**RECOMMENDATION OF THE ILLINOIS  
ENVIRONMENTAL PROTECTION AGENCY**

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board ("Board"), 35 Ill. Adm. Code 125.204.

1. On October 20, 2017, the Illinois EPA received a request from Meier Land and Cattle LLC (log number TC-138795, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
2. The facility's address is: Meier Land and Cattle LLC  
3568 E. McConnell Road  
Dakota, IL 61018

The proposed water pollution control facility in this request is located in the NE ¼ of Section 14, T28N, R8E of the 4th P.M. in Stephenson County, at the above street address and consist of the following:

One (1) concrete manure pit (approximately 64 ft. x 36 ft. x 8 ft. deep); One (1) concrete manure pit (approximately 36 ft. x 30 ft. x 8 ft. deep) and the portion of concrete slatted flooring over these manure pits in building number 1;

One (1) concrete manure pit (approximately 160 ft. x 8 ft. x 8 ft. deep) and the portion of concrete slatted flooring over this manure pit in building number 2;

One (1) concrete manure pit (approximately 174 ft. x 12 ft. x 8 ft. deep) and the portion of concrete slatted flooring over this manure pit in building number 3;

Two (2) concrete manure pits (approximately 85 ft. x 50 ft. x 10 ft. deep) and the portion of concrete slatted flooring over these manure pits in building number 4;

Two (2) concrete manure pits (approximately 85 ft. x 50 ft. x 10 ft. deep) and the portion of concrete slatted flooring over these manure pits in building number 5;

One (1) 12 ft. deep rectangular earthen storage basin having top elevation dimensions approximately 198 ft. (length) x 107 ft. (width) and bottom elevation dimensions approximately 150 ft. (length) x 59 ft. (width) and having slopes of 2H:1V, all waste storage pits from buildings 1, 2, 3, 4, and 5 drain to this basin;

One (1) concrete manure pit approximately 50 ft. (length) x 12 ft. (width) x 8 ft. (depth) and associated  $\frac{3}{4}$  h.p. pump to transfer liquid waste from this manure pit to manure pits associated with building number 1.

This livestock waste management facility is used to collect, transport, and/or store livestock waste prior to cropland application, and is further described in Exhibit A.

3. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2014), and Section 125.200(a) of the Board's regulations, 35 Ill. Adm. Code 125.200(a), define "pollution control facilities" as:

any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: eliminating, preventing, or reducing air or water pollution ...or treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.

4. In order to receive preferential tax treatment as pursuant to 35 ILCS 200/11-5 (2014), pollution control facilities must be certified as such by the Board, 35 ILCS 200/11-20 (2014) and 35 Ill. Adm. Code 125.200(a).
5. Upon receipt of a tax certification application, the Illinois EPA must file a recommendation on the application with the Board, 35 Ill Adm. Code 125.204(a).
6. Based on the information in the application and the purpose of the facility, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and is eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Re: Meier Land and Cattle LLC - Dakota  
Recommendation of Tax Certification  
Log # TC-138795  
BOW ID # W1778010002  
Property Identification # 14-09-14-200-001

The Bureau of Water received a request on October 20, 2017 from Meier Land and Cattle LLC for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Il. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Meier Land and Cattle LLC  
3568 E. McConnell Road  
Dakota, IL 61018

NE 1/4 of Section 14, Township 28-North, Range 8-East of the East 4th PM in Stephenson County.

Livestock waste management facilities consisting of:

One (1) concrete manure pit approximately 64 ft. (length) x 36 ft. (width) x 8 ft. (depth), One (1) concrete manure pit approximately 36 ft. (length) x 30 ft. (width) x 8 ft. (depth) and the portion of concrete slatted flooring over these manure pits in building no. 1;

One (1) concrete manure pit approximately 160 ft. (length) x 8 ft. (width) x 8 ft. (depth) and the portion of concrete slatted flooring over this manure pit in building no. 2;

One (1) concrete manure pit approximately 174 ft. (length) x 12 ft. (width) x 8 ft. (depth) and the portion of concrete slatted flooring over this manure pit in building no. 3;

Two (2) concrete manure pits approximately 85 ft. (length) x 50 ft. (width) x 10 ft. (depth) and the portion of concrete slatted flooring over these manure pits in building no. 4;

Two (2) concrete manure pits approximately 85 ft. (length) x 50 ft. (width) x 10 ft. (depth) and the portion of concrete slatted flooring over these manure pits in building no. 5;

One (1) 12 ft. deep rectangular earthen storage basin having top elevation dimensions approximately 198 ft. (length) x 107 ft. (width) and bottom elevation dimensions approximately 150 ft. (length) x 59

Page No. 2

Log No. TC-138795

ft. (width) and having slopes of 2H:1V, all waste storage pits from buildings 1, 2, 3, 4, and 5 drain to this basin;

One (1) concrete manure pit approximately 50 ft. (length) x 12 ft. (width) x 8 ft. (depth) and associated 3/4 h.p. pump to transfer liquid waste from this manure pit to manure pits associated with building no. 1.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Darren Gove at 217/782-0610.

# Pollution Control Facility Tax Return

## Step 1: Complete the following information

060-089-1007

**RECEIVED**  
MAY - 3 2018  
SW/WS/IFAS

EUGENE MEIER  
3994 E MILL ROAD  
DAKOTA, IL 61018

1 Is the preprinted information above correct?  Yes  No  
If no, cross through it and write the correct information here.

2 Write the name and telephone number of the person we should contact for additional information. (If different from preprinted information above.)

Eugene Meier  
Name  
(815) 541-9294  
Phone

3 Write the assessment year. \_\_\_\_\_

4 Write the principal nature of your business.  
farmer/cattle feeder

5 a Is your facility still in use?  Yes  No

b If no, do you wish to revoke your certification?  Yes  No

## Step 2: Identify the pollution control facility

1 Check the box that identifies the type of pollution control facility.

- 1a  Air pollution
- 1b  Water pollution
- 1c  Low-sulfur dioxide emission coal-fueled device

2 Write the number written on the facility's Illinois EPA certification.

2 ~~21~~ RA 101 WPC 82-02

3 Write the three-digit classification number of the pollution control facility. (See instructions.)

3 060

4 Write the complete description of the pollution control facility written on the Illinois EPA certification.

5 concrete manure pits with slatted floors, all under roof. Buildings 2 & 3 have outside pumpouts and the rest are pumped by removing slats & PTO pump. The reception pit has no slats or roof (7). When pits are full we pump manure to the earthen storage basin. That is emptied once in the spring and once in the fall. In the fall it is hauled by tankers to far away fields and injected. In the spring it is injected in nearby fields with a dragline. We use 6" rubber hose to transfer to the earthen storage basin.

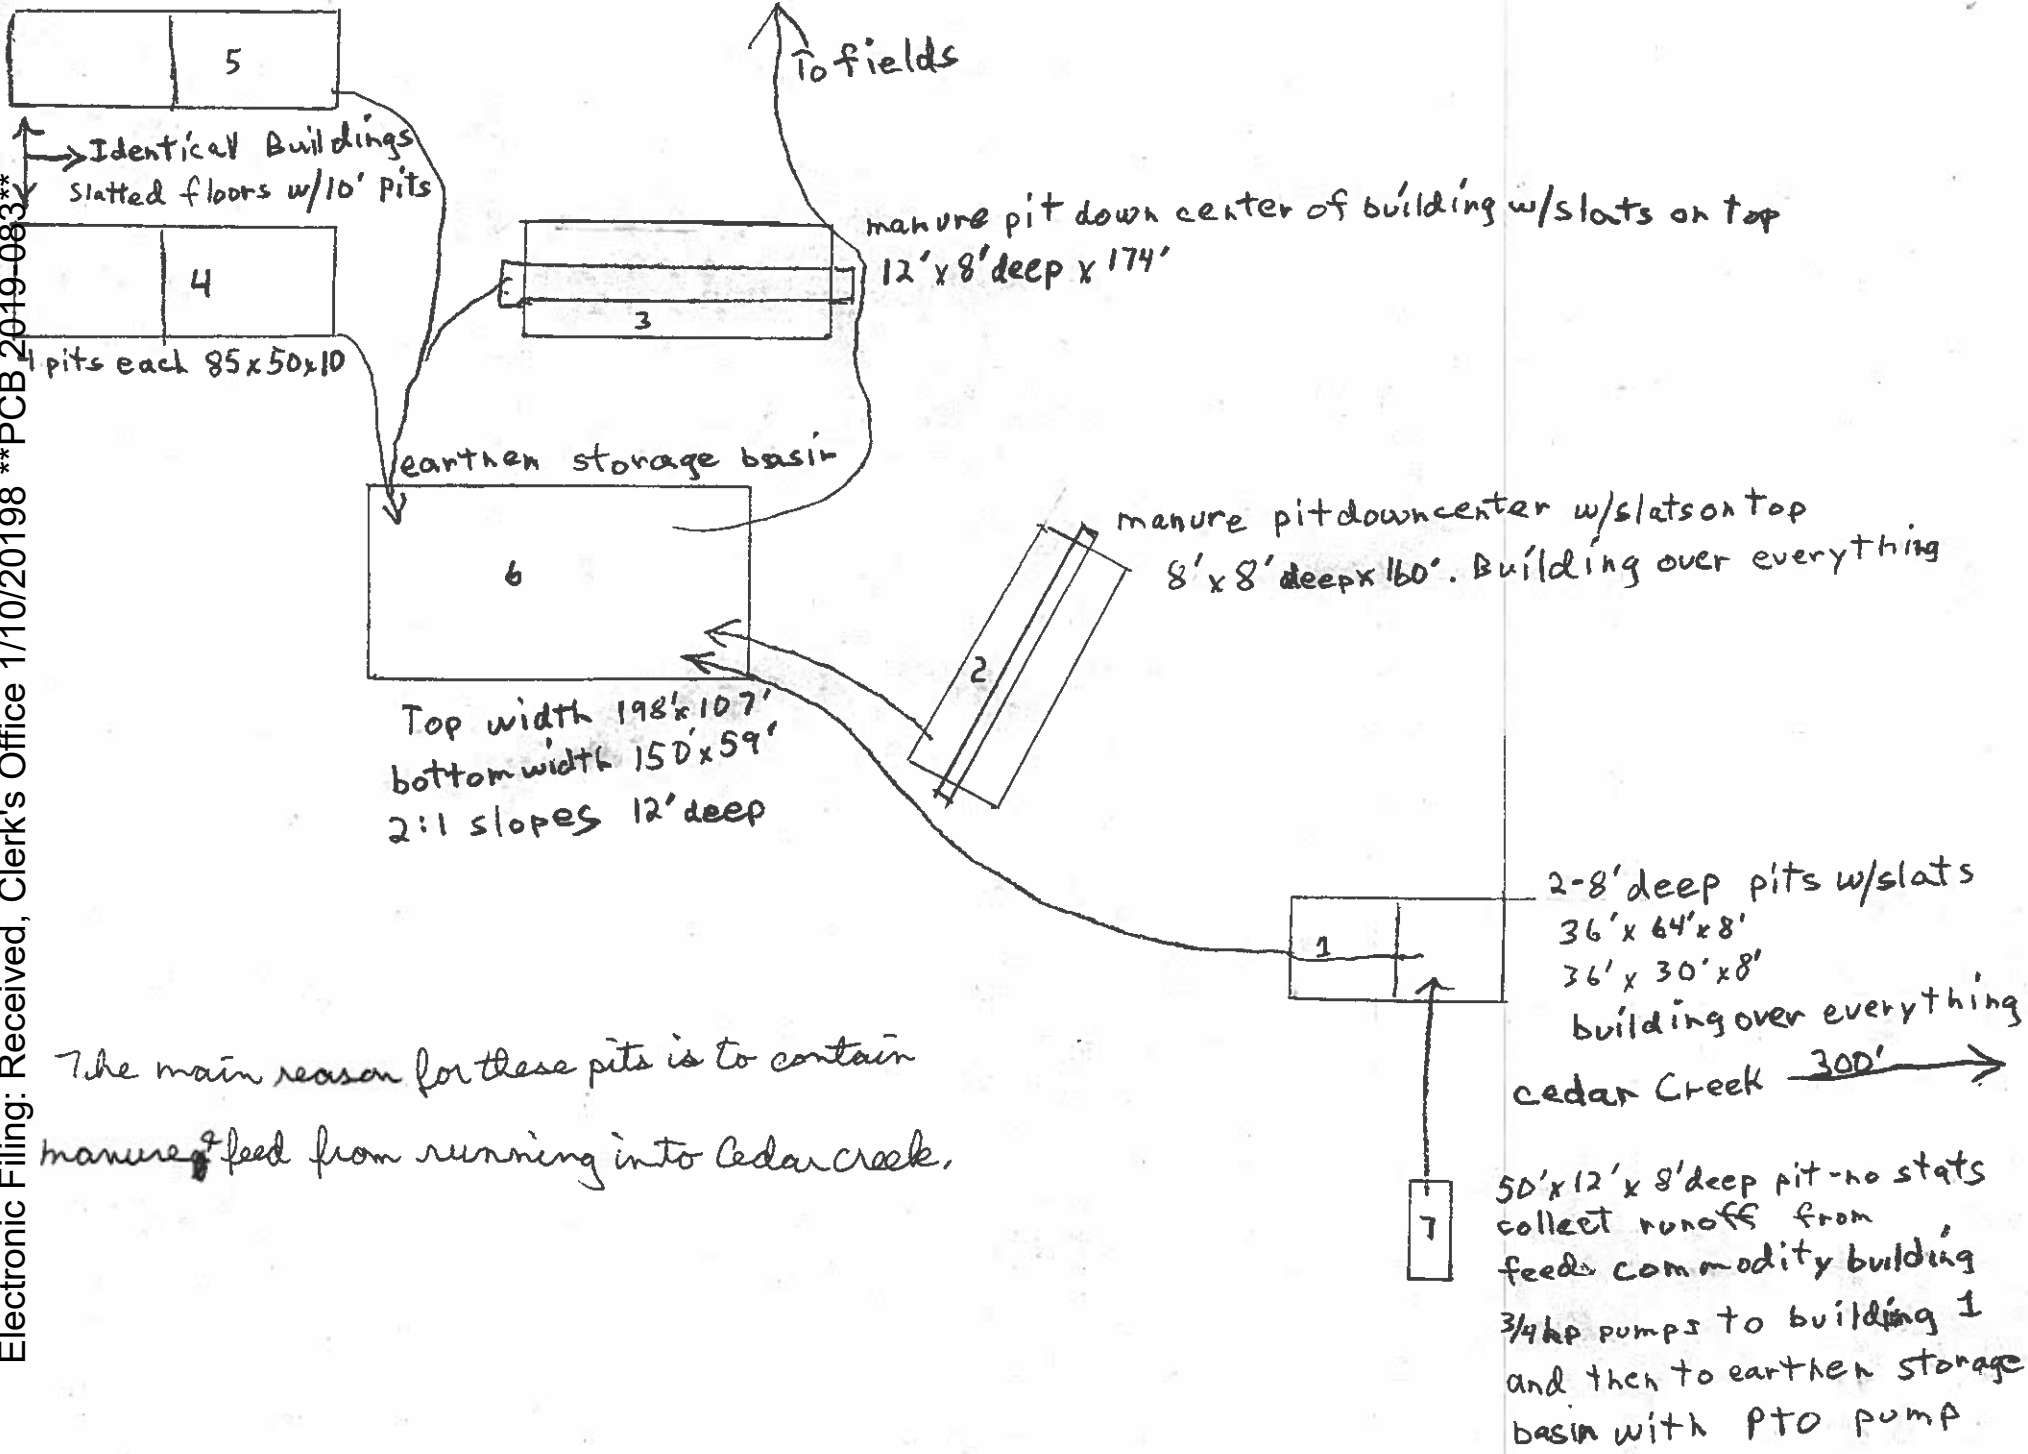

5 Write the location of the pollution control facility.

3568 E. McConnell Rd  
Street address  
Dakota IL 61018  
City State Zip  
Dakota Stephenson  
Township County

6 Write the location's property index number (PIN).

6 14-09-14-200-001

Electronic Filing: Received, Clerk's Office 1/10/20198 \*\*PCB 2019-083\*\*

The main reason for these pits is to contain manure & feed from running into cedar creek.

**Gove, Darren**

**From:** Gove, Darren  
**Sent:** Wednesday, April 25, 2018 10:30 AM  
**To:** 'cattle6600@yahoo.com'  
**Subject:** Meier Land and Cattle LLC TC-138795

Good morning Mr.Meier,

Thanks for taking my call this morning. As discussed I am sending this email to describe what I would like you to do to fix some problems with your tax certification request.

Problem 1: The form is not complete. Please resolve as indicated below:

- Please revise the form to provide additional information on page 2 under "Describe the Pollution Control Facility" to be consistent with what you are requesting and more specific such as 5 concrete manure pits with pumpouts and slat flooring, 1 earthen waste holding basin and 1 reception pit.
- Neatly sketch a diagram showing the flow of livestock waste from the initial animal waste collection or containment area through all pollution control facilities to final disposal on cropland. Include the locations of components such as pumps, pipes, gutter scrapers, manure pits, tanks, slotted floors, holding ponds, lagoons, settling basins, vegetative filters, etc. Briefly describe the major pollution control components on the flow diagram including dimensions (length, width, depth, diameter), construction materials (steel, concrete block, etc.), and size (i.e., 10 H-P centrifugal pump). Identify local streams, lakes, groundwater, or other waters that the pollution control facilities protect from contamination by livestock wastes. Briefly explain how the pollution control facilities prevent livestock wastes from entering these waters.
- Please describe the primary purpose of the pollution control facility(s) that are being requested in the appropriate form block on page 2.
- Complete page 3, all questions and blocks must be filled out.

Problem 2: The Aerial Map exhibit is too busy and cluttered with extraneous information. Please state explicitly in your response that you request this exhibit to be withdrawn from consideration due to inaccuracy of information.

My phone number is below if you would like to discuss or feel free to email. Your revisions may also be submitted by email if that is convenient.

Thank you,

**Darren Gove**

APC Construction Permit Number: _____	Date Issued: _____
APC Operating Permit Number: _____	Date Issued: _____ Exp. Date: _____

Note: Submit copies of all relevant permits issued by local pollution control agencies. (e.g. MSD Construction Permit)

This Agency is authorized to request this information under 415 ILCS 5/4(b)(2012). Disclosure of this information is voluntary and no penalties will result from the failure to provide the information. However, the absence of the information could prevent your application from being processed or could result in denial of your application.

**Manufacturing Process Information:**

Please provide information on the manufacturing process and materials on which pollution control facility is used, including each major piece of equipment associated with the pollution control facility (or low sulfur dioxide emission coal fueled device).  
Description of the Process:

**Materials Used in the Process:**

**Pollution Control Facility Information:**

Please provide a narrative description of the pollution control facility (or low sulfur dioxide emission coal fueled device), and an explanation of why its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility, as well as a narrative description and a process flow diagram describing the pollution control facility. Include an average analysis of the influent and effluent of the control facility stating the collection efficiency, if applicable.

Describe the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

*manure pit*

Describe the Primary Purpose of the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

Identify the statute or regulation (federal or state), or local ordinance, if any, requiring the installation of the subject pollution control facility (or low sulfur dioxide emission coal fueled device).

**Nature of Contaminants or Pollutants:**

List air contaminants or water pollution substances released as effluents to the manufacturing processes. Also list the final disposal of any contaminants removed from the manufacturing processes.

Contaminant or Pollutant	Material Retained, Captured or Recovered	
	Description	Disposal or Use
<i>manure</i>		<i>injected into farmland</i>

Note: Contaminant or pollutant means that which is removed from the process by the pollution control facility.

Point(s) of Waste Water Discharge: <sup>Does</sup> Not Apply

Identify the location of the discharge to the receiving stream. This will typically refer to a source of water pollution but can include water-carried wastes from air pollution control facilities.

Plans and Specifications Attached  Yes  No

Submit Drawings, which clearly show:

- (a) Point(s) of discharge to receiving stream; and
- (b) Sewers and process piping to and from the control facility.

Are contaminants (or residues) collected by the control facility?  Yes  No

Note: If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value dollars reclaimed by the sale or reuse of the collected substances. State the cost of reclamation and related expense.

**Project Status:**

Date Installation Completed: August 10, 2012

Provide the date the pollution control facility was first placed into service and operated. If not, explain.

Status of installation on date of application:

**III. Verification and Signature:**

The following information is submitted in accordance with the Illinois Property Tax Code, as amended, and to the best of my knowledge is true and correct.

**Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))**

**Pollution Control Facility Information:**

Please provide a narrative description of the pollution control facility (or low sulfur dioxide emission coal fueled device), and an explanation of why its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility, as well as a narrative description and a process flow diagram describing the pollution control facility. Include an average analysis of the influent and effluent of the control facility stating the collection efficiency, if applicable.

Describe the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

*manure pit*

Describe the Primary Purpose of the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

Identify the statute or regulation (federal or state), or local ordinance, if any, requiring the installation of the subject pollution control facility (or low sulfur dioxide emission coal fueled device).

**Nature of Contaminants or Pollutants:**

List air contaminants or water pollution substances released as effluents to the manufacturing processes. Also list the final disposal of any contaminants removed from the manufacturing processes.

Contaminant or Pollutant	Material Retained, Captured or Recovered	
	Description	Disposal or Use
<i>manure</i>		<i>injected onto farmland</i>

Note: Contaminant or pollutant means that which is removed from the process by the pollution control facility.

Point(s) of Waste Water Discharge: Does Not Apply

Identify the location of the discharge to the receiving stream. This will typically refer to a source of water pollution but can include water-carried wastes from air pollution control facilities.

Plans and Specifications Attached  Yes  No

Submit Drawings, which clearly show:

(a) Point(s) of discharge to receiving stream; and

(b) Sewers and process piping to and from the control facility.

Are contaminants (or residues) collected by the control facility?  Yes  No

Note: If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value dollars reclaimed by the sale or reuse of the collected substances. State the cost of reclamation and related expense.

**Project Status:**

Date Installation Completed: \_\_\_\_\_

Provide the date the pollution control facility was first placed into service and operated. If not, explain.

Status of installation on date of application:

**III. Verification and Signature:**

The following information is submitted in accordance with the Illinois Property Tax Code, as amended, and to the best of my knowledge is true and correct.

*Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))*
