Subject: [External] Protect Illinois' air: R2018-20, Amendments to 35 Ill. Adm. Code 225.233
Date: Tuesday, November 28, 2017 12:41:39 PM

Dear IL Pollution Control Board Assistant Clerk,

Dynergy's proposals to its Multi Pollutant Standard (MPS) could allow Dynergy to produce more air pollution (NOx and So2) at Dynergy's Baldwin, Coffeen, Duck Creek, Edwards, Havana, Hennepin, Joppa, and Newton coal fired power plants which could place an undue burden on the communities surrounding the plants and the people who live in them.

This proposal presents Environmental Justice concerns because it could allow Dynergy to potentially increase NOx and SO2 pollution from individual coal fired power plants. Both NOx and SO2 can pose serious health risks, especially for vulnerable community members like, infants and small children, the elderly and asthmatics; and a disturbingly high number of Dynergy's plants are located in communities that have been identified as having Environmental Justice concerns.

For these reasons, the Illinois Pollution Control Board should reject the regulatory changes that the Illinois Environmental Protection Agency and Dynergy are proposing.

Sincerely,

Libby Munsterman
