ORDER OF THE BOARD (by J. Anderson):

On March 14, 1990, the City of Batavia (Batavia) filed a response to a March 8, 1990 Order of the Board that included a request that the parties provide all available radiological analyses of Batavia's water supply and to address what appears presently a discrepancy in data as compared to an Agency computer print out document identified by the Board.

Batavia's response contained additional test results and a 1990 Illinois State Water Survey Report. Batavia also stated that it had not seen the computer print out, but would request a copy from the Illinois Environmental Protection Agency (Agency).

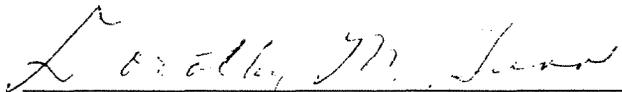

In order to allow this proceeding to proceed expeditiously, the Board requests that the Agency, in its Recommendation, address the discrepancy question. We also request the Agency to identify where in the distribution system radium samples have been taken, and why those particular locations were chosen. We also request the Agency to clarify how the present use of the wells, particularly Well #3, may differentially affect the radium concentrations in the water as delivered to the various parts of Batavia's service area.

The Board hopes that the Agency will be able to file its recommendation expeditiously; after the Board receives the Agency's Recommendation, it will consider whether or not a hearing may be necessary.

IT IS SO ORDERED.

B. Forcade concurred.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 23rd day of March, 1990, by a vote of 7-0.

Dorothy M. Gunn, Clerk
Illinois Pollution Control Board
