RECOMMENDATION

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its corrected Recommendation, which replaces the Recommendation filed on June 26, 2013, pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board, 35 Ill. Adm. Code 125.204.

1. On December 3, 2012, the Illinois EPA received a request from Johnson-Pate Pork, Inc. (log number TC-22-12, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.

2. The applicant's address is: Johnson-Pate Port, Inc.
15072 Crego Road
DeKalb, Illinois 60115

3. The proposed water pollution control facilities in this request are located at Section 13, T39N, R4E of the 3rd PM in DeKalb County, at the above street address and consist of the following:

- 35' x 79' x 6' deep concrete manure pits and slotted floor over the pit in Building #1
- 44' x 127' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #2
- 40' x 116' x 2' deep concrete manure pits and slotted floor over the pit in Building #3
- 85' x 29' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #4
- 22' x 29' x 2' deep concrete manure pits and slotted floor over the pit in Building #4
- 6' x 126' x 4' deep concrete manure pits and concrete slotted floor over the pit in Building #5
- 12' x 20' x 8' deep concrete manure pits and slotted floor over the pit in Building #5
- 20' x 39' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #6
- 35' x 155' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #7
- 40' x 139' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #8

THIS FILING IS SUBMITTED ON RECYCLED PAPER

79' x 421' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #9

79' x 401' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #10

29' x 49' x 8' 8' deep concrete manure pits and concrete slotted floor over the pit in Building #11

These pollution control facilities have the primary purpose of collecting, transporting, and/or storing livestock wastes prior to cropland application, and are further described in Exhibit A.

4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2012), defines "pollution control facilities" as:

"any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property."

5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.

6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the

THIS FILING IS SUBMITTED ON RECYCLED PAPER

requested tax certification.

Re: Johnson-Pate Pork, Inc. - Afton Township
Recommendation of Tax Certification
Log # FC-22-12
Property Identification # 11-13-300-011

The Bureau of Water received a request on December 3, 2012 from Johnson-Pate Pork, Inc. for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Robert Johnson
Johnson-Pate Pork, Inc. *JK*
15072 Crego Road
DeKalb, Illinois 60115

Section 13, Township 39N, Range 4 East of the 3rd P.M in DeKalb County

Livestock waste management facilities consisting of:

- 35' x 79' x 6' deep concrete manure pits and slotted floor over the pit in Building #1
- 44' x 127' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #2
- 40' x 116' x 2' deep concrete manure pits and slotted floor over the pit in Building #3
- 85' x 29' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #4
- 22' x 29' x 2' deep concrete manure pits and slotted floor over the pit in Building #4
- 6' x 126' x 4' deep concrete manure pits and concrete slotted floor over the pit in Building #5
- 12' x 20' x 8' deep concrete manure pits and slotted floor over the pit in Building #5
- 20' x 39' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #6
- 35' x 155' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #7
- 40' x 139' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #8
- 79' x 421' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #9
- 79' x 401' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #10
- 29' x 49' x 8' x 8' deep concrete manure pits and concrete slotted floor over the pit in Building #11

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

Page No. 2

Log No. TC-22-12

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Jamie Cowles at 217-782-0610.

	Signature	Title

INSTRUCTIONS	Sec. G INSTRUCTIONS FOR COMPILING AND FILING APPLICATION			
	General: Separate applications must be completed for each control facility claimed. Do not mix types (water and air). Where both air and water operations are related, file two applications. If attachments are needed, record them consecutively on an index sheet.			
	Sec. A	Information refers to applicant as listed in the tax records and the person to be contacted for further details or for inspection of facilities. Define facility location by street address or legal description. A plat map location is required for facilities located outside of municipal boundaries. The property identification number is required.		
	Sec. B	Self-explanatory. Submit copies of all permits issued by local pollution control agencies. (e.g. MSD Construction Permit)		
	Sec. C	Refers to manufacturing processes or materials on which pollution control facility is used.		
	Sec. D	Narrative description of the pollution control facility, indicating that its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility. State permit number, date, and agency issuing permit. A narrative description and a process flow diagram describing the <u>pollution control facility</u> . Include a listing of each major piece of equipment included in the claimed fair cash value for real property. Include an <u>average</u> analysis of the influent and effluent of the control facility stating the collection efficiency.		
	Sec. E	List air contaminants, or water pollution substances released as effluents to the manufacturing processes. List also the final disposal of any contaminants removed from the manufacturing processes. Item (1) - Refers to pollutants and contaminants removed from the process by the pollution control facility. Item (2) - Refers to water pollution but can apply to water-carried wastes from air pollution control facilities. Submit drawings, which clearly show (a) Point(s) of discharge to receiving stream, and (b) Sewers and process piping to and from the control facility. Item (3) - If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value in dollars reclaimed by sale or reuse of the collected substances. State the cost of reclamation and related expense. Item (4) - State the date which the pollution control facility was first placed in service and operated. If not, explain. Item (5) - This information is essential to the certification and assessment actions. This accounting data must be completed to activate project review prior to certification by this Agency.		
	Sec. F	Self-explanatory. Signature must be a corporate authorized signature.

Facility Evaluation Unit
P O Box 19276
Springfield, IL 62794-9276

Enclosed are applications for our two swine production facilities to certify the manure storage pits as pollution control facilities.

Both sites are identified on the included Afton Township map and are both located in the watershed of the Little Rock Creek, which passes through the Afton Forest Preserve, located ½ mile from our McGirr Road facility and one mile from our Crego Road facility. Our manure storage facilities are utilized to store manure until it can be applied to crop land and prevent any discharge that might end up in the Little Rock Creek.

~~McGirr Road facility (11-26-300-013)~~

All buildings utilize pull-plug pits or flush gutters. All manure is pumped into the first stage (#37 on the included aerial photo) of our lagoon through underground PVC piping. The underground piping is depicted on the aerial photo. The first stage bacteria digest most of the manure before it flows into the second stage (#38). Another pump then returns effluent from the second stage back to buildings 31, 33, 34, and 36 where it is used to fill flush tanks or to recharge pull-plug pits. The nursery (#35) has pull-plug pits; the manure is pumped to the lagoon first stage. In the spring and/or fall of each year, the lagoon effluent is pumped via a dragline system and injected into nearby fields.

X Crego Road facility (11-13-300-011):

All buildings utilize poured concrete pits under each building. Manure is stored until application each fall after harvest and/or each spring prior to planting. Johnson Farms, owned by the same owners of Johnson-Pate-Pork, operate 2077 acres of crop land. Manure is hauled to the appropriate fields each year as documented in our annually updated manure management plan. We utilize a PTO powered transfer pump, two semi tankers and an applicator

tank wagon equipped with GPS and a manure flowmeter to accurately apply the appropriate agronomic rate of manure per acre. Manure is applied to each field about every four years.

Sincerely,

A handwritten signature in black ink that reads "Bob Johnson". The signature is written in a cursive style with a large, prominent initial "B".

Bob Johnson,
President, Johnson-Pate Pork, Inc.
