

ILLINOIS POLLUTION CONTROL BOARD

June 5, 2014

IN THE MATTER OF:)
NATIONAL AMBIENT AIR QUALITY) R14-17
STANDARDS, USEPA REGULATIONS) (Identical-in-Substance Rulemaking - Air)
(July 1, 2013 through December 31, 2013))

Adopted Rule. Final Order.

OPINION AND ORDER OF THE BOARD (by J.A. Burke):

This rulemaking updates the ambient air quality standards in the Board’s air pollution regulations (35 Ill. Adm. Code 243) to include revisions to the National Ambient Air Quality Standards (NAAQS)¹ adopted by the United States Environmental Protection Agency (USEPA) pursuant to section 109 of the Clean Air Act (CAA) (42 U.S.C. § 7409 (2011)) during the period July 1, 2013 through December 31, 2013.

Today the Board adopts an amendment to one segment of the Illinois ambient air quality standards to reflect revisions and USEPA actions that affect the federal NAAQS codified in 40 C.F.R. 50. As explained below, the Board intends the Illinois ambient air quality standards adopted in this proceeding to be identical-in-substance with their federal counterparts, as “identical-in-substance” is defined by Section 7.2(a) of the Environmental Protection Act (Act) (415 ILCS 5/7.2(a) (2012)).

Section 10(H) of the Act (415 ILCS 5/10(H), as added by P.A. 97-945 (eff. Aug. 10, 2012)), mandates this rulemaking by requiring the Board to “adopt ambient air quality standards specifying the maximum permissible short-term and long-term concentrations of various contaminants in the atmosphere; those standards shall be identical in substance to the national ambient air quality standards promulgated by . . . the United States Environmental Protection Agency in accordance with Section 109 of the Clean Air Act [(42 U.S.C. § 7409)].” 415 ILCS 5/10(H).

The Board adopted the initial amendments in National Ambient Air Quality Standards, USEPA Regulations (through December 31, 2012), R13-11 (July 25, 2013), which were effective on July 29, 2013. *See* 37 Ill. Reg. 12882 (Aug. 9, 2013). The Board updated the amendments in National Ambient Air Quality Standards, USEPA Regulations (January 1, 2013 through June 30, 2012, July 3, 2013, and August 5, 2013), R14-6 (September 5, 2013). The present amendments are the second update to the initial amendments.

Section 10(H) of the Act (415 ILCS 5/10(H) (2012)) and Section 1-5(c)(1) of the Administrative Procedure Act (APA) (5 ILCS 100/5-1-5(c)(1) (2012)) also provide that Title VII of the Act and Section 5-35 of the APA (5 ILCS 100/5-35 (2012)) do not apply to this proceeding. Accordingly, the Board did not adopt a “First Notice” proposal, or a “Second

¹ Throughout this opinion and in the regulatory text, the Board uses the abbreviation “NAAQS” to refer to a single standard and “NAAQS” to refer to multiple standards.

Notice” proposal for review by the Joint Committee on Administrative Rules (JCAR). However, as provided in Section 10(H) of the Act, and as explained in the two following segments of this opinion and order, the Board, before adopting final rule amendments, provided notice of this rulemaking proposal in the *Illinois Register*, held one public hearing on the proposal as required by the federal Clean Air Act (33 U.S.C. § 7410(a) (2011)), and allowed for public comment.

The Board reserved this docket to accommodate amendments that are necessary to update the Illinois ambient air quality standards to reflect revisions and USEPA actions that affect the federal NAAQS during the period July 1, 2013 through December 31, 2013. Board action is necessary to amend the Illinois ambient air quality standards to conform with the NAAQS adopted and amended by USEPA. USEPA issued an updated version of its *List of Designated Reference and Equivalent Methods* on December 17, 2013.

PUBLIC COMMENTS

The Board adopted a proposal for public comment in this matter on March 20, 2014. A Notice of Proposed Amendment appeared in the April 11, 2014 issue of the *Illinois Register*, at 38 Ill. Reg. 7774. The Board received public comments on the proposal for 45 days after the date of publication, until May 26, 2014. During the public comment period, the Board received no public comments. The Board did receive a copy of the amendments as published in the *Illinois Register*, which included a suggested correction made by JCAR during preparation for publication. The Board has accepted the JCAR correction and corrected the text of the adopted amendment accordingly. The correction is listed in Table 2 appended below.

FEDERALLY REQUIRED PUBLIC HEARING

The Board expects that the Illinois Environmental Protection Agency (Agency) will submit the present amendments as a revision to the Illinois State Implementation Plan (SIP) for various contaminants pursuant to section 110 of the federal Clean Air Act (42 U.S.C. § 7410(a) (2011) and the implementing USEPA regulations. *See* 40 C.F.R. 51.102 and appendix V (2013).

The Board conducted a public hearing for the purpose of allowing interested members of the public to comment on the proposed amendments and the anticipated SIP revision that will result from their adoption. The Board simultaneously conducted the hearing at two locations via video conference so that persons at both locations could freely participate in the proceedings. 35 Ill. Adm. Code 102.412(c) (provision for videoconference hearing in identical-in-substance rulemaking). The hearing occurred on May 7, 2014 between the Board’s offices in Chicago and Springfield.

The record in this docket includes all documents pertaining to this proceeding. All documents in the record are publicly available for inspection and copying as provided in 2 Ill. Adm. Code 2175 (2012). The documents are also freely available online at the Board’s webpage: www.ipcb.state.il.us.

The record has not included a copy of the following documents, which are all otherwise publicly available:

- Any *Federal Register* notices relating to this action (referenced elsewhere in this opinion and order);
- Federal statutes and regulations referenced in this opinion and order; and
- Illinois statutes and regulations referenced in this opinion and order.

OVERVIEW OF THE FEDERAL NAAQS AND THIS PROCEEDING

The amendments adopted today are intended to make the Illinois ambient air quality standards identical-in-substance to the NAAQS adopted by USEPA. Today's adopted amendments include one ancillary USEPA action that occurred during the period July 1, 2013 through December 31, 2013: USEPA issued an update to its *List of Designated Reference and Equivalent Methods* on December 17, 2013. The Board did not need to include two other federal actions that occurred on July 3, 2013 and August 5, 2013 because the Board included those in a prior NAAQS update, as is described below. Further, Board action on a November 12, 2013 USEPA approval of five new equivalent methods for particulate matter and nitrogen oxides was not necessary because the December 17, 2013 update to the *List of Designated Methods* subsumes the November 12, 2013 approval.²

Docket R14-17: July 1, 2013 through December 31, 2013 Amendments

USEPA did not amend the federal NAAQS once during the period July 1, 2013 through December 31, 2013. Instead, USEPA undertook four ancillary actions during the period. The actions, described below, all related to approval of new analytical methods for demonstrating compliance.

Board action is required on only one of the USEPA actions, as is summarized below:

July 3, 2013 (78 Fed. Reg. 40000): New FRM for Lead in Total Suspended Particulate Matter

Description of the USEPA action: USEPA amended appendix G to 40 C.F.R. 50 to establish a new FRM for measuring lead in total suspended particulate matter for the purposes of the lead NAAQS.

Prospective necessary Board action in response: The Board updated the incorporation by reference to appendix G in Section 243.108 by adding a *Federal Register* citation in the prior NAAQS update, National Ambient Air Quality Standards, USEPA Regulations (January 1, 2013 through June 30, 2013, July 3, 2013, and August 5, 2013), R14-6 (September 5, 2013). No further Board action is necessary.

² Nevertheless, the November 12, 2013 remains the earliest USEPA action included in this docket, so that date is used for computation of the statutory due date.

August 5, 2013 (78 Fed. Reg. 47191): Area Designations for Two Areas in Illinois Under the 2010 Primary Annual Average and 24-Hour NAAQS for Sulfur Oxides

Description of the USEPA action: USEPA made area designations for the 2010 NAAQS for sulfur dioxide.

Prospective necessary Board action in response: The Board modified the Board note appended to 35 Ill. Adm. Code 243.122(a)(5), in response to this action in the prior NAAQS update, National Ambient Air Quality Standards, USEPA Regulations (January 1, 2013 through June 30, 2013, July 3, 2013, and August 5, 2013), R14-6 (September 5, 2013). No further Board action is necessary.

November 12, 2013 (78 Fed. Reg. 67360): Designation of Five New Equivalent Methods for Particulate Matter and Nitrogen Oxides

Description of the USEPA action: USEPA designated five new equivalent methods: one for particulate matter (PM₁₀), one for coarse particulate matter (PM_{10-2.5}), two for fine particulate matter (PM_{2.5}), and one for nitrogen oxides (NO_x).

Prospective necessary Board action in response: This action would normally require the Board to update the incorporation by reference to the *List of Designated Reference and Equivalent Methods* that is incorporated by reference in Section 243.108 to include this *Federal Register* notice. USEPA's release of an updated version of the *List of Designated Methods* on December 17, 2013 obviates any actions specific to these approvals because these approvals are included in the updated version.

December 17, 2013: Updated Version of List of Designated Reference and Equivalent Methods

Description of the USEPA action: USEPA issued an updated version of its *List of Designated Reference and Equivalent Methods*.

Prospective necessary Board action in response: The Board must modify the version of the *List of Designated Reference and Equivalent Methods* that is incorporated by reference in Section 243.108

**Summary Listing of the Federal Action
Upon Which Action is Required in This Docket**

Based on the foregoing, the federal action that forms the basis for Board action in this update docket is the following:

Federal Action Date (citation)	Description of the Action
December 17, 2013	Update to the List of Designated Methods

The Context of This Identical-in-Substance Proceeding

The Board does not engage in substantive review of federal standards in the context of an identical-in-substance proceeding. Rather, the Board reviews federal standards only to the extent necessary to make a “best fit” for those standards in the context of the Illinois regulatory scheme.

The Board tries to follow the structure and content of federal regulations where possible. This ensures the full incorporation of all necessary elements of the present federal standards, and it makes updating the regulations easier when future federal amendments occur.

Departures from the federal structure may occur for a variety of reasons and will be noted as needed below. Where more stringent pre-existing State standards exist that will continue in effect after incorporation of federal elements, the Board will incorporate a structure that retains those State standards. *See, e.g., RCRA Subtitle D Amendments (Amendments to 35 Ill. Adm. Code 810, 811, and 814), R93-10 (Sept. 15, 1993), slip op. at 3-5 (adding required federal elements into existing State regulations); Safe Drinking Water Act Regulations, R88-26 (Aug. 9, 1990), slip op. at 6-7 (retaining more stringent pre-existing State regulations within the body of new federal requirements).*

DISCUSSION

The following discussion begins with substantive discussion of the single USEPA action that requires Board action in this docket. The discussion concludes with a description of the types of deviations that the Board makes from the literal text of federal regulations in adopting identical-in-substance rules.

Discussion of the Particular Federal Action Involved in This Docket

Updated Edition of List of Designated Methods—Section 243.108

On December 17, 2013, USEPA released a new version of the *List of Designated Methods*. The List is not codified, and the Board did not see that USEPA published a notice for the update in the *Federal Register*. Rather, USEPA’s usual practice is simply to post a link to the updated version on the Internet (at www.epa.gov/ttn/amtic/criteria.html). Thus, the Board found the update in a routine on-line check for an update.

The December 17, 2013 update to the *List of Designated Methods* included a number of methods that were modified since the last version dated June 27, 2013. These were the methods modifications that appeared in the *Federal Register* on July 3, 2014 and November 12, 2013, as described above. The modified methods were the following, arranged by criteria pollutant:

Lead in total suspended particulate matter:

Manual Reference Method RFLA-0813-813 (inductively coupled plasma-mass spectroscopy (ICP-MS)), codified as appendix G to 40 C.F.R. 50 at 78 Fed. Reg. 40000 (July 3, 2013): “Reference Method for the Determination of Lead in Suspended Particulate Matter Collected from Ambient Air.” In the prior update docket, National Ambient Air Quality Standards, USEPA Regulations (January 1, 2013 through June 30, 2012, July 3, 2013, and August 5, 2013), R14-6 (September 5, 2013), the Board updated the incorporation by reference to appendix G to 40 C.F.R. 50 to include this new reference method. The Board now updates the incorporation by reference to *List of Designated Reference and Equivalent Methods* to include the method.

Manual Equivalent Method EQLA-0813-803 (flame atomic absorption spectroscopy (FAAS)): “Environment S.A. Model AS32M cavity attenuated phase shift spectroscopy Nitrogen Dioxide Analyzer.” Approved at 78 Fed. Reg. 40000 (July 3, 2013).

Coarse Particulate Matter (PM_{10-2.5}):

Automated Equivalent Method EQPM-1013-207: “Thermo Scientific TEOM[®] 1405-DF Dichotomous Ambient Particulate Monitor with FDMS[®].” Approved at 78 Fed. Reg. 67360 (Nov. 12, 2013).

Total Particulate Matter (PM₁₀):

Automated Equivalent Method EQPM-1013-208: “Thermo Scientific TEOM[®] 1405-DF Dichotomous Ambient Particulate Monitor with FDMS[®].” Approved at 78 Fed. Reg. 67360 (Nov. 12, 2013).

Fine Particulate Matter (PM_{2.5}):

Automated Equivalent Method EQPM-1013-209: “Met One BAM-1022 Real Time Beta Attenuation Mass Monitor—Outdoor PM_{2.5}FEM Configuration.” Approved at 78 Fed. Reg. 67360 (Nov. 12, 2013).

Automated Equivalent Method EQPM-1013-211 (Environment S.A. Model MP101M PM2.5 Monitor): “Environment S.A. Model MP101M PM2.5 Beta Attenuation Monitor.” Approved at 78 Fed. Reg. 67360 (Nov. 12, 2013).

Nitrogen oxides:

Automated Equivalent Method EQNA-1013-210 (Environment S.A. Model AS32M Nitrogen Dioxide Analyzer): “Environment S.A. Model AS32M cavity attenuated phase shift spectroscopy Nitrogen Dioxide Analyzer.” Approved at 78 Fed. Reg. 67360 (Nov. 12, 2013).

The *List of Designated Methods* is essential to implementation of the various NAAQS. The *List* specifies the analytical methods that are permissible for the monitoring required to demonstrate compliance with ambient air quality standards. Thus, the modifications are important to any entity or State using the particular methods.

Any person interested in the substance of the December 17, 2013 update to the List of Designated Methods should refer to that document. Any person interested in the July 3, 2013, August 5, 2013 or November 17, 2013 methods approvals should refer to the appropriate *Federal Register* notice. Alternatively, interested persons could contact USEPA as directed at www.epa.gov/ttn/amtic/criteria.html.

The June 27, 2013 version of the *List of Designated Methods* is incorporated by reference in Section 243.108. The incorporation by reference includes a citation to the July 3, 2013 *Federal Register* notice that added the equivalent method for lead in total suspended particulate matter. Also incorporated by reference is the federal reference method for lead in total suspended particulate matter in appendix G to 40 C.F.R. 50, with a citation to the *Federal Register* notice for the amendment of July 3, 2013.

The Board has updated that incorporation by reference to the *List of Designated Methods* to the December 17, 2013 version of the *List*. This includes deleting the reference to the July 3, 2013 designation of the federal equivalent method for lead in total suspended particulate matter. The revisions are itemized and summarily outlined in Table 1, which appears below in the opinion segment of this opinion and order. No action is necessary with regard to the incorporation by reference to the federal reference method in appendix G to 40 C.F.R. 50. The updated version of the *List of Designated Methods* included the new federal reference method, but did not affect the *Code of Federal Regulations* and *Federal Register* citations for the method.

Request for Public Comments: The Board requested comments on the update to the incorporation by reference to the December 17, 2013 version of the *List of Designated Methods*. The Board received no comments in response.

Deviations from the Literal Text of the Federal Amendments and Non-Federally Derived Corrections and Clarifications

The Board routinely examines federal amendments and the base text of rules open for amendments to find any areas that need correction or clarification. JCAR and the Office of the Secretary of State also routinely examine the text and suggest corrections and clarifications. Sometimes suggestions arise from the Agency, USEPA, or members of the regulated community. The Board often makes revisions as a result. The revisions thus made are not directly derived from federal amendments. The Board is ever mindful of the limited discretion authorized in the context of an identical-in-substance proceeding. The Board is limited to “those changes that are necessary for compliance with the Illinois Administrative Code,” “technical changes that in no way change the scope or meaning of any portion of the regulations,” and “apparent typographical and grammatical errors.” See 415 ILCS 5/7.2(a) and (a)(7) (2012). Thus, the Board will only make minor, non-substantive corrections and clarifications in this context. These corrections are non-substantive in effect.

The tables below list corrections and amendments that are not based on current federal amendments. Table 1 includes the single deviation made in this proposal for public comment from the verbatim text of the federal amendments. Table 2 is a listing of the single revision made to the text of the amendments from that proposed and set forth in the Board's opinion and order of March 20, 2014. Table 2 indicates the change made, as well as the source that suggested the change.

**Table 1:
Amendments Not Directly Based on Federal NAAQS Amendments**

Illinois Provision	Revision(s)
243.108, USEPA, List of Designated Reference and Equivalent Methods”	Changed “June 27, 2013” to “December 17, 2013”; replaced the explanation of and citation to later amendments with a statement that the incorporation by reference does not include any USEPA approvals after December 17, 2013.

**Table 2:
Revision to the Text of the Proposed Amendments
Made in Final Adoption**

Section	Source	Revision(s)
243.108, Government Printing Office, Appendix J to 40 C.F.R. 50	JCAR	Added the closing parenthesis mark after “Atmosphere.”

ORDER

The Board directs the Clerk to immediately file the adopted amendments with the Office of the Secretary of State and provide notice in the *Illinois Register* of the following adopted amendments to the Illinois ambient air quality regulations at 35 Ill. Adm. Code 243:

TITLE 35: ENVIRONMENTAL PROTECTION
