Subject: Will County 2S Pond - Floor Core Sample

Aron,

It looks like the existing Poz-o-pac floor is different then the site drawings because of this we will need to take two core samples to determine what we actually have, NRT would like one sample to be taken in the center and another sample to be taken near the edge of the pond. Let me know if Brieser can support this work and what the cost will be, if Brieser can not support I can bring in another contractor to perform the work just let me know.

Aron,

Here is a weld strip detail. Please let me know if you need more information.

Thanks,

Mac Riemenschneider
