Date: Saturday, February 17, 2018 9:05:44 PM

Dear IL Pollution Control Board Assistant Clerk,

In an age where more and more children have asthma, air pollution limits should not be decided by the polluters. Illinois Environmental Protection Agency and Dynegy's proposal to amend the Multi Pollutant Standard (MPS) would give Dynegy the option to increase air pollution (NOx and SO2) at certain plants. Any increase in pollution would place an undue public health burden on the communities surrounding the plants and the people who live there, particularly the most vulnerable of our population: infants, young children, asthmatics, and the elderly. This is outrageous--an egregious social justice offense!

For these reasons, and that some of the plants in question are in Environmental Justicecommunities, the Illinois Pollution Control Board should reject the regulatory changes that the Illinois Environmental Protection Agency and Dynegy are proposing.

Sincerely,

Shandi Greve Penrod
