BOARD PROPOSES FIRST NOTICE SITE-SPECIFIC RULEMAKING FOR BORDEN CHEMICALS AND PLASTICS OPERATING LIMITED PARTNERSHIP, R86-14

This matter comes to the Board on a petition for site-specific rulemaking filed March 31, 1986. The original petition was filed by Borden Chemical Company, but the petitioner's name was subsequently changed to Borden Chemicals and Plastics Operating Limited Partnership. The Board proposes for First Notice the amendments to 35 Ill. Adm. Code, Subtitle C: Water Pollution, Chapter I, Pollution Control Board, Section 304.211, Discharges from Borden Chemicals and Plastics Operating Limited Partnership into an unnamed tributary of Long Point Slough.

This regulatory proposal is intended to apply from the point of Borden's discharge in the unnamed tributary of Long Point Slough, downstream to the confluence with the Sangamon River. It is intended to effectively modify the water quality standards for total dissolved solids (TDS) and chloride from 1,000 mg/l TDS and 500 mg/l to 2,500 mg/l and 800 mg/l in that stretch of water as it applies to Borden's discharge.

Copies of R86-14 First Notice Opinion and Order may be obtained at the Board. Interested parties may contact Margaret Dolan-Fliss at (312) 814-6062.

BOARD PROPOSES RULEMAKING PROCEDURAL RULES FOR SECOND NOTICE (R88-5(B))

On February 8, 1990, the Board proposed for second notice new procedural rules for rulemaking proceedings. This docket (R88-5(B))

includes proposed new rules for regulatory proceedings (35 Ill. Adm. Code 102), the repeal of the existing regulatory procedural rules, and non-substantive changes to Subparts D, E, and F of 35 Ill. Adm. Code 106 (Hearings Pursuant to Specific Rules).

Among other things, the proposed new regulatory procedural rules govern the required contents of a regulatory proposal, address the Board's economic impact study determinations, provide for a challenge to an Illinois Environmental Protection Agency certification that a proposed rule is federally required pursuant to Section 28.2 of the Environmental Protection Act, and establish procedures for pre-hearing conferences. In adopting the second notice opinion and order, the Board considered all public comment and testimony received at hearing and in written comments.

The Board's second notice opinion and order is available upon request of the Clerk's office. Questions may be

directed to Elizabeth Harvey at 312/814-6921. The rules will be submitted to the Joint Committee on Administrative Rules for a 45-day review period.

BOARD ADOPTS R89-2, UIC UPDATE

On January 25, 1990, the Board adopted this rulemaking which updates the UIC rules to correspond with federal amendments during the period July 1 through December 31, 1988. Among the revisions are revisions to permitting, reporting, operating, and notice requirements. This rulemaking implements the first phase of restrictions on the underground injection of hazardous wastes, also implementing procedures for exemptions from the general prohibitions. Also among the revisions are deconsolidations of the RCRA and UIC permitting rules. This rulemaking adopts a new Part 738: Hazardous Waste Injection Restrictions.

BOARD PROPOSES UIC UPDATE, R89-11

On January 25, 1990 the Board approved the Proposal for Public Comment to R89-11. This rulemaking proposes amendments to update the UIC rules to correspond with federal amendments during the period January 1 through November 30, 1989. Among the revisions it proposes are several that would add to the restrictions on underground injection of hazardous wastes by including several new hazardous wastes to those prohibited from underground injection.

BOARD ADOPTS R90-8, AMENDMENTS TO DE NOVO HEARINGS IN NPDES PERMIT APPEALS FOR FIRST NOTICE

On February 8, 1990, the Board adopted for first notice some amended regulatory language that affects the manner in which NPDES permit appeals will be conducted. This regulatory amendment arises on the Board's own motion. Recently, the appellate court interpretations of a Board regulation have been different than the Board's interpretation of that regulation. To ensure the Board's objective is secured, the Board proposed to amend that regulatory language to more clearly reflect the Board's present intentions.

The regulation at issue, 35 Ill.

Adm. Code 105.102 (b)(8) provides for de novo hearings on disputed issues of fact in NPDES permit appeals. The Second District, in Dean Foods Company v. PCB, 143 Ill. App. 3d 322, 492 N.E. 2d 1344 (Second District, 1986) held that "de novo" required the Board to entertain facts not before the Agency in its permit review. In City of East Moline v. Illinois Environmental Protection Agency, PCB 86-218 (September 8, 1988), the Board reevaluated the regulation and held that "de novo" meant a "new and fresh" look at the facts before the Agency and a decision that did not grant deference to the prior Agency decision. The Board felt that allowing new information to be introduced, information that was not before the Agency, would make this Board the permit issuing entity in Illinois in contravention of Section 39 (a) of the Environmental Protection Act (hereinafter "the Act"), and Village of Hillside v. John Sexton Sand & Gravel Company, 105 Ill. App. 3d 533, 434 N. E. 2d 382 (First District, 1982).

The Board's interpretation appears to be at least partially at odds with two cases very recently decided by the Appellate Courts, City of East Moline v. PCB, 188 Ill. App. 3d 349, 544 N.E. 2d 82 (Third District, 1989), and Citizens Utilities v. PCB, Ill. App. 3d , N.E.2d (Third District, Slip Opinion January 5, 1990).

The Board intends in R 90-8 to correct this discrepancy in interpretation by proposing to amend the regulatory language to more clearly reflect the Board's intentions.

This proposal flows from the authorization of Section 26 of the Act, allowing the Board to adopt procedural rules pursuant to the Administrative Procedures Act (hereinafter "APA"). The Board intends to follow the procedures of Section 5.01 of the APA by allowing comment for at least 45 days after first notice publication in the Illinois Register. Because of the limited scope of the proposed amendments, the Board does not intend to initiate hearings in this matter. Interested persons are requested to

provide all comments in written format to the Clerk of the Board.

The Board's intention in this proceeding is to make the NPDES permit appeal process function in the same manner as the appeal of all other Agency issued permits. In those other circumstances the Board gives no deference to the Agency's decision, but neither does the Board allow a hearing based on totally new factual material not previously before the Agency. The Board believes implementation of this concept can be accomplished in NPDES permit appeals by including the language, "The decision of the Board shall be based exclusively on the record before the Agency including the record of hearing, if any." This language, as well as the burden of proof language, is found with minor semantic differences in Section 40(b), (c), and (d) of the Act governing permit appeals. Today's proceeding is not intended to make any changes in the

manner in which other non-NPDES permit appeal proceedings are conducted.

The Board specifically encourages all interested persons to comment on what unique aspects of the NPDES permitting process would require divergence from the traditional Board permit review procedures which are limited to the record before the Agency, and whether such divergence could be accomplished without making the Board the permitting agency.

BOARD AND STAFF ACTIVITIES

On January 24, 1990, Chairman John Marlin spoke to the Illinois Water Pollution Control Association Annual Meeting in Matteson on trends in environmental regulation.

On February 6, 1990, Chairman John Marlin spoke to the Environmental Law Committee of the Chicago Bar Association about legislative and regulatory matters.
