Subject: [External] Dynegy-Vistra Proposed rule change, case number R2018-20.
Date: Sunday, February 17, 2019 8:05:55 AM

Dear IL Pollution Control Board Assistant Clerk,

I am totally against allowing Dynegy to increase its pollution levels. I've seen first hand the effects of family and friends living in high pollution areas and suffering from COPD and even lung cancer. Big corporations should be made to operate in a manner that is not detrimental to public health. Profit should never be put before human health. Isn't that why the EPA was created?? Today we find ourselves wondering whose side the EPA is on. Our environmental standards should be increasingly more stringent and polluters need to be made to pay for their disregard of human life and suffering.

Dear Clerk Brown:

Please accept my comment on the Dynegy-Vistra Proposed rule change, case number R2018-20.

I am writing in solidarity with communities members who are rightly concerned about their air quality worsening under the current proposal. While the PCB made changes to Dynegy-Vistra's request, those changes do not go far enough and ultimately still allow Dynegy-Vistra to increase its dangerous coal pollution by 40%. These changes to state air protections are unnecessary and the current MPS rate-based standard should be kept in place.

No Illinois community, like Peoria, should be a sacrifice zone with uncontrolled plants. Instead of weakening air regulations, Illinois should be leading in environmental health protections for our residents by strengthening existing rules like the MPS to require polluting coal plants to install modern pollution controls.

Thank you for this opportunity to comment,

Sincerely,

Kathy Guerra
