable and dissolved are the same for all practical purposes.") (attached as Attachment C).
- 11) On October 25, 2017, the Complainants moved to admit into evidence Exhibit 261, the Groundwater Sampling Summary for the Metals Cleaning Basin at the Powerton Station, dated January 24, 2017 (attached as Attachment D).
- 12) MWG objected to the admission of Exhibit 261 because it contains the same data as the CCA reports submitted as Exhibits 257O and 258O (attached as Attachments E and F), and thus

is duplicative and cumulative evidence, prejudicial to MWG. (PCB13-15 Hearing Transcript, Oct. 25, 2017, 152:13-21) (See Attachment A).

13) On October 25, 2017, over the objection of MWG, the Hearing Officer issued a ruling to admit Exhibits 204G-209G, 210H-215H, 222J-228J, 236L-241L, and 261 as evidence.

14) MWG appeals the Hearing Officer's decision to admit Exhibits 204G-209G, 210H-215H, 222J-228J, 236L-241L, and 261, because the exhibits are duplicative and cumulative evidence, and thus are prejudicial to MWG. 5 ILCS 100/10-40, 35 Ill. Adm. Code 101.626; Ill. R. Evid. 403.

WHEREFORE, for the reasons stated above, MWG requests that the Board reverse the Hearing Officer's ruling, exclude Exhibits 204G-209G, 210H-215H, 222J – 228J, 236L – 241L (except for the specific wells identified herein), exclude Exhibit 261, and strike all testimony related to the Exhibits.

Respectfully submitted,  
Midwest Generation, LLC

**MEMORANDUM IN SUPPORT OF MIDWEST GENERATION, LLC'S OBJECTION  
AND APPEAL FROM HEARING OFFICER'S RULING TO ADMIT  
COMPLAINANTS' EXHIBITS 204G-209G, 210H-215H, 222J-228J,  
236L-241L, AND 261 AS EVIDENCE**

Midwest Generation, LLC ("MWG") submits this Memorandum in Support of its Objection and Appeal from the Hearing Officer's Ruling to Admit Exhibits 204G-209G, 210H-215H, 222J-228J, 236L-241L, and 261, and states as follows:

**I. Statement of Facts**

On October 25, 2017, Complainants moved to admit Exhibits 204G-209G, 210H-215H, 222J-228J, 236L-241L, and 261. MWG objected to the admission of the Exhibits because they are duplicative and cumulative evidence, and thus are prejudicial to MWG. (PCB13-15 Hearing Transcript, Oct. 25, 2017, p. 60:14-62:14, 65:7-10, 68:7-11, 71:12-19, 152:13-21) (attached as Attachment A). Over MWG's objections, the Hearing Officer admitted the exhibits into evidence.

**a. The CCA Data Is The Same As The CCR Data**

Exhibits 204G-209G, 210H-215H, 222J-228J, and 236L-241L consist of groundwater data for the Joliet 29 Station, Powerton Station, Waukegan Station, and Will County Stations,

respectively.<sup>3</sup> The groundwater data in Exhibits 204G-209G, 210H-215H, 222J-228J, and 236L-241L (“CCR Data”) were taken pursuant to the Federal Coal Combustion Residual Rules, 40 CFR 257 (“CCR Rules”), from the first quarter of 2016 through the second quarter of 2017. The CCR Data taken pursuant to the Federal CCR Rules is taken at the same time and from the same wells as groundwater data already admitted into evidence in the Hearing. Specifically:

- The CCR Data from Joliet 29 Station in Exhibits 204G-209G is collected from the same wells and collected at the same time MWG collects the groundwater data pursuant to the Illinois Environmental Protection Agency (“Illinois EPA”) Compliance Commitment Agreements signed by MWG in 2012 (“CCA Data”). The CCA Data for Joliet 29 was separately admitted as Exhibits 243M through 246M.<sup>4</sup> (PCB13-15 Hearing Transcript, Oct. 26, 2017 (morning session), p. 11:5-12) (Attachment B).
- With the exception of monitoring wells 17, 18, and 19, the CCR Data from the Powerton Station in Exhibits 210H-215H is collected from the same wells and collected at the same time MWG collects the CCA Data. The CCA Data for Powerton was separately admitted as Exhibits 256O through 260O.<sup>5</sup> (PCB13-15 Hearing Transcript, Oct. 26, 2017 (morning session), p. 11:5-9, 11:13-16) (Attachment B).
- With the exception of monitoring wells 11, 14, and 16, the CCR Data from the Waukegan Station in Exhibits 222J-228J is collected from the same wells and collected at the same time MWG collects the CCA Data. The CCA Data for Waukegan was separately admitted as Exhibits 267P through 270P.<sup>6</sup> (PCB13-15 Hearing Transcript, Oct. 26, 2017 (morning session), p. 11:5-12, 11:17-19) (Attachment B).
- At Will County, the CCR Data from groundwater monitoring wells 5, 6, 9 and 10 in Exhibits 236L-241L is collected from the same wells and collected at the same time MWG collects the CCA Data. The CCA Data for Will County was separately admitted as Exhibits 278Q through 281Q. (PCB13-15 Hearing Transcript, Oct. 26, 2017 (morning session), p. 11:5-12, 84:5-15) (Attachment B).

After the Hearing Officer ruled to admit Exhibits 204G-209G, 210H-215H, 222J-228J, and 236L-241L – the CCR Data – it became very clear that the Exhibits are duplicative of the CCA

---

<sup>3</sup> As Exhibits 204G-209G, 210H-215H, 222J-228J, and 236L-241L consist of groundwater data that is voluminous, MWG has not attached the exhibits to this motion. If the Board requests, MWG will submit the exhibits for the Board’s review.

<sup>4</sup> As Exhibits 243M-246M, 256O, 260O, 267P-270P, and 278Q-281Q consist of groundwater data that is voluminous, MWG has not attached the exhibits to this motion. If the Board requests, MWG will submit the exhibits for the Board’s review

<sup>5</sup> Monitoring wells 17, 18, and 19 at the Powerton are only sampled pursuant to the Federal CCR Rules.

<sup>6</sup> Monitoring wells 11, 14, and 16 at the Waukegan Station are only sampled pursuant to the Federal CCR Rules.

Data in Exhibits 243M-246M, 256O-260O, 267P-270P, and 278Q-281Q. Mr. Richard Gnat, Principal and part owner of the environmental consulting firm KPRG & Associates, explained the difference between the CCR Data and the CCA Data at the Hearing. In short, the method of analysis of the two sets of data is the exact same except for one step of the analysis procedure. (PCB13-15 Hearing Transcript, Oct. 26, 2017 (morning session), p. 12:5-8) (Attachment B). As explained by Mr. Gnat, the only difference is whether or not the person collecting the samples filters the groundwater when the sample is collected. (PCB13-15 Hearing Transcript, Oct. 26, 2017(morning session), p. 12:9-12) (Attachment B). The groundwater analyzed in the CCA Data is filtered whereas the groundwater analyzed in the CCR Data is not filtered, and the two sets of groundwater samples are analyzed with the exact same method at the laboratory. (PCB13-15 Hearing Transcript, Oct. 26, 2017(morning session), p. 12:13-23) (Attachment B). In fact, Mr. Gnat testified that the filtered groundwater data, i.e. – the CCA Data – is more representative than the CCR Data for comparison to the Class 1 Standards, 35 ILCS 620.410. (PCB13-15 Hearing Transcript, Oct. 26, 2017(morning session), pp. 14:24-15:3) (Attachment B).

Later in the Hearing, Complainants' expert, Dr. James Kunkel, confirmed that there was no real difference between the CCR Data and the CCA Data:

MR. RUSS: Q. What do they represent, in terms of data?

DR. KUNKEL: A: In terms of data, they -- well, the CCA are dissolved constituents. So, those are filtered samples, as we talked about before. The CCR are unfiltered samples. If I can opine on those.

Q. Sure.

A. My opinion is that the -- you know, having looked at many, many -- super many, over 50 years of ground water quality data, that the total recoverable and dissolved are the same for all practical purposes.

I think Rich tried to explain it, Rich Gnat this morning, where he said the difference between total undissolved is the total recoverable might have some sediment in the sample, because they extract the sample from the well.

So, there is a stress put on the well, and that the gravel pack or the sand pack around the well doesn't filter out all -- maybe it doesn't filter out all the sediment.

As we talked before, we may get some difference between the total recoverable and the dissolved. But for practical purposes, I guess if I was a regulator, I wouldn't quibble about the difference.

Q. Looking at your charts for MW-3, just to clarify, when you say the same, how precisely are you using that word?

A. Well, pretty precisely. If you look at, say, the boron concentrations, the difference is between, and I don't have -- between .4 and, say, .5 milligrams per liter for boron, and that's well within the error of laboratory analyses and things like that.

Sometimes -- I think if you look at these, sometimes the total recoverable is less than the dissolved and sometimes it's the other way around.

So, I mean, I'm not going to quibble with that as a professional engineer. I think that's the way life is. Life is not perfect and neither is hydrology.

(PCB13-15 Hearing Transcript, Oct. 26, 2017 (afternoon session), pp. 71:4-72:20, emphasis added) (Attachment C).

Thus, both Mr. Gnat, an environmental consultant, and Complainants' expert Dr. Kunkel, a professional engineer with a doctorate in Hydrology and Water Resources Engineering, stated that there was no meaningful difference between the CCR Data and the CCA Data. There is no question that the CCR Data is duplicative of the CCA Data.

b. The Metals Cleaning Basin Groundwater Sampling Summary Has the Same Data As The CCA Data

Complainants also moved to admit Exhibit 261, the Metals Cleaning Basin Groundwater Sampling Summary dated January 24, 2017, during testimony of Mr. Gnat. (Attachment D). Mr. Gnat explained that Exhibit 261 only contained data from three monitoring wells (monitoring wells 13, 14, and 15) at the Powerton Station, and the results from those three wells are submitted pursuant to the Illinois EPA metal cleaning basin permit. (PCB13-15 Hearing Transcript, Oct. 25, 2017, p. 151:17-20) (Attachment A). MWG initially objected to the admission of Exhibit 261 because there was no analytical data package attached to the exhibit, and thus it was an incomplete exhibit. (PCB13-15 Hearing Transcript, Oct. 25, 2017, 152:2-5) (Attachment A). Mr. Gnat

explained that the reason there was no analytical package was because “these are also sampled as part of our CCA sampling. All these analytics were included in there.” (PCB13-15 Hearing Transcript, Oct. 25, 2017, 152:9-12) (Attachment A). Upon that revelation, MWG objected to the admission of Exhibit 261 because it contained the same data as the CCA Data reports that had just been admitted as exhibits. As a result, Exhibit 261 was simply cumulative and duplicative and there was no reason to include the document into the proceeding. (PCB13-15 Hearing Transcript, Oct. 25, 2017, 152:13-21) (Attachment A). Over MWG’s objections, the Hearing Officer ruled to admit Exhibit 261.

Later in the proceeding, Mr. Gnat testified that the groundwater data in Exhibit 261 was already admitted as part of the CCA sampling results in Exhibits 257O and 258O. (PCB13-15 Hearing Transcript, Oct. 26, 2017(morning session), pp. 75:4-6, 75:20-22, 76:16-18, 77:22-24, 78:18-79:1) (Attachment B). In particular Mr. Gnat stated:

MS. GALE: Q. And the data in both of these tables is from the same sample, correct?

MR. GNAT: A. Yes. I'm going through the metals data here and they're identical.

(PCB13-15 Hearing Transcript, Oct. 26, 2017(morning session), p. 81:5-8) (Attachment B).

Thus, the groundwater data in Exhibit 261 is simply a duplicate of the groundwater data contained in Exhibits 257O and 258O, attached as Attachments E and F.

## **II. Cumulative Evidence Should Be Excluded**

Pursuant to the Illinois Pollution Control Board (“Board”) rules, in accordance with the Section 10-40 of the Illinois Administrative Procedures Act (“Illinois APA”), the Hearing Officer “will admit evidence that is admissible under the rules of evidence as applied in the civil courts of Illinois, except as otherwise provided in this Part.” 35 Ill. Adm. Code 101.626. The Illinois APA states that “irrelevant, immaterial, or unduly repetitious evidence shall be excluded,”...and that the rules of evidence as applied in civil cases shall be followed. 5 ILCS 100/10-40. The Hearing

Officer is also directed to “limit repetitive or cumulative testimony and questioning.” 35 Ill. Adm. Code 101.610 (e).

Pursuant to Rule 403 of the Illinois Rules of Evidence, “Although relevant, evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence.” Ill. R. Evid. 403 (emphasis added). The Illinois Supreme Court has stated that cumulative evidence is as a general rule “... held to be additional evidence of the same kind and to the same point.” *People v. Cotell*, 298 Ill. 207, 216, 131 N.E. 659, 662 (1921). In other words, “Cumulative evidence replicates other admitted evidence.” *United States v. Ives*, 609 F.2d 930, 933 (7th Cir. 1979). The reason to exclude cumulative evidence is because it can be prejudicial. *Old Chief v. United States*, 519 U.S. 172, 179, 117 S. Ct. 644, 650 (1997) (stating cumulative evidence can be unfairly prejudicial even though it may be relevant). The Wisconsin District Court has given an example of cumulative evidence: “Evidence is cumulative when it bears on the same fact that the party presenting the evidence seeks to prove... In other words, five witnesses called to say they saw the defendant at work on a particular day, when the fact that he was at work is unchallenged, would be cumulative.” *United States v. Giles*, No. 08-CR-143, 2008 U.S. Dist. LEXIS 101036, at \*7-8 (E.D.Wis. Dec. 4, 2008)(*internal citations omitted*). Thus, “claiming evidence is cumulative involves a determination that such evidence adds nothing to what is already before the jury.” *People v. Molstad*, 101 Ill. 2d 128, 135 (1984).

### **III. The CCR Data is Cumulative Evidence that Should Be Excluded**

As established by the testimony of Mr. Gnat and Dr. Kunkel, the CCA Data and the CCR Data is “the same for all practical purposes.” (PCB13-15 Hearing Transcript, Oct. 26, 2017 (afternoon session), pp. 71:13-14) (Attachment C). In other words, it is “additional evidence of the same kind and to the same point.” *People v. Cotell*. Except for specific wells sampled in compliance with the

Federal CCR Rules identified herein, the CCA Data and the CCR Data are taken at the same time and from the same wells, thus the results are effectively the same. Even though there is one minor difference in the sampling process, as Dr. Kunkel stated if he were a regulator he “would not quibble about the difference.” (PCB13-15 Hearing Transcript, Oct. 26, 2017 (afternoon session), pp. 72:3-4) (Attachment C). In fact, Mr. Gnat testified that the CCA Data is more representative for a comparison to the Class 1 Standards, 35 ILCS 620.410. (PCB13-15 Hearing Transcript, Oct. 26, 2017(morning session), pp. 14:24-15:3) (Attachment B). Thus, it is better to use the CCA Data when comparing to the Class I standards, and if the CCA Data is available, it should be used over the CCR Data.

The addition of the CCR Data adds nothing to what is already before the Board. *People v. Molstad*. Instead, the addition of the CCR Data is unduly repetitious and a needless presentation of cumulative evidence. 5 ILCS 100/10-40, Ill. R. Evid. 403. Admission of the CCR Data groundwater results is unfairly prejudicial to MWG because the results may be improperly interpreted as additional alleged violations, even though MWG is simply following the two different regulatory requirements of two different agencies. *Old Chief v. United States*. As part of Complainants’ demonstratives with their expert, which were admitted as Exhibit 411, Complainants included the CCR Data, along with the CCA Data, on each of the graphs demonstrating the levels of certain constituents in the groundwater. Thus, even though the CCA Data and the CCR Data are taken at the same time and from the same wells, there is a significant potential for confusion by including the two sets of data. The double sets of data leave the impression that there are an increased number of alleged violations of the Illinois groundwater standards, which is prejudicial to MWG.

**IV. The Metal Cleanings Basin Report is Cumulative Evidence that Should Be Excluded**

Exhibit 261, the Metal Cleaning Basin Groundwater Sampling Summary and attached as Attachment D, is also duplicative of the CCA Data that was admitted and thus is cumulative evidence. As described by Mr. Gnat during the Hearing, the reason Exhibit 261 did not have an analytical package attached is because the analytical data supporting the tables in Exhibit 261 were within the CCA Reports submitted to the Illinois EPA. (PCB13-15 Hearing Transcript, Oct. 25, 2017, 152:9-12) (Attachment A). The next day, Mr. Gnat went through the tables in Exhibit 261, compared the data to the tables in Exhibits 257O and 258O, attached as Attachments E and F, and stated that the groundwater results in Exhibits 261 for monitoring wells 13, 14, and 15 were from the same wells, collected on the same date, and had the same results.<sup>7</sup> For instance, in comparing the results for monitoring well 13 in both Exhibit 261 and Exhibit 257O, Mr. Gnat stated:

MS GALE: Q. And these are the tables of the ground water sampling results in each of those reports, aren't they?

MR. GNAT: A. Yes.

Q. Looking at the dates on these tables, do you see that the first column on Exhibit 261 is dated 5-28-2014?

A. Yes.

Q. And you see that the fifth column on Exhibit 257O is also dated 5-28-2014?

A. Yes.

Q. And both of these tables are for MW13?

A. Yes.

Q. And both of these tables have analysis for metals?

A. Yes.

Q. Okay - And if you continue on looking at both of these tables, it has the date 5-13-2015 on Exhibit 261, the metal cleaning basin?

A. Yes.

Q. And if you look at the column to the furthest right of Exhibit 257O on Page 49863 –

---

<sup>7</sup> In the October 26, 2017 Transcript, Exhibits 257O and 258O are mistakenly identified as Exhibits 2570 and 2580.

A. Yes.

Q. -- it also says May 13, 2015?

A. Yes.

Q. So this appears -- on these two pages, the data appears to be for metals analysis the same?

A. Yes. It's the same data.

(PCB13-15 Hearing Transcript, Oct. 26, 2017 (morning session), pp. 74:2-75:6, emphasis added) (Attachment B)

Mr. Gnat concluded similarly that the sample results in the tables in Exhibit 261 were the same sample results in Exhibit 2570 for monitoring wells 14 and 15:

MS GALE: Q. We're going to stay with 261 and 2570. I want to turn to MW14, please. These are Bates Pages 58591, and in Exhibit 2570, 58864. Both of these tables are for MW14. Is that correct?

MR. GNAT: A. Yes.

Q. And both of these tables have the dates 5-28-14 and 5-13-2015, correct?

A. Yes.

Q. Both of these tables have metals analysis, correct?

A. Yes.

Q. Let's flip to MW14. I'm sorry. Go back. And the metals analysis for MW14 on Page 49864 and Page 58591 are the same?

A. Yes. These are the same sample.

Q. Can you flip to, on both documents, MW15.

A. Okay.

Q. So on Exhibit 1261, which is the metals cleaning basin, and we're looking at Page MWG-13-15\_58592, and on Exhibit 2570, we're looking at Page MWG-13-15\_49865, these are both tables of Monitoring Well 15, correct?

A. Yes.

Q. And both of these tables contain data taken on May 28, 2014, correct?

A. Yes.

Q. Both of these tables contain data taken on May 14, 2015?

A. Correct.

Q. And both of these tables contain analysis of metals; isn't that correct?

A. Yes.

Q. And the results of those analyses are the exact same, correct?

A. Yes. These are the same sample.

(PCB13-15 Hearing Transcript, Oct. 26, 2017 (morning session), pp. 75:8-76:18, emphasis added) (Attachment B)

Additionally, Mr. Gnat compared the groundwater data in Exhibit 261 to Exhibit 258O, and made a similar observation regarding the sample results for monitoring well 13 from August 18, 2016 and November 17, 2016:

MS. GALE: And right next to that, both of those columns, is the date August 18, 2016. Do you see that on both of those tables?

MR. GNAT: A. Yes.

Q. And, again -- I just want to shorten this up. And then right after that is the date November 17, 2016. Do you see that on both those tables?

A. Yes.

Q. So these samples were taken on the exact same day?

A. Correct. They're the same sample.

Q. The same sample?

A. Yes.

Q. Meaning this is the result of only one sample?

A. The sampling event of August 18, 2016, that's one sample, and there's another sampling event November 17, 2016. What's on both tables reflects the same sample, same results.

Q. Same sample, same results?

A. Correct. It's just duplicated from one table to another.

(PCB13-15 Hearing Transcript, Oct. 26, 2017 (morning session), pp. 78:2-79:1, emphasis added) (Attachment B)

Mr. Gnat made the same conclusions related to monitoring wells 14 and 15 in both Exhibit 261 and 258O, and Mr. Gnat ultimately stated:

MS. GALE: Q. And the data in both of these tables is from the same sample, correct?

MR. GNAT: A. Yes. I'm going through the metals data here and they're identical.

(PCB13-15 Hearing Transcript, Oct. 26, 2017(morning session), p, 81:5-8, emphasis added) (Attachment B).

Clearly Exhibit 261 contains the same sample results as Exhibits 257O and 258O for monitoring wells 13, 14, and 15. Where there are two reports with the same analytical data, from

the same wells and analyzed the same date, and when the analytical data numbers are not in dispute, then Exhibit 261 is cumulative because it replicates other admitted evidence. *United States v. Ives*, 609 F.2d at 933; *United States v. Giles*. The groundwater data in Exhibits 257O and 258O is simply duplicated in Exhibit 261, and adds nothing to what is already before the Board for its decision. *People v. Molstad*, Moreover, Exhibits 257O and 258O have more complete data because those exhibits contain the groundwater results for monitoring wells 1 through 12 and monitoring well 16. It is prejudicial to MWG to include Exhibit 261 because the duplicated data leaves the impression of an increased number of alleged violations even though they are the results from the same samples. *Old Chief v. United States*.

MWG requests that the Board reverse the Hearing Officer's Decision, exclude Exhibits 204G-209G, 210H-215H, 222J – 228J, 236L – 241L (except for the specific wells identified herein), exclude Exhibit 261, and strike all testimony related to the Exhibits.

Respectfully submitted,  
Midwest Generation, LLC

MIDWEST GENERATION, LLC,        )  
                                      )  
Respondent.                      )

Report of Proceedings had at the Hearing on October  
25th, 2017, at the hour of 9:00 o'clock a.m, pursuant to  
notice, at 100 West Randolph Street, Ninth Floor, Chicago,  
Illinois, before HEARING OFFICER BRADLEY P. HALLORAN.

1 compliance of the new federal rule for coal  
2 combustion byproduct ponds.

3 That's the CCR rule. So, we have a  
4 program called CCR sampling, which is the data you  
5 provided me.

6 We also do what we call CCA sampling,  
7 which is a sampling that's done on a quarterly basis  
8 in accordance with the compliance commitment  
9 agreement that was signed with IEPA.

10 Q. Understood. Thank you.

11 MR. WANNIER: Complainants would move for  
12 admission of Complainant's Exhibits 204G through  
13 209G?

14 MS. GALE: We object to the admission of the  
15 CCR data, which is Exhibits 204G to 209G, because  
16 it's prejudicial and cumulative evidence.

17 The CCR data is collected pursuant to the  
18 new federal rules. I actually have complaints.  
19 They also tend to introduce the CCA data as well  
20 which is collected pursuant to the Illinois EPA  
21 requirement.

22 The CCR data and CCA data is collected  
23 from the exact same wells at Joliet 29 and collected  
24 at the exact same time. It is prejudicial to

1 Midwest Generation to include both sets of data  
2 which are virtually identical to each other.

3 HEARING OFFICER HALLORAN: I think the Board  
4 can sort that out. It's not like a jury. I  
5 overrule your objection. Complainant's Exhibit 204G  
6 through 209G is admitted over objection.

7 (Complainant Exhibit Nos. 204G  
8 through 209G was admitted into  
9 evidence.)

10 MS. GALE: I move to strike any testimony  
11 related to the CCR data.

12 MR. WANNIER: Your Honor, just to explain, for  
13 the record -- here, part of the reason we're  
14 including this is that although CCR data is taking  
15 contemporaneously with CCA well data, the results  
16 for the CCR are measured as total recoverable  
17 concentrations; and the results in CCA data are  
18 measured in dissolved, which are similar, but not  
19 exact, figures.

20 We are using both to create a more  
21 complete picture of the series of ground water  
22 results at the time.

23 MS. GALE: If I may, Mr. Halloran, respond to  
24 that. The method of testing is a marginal

1 difference. My understandings is the only  
2 difference is one step taken in the field, but that  
3 analysis, when the samples get to the laboratory, is  
4 the exact same.

5 To further explain our reasoning, our  
6 understanding is that the complainants intend to use  
7 each of the same results. So, the same results from  
8 CCA data in second quarter, for example, and CCR  
9 data in second quarter of 2016 to include as  
10 individual evidence of alleged the violations, and  
11 it's very prejudicial to Midwest Generation.

12 In effect, Midwest Generation is being  
13 penalized for following two different agencies'  
14 requirements.

15 HEARING OFFICER HALLORAN: The Board will take  
16 note of your objection in the record. Thank you.  
17 It goes to the weight, not the admissibility. But,  
18 thank you. You may proceed.

19 BY MR. WANNIER:

20 Q. I can put that aside. Plaintiffs are now  
21 placing before you Group Exhibit H, which  
22 Complainant's Exhibits 210H through 215H.

23 MS. GALE: Before we get into it, I'm going to  
24 continue to object to this group exhibit, except for

1 MR. WANNIER: Complainant's move for  
2 introduction of Complainant's Exhibit 210H through  
3 215H.

4 HEARING OFFICER HALLORAN: You can state your  
5 objection, again, Ms. Gale, or so noted on the  
6 record.

7 MS. GALE: As I said earlier, we object to the  
8 admission of these reports, except for the results  
9 for MW17, 18, 19, because they are duplicative and  
10 cumulative evidence.

11 HEARING OFFICER HALLORAN: Thank you.  
12 Overruled. Complainant's Group Exhibit 210H through  
13 215H is admitted.

14 (Complainant Exhibit No. 210H  
15 through 215H were admitted into  
16 evidence.)

17 BY MR. WANNIER:

18 Q. Mr. Gnat, we are placing before you now  
19 Complainant Exhibits 216I through 220I, as part of  
20 Group Exhibit I, which we would present our CCA lab  
21 results of the Waukegan facility monitoring wells 8  
22 and 9.

23 Do you recognize these documents?

24 A. Yes, I do. However, I would like to

Page 68

1 Q. Okay. And do you have any reason to doubt  
2 the accuracy of any of this information?

3 A. No, I do not.

4 MR. WANNIER: Complainants move for admission  
5 of Group Exhibit J, Complainant's Exhibit Nos. 222J  
6 through 228J.

7 MS. GALE: Again, I similarly, for the group  
8 Exhibits G and H, I object to the admission of this  
9 data because it is duplicative and cumulative,  
10 except for the wells 11, 14 and 16, which are new  
11 wells.

12 HEARING OFFICER HALLORAN: Thank you. Your  
13 objection is noted on the record; however,  
14 overruled. I'll admit Complainant's Group Exhibit  
15 J222 to 228.

16 (Complainant Exhibit Nos. J222  
17 to J228 were admitted into  
18 evidence.)

19 BY MR. WANNIER:

20 Q. Mr. Gnat, we are now placing before you  
21 Group Exhibit K, which is Complainant's  
22 Exhibits 229K through 235.5K, and I'll just note  
23 that it's 229 through 235 plus 235.5. We added one  
24 at the end.

1           A. Yes, I do.

2           Q. Are they ground water monitoring results  
3 at the Will County facility?

4           A. For the CCR sampling, correct.

5           Q. Do you have any reason to doubt the  
6 accuracy of any of this information?

7           A. No, I do not.

8           MR. WANNIER: Complainant's move for introduce  
9 -- the admission of Group Exhibit L, Complainant's  
10 Exhibits 236L through 241L.

11          HEARING OFFICER HALLORAN: Ms. Gale?

12          MS. GALE: Again, we would object to the  
13 admission of this document as duplicative and  
14 cumulative, except for monitoring wells 11 and 12,  
15 which are not part of the CCA sampling.

16          Again, the admission of this data, the  
17 inclusion of this in this case, prejudices my client  
18 for being double dinged for simply following two  
19 different agency requirements.

20          HEARING OFFICER HALLORAN: Okay, thank you.

21          The Board will take note, I'm sure. In any event,  
22 it's overruled.

23          Complainant's Exhibit Group L -- 236L  
24 through 241L is admitted.

Page 151

1           A. This is the metals cleaning basin ground  
2 water sampling summary dated January -- the date of  
3 the report is January 24, 2017, to Midwest  
4 Generation Powerton station.

5           Q. If you could turn to Bates page 58589,  
6 which is unfortunately obscured, but it's the map on  
7 the second page.

8           A. Yes.

9           Q. Does this map depict the metal cleaning  
10 basin?

11          A. Yes, it does.

12          Q. And do you see that it mentions monitoring  
13 wells 12 through 16?

14          A. Yes, it does.

15          Q. Those are the four wells for which data  
16 are included on the subsequent data, correct?

17          A. No, the metals cleaning basin permit  
18 requirements are only three monitoring wells, 13,  
19 14, and 15, and that's the data for those wells.  
20 Wells 12 is not part of that network.

21          Q. I apologize for my misstatement, but it  
22 includes wells 13 through 15?

23          A. Correct.

24          MR. WANNIER: Complainants move for admission

1 of Complainant Exhibit 271.

2 MS. GALE: I have to object because I'm  
3 wondering if there was analytical data attached to  
4 this report. My understanding is typically  
5 analytical data is attached to these reports.

6 BY MR. WANNIER:

7 Q. Mr. Gnat, is analytical data of this type  
8 typically attached to these types of reports?

9 A. In these reports, I do not believe we were  
10 attaching the analytical data package because these  
11 are also sampled as part of our CCA sampling. All  
12 the analytics were included in there.

13 MS. GALE: Now I have a different objection.  
14 Mr. Gnat just told us this data is in the CCA  
15 reports, which I've just admitted into evidence.

16 As I stated this morning, the data is  
17 cumulative and duplicative. In fact, I believe it  
18 had the exact same numbers and the exact same data  
19 that's already in the record.

20 So, there is really no reason to include  
21 this document.

22 MR. WANNIER: Your Honor, we don't believe that  
23 is the case. We're not prepared to do that this  
24 comparison at this time.

312-419-9292

Page 11

1 A. Yes.

2 Q. And we often, in this proceeding, have been  
3 calling those the CCAs?

4 A. Yes.

5 Q. Your employee at KPRG, he often collects this  
6 CCR data and the CCA data on the same day; isn't that  
7 correct?

8 A. Yes. If they're coming out of the same well,  
9 yes.

10 Q. And at Joliet 29, the CCR data and the CCA  
11 data is taken from the exact same wells, isn't it?

12 A. Yes.

13 Q. And at Powerton, the CCR data and the CCA  
14 data is taken from wells -- Monitoring Wells 1  
15 through 16; isn't that correct?

16 A. I believe so.

17 Q. And Waukegan CCR data and CCA data is taken  
18 from monitoring wells 1 through 7; isn't that correct?

19 A. I believe so.

20 Q. And at Will County the CCR data and the CCA  
21 data is taken from wells 1 through 10; isn't that  
22 correct?

23 A. I'm sorry, can you repeat that again?

24 Q. Sure.

Page 12

1           At Will County, the CCR data and the CCA data  
2    is taken from wells 1 -- oh, you're right. I'm wrong.  
3    It's not taken from wells 1 through 10. Good work.  
4    I'll get back to that.

5           So when the samples are collected in the  
6    field, there's only one step in the procedure that is  
7    different, correct?

8       A. That is correct.

9       Q. And that one step is whether your employee  
10   filters the groundwater when he collects the sample or  
11   not, correct?

12      A. Correct.

13      Q. And for the CCA data, the groundwater is  
14   filtered?

15      A. Yes.

16      Q. And the CCR data, the groundwater is not  
17   filtered?

18      A. That's correct.

19      Q. And once the samples are at the laboratory  
20   for analysis, the lab runs the CCR and CCA samples for  
21   the same analysis, correct?

22      A. Yes.

23      Q. I want to ask you about the difference in  
24   that analysis. We discussed that the only difference

Page 13

1      is whether the samples are filtered.

2                The Class 1 standards that we have discussed  
3      in this proceeding, they're based upon drinking water  
4      standards; isn't that correct?

5                A.     Yes.

6                Q.     Do you have a knowledge how the drinking  
7      water wells are screened?

8                A.     Drinking water wells are constructed in  
9      formations that can provide a sufficient body of water  
10     for the purpose of that well for consumption. And the  
11     sand packs around those wells are specifically  
12     engineered to the matrix of the aquifer that the well  
13     is going to be screened in. And those sand packs are  
14     generally developed so that they're providing a  
15     natural filter for the water coming in to naturally  
16     try and filter out any of the finds in that unit.

17               So that's how the water well is constructed.

18               Q.     Okay. So as you just said, there's a natural  
19     filter in a drinking water well, isn't there?

20               A.     Within that engineered sand pack, yes.

21               Q.     And the monitoring wells, such as the ones  
22     that are the subject of this matter, how are those  
23     screened?

24               A.     Well, monitoring wells often target zones

Page 14

1 which a drinking water well would not target because  
2 they just don't produce the volume of water that you  
3 need; they're too fine-grained, they have a very heavy  
4 silt load, sediment load.

5 And the sand pack that you put down around  
6 the screen is generally -- it's not engineered. It's  
7 just a fine to medium sand that you're putting around  
8 the screen to provide a little bit of filtration  
9 through however. Especially if these wells are  
10 screened in non-potable aquifer, specifically silts or  
11 clays, it's the first saturated unit which has to be  
12 monitored. You often, even after development, have a  
13 very sediment-laden sample.

14 Q. So, in other words, there's really no natural  
15 filter?

16 A. Minimal just based on this sand pack that's  
17 put down.

18 Q. The filtered groundwater sampling water  
19 collected is more -- excuse me. Strike that.

20 The filtered groundwater sampling water is  
21 more like the water from a drinking water well that  
22 has a natural filter; isn't that correct?

23 A. That is correct.

24 Q. And that the filtered groundwater data

Page 15

1 produced is more representative of a comparison to the  
2 Class 1 standards; isn't that correct?

3 A. That's my belief, yes.

4 Q. I want to talk to you about the various data  
5 packages that were presented to you yesterday where  
6 you were asked about the accuracy of the information.

7 Do you recall that testimony?

8 A. Yes, I do.

9 Q. Isn't it true that there are some level of  
10 inherent inaccuracies in that data, such as equipment  
11 failure?

12 A. Yes, that is correct.

13 Q. And, in fact, in one of these instances,  
14 there was an equipment failure of a pH meter, wasn't  
15 there?

16 A. Yes, for some of the field readings.

17 Q. And that data is flagged along with -- which  
18 disqualifies the data, doesn't it?

19 A. Well, the field data is not within the  
20 analytical data package. That's within the field  
21 notes, and we note that there was a problem with the  
22 meter. So if there is an issue with the pH, you get  
23 an understanding of how reliable that data is truly --  
24 as basically a field screening parameter.

1 A. Yes.

2 Q. And these are the tables of the ground  
3 water sampling results in each of those reports,  
4 aren't they?

5 A. Yes.

6 Q. Looking at the dates on these tables, do you  
7 see that the first column on Exhibit 261 is dated  
8 5-28-2014?

9 A. Yes.

10 Q. And you see that the fifth column on  
11 Exhibit 2570 is also dated 5-28-2014?

12 A. Yes.

13 Q. And both of these tables are for MW13?

14 A. Yes.

15 Q. And both of these tables have analysis for  
16 metals?

17 A. Yes.

18 Q. Okay.

19 And if you continue on looking at both of  
20 these tables, it has the date 5-13-2015 on  
21 Exhibit 261, the metal cleaning basin?

22 A. Yes.

23 Q. And if you look at the column to the furthest  
24 right of Exhibit 2570 on Page 49863 --

Page 75

1 A. Yes.

2 Q. -- it also says May 13, 2015?

3 A. Yes.

4 Q. So this appears -- on these two pages, the  
5 data appears to be for metals analysis the same?

6 A. Yes. It's the same data.

7 Q. Staying with 261 -- never mind.

8 We're going to stay with 261 and 2570. I  
9 want to turn to MW14, please. These are Bates  
10 Pages 58591, and in Exhibit 2570, 58864. Both of  
11 these tables are for MW14. Is that correct?

12 A. Yes.

13 Q. And both of these tables have the dates  
14 5-28-14 and 5-13-2015, correct?

15 A. Yes.

16 Q. Both of these tables have metals analysis,  
17 correct?

18 A. Yes.

19 Q. Let's flip to MW14. I'm sorry. Go back.

20 And the metals analysis for MW14 on  
21 Page 49864 and Page 58591 are the same?

22 A. Yes. These are the same sample.

23 Q. Can you flip to, on both documents, MW15.

24 A. Okay.

Page 76

1           Q.     So on Exhibit 1261, which is the metals  
2     cleaning basin, and we're looking at Page  
3     MWG-13-15\_58592, and on Exhibit 2570, we're looking at  
4     Page MWG-13-15\_49865, these are both tables of  
5     Monitoring Well 15, correct?

6           A.     Yes.

7           Q.     And both of these tables contain data taken  
8     on May 28, 2014, correct?

9           A.     Yes.

10          Q.     Both of these tables contain data taken on  
11     May 14, 2015?

12          A.     Correct.

13          Q.     And both of these tables contain analysis of  
14     metals; isn't that correct?

15          A.     Yes.

16          Q.     And the results of those analyses are the  
17     exact same, correct?

18          A.     Yes. These are the same sample.

19          Q.     Thank you.

20                 I'd like you to now look at, staying with  
21     Exhibit 261, 2580.

22                 When you're ready?

23          A.     Yes.

24          Q.     I'd like you to flip in 2580 to Page

1 MWG-13-15\_58178.

2 A. Okay.

3 Q. And in 261, I'd like you to flip back to Page  
4 MWG-13-15, 58590.

5 Both of these tables are for Monitoring  
6 Well 13, correct?

7 A. Yes.

8 Q. And I want to direct your attention to -- on  
9 Exhibit 261, the fourth column, which states May 19,  
10 2016.

11 Do you see that there?

12 A. Yes.

13 Q. And looking at Exhibit 2580, at the column  
14 the third from the right, it states May 19, 2016.

15 Do you see that there?

16 A. Yes.

17 Q. And those are the same dates?

18 A. Same dates, yes.

19 Q. And both of these tables analyze metals,  
20 correct?

21 A. Correct.

22 Q. And the results for the metals in these  
23 tables are the exact same, aren't they?

24 A. Yes, they're the same sample.

1 Q. Thank you.

2 And right next to that, both of those  
3 columns, is the date August 18, 2016. Do you see that  
4 on both of those tables?

5 A. Yes.

6 Q. And, again -- I just want to shorten this up.  
7 And then right after that is the date  
8 November 17, 2016. Do you see that on both those  
9 tables?

10 A. Yes.

11 Q. So these samples were taken on the exact same  
12 day?

13 A. Correct. They're the same sample.

14 Q. The same sample?

15 A. Yes.

16 Q. Meaning this is the result of only one  
17 sample?

18 A. The sampling event of August 18, 2016, that's  
19 one sample, and there's another sampling event  
20 November 17, 2016.

21 What's on both tables reflects the same  
22 sample, same results.

23 Q. Same sample, same results?

24 A. Correct. It's just duplicated from one table

1 to another.

2 Q. Thank you.

3 Let's flip to Monitoring Well 14 for both of  
4 these analyses. And that is on Page MWG-13-15\_58591  
5 in Exhibit 261. Exhibit 261 is the metal cleaning  
6 basin?

7 A. I'm lost in my paperwork here.

8 Got it.

9 Q. Okay. I'm sorry.

10 We're looking at Monitoring Well 14 on both  
11 of these sample results. And, again, as you just  
12 stated, for the results on May 19, 2016, August 18,  
13 2016, and November 17, 2016, these are the sample  
14 results taken from the same sample, correct?

15 MR. WANNIER: Your Honor?

16 THE COURT: Yes?

17 MR. WANNIER: I'm not objecting to the  
18 question. Could I just ask that the Bates numbers be  
19 highlighted on the screen?

20 MS. GALE: Sure.

21 MR. WANNIER: And would it be possible to  
22 read these into the record?

23 MS. GALE: Oh, I thought I did, but I could  
24 do it again.

Page 80

1 MR. WANNIER: I might have missed.

2 THE HEARING OFFICER: Thank you.

3 MS. GALE: I'll do it again.

4 BY MS. GALE:

5 Q. Okay. We're looking at Monitoring Well 14,  
6 which is on Bates Page MWG-13-15\_58591, and that is  
7 part of Exhibit 261. And we're looking at -- also  
8 looking at Exhibit 2580, Monitoring Well 14, which is  
9 located on Page Number MWG-13-15\_58179.

10 And, Mr. Gnat, I believe you just stated  
11 that -- I believe we just looked at that the dates are  
12 May 19, 2016, August 18, 2016, and November 17, 2016,  
13 are the same on both of these tables. Correct?

14 A. Correct.

15 Q. And the data in these reports are from the  
16 same sampling analysis; isn't that correct?

17 A. Correct.

18 Q. And simply duplicated it in the Exhibit 261,  
19 correct?

20 A. Correct.

21 Q. Let's flip to Monitoring Well 15 on  
22 Exhibit 261, that's Page MWG-13-15\_58592, and on  
23 Exhibit 2580, that is Page MWG13-15\_58180. These are  
24 both the tables for Monitoring Well 15, correct?

1           A.    Correct.

2           Q.    And these tables also have the dates May 19,  
3    2016, August 18, 2016, 11-17-2016, correct?

4           A.    Correct.

5           Q.    And the data in both of these tables is from  
6    the same sample, correct?

7           A.    Yes. I'm going through the metals data here  
8    and they're identical.

9           Q.    Thank you. We are done with those three  
10   exhibits.

11                 Mr. Gnat, I would like you to look at  
12   Exhibit 268P.

13           A.    Okay.

14           Q.    This is the annual and quarterly groundwater  
15   monitoring report for the Waukegan generating station  
16   dated January 22, 2015, MWG-13-15\_45328. Correct?

17           A.    Correct.

18           Q.    Please flip to MWG-13-15\_45330.

19           A.    Okay.

20           Q.    These are your observations. Do you recall  
21   discussing these yesterday?

22           A.    Yes, I do.

23           Q.    Let's look at the bullet -- fifth bullet  
24   down. Here the report states that manganese -- strike

1 that.

2                 Here the report states Wells MW5, MW6, and  
3 MW7 were the only wells with detections of dissolved  
4 manganese above the groundwater standard since the  
5 third quarter 2011 sampling. Manganese concentrations  
6 at all other locations appear fairly stable and are  
7 generally below the comparison standard.

8                 Do you see that observation made in this  
9 report?

10               A. Yes.

11               Q. Let's turn to Page 45333. This is a map of  
12 the Waukegan station site map?

13               A. Yes.

14               Q. This includes locations of all the monitoring  
15 wells?

16               A. Of Monitoring Wells 1 through 7.

17               Q. Right. But those are for the CCA, correct?

18               A. Correct.

19               Q. Monitoring Well 6 is on the western edge of  
20 Midwest Generation's property, correct?

21               A. Correct.

22               Q. Stay on this map.

23                 And to confirm, this is a map prepared by  
24 KPRG as a consultant of Midwest Generation, and this

Page 83

1 map was prepared from Midwest Generation. Correct?

2 A. Yes.

3 Q. So looking at the area west of the ash ponds,  
4 it appears in this map to be a grassy field. In your  
5 experience visiting Waukegan, does it appear to be a  
6 grassy field?

7 A. Yes, it is.

8 Q. And you have no personal knowledge of the  
9 material beneath that grassy field, correct?

10 A. Correct.

11 THE HEARING OFFICER: May we go off the  
12 record for a minute. Do you need a break?

13 (Whereupon, a discussion was had  
14 off the record.)

15 THE COURT: We're back on the record.

16 BY MS. GALE:

17 Q. Mr. Gnat, I have one more question. Earlier  
18 today I was identifying for you the CCA and CCR wells.  
19 Do you recall that, when we were discussing --

20 A. Yes.

21 Q. -- both wells?

22 A. Yes.

23 Q. And we were discussing the Will County CCA  
24 and CCR wells, and I made a representation that CCA

Page 84

1 wells -- all the CCA wells at Will County were also  
2 sampled at CCR, and you corrected me. Do you remember  
3 that?

4 A. Yes.

5 Q. At Will County, the CCA wells and the CCR  
6 wells, to your recollection, are both Monitoring Well  
7 5, Monitoring Well 6, Monitoring Well 9, and  
8 Monitoring Well 10. That's correct?

9 A. The overlap?

10 Q. The overlap between the two.

11 A. Can you run those again, please?

12 Q. Sure.

13 Monitoring Well 5, Monitoring Well 6,  
14 Monitoring Well 9, and Monitoring Well 10.

15 A. I believe that's correct, yes.

16 MS. GALE: Can I have a minute?

17 THE HEARING OFFICER: Sure. Off the record.

18 (Whereupon, a discussion was had  
19 off the record.)

20 THE HEARING OFFICER: We are back on the  
21 record.

22 Ms. Gale, nothing further?

23 MS. GALE: Thank you. Nothing further.

24 THE HEARING OFFICER: Mr. Wannier, I assume

Report of Proceedings had at the Hearing on October  
26th, 2017, at the hour of 11:45 a.m, pursuant to notice, in  
at 100 West Randolph Street, Ninth Floor, Chicago, Illinois,  
before HEARING OFFICER BRADLEY P. HALLORAN.

L.A. Court Reporters, L.L.C.  
312-419-9292

1 we've been discussing this for the past couple of  
2 days, what are CCA and CCR?

3 A. CCA is --

4 Q. What do they represent, in terms of data?

5 A. In terms of data, they -- well, the CCA  
6 are dissolved constituents. So, those are filtered  
7 samples, as we talked about before. The CCR are  
8 unfiltered samples. If I can opine on those.

9 Q. Sure.

10 A. My opinion is that the -- you know, having  
11 looked at many, many -- super many, over 50 years of  
12 ground water quality data, that the total  
13 recoverable and dissolved are the same for all  
14 practical purposes.

15 I think Rich tried to explain it, Rich  
16 Gnat this morning, where he said the difference  
17 between total undissolved is the total recoverable  
18 might have some sediment in the sample, because they  
19 extract the sample from the well.

20 So, there is a stress put on the well, and  
21 that the gravel pack or the sand pack around the  
22 well doesn't filter out all -- maybe it doesn't  
23 filter out all the sediment.

24 As we talked before, we may get some

1 difference between the total recoverable and the  
2 dissolved. But for practical purposes, I guess if I  
3 was a regulator, I wouldn't quibble about the  
4 difference.

5 Q. Looking at your charts for MW-3, just to  
6 clarify, when you say the same, how precisely are  
7 you using that word?

8 A. Well, pretty precisely. If you look at,  
9 say, the boron concentrations, the difference is  
10 between, and I don't have -- between .4 and, say,  
11 .5 milligrams per liter for boron, and that's well  
12 within the error of laboratory analyses and things  
13 like that.

14 Sometimes -- I think if you look at these,  
15 sometimes the total recoverable is less than the  
16 dissolved and sometimes it's the other way around.

17 So, I mean, I'm not going to quibble with  
18 that as a professional engineer. I think that's the  
19 way life is. Life is not perfect and neither is  
20 hydrology.

21 Q. Okay. Anyway, going back to these wells,  
22 can you walk us through the data well by well and  
23 tell us what you see?

24 A. Yeah, I sure can. Well MW-1, which is

Re: Midwest Generation Powerton Generating Station  
Water Pollution Control Permit No. 2009-EB-2748

Dear Agency Representative:

In accordance with the Illinois Environmental Protection Agency (IEPA) Water Pollution Control Permit No. 2009-EB-2748, Special Condition 4, this submittal provides the 4<sup>th</sup> Quarter 2016 groundwater monitoring results associated with the constructed Metals Cleaning Basin which was in use during a portion of the third quarter. Monitoring wells MW-13 MW-14 and MW-15 were installed around the basin at locations shown on Figure 1. Static water elevations were collected prior to sampling. Groundwater samples were collected using the low flow sampling technique. The samples were analyzed for parameters listed in 35 IAC 620.410(a) and (d). The most recent quarterly sampling data are summarized in Table 1.

If there are any questions, please contact either Sharene Shealey of Midwest Generation at 815-372-4625 or Richard Gnat of KPRG at 262-781-0475.

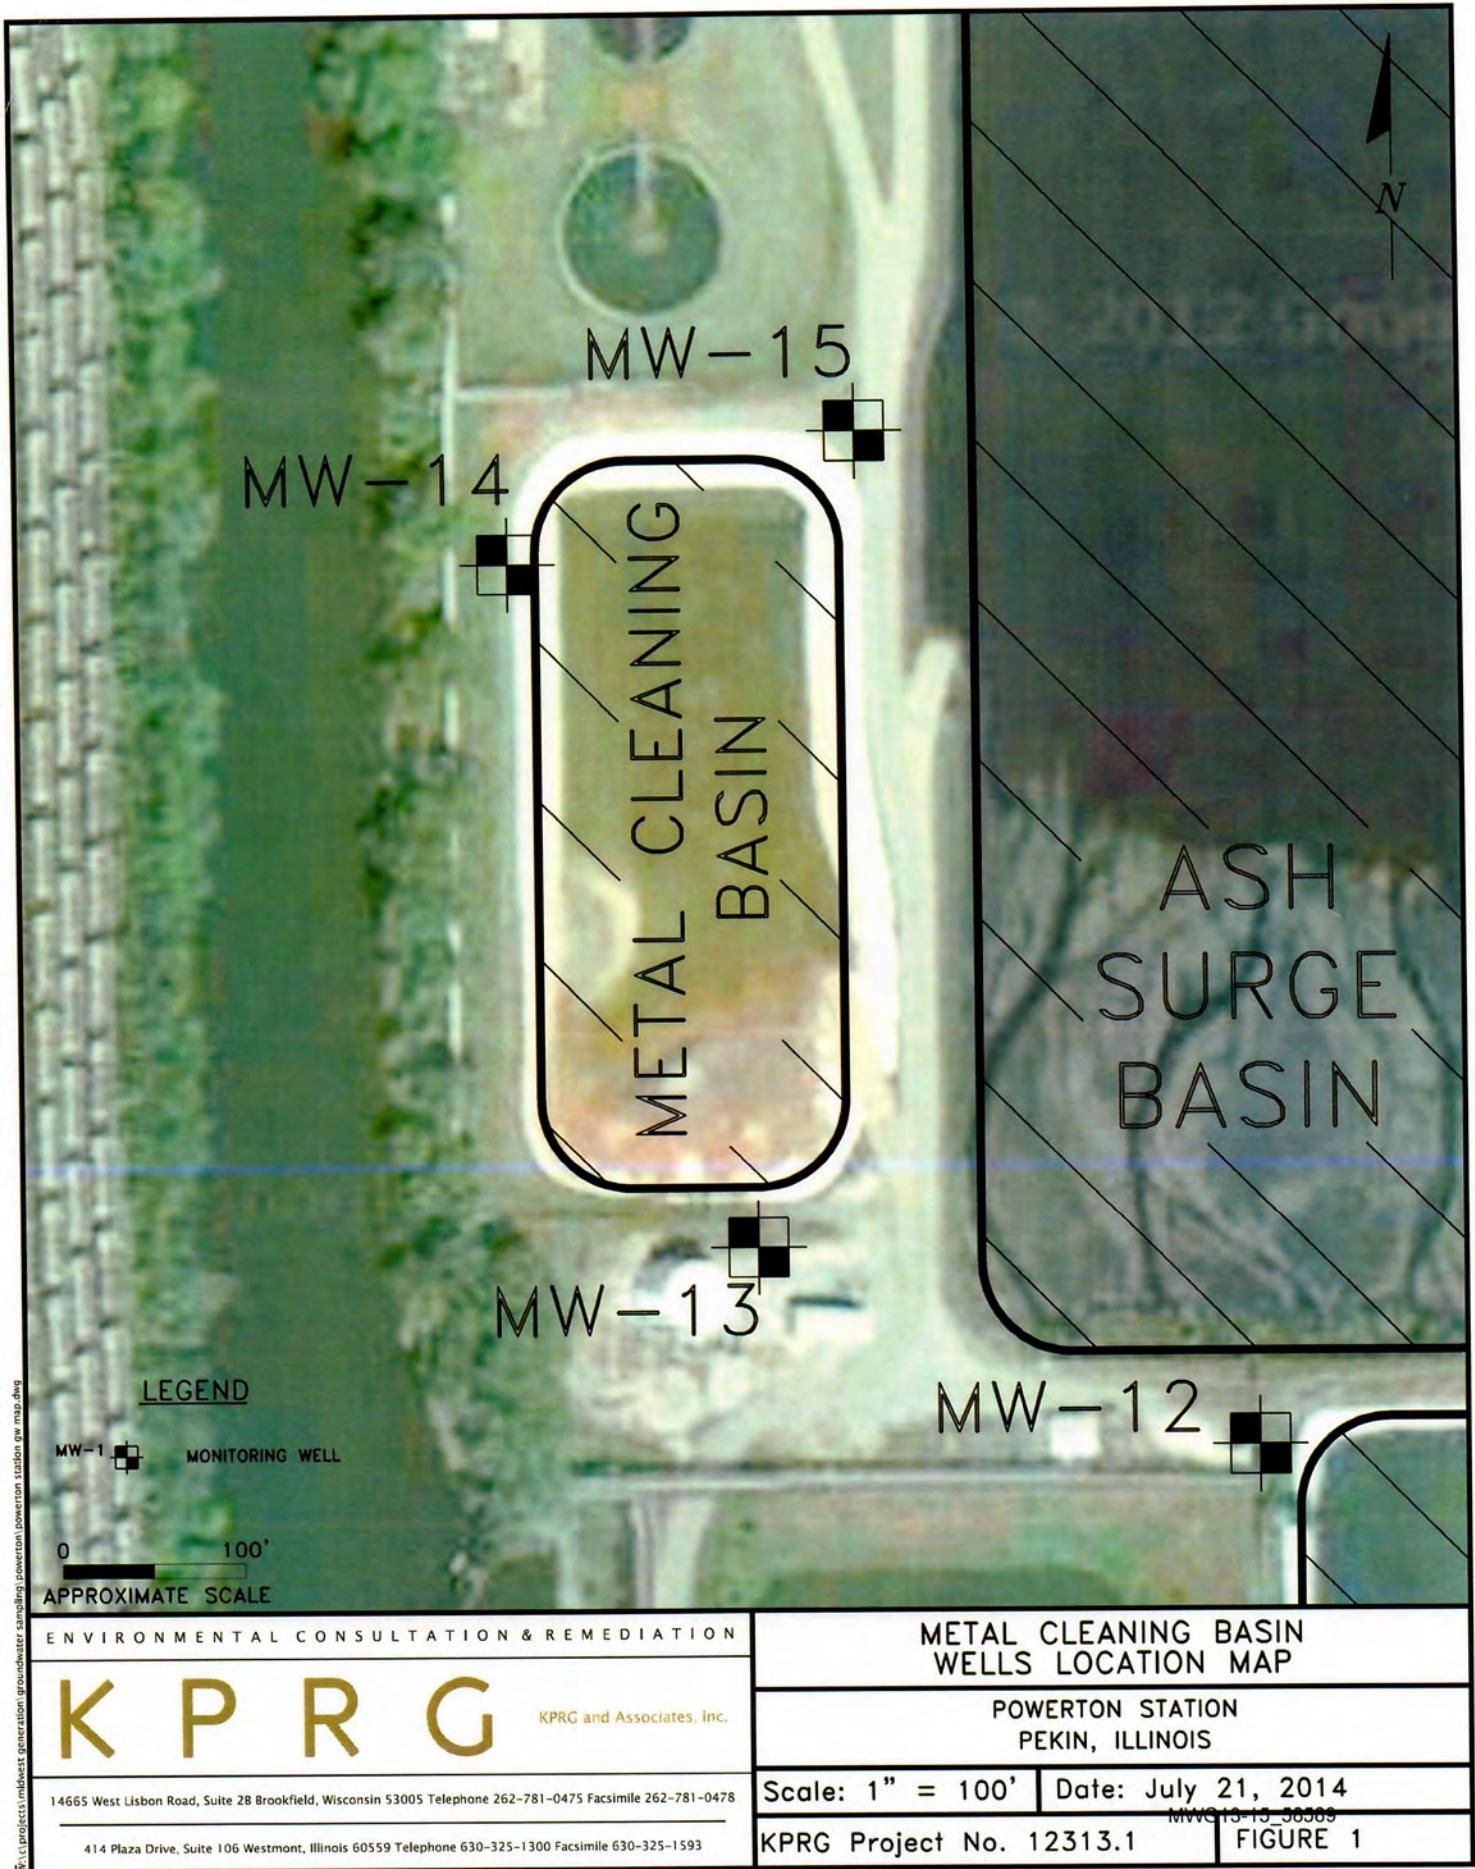

Sincerely,

Dale Green  
Plant Manager  
Powerton Station

Re: Quarterly Groundwater Monitoring Results – Second Quarter 2015  
Powerton Generating Station – Ash Impoundments  
Compliance Commitment Agreement VN W-2012-00057; ID# 6282

Dear Ms. Rhodes:

The second quarterly groundwater sampling for 2015 has been completed for the ash pond monitoring wells located at the Midwest Generation, LLC (Midwest Generation) Powerton Generating Station in accordance with the Compliance Commitment Agreement (CCA) with Illinois Environmental Protection Agency (IEPA) dated October 24, 2012. This quarterly monitoring report summarizes the results of the monitoring event.

**Well Inspection and Sampling Procedures**

The groundwater monitoring network around the ash ponds at the Powerton facility consists of sixteen wells (MW-1 through MW-16) as shown on Figure 1. As part of sampling procedures, the integrity of all monitoring wells was inspected and water levels obtained using an electronic water level meter (see summary of water level discussion below). All wells were found in good condition with locked protector casings and the concrete surface seals were intact.

Groundwater samples at well locations MW-1 through MW-16 were collected using the low-flow sampling technique. In addition, a surface water grab sample was collected from the discharge of the East Yard Run-off Basin.

One duplicate sample was collected for quality assurance purposes. In addition, a deionized water trip blank was placed with the sample bottle shipment by the laboratory and accompanied the groundwater samples bottles from and back to the laboratory. The groundwater monitoring samples, the East Yard Run-off Basin sample and the duplicate sample were analyzed for the inorganic compounds listed in Illinois Administrative Code (IAC) 620.410(a), 620.410(d) and 620.410(e), excluding radium 226/228. The trip blank was analyzed for the volatile organic compounds (VOCs) listed in IAC 620.410(d).

### Groundwater Flow Evaluation

Water level data from the most recent round of sampling along with historical water levels obtained from each well are summarized in Table 1. As noted in previous submittals, monitoring wells MW-6, MW-8, MW-12, MW-14 and MW-15 are screened within a shallow, localized, saturated clay/silt unit which is underlain by a more extensive sand unit. The remaining eleven monitoring wells have deeper screens, within the more extensive sand unit. The water levels from wells screened in the clay/silt unit and the water levels from monitoring wells screened within the sand unit were evaluated separately and used to generate groundwater flow maps for each unit. These maps are provided on Figures 2 and 3. The water elevation data within the clay/silt unit indicates localized groundwater flow in a westerly direction (Figure 2). Groundwater flow within the more extensive sand unit is generally in a north-westerly direction (Figure 3). The flow conditions observed during this sampling are generally consistent with historical conditions reported for the site.

### Summary of Analytical Data

A copy of the analytical data package is provided in Attachment 1. The field parameter and groundwater analytical data from the most recent sampling, along with the previous eight quarters of data, are summarized in Table 2. The duplicate sample was collected from well MW-16. The trip blank showed no detectable contamination. The duplicate sample was analyzed and the relative percent difference for each detectable analyte was below 20% which is within an acceptable range.

In general, the data are generally consistent with the following general observations Boron concentrations at well MW-3 have decreased and selenium was detected when all previous samples were non-detect; there was an increase in sulfate at well MW-15; there was an increase in total dissolved solids in wells MW-13, MW-14 and MW-15; there was a decrease in manganese and an increase in nitrogen at well MW-14; there were slight increases in fluoride and chloride at wells MW-1 and MW-2, respectively. All wells for which the sampling data reports a value above one or more groundwater standards are located within the area of the approved Groundwater Management Zone.

The data from the East Yard Run-off Basin sampling along with the previous sampling results are summarized in Table 3. This data is consistent with the data from the previous sampling data with the exception of an increase in sulfate, fluoride, and selenium. Under

Electronic Filing: Received, Clerk's Office 11/14/2017

*Ms. Andrea Rhodes  
Illinois Environmental Protection Agency  
Re: Ash Pond Monitoring 2<sup>nd</sup> Quarter 2015*

*Page 3  
July 22, 2015*

the CCA, Midwest Generation was obligated to undertake four quarterly rounds of sampling of the East Yard Run-off Basin. At this time, ten (10) rounds of sampling have occurred. That obligation has been met and exceeded. Accordingly, Midwest Generation respectfully continues to request that the obligation to undertake quarterly sampling at the East Yard Run-off Basin cease.

If there are any questions, please contact either Sharene Shealey of Midwest Generation at 815-372-4625 or Richard Gnat of KPRG at 262-781-0475.

Sincerely,

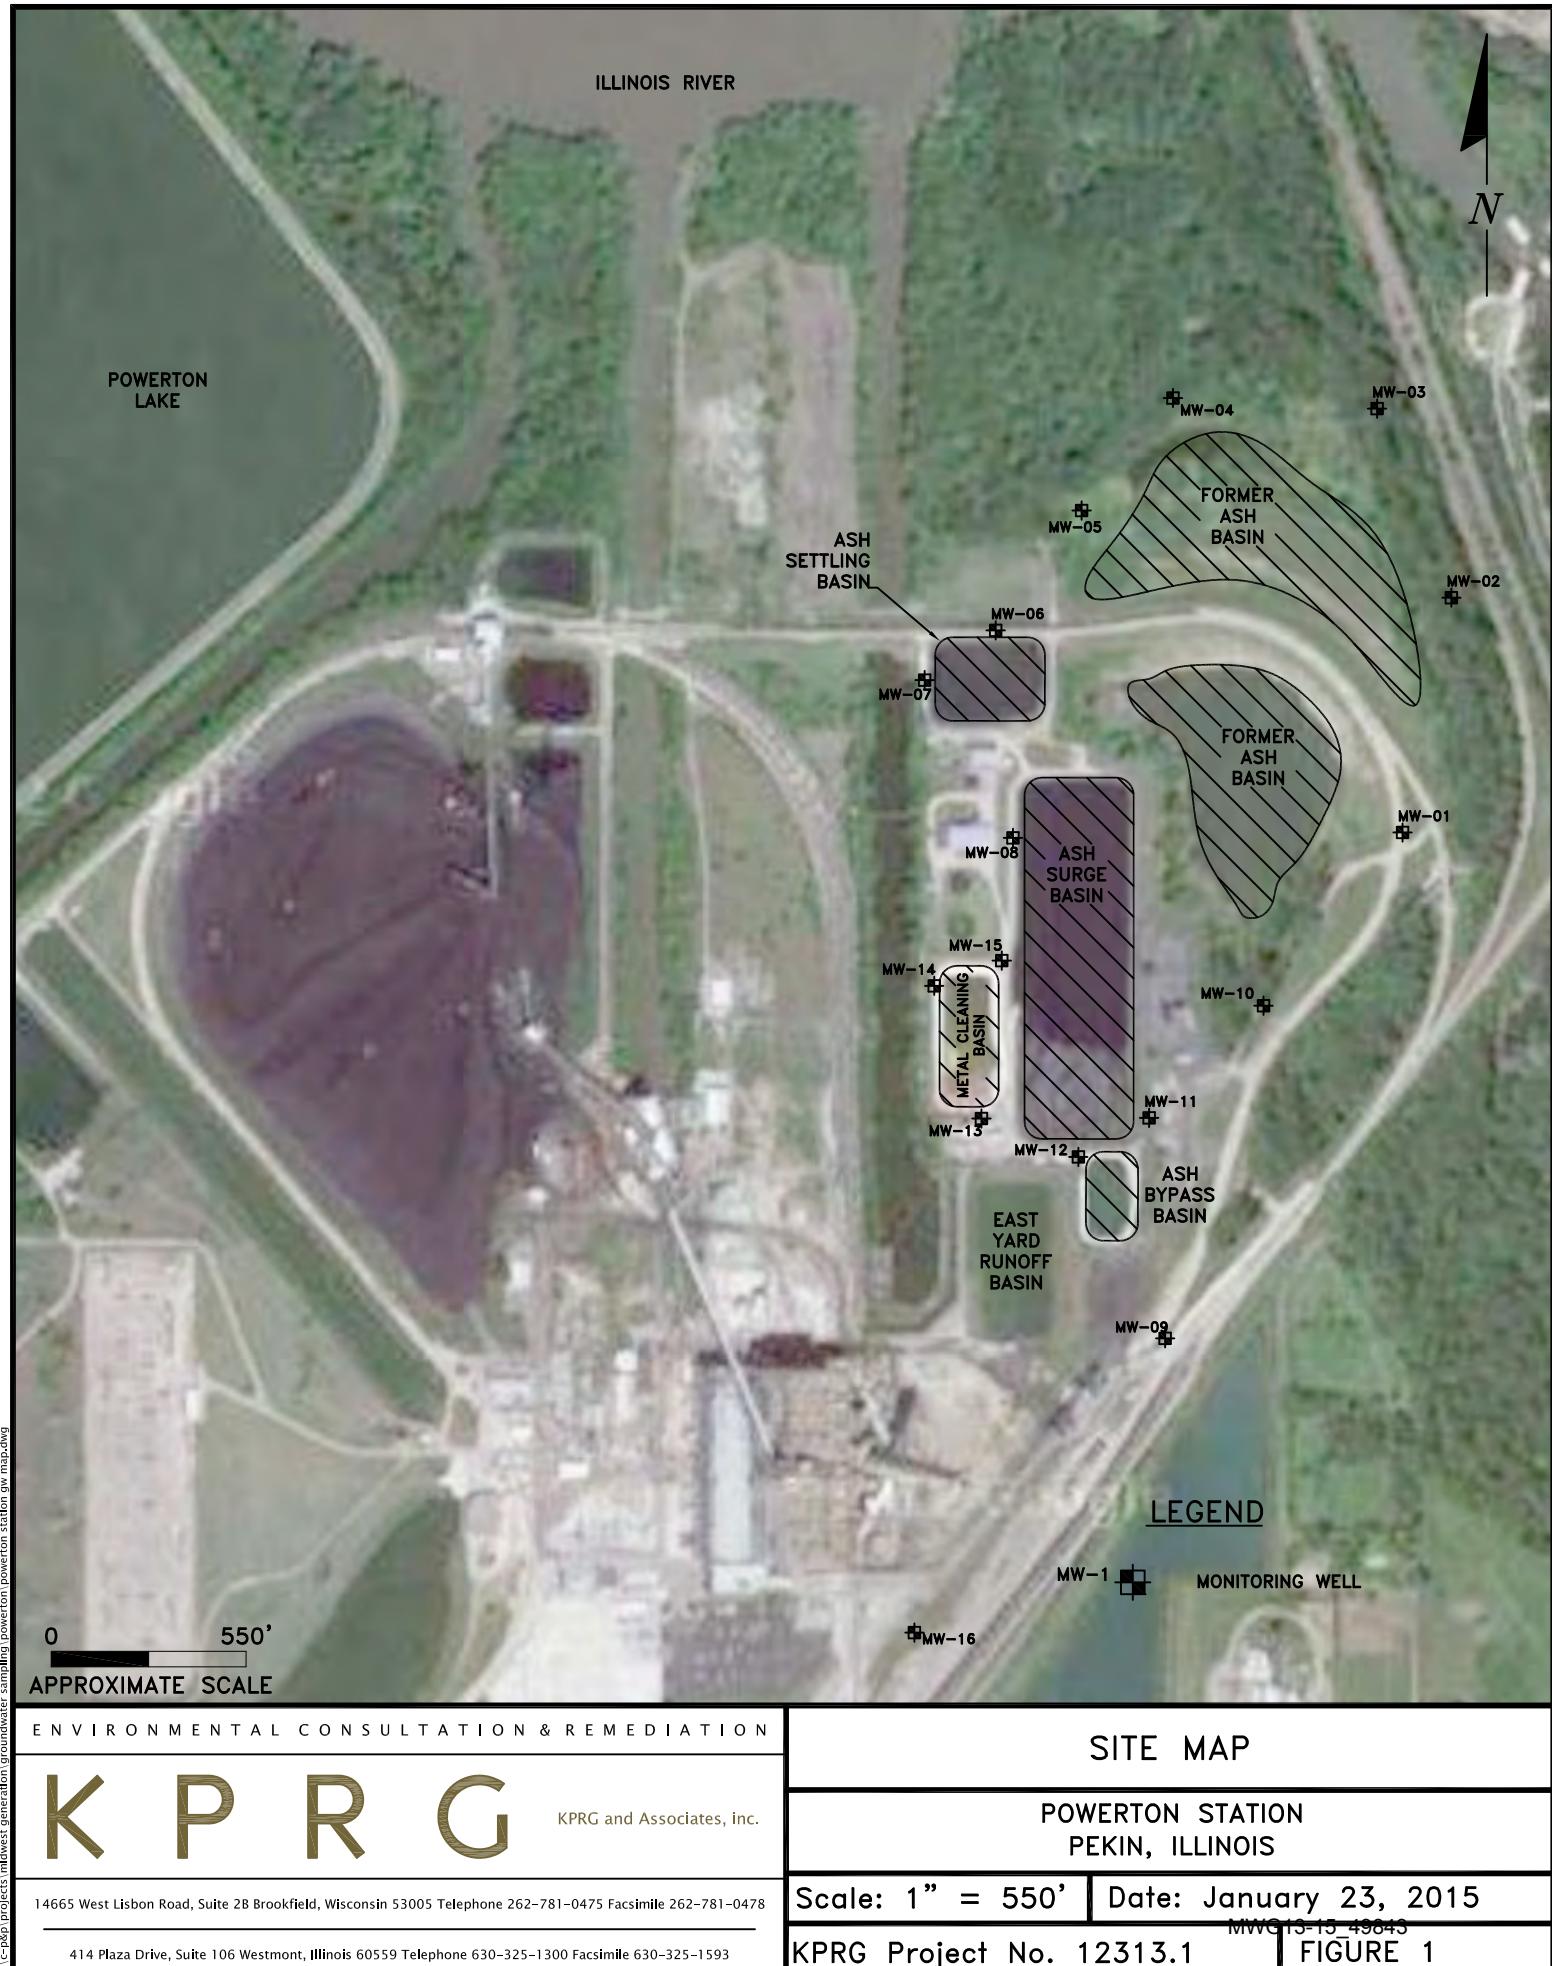

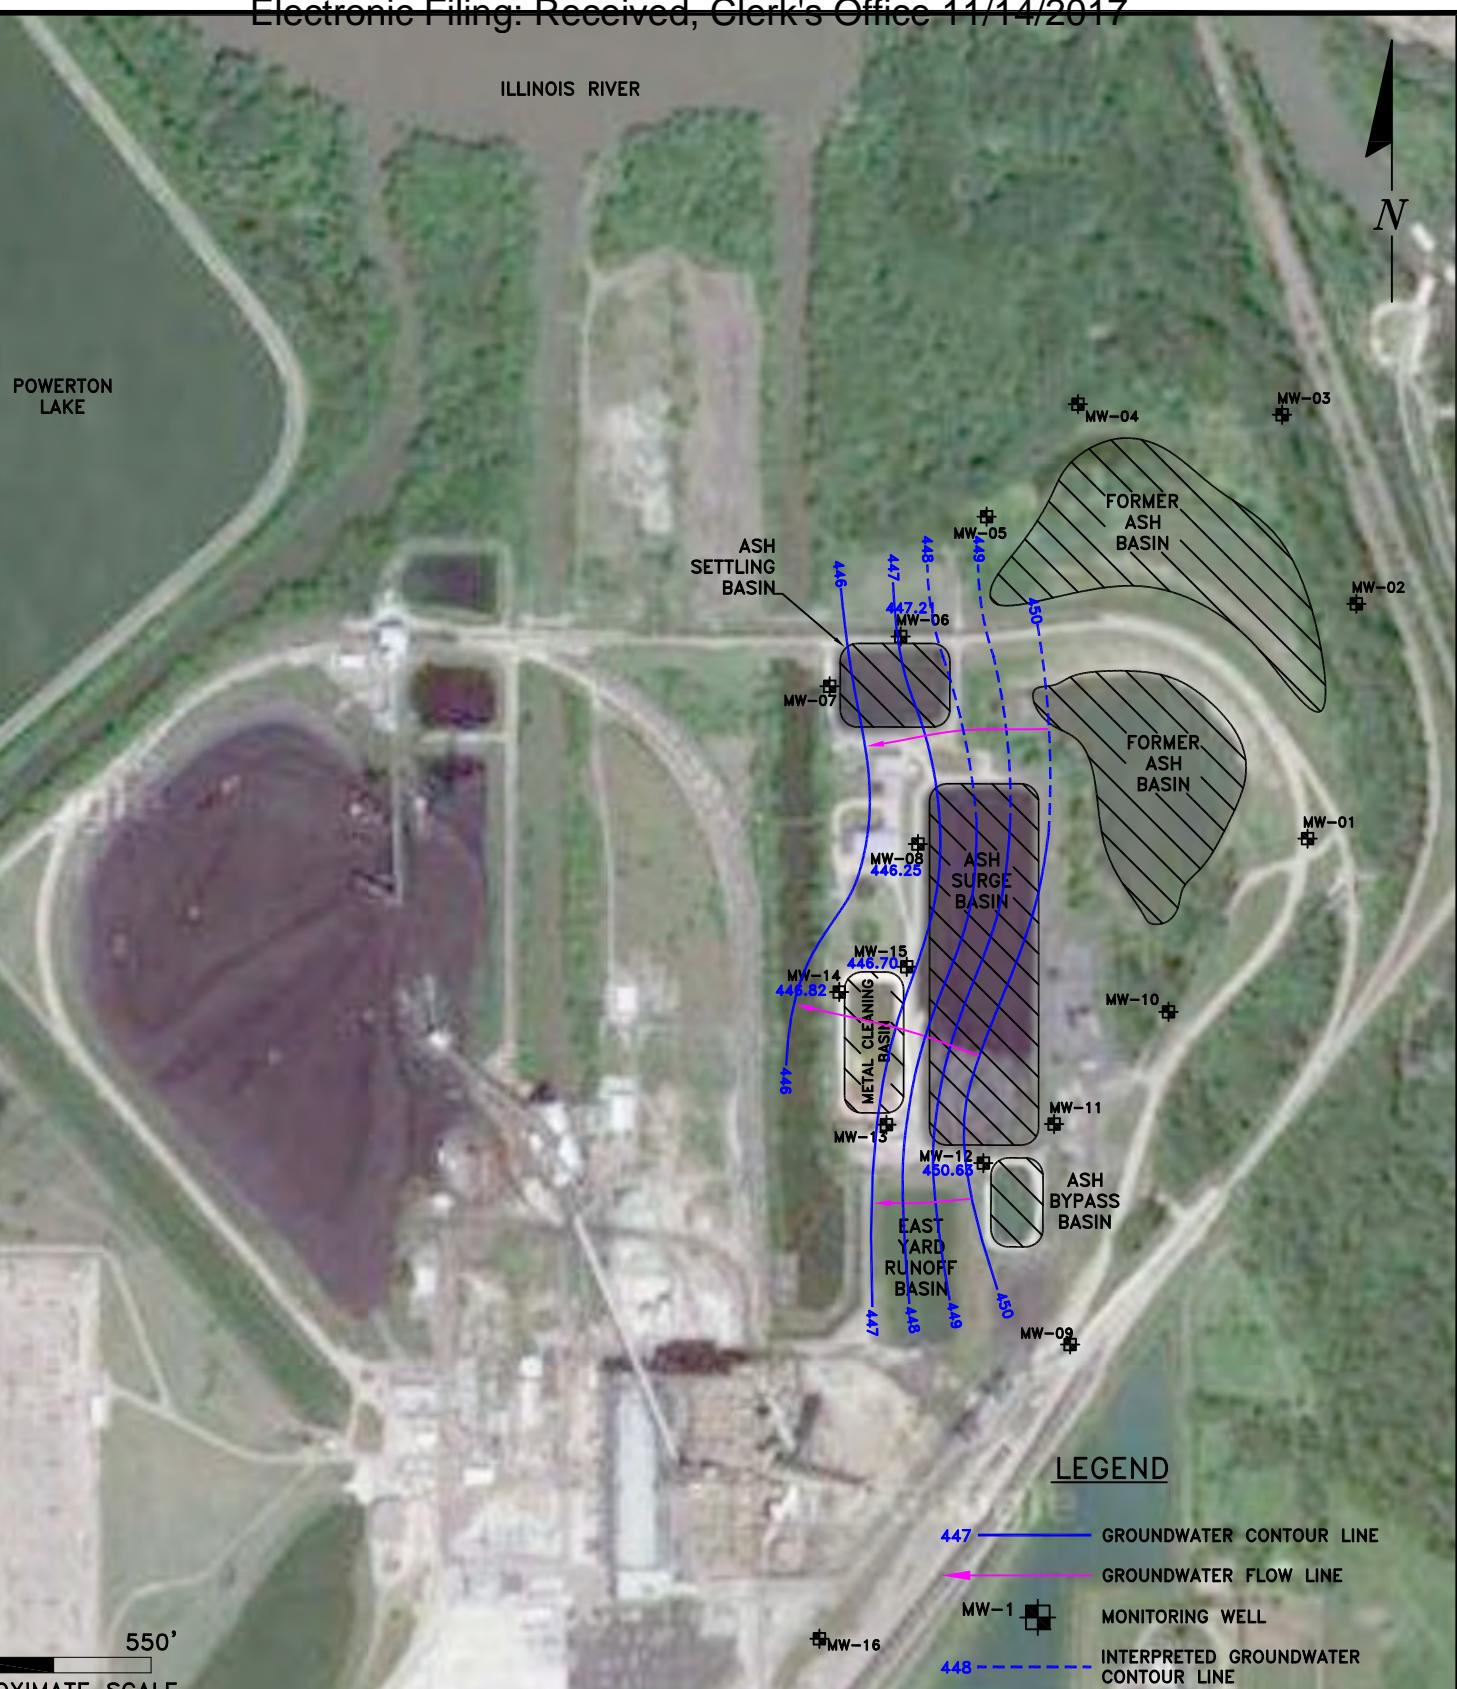

Dale Green  
Station Manager

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
NA - Not Applicable  
ND - Not Detected  
NM - Not Measured

NR - Not Required  
NS - Not Sampled  
^ - Denotes instrument related QC exceeds the control limits  
\* - Median Value

Temperature °C degrees Celcius  
Conductivity ms/cm<sup>c</sup> millisiemens/centimeters  
Dissolved Oxygen mg/L milligrams/liter  
Oxygen Reduction Potential (ORP) mV millivolts

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
NA - Not Applicable  
ND - Not Detected  
NM - Not Measured

NR - Not Required  
NS - Not Sampled  
^ - Denotes instrument related QC exceeds the control limits  
\* - Median Value

Temperature °C degrees Celcius  
Conductivity ms/cm<sup>3</sup> millisiemens/centimeters  
Dissolved Oxygen mg/L milligrams/liter  
Oxygen Reduction Potential (ORP) mV millivolts

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

**Job ID: 500-95808-1****Laboratory: TestAmerica Chicago****Narrative****Job Narrative  
500-95808-1****Comments**

No additional comments.

**Receipt**

The samples were received on 5/12/2015 10:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 10 coolers at receipt time were 0.8° C, 2.3° C, 2.4° C, 2.4° C, 2.7° C, 2.8° C, 3.1° C, 3.2° C, 3.4° C and 3.7° C.

**GC/MS VOA**

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

**Metals**

Method(s) 6020, 6020A: The internal standard (Tb) was used to report Pb and Ti for job MW-01 (500-95808-1) in batch 288535.

Method(s) 6020A: The low level calibration verification (CCVL) at line 121 in AD batch 288542 was outside the upper control limit for boron. The CCVI bracketed the (MB 500-288223/1-A) only and it was within control limits for all elements. The boron was reported.

Method(s) 6020A: The internal standard (Y) was used to report Cr. The internal standard (Rh) was used to report Fe and Ni for job MW-08 (500-95808-4) in batch 289108.

Method(s) 6020A: The following sample(s) was diluted due to the nature of the sample matrix: 500-95808-3, 6, 14, 15. Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**Field Service / Mobile Lab**

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

**General Chemistry**

Method(s) 314.0: The low level check (MRL at 4ppb) associated with batch 75111 was above the upper control limit -- indicating a high bias. However, all samples associated with this QC check were non-detect. Additionally, all other quality control checks were in control. Data is being reported.

MW-01 (500-95808-1), MW-06 (500-95808-2), MW-07 (500-95808-3), MW-08 (500-95808-4), MW-09 (500-95808-5), MW-11 (500-95808-6), MW-12 (500-95808-7), MW-16 (500-95808-8), DUPLICATE (500-95808-9), MW-02 (500-95808-10), MW-03 (500-95808-11), MW-04 (500-95808-12), MW-05 (500-95808-13), MW-13 (500-95808-14), MW-14 (500-95808-15), MW-10 (500-95808-16), MW-15 (500-95808-17), (CCB 320-75111/10), (CCB 320-75111/23), (CCB 320-75111/34), (CCB 320-75111/42), (CCV 320-75111/22), (CCV 320-75111/33), (CCV 320-75111/41), (CCV 320-75111/9), (ICB 320-75111/2), (ICV 320-75111/1), (INF 320-75111/3), (LCS 320-75111/13), (MB 320-75111/12), (MRL 320-75111/5), (500-95874-B-1), (500-95874-B-1 MS) and (500-95874-B-1 MSD)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**Qualifiers****HPLC/IC****Qualifier****Qualifier Description**

^

ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.

**Metals****Qualifier****Qualifier Description**

F1

MS and/or MSD Recovery is outside acceptance limits.

^

ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.

**General Chemistry****Qualifier****Qualifier Description**

4

MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

F1

MS and/or MSD Recovery is outside acceptance limits.

**Glossary****Abbreviation****These commonly used abbreviations may or may not be present in this report.**

^

Listed under the "D" column to designate that the result is reported on a dry weight basis

%R

Percent Recovery

CFL

Contains Free Liquid

CNF

Contains no Free Liquid

DER

Duplicate error ratio (normalized absolute difference)

Dil Fac

Dilution Factor

DL, RA, RE, IN

Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample

DLC

Decision level concentration

MDA

Minimum detectable activity

EDL

Estimated Detection Limit

MDC

Minimum detectable concentration

MDL

Method Detection Limit

ML

Minimum Level (Dioxin)

NC

Not Calculated

ND

Not detected at the reporting limit (or MDL or EDL if shown)

PQL

Practical Quantitation Limit

QC

Quality Control

RER

Relative error ratio

RL

Reporting Limit or Requested Limit (Radiochemistry)

RPD

Relative Percent Difference, a measure of the relative difference between two points

TEF

Toxicity Equivalent Factor (Dioxin)

TEQ

Toxicity Equivalent Quotient (Dioxin)

500-95874-1****Comments**

No additional comments.

**Receipt**

The samples were received on 5/13/2015 9:40 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 2.4° C and 2.8° C.

**Receipt Exceptions**

COC indicates dissolved methods. Per client, samples are for total methods.

**GC/MS VOA**

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

**Metals**

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

**General Chemistry**

Method(s) 314.0: The low level check (MRL at 4ppb) associated with batch 75111 was above the upper control limit -- indicating a high bias. However, all samples associated with this QC check were non-detect. Additionally, all other quality control checks were in control. Data is being reported: East Yard Run Off, EYRO (500-95874-1), (CCB 320-75111/10), (CCB 320-75111/23), (CCV 320-75111/22), (CCV 320-75111/9), (ICB 320-75111/2), (ICV 320-75111/1), (INF 320-75111/3), (LCS 320-75111/13), (MB 320-75111/12), (MRL 320-75111/5), (500-95874-B-1 MS) and (500-95874-B-1 MSD)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**Qualifiers****HPLC/IC**

<b>Qualifier</b>	<b>Qualifier Description</b>
^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.

**Glossary****Abbreviation** **These commonly used abbreviations may or may not be present in this report.**

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

## QC Association Summary

Client: KPRG and Associates, Inc.  
Project/Site: Powerton Station Ash Ponds

TestAmerica Job ID: 500-95874-1

### GC/MS VOA

#### Analysis Batch: 289119

Lab Sample ID	Client Sample ID	Prep Type	Matrix	Method	Prep Batch
500-95874-1	East Yard Run Off, EYRO	Total/NA	Water	8260B	
LCS 500-289119/3	Lab Control Sample	Total/NA	Water	8260B	
MB 500-289119/5	Method Blank	Total/NA	Water	8260B	

### HPLC/IC

#### Analysis Batch: 75111

Lab Sample ID	Client Sample ID	Prep Type	Matrix	Method	Prep Batch
500-95874-1	East Yard Run Off, EYRO	Total/NA	Water	314.0	
500-95874-1 MS	East Yard Run Off, EYRO	Total/NA	Water	314.0	
500-95874-1 MSD	East Yard Run Off, EYRO	Total/NA	Water	314.0	
LCS 320-75111/13	Lab Control Sample	Total/NA	Water	314.0	
MB 320-75111/12	Method Blank	Total/NA	Water	314.0	
MRL 320-75111/5	Lab Control Sample	Total/NA	Water	314.0	

### Metals

#### Prep Batch: 288205

Lab Sample ID	Client Sample ID	Prep Type	Matrix	Method	Prep Batch
500-95874-1	East Yard Run Off, EYRO	Total/NA	Water	7470A	
LCS 500-288205/13-A	Lab Control Sample	Total/NA	Water	7470A	
MB 500-288205/12-A	Method Blank	Total/NA	Water	7470A	

#### Analysis Batch: 288447

Lab Sample ID	Client Sample ID	Prep Type	Matrix	Method	Prep Batch
500-95874-1	East Yard Run Off, EYRO	Total/NA	Water	7470A	288205
LCS 500-288205/13-A	Lab Control Sample	Total/NA	Water	7470A	288205
MB 500-288205/12-A	Method Blank	Total/NA	Water	7470A	288205

#### Prep Batch: 288692

Lab Sample ID	Client Sample ID	Prep Type	Matrix	Method	Prep Batch
500-95874-1	East Yard Run Off, EYRO	Total Recoverable	Water	3005A	
LCS 500-288692/2-A	Lab Control Sample	Total Recoverable	Water	3005A	
MB 500-288692/1-A	Method Blank	Total Recoverable	Water	3005A	

#### Analysis Batch: 288804

Lab Sample ID	Client Sample ID	Prep Type	Matrix	Method	Prep Batch
500-95874-1	East Yard Run Off, EYRO	Total Recoverable	Water	6020A	
LCS 500-288692/2-A	Lab Control Sample	Total Recoverable	Water	6020A	
MB 500-288692/1-A	Method Blank	Total Recoverable	Water	6020A	

#### Analysis Batch: 288821

Lab Sample ID	Client Sample ID	Prep Type	Matrix	Method	Prep Batch
500-95874-1	East Yard Run Off, EYRO	Total Recoverable	Water	6020A	
LCS 500-288692/2-A	Lab Control Sample	Total Recoverable	Water	6020A	
MB 500-288692/1-A	Method Blank	Total Recoverable	Water	6020A	

#### Analysis Batch: 288909

Lab Sample ID	Client Sample ID	Prep Type	Matrix	Method	Prep Batch
500-95874-1	East Yard Run Off, EYRO	Total Recoverable	Water	6020A	288692

Bonnie,  
Thank you for bringing this to my attention, please accept this email as an amendment to the current submitted signed COC, and continue to test parameters based on our previous submitted COC's.  
My apologies for the mix up, and thank you for your diligence.

On Friday, May 15, 2015, Stadelmann, Bonnie <[bonnie.stadelmann@testamericainc.com](mailto:bonnie.stadelmann@testamericainc.com)> wrote:

Re: Annual and Quarterly Groundwater Monitoring Results – Fourth Quarter 2016  
Powerton Generating Station – Ash Impoundments  
Compliance Commitment Agreement VN W-2012-00057; ID# 6282

Dear Ms. Rhodes:

The fourth quarterly groundwater sampling for 2016 has been completed for the ash pond monitoring wells located at the Midwest Generation, LLC (Midwest Generation) Powerton Generating Station in accordance with the Compliance Commitment Agreement (CCA) with Illinois Environmental Protection Agency (IEPA) dated October 24, 2012. This quarterly monitoring report summarizes the results of the monitoring event. This report is also intended to serve as the Annual Report and includes historical data analysis/summaries.

**Well Inspection and Sampling Procedures**

The groundwater monitoring network around the ash ponds at the Powerton facility consists of sixteen wells (MW-01 through MW-16) as shown on Figure 1. As part of sampling procedures, the integrity of all monitoring wells was inspected and water levels obtained using an electronic water level meter (see summary of water level discussion below). All wells were found in good condition with locked protector casings and the concrete surface seals were intact.

Groundwater samples at well locations MW-01 through MW-16 were collected using the low-flow sampling technique.

One duplicate sample was collected from well MW-08 for quality assurance purposes. In addition, a deionized water trip blank was placed with the sample bottle shipment by the

laboratory and accompanied the groundwater samples bottles from and back to the laboratory. All samples were analyzed for the inorganic compounds listed in Illinois Administrative Code (IAC) 620.410(a), 620.410(d) and 620.410(e), excluding radium 226/228. The trip blank was analyzed for the volatile organic compounds (VOCs) listed in IAC 620.410(d).

#### Groundwater Flow Evaluation

Water level data from the most recent round of sampling along with historical water levels obtained from each well are summarized in Table 1. As noted in previous submittals, monitoring wells MW-06, MW-08, MW-12, MW-14 and MW-15 are screened within a shallow, localized, saturated clay/silt unit which is underlain by a more extensive sand unit. The remaining eleven monitoring wells have deeper screens, within the more extensive sand unit. The water levels from wells screened in the clay/silt unit and the water levels from monitoring wells screened within the sand unit were evaluated separately and used to generate groundwater flow maps for each unit. These maps are provided on Figures 2 and 3. The water elevation data within the clay/silt unit indicates localized groundwater flow in a westerly direction (Figure 2). Groundwater flow within the more extensive sand unit is generally in a northwesterly direction (Figure 3). The flow conditions observed during this sampling are generally consistent with historical conditions reported for the site. Relative to an annual evaluation of groundwater levels, a historical hydrograph is presented in Attachment 1.

#### Summary of Analytical Data

A copy of the analytical data package is provided in Attachment 2. The field parameter and groundwater analytical data from the most recent sampling, along with the previous eight quarters of data, are summarized in Table 2. As stated above, the duplicate sample was collected from well MW-08. All duplicate values were within an acceptable range (+/- 30%). All wells for which the sampling data reports a value above one or more groundwater standards are located within the area of the approved Groundwater Management Zone (GMZ) and the Environmental Land Use Control (ELUC) restrictions placed on the property with the exception of upgradient well MW-16 which has noted nitrate impacts above the Class I groundwater standard.

Relative to an annual evaluation of the water chemistry data, time versus concentration curves are provided for each parameter analyzed in Attachment 3. The curves include the Class I drinking water standard for reference

As noted previously, all wells for which the sampling data reports a value above one or more applicable groundwater standards are located within the area of the approved GMZ and the ELUC restrictions placed on the property, except upgradient well MW-16.

If there are any questions, please contact either Sharene Shealey of Midwest Generation at 815-372-4625 or Richard Gnat of KPRG and Associates, Inc. at 262-781-0475.

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
NA - Not Applicable  
ND - Not Detected

\* - Median Value  
^ - Denotes instrument related QC exceeds the control limits  
F1- MS and/or MSD Recovery outside of limits.

Temperature °C degrees Celsius  
Conductivity ms/cm<sup>c</sup> millisiemens/centimeters  
Dissolved Oxygen mg/L milligrams/liter  
Oxygen Reduction Potential (ORP) mV millivolts

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
NA - Not Applicable  
ND - Not Detected

\* - Median Value  
^ - Denotes instrument related QC exceeds the control limits  
F1- MS and/or MSD Recovery outside of limits.  
F2- MS/MSD RPD exceeds control limits.

Temperature °C degrees Celsius  
Conductivity ms/cm<sup>-3</sup> millisiemens/centimeters  
Dissolved Oxygen mg/L milligrams/liter  
Oxygen Reduction Potential (ORP) mV millivolts

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
NA - Not Applicable  
ND - Not Detected

\* - Median Value  
^ - Denotes instrument related QC exceeds the control limits  
F1- MS and/or MSD Recovery outside of limits.

Temperature °C degrees Celsius  
Conductivity ms/cm<sup>-3</sup> millisiemens/centimeters  
Dissolved Oxygen mg/L milligrams/liter  
Oxygen Reduction Potential (ORP) mV millivolts

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
NA - Not Applicable  
ND - Not Detected

\* - Median Value  
^ - Denotes instrument related QC exceeds the control limits  
F1- MS and/or MSD Recovery outside of limits.

Temperature °C degrees Celsius  
Conductivity ms/cm<sup>3</sup> millisiemens/centimeters  
Dissolved Oxygen mg/L milligrams/liter  
Oxygen Reduction Potential (ORP) mV millivolts

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
 All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
 NA - Not Applicable  
 ND - Not Detected

\* - Median Value  
 ^ - Denotes instrument related QC exceeds the control limits  
 F1- MS and/or MSD Recovery outside of limits.

Temperature °C degrees Celsius  
 Conductivity ms/cm<sup>-3</sup> millisiemens/centimeters  
 Dissolved Oxygen mg/L milligrams/liter  
 Oxygen Reduction Potential (ORP) mV millivolts

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
NA - Not Applicable  
ND - Not Detected

\* - Median Value  
^- Denotes instrument related QC exceeds the control limits  
F1- MS and/or MSD Recovery outside of limits.

Temperature °C degrees Celsius  
Conductivity ms/cm<sup>-3</sup> millisiemens/centimeters  
Dissolved Oxygen mg/L milligrams/liter  
Oxygen Reduction Potential (ORP) mV millivolts

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
NA - Not Applicable  
ND - Not Detected

\* - Median Value  
^ - Denotes instrument related QC exceeds the control limits  
F1- MS and/or MSD Recovery outside of limits.

Temperature °C degrees Celsius  
Conductivity ms/cm<sup>-3</sup> millisiemens/centimeters  
Dissolved Oxygen mg/L milligrams/liter  
Oxygen Reduction Potential (ORP) mV millivolts

Notes: Standards obtained from IAC, Title 35, Chapter I, Part 620, Subpart D, Section 620.410 - Groundwater Quality Standards for Class I: Potable Resource Groundwater  
 All values are in mg/L (ppm) unless otherwise noted.

DL - Detection limit  
 NA - Not Applicable  
 ND - Not Detected

\* - Median Value  
 ^ - Denotes instrument related QC exceeds the control limits  
 F1- MS and/or MSD Recovery outside of limits.

Temperature °C degrees Celsius  
 Conductivity mS/cm<sup>3</sup> millisiemens/centimeters  
 Dissolved Oxygen mg/L milligrams/liter  
 Oxygen Reduction Potential (ORP) mV millivolts

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

**Job ID: 500-120174-1****Laboratory: TestAmerica Chicago****Narrative****Job Narrative  
500-120174-1****Comments**

No additional comments.

**Receipt**

The samples were received on 11/16/2016 8:50 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 3 coolers at receipt time were 2.4° C, 3.6° C and 4.8° C.

**GC/MS VOA**

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

**Metals**

Method(s) 6020A: The low level check standard recovery (CCVL) associated with batch 500-362994 recovered above the upper control limit for Selenium. The samples associated with this CCVL were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: MW-04 (500-120174-3), MW-05 (500-120174-4), MW-08 (500-120174-5), DUPLICATE (500-120174-6), MW-01 (500-120174-7), MW-06 (500-120174-8), MW-07 (500-120174-9), MW-16 (500-120174-11), MW-11 (500-120174-13), MW-14 (500-120174-15) and MW-12 (500-120174-17).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**Field Service / Mobile Lab**

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

**General Chemistry**

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

## Detection Summary

Client: KPRG and Associates, Inc.  
Project/Site: Powerton Station CCA

TestAmerica Job ID: 500-120174-1

### Client Sample ID: MW-09 (Continued)

### Lab Sample ID: 500-120174-12

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
Nitrogen, Nitrate	4.4		0.10		mg/L	1		Nitrate by calc	Dissolved
Total Dissolved Solids	600		10		mg/L	1		SM 2540C	Dissolved
Fluoride	0.15		0.10		mg/L	1		SM 4500 F C	Dissolved
Nitrogen, Nitrate Nitrite	4.4		0.50		mg/L	5		SM 4500 NO3 F	Dissolved

### Client Sample ID: MW-11

### Lab Sample ID: 500-120174-13

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
Toluene	0.00053		0.00050		mg/L	1		8260B	Total/NA
Arsenic	0.0071		0.0010		mg/L	1		6020A	Dissolved
Barium	0.19		0.0025		mg/L	1		6020A	Dissolved
Boron	1.0		0.25		mg/L	5		6020A	Dissolved
Cobalt	0.0024		0.0010		mg/L	1		6020A	Dissolved
Iron	0.80		0.10		mg/L	1		6020A	Dissolved
Manganese	4.0		0.0025		mg/L	1		6020A	Dissolved
Nickel	0.0040		0.0020		mg/L	1		6020A	Dissolved
Sulfate	390		100		mg/L	20		9038	Dissolved
Chloride	130		10		mg/L	5		9251	Dissolved
Total Dissolved Solids	1100		10		mg/L	1		SM 2540C	Dissolved
Fluoride	0.45		0.10		mg/L	1		SM 4500 F C	Dissolved

### Client Sample ID: MW-13

### Lab Sample ID: 500-120174-14

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
Arsenic	0.028		0.0010		mg/L	1		6020A	Dissolved
Barium	0.094		0.0025		mg/L	1		6020A	Dissolved
Boron	3.7		0.50		mg/L	10		6020A	Dissolved
Iron	0.96		0.10		mg/L	1		6020A	Dissolved
Manganese	5.0		0.0025		mg/L	1		6020A	Dissolved
Sulfate	1700		500		mg/L	100		9038	Dissolved
Chloride	160		10		mg/L	5		9251	Dissolved
Total Dissolved Solids	3400		10		mg/L	1		SM 2540C	Dissolved
Fluoride	0.34		0.10		mg/L	1		SM 4500 F C	Dissolved

### Client Sample ID: MW-14

### Lab Sample ID: 500-120174-15

**Qualifiers****Metals**

Qualifier	Qualifier Description
^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits.

**General Chemistry**

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.

**Glossary**

Abbreviation	These commonly used abbreviations may or may not be present in this report.
%R	Listed under the "D" column to designate that the result is reported on a dry weight basis
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

<b>Question</b>	<b>Answer</b>	<b>Comment</b>
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	4.8c,3.6c,2.4,5.0,3.5,0.4,2.8,2.3,5.6
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A
