Respondent. )

ORDER OF THE BOARD (by Mr. Henss):

Petitioner requests variance from the Air Pollution Control Regulations dealing with compliance programs and project completion schedules (Rule 104), the particulate emission standards for incinerators [Rule 203(e)] and the carbon monoxide emission standards for incinerators [Rule 206(b)]. The purpose of the variance is to allow Petitioner to burn explosive wastes in its incinerator. Under the recent United States Supreme Court decision, Train, Administrator etc. vs. Natural Resources Defense Council (No. 73-1742), it will be necessary to establish that the grant of the variance will not interfere with the attainment and subsequent maintenance of national ambient air quality standards. The petition seems to be specific in alleging that the air quality standards for particulates will be met but is inadequate in its allegations regarding the national ambient air quality standard for carbon monoxide. The Board orders Petitioner to file within 45 days such additional information as may be necessary to determine whether allowance of this variance will interfere with the attainment and subsequent maintenance of national ambient air quality standards for carbon monoxide. Since public hearings have been held on similar variance requests by Petitioner the Board does not deem it necessary to schedule a public hearing on this petition. Failure to file the missing information, however, may result in a determination that the petition is inadequate.

It is Ordered that Petitioner within 45 days of this Order file additional information from which it can be determined whether

the grant of the variance will interfere with the attainment and subsequent maintenance of the national ambient air quality standard for carbon monoxide.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted the 28th day of August, 1975 by a vote of 3-0.

Christan L. Moffett (gm)  
Christan L. Moffett, Clerk  
Illinois Pollution Control Board
