

## **Board Adopts Final Notice of a Proposal to Control Nitrogen Oxide Emissions From Various Source Categories**

On August 20, 2009, the Illinois Pollution Control Board sent to final notice a proposal to amend Parts 211 and 217 of the Board's air pollution regulations. The proposal, filed by the Illinois Environmental Protection Agency (IEPA) on May 9, 2008, is docketed as Nitrogen Oxides Emissions from Various Source Categories: Amendments to 35 Ill. Adm. Code Parts 211 and 217 (R08-19). On both January 30, 2009 and March 23, 2009, the IEPA filed motions to amend the proposal based on negotiations with interested parties.

Generally, the adopted rules control nitrogen oxides (NO<sub>x</sub>) emissions from major stationary sources in nonattainment areas, and from emission units including industrial boilers, process heaters, glass melting furnaces, cement kilns, lime kilns, furnaces used in steelmaking and aluminum melting, and fossil fuel-fired stationary boilers at such sources.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board's Web site and may be downloaded from the Web without charge. Hard copies may be obtained for \$.75 per page from the Clerk's office at 312-814-3629, or by writing to the Clerk's office:
