Analytical Report for STAT Work Order: 15050878 Revision 0

RE: 3892-300-03-02, 300 West - Marengo, Marengo, IL

Dear Carl Dawes:

STAT Analysis received 8 samples for the referenced project on 5/27/2015 4:40:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Craig Chawla
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.Tl report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall beco property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 15050243 Revision 1

RE: 3892-300-03-02, 300 West Marengo, Marengo, IL

Dear Carl Dawes:

STAT Analysis received 6 samples for the referenced project on 5/8/2015 7:25:00 PM. The analytical results are presented in the following report.

This report is revised to reflect changes made after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Craig Chawla
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.Tl report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall beco property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

STAT Analysis Corporation

Date: *June 30, 2015*

CLIENT: Weaver Consultants Group
Project: 3892-300-03-02, 300 West Marengo, Marengo, IL
Work Order: 15050243 Revision 1

CASE NARRATIVE

The Continuing Calibration Verification (CCV) for the SPLP had recovery outside of control limits for Sodium (110.6% recovery, QC Limits 90-110%).

Analytical Report for STAT Work Order: 15060743 Revision 0

RE: 3892-300-03-02, 300 West Marengo, Marengo, IL

Dear Carl Dawes:

STAT Analysis received 5 samples for the referenced project on 6/18/2015 5:15:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Victoria Young
Project Manager

Analytical Report for STAT Work Order: 15060644 Revision 0

RE: 3892-300-03-02, 300 West Marengo, Marengo, IL

Dear Carl Dawes:

STAT Analysis received 2 samples for the referenced project on 6/16/2015 4:39:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Victoria Young
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 15060637 Revision 0

RE: 3892-300-03-02, 300 West Marengo, Marengo

Dear Carl Dawes:

STAT Analysis received 7 samples for the referenced project on 6/16/2015 4:39:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Victoria Young
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 15090604 Revision 0

RE: 3892-300-03-04, 300 West-Marengo, Marengo, IL

Dear Sarah McGinnis:

STAT Analysis received 3 samples for the referenced project on 9/18/2015 5:24:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone. This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 15100569 Revision 0

RE: 3892-300-03-04, 300 West Marengo, Marengo

Dear Carl Dawes:

STAT Analysis received 2 samples for the referenced project on 10/16/2015 6:30:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Craig,

Please filter the following water samples and analyze for the metals (dissolved) indicated with a standard turnaround time.

1. MW-94 (Lab ID 15100569): Aluminum, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
2. MW-125 (Lab ID 15100569): Manganese

If you should have any questions concerning the aforementioned, please feel free to contact me at 630-717-4848.

Regards,

Carl

Analytical Report for STAT Work Order: 15090604 Revision 1

RE: 3892-300-03-04, 300 West-Marengo, Marengo, IL

Dear Carl Dawes:

STAT Analysis received 3 samples for the referenced project on 9/18/2015 5:24:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Craig,

Pursuant to our discussion yesterday, please filter the following water samples and analyze for the metals (dissolved) indicated with a standard turnaround time.

1. MW-26 (Lab ID 15090604): Aluminum, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
2. MW-27 (Lab ID 15090604): Aluminum, Iron, Lead, Manganese, and Vanadium
3. MW-30 (Lab ID 15050618): Aluminum, Iron, Lead, Manganese, Nickel, Thallium and Vanadium
4. MW-31 (Lab ID 15050618): Aluminum, Antimony, Arsenic, Beryllium, Cadmium, Chromium, Iron, Lead, Manganese, Nickel, Vanadium
5. MW-32 (Lab ID 15060637): Aluminum, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
6. MW-33 (Lab ID 15060637): Aluminum, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
7. MW-35 (Lab ID 15060644): Aluminum, Chromium, Iron, Lead, Manganese, Nickel and Vanadium
8. MW-41 (Lab ID 15050618): Aluminum, Arsenic, Iron, Lead, and Manganese, Nickel, Vanadium.
9. MW-46 (Lab ID 15090604): Aluminum, Iron, Lead, and Manganese.

If you should have any questions concerning the aforementioned, please feel free to contact me at 630-717-4848.

Regards,

Carl

Analytical Report for STAT Work Order: 15100752 Revision 0

RE: 300 West, Marengo

Dear Bob Jaydos:

STAT Analysis received 11 samples for the referenced project on 10/22/2015 4:45:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Justice Kwateng
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 15100490 Revision 0

RE: 630-673-1692, 300 West, Marengo

Dear Bob Jaydos:

STAT Analysis received 64 samples for the referenced project on 10/14/2015 6:50:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Craig Chawla
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

STAT Analysis Corporation

Date: *November 11, 2015*

CLIENT: 300 W. LLC
Project: 630-673-1692, 300 West, Marengo
Work Order: 15100490 Revision 0

CASE NARRATIVE

Sample GP422- 23 To 25 (15100490-031) has Acetone reported with an "E" flag, exceeding the calibration curve range. The medium level dilution was below the reporting level. The detected value is reported.

Analytical Report for STAT Work Order: 15100658 Revision 0

RE: 3892-300-03-04, 300 West-Marengo, Marengo Illinois

Dear Sarah McGinnis:

STAT Analysis received 2 samples for the referenced project on 10/20/2015 5:40:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Craig Chawla
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 15100714 Revision 0

RE: 3892-300-03-04, 300 West Marengo, Marengo, IL

Dear Sarah McGinnis:

STAT Analysis received 1 sample for the referenced project on 10/21/2015 5:12:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Craig Chawla
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

CASE NARRATIVE

For sample MW-34 (15100714-001), hold times were exceeded for the following parameters:
SVOC: 2 days
1,4-Dioxane (8270C): 7 days
Pesticides: 3 days
The request for analysis was made after the hold time had expired.

Analytical Report for STAT Work Order: 15100572 Revision 0

RE: 630-673-1692, 300 West, Marengo

Dear Bob Jaydos:

STAT Analysis received 40 samples for the referenced project on 10/16/2015 6:30:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Justice Kwateng
Project Manager

Work Order: 15100572 Revision 0

CASE NARRATIVE

Sample GP386-38 to 40 (15100572-009) has 1,1-Dichloroethane reported with an "E" flag, exceeding the calibration curve range. The medium level dilution was below the reporting level. The detected value is reported.

Analytical Report for STAT Work Order: 15100609 Revision 0

RE: 630-673-1692, 300 West, Marengo

Dear Bob Jaydos:

STAT Analysis received 23 samples for the referenced project on 10/19/2015 5:35:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Justice Kwateng
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone. This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 15100710 Revision 0

RE: 300 West, Marengo, IL

Dear Bob Jaydos:

STAT Analysis received 18 samples for the referenced project on 10/21/2015 5:12:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 15100528 Revision 1

RE: 3892-300-03-04, 300 West-Marengo, Marengo, IL

Dear Sarah McGinnis:

STAT Analysis received 2 samples for the referenced project on 10/15/2015 6:50:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Subject: FW: RE: 3892-300-03 -- 300 West - Marengo, IL

Craig,

Pursuant to our discussions, please filter the following water samples and analyze for the dissolved metals indicated with a standard turnaround time.

1. MW-5 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
2. MW-6 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
3. MW-7 (Lab ID 15100565): Iron, Manganese
4. MW-25 (Lab ID 15100565): Aluminum, Arsenic, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, Thallium, and Vanadium
5. MW-28 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
6. MW-29 (Lab ID 15100565): Aluminum, Arsenic, Barium, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
7. MW-36 (Lab ID 15100528): Aluminum, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
8. MW-37 (Lab ID 15100528): Aluminum, Iron, Lead, Manganese, and Nickel
9. MW-44 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese
10. MW-79 (Lab ID 15100608): Aluminum, Arsenic, Iron, Lead, Manganese, and Vanadium
11. MW-80 (Lab ID 15100608): Aluminum, Iron, Lead, Manganese, Selenium, and Vanadium
12. MW-89 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese
13. MW-90 (Lab ID 15100608): Aluminum, Iron, Lead, Manganese
14. MW-97 (Lab ID 15100657): Aluminum, Arsenic, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium

If you should have any questions concerning the aforementioned, please feel free to contact me at 630-717-4848.

Regards,

Carl

Analytical Report for STAT Work Order: 15100565 Revision 1

RE: 3892-300-03-04, 300 West Marengo, Marengo

Dear Carl Dawes:

STAT Analysis received 8 samples for the referenced project on 10/16/2015 6:30:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Craig,

Pursuant to our discussions, please filter the following water samples and analyze for the dissolved metals indicated with a standard turnaround time.

1. MW-5 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
2. MW-6 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
3. MW-7 (Lab ID 15100565): Iron, Manganese
4. MW-25 (Lab ID 15100565): Aluminum, Arsenic, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, Thallium, and Vanadium
5. MW-28 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
6. MW-29 (Lab ID 15100565): Aluminum, Arsenic, Barium, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
7. MW-36 (Lab ID 15100528): Aluminum, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
8. MW-37 (Lab ID 15100528): Aluminum, Iron, Lead, Manganese, and Nickel
9. MW-44 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese
10. MW-79 (Lab ID 15100608): Aluminum, Arsenic, Iron, Lead, Manganese, and Vanadium
11. MW-80 (Lab ID 15100608): Aluminum, Iron, Lead, Manganese, Selenium, and Vanadium
12. MW-89 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese
13. MW-90 (Lab ID 15100608): Aluminum, Iron, Lead, Manganese
14. MW-97 (Lab ID 15100657): Aluminum, Arsenic, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium

If you should have any questions concerning the aforementioned, please feel free to contact me at 630-717-4848.

Regards,

Carl

Analytical Report for STAT Work Order: 15100608 Revision 1

RE: 3892-300-03-04, 300 West Marengo, Marengo, IL

Dear Sarah McGinnis:

STAT Analysis received 3 samples for the referenced project on 10/19/2015 5:35:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Subject: FW: RE: 3892-300-03 -- 300 West - Marengo, IL

Craig,

Pursuant to our discussions, please filter the following water samples and analyze for the dissolved metals indicated with a standard turnaround time.

1. MW-5 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
2. MW-6 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
3. MW-7 (Lab ID 15100565): Iron, Manganese
4. MW-25 (Lab ID 15100565): Aluminum, Arsenic, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, Thallium, and Vanadium
5. MW-28 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
6. MW-29 (Lab ID 15100565): Aluminum, Arsenic, Barium, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
7. MW-36 (Lab ID 15100528): Aluminum, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
8. MW-37 (Lab ID 15100528): Aluminum, Iron, Lead, Manganese, and Nickel
9. MW-44 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese
10. MW-79 (Lab ID 15100608): Aluminum, Arsenic, Iron, Lead, Manganese, and Vanadium
11. MW-80 (Lab ID 15100608): Aluminum, Iron, Lead, Manganese, Selenium, and Vanadium
12. MW-89 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese
13. MW-90 (Lab ID 15100608): Aluminum, Iron, Lead, Manganese
14. MW-97 (Lab ID 15100657): Aluminum, Arsenic, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium

If you should have any questions concerning the aforementioned, please feel free to contact me at 630-717-4848.

Regards,

Carl

Analytical Report for STAT Work Order: 15100752 Revision 1

RE: 300 West, Marengo

Dear Bob Jaydos:

STAT Analysis received 11 samples for the referenced project on 10/22/2015 4:45:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Michelle Budniak
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Subject: RE: 3892-300-03 -- 300 West - Marengo, IL (SPLP Analyses Request)

Craig,

Pursuant to our discussions, please analyze the following soil samples for the SPLP metals indicated with a standard turnaround time.

1. GP-380 (1-3) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
2. GP-380 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
3. GP-380 (13-15) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
4. GP-382 (1-3) (Lab ID 15100861): Beryllium, Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
5. GP-382 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
6. GP-382 (13-15) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
7. GP-396 (1-3) (Lab ID 15100752): Arsenic
8. GP-396 (5-7) (Lab ID 15100752): Arsenic
9. GP-418 (1-3) (Lab ID 15100825): Aluminum, Selenium, Silver, Sodium, Thallium
10. GP-418 (5-7) (Lab ID 15100825): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
11. GP-430 (1-3) (Lab ID 15100825): Aluminum, Beryllium, Chromium, Cobalt, Iron, Selenium, Silver, Thallium
12. GP-430 (5-7) (Lab ID 15100825): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
13. GP-431 (1-3) (Lab ID 15100825): Arsenic
14. GP-432 (6-8) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
15. GP-432 (12-14) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
16. GP-433 (6-8) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
17. GP-433 (12-14) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
18. GP-434 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
19. GP-434 (12-14) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
20. GP-435 (6-8) (Lab ID 15100861): Aluminum, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Magnesium, Selenium, Silver, Sodium, Thallium, Vanadium
21. GP-435 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
22. GP-436 (6-8) (Lab ID 15100861): Selenium, Silver, Sodium, Thallium
23. GP-436 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
24. GP-437 (6-8) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
25. GP-437 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
26. GP-438 (1-3) (Lab ID 15100825): Aluminum, Cobalt, Copper, Iron, Lead, Potassium, Selenium, Silver, Sodium, Thallium
27. GP-438 (5-7) (Lab ID 15100825): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium

Analytical Report for STAT Work Order: 15100657 Revision 1

RE: 3892-300-03-04, 300 West-Marengo, Marengo Illinois

Dear Sarah McGinnis:

STAT Analysis received 1 sample for the referenced project on 10/20/2015 5:40:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone. This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Subject: FW: RE: 3892-300-03 -- 300 West - Marengo, IL

Craig,

Pursuant to our discussions, please filter the following water samples and analyze for the dissolved metals indicated with a standard turnaround time.

1. MW-5 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
2. MW-6 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
3. MW-7 (Lab ID 15100565): Iron, Manganese
4. MW-25 (Lab ID 15100565): Aluminum, Arsenic, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, Thallium, and Vanadium
5. MW-28 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese, and Vanadium
6. MW-29 (Lab ID 15100565): Aluminum, Arsenic, Barium, Beryllium, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
7. MW-36 (Lab ID 15100528): Aluminum, Chromium, Iron, Lead, Manganese, Nickel, and Vanadium
8. MW-37 (Lab ID 15100528): Aluminum, Iron, Lead, Manganese, and Nickel
9. MW-44 (Lab ID 15100565): Aluminum, Iron, Lead, Manganese
10. MW-79 (Lab ID 15100608): Aluminum, Arsenic, Iron, Lead, Manganese, and Vanadium
11. MW-80 (Lab ID 15100608): Aluminum, Iron, Lead, Manganese, Selenium, and Vanadium

Analytical Report for STAT Work Order: 15100825 Revision 1

RE: 300 West, Marengo

Dear Bob Jaydos:

STAT Analysis received 44 samples for the referenced project on 10/23/2015 5:25:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Michelle Budniak
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Qualifiers:
ND - Not Detected at the Reporting Limit
J - Analyte detected below quanititation limits
B - Analyte detected in the associated Method Blank
HT - Sample received past holding time
* - Non-accredited parameter
RL - Reporting / Quantitation Limit for the analysis
S - Spike Recovery outside accepted recovery limits
R - RPD outside accepted recovery limits
E - Value above quantitation range
H - Holding time exceeded

To: Craig Chawla
Subject: RE: 3892-300-03 -- 300 West - Marengo, IL (SPLP Analyses Request)

Craig,

It appears that the samples from GP-382 were listed on two chains-of-custody. The samples from GP-382 were analyzed for TCL. The Lab ID should be 15100825.

Thanks,

Carl

Subject: RE: 3892-300-03 -- 300 West - Marengo, IL (SPLP Analyses Request)

Carl,

For the following samples, we did not perform total metals. I just wanted to make sure you wanted SPLP metals on these samples?

4. GP-382 (1-3) (Lab ID 15100861): Beryllium, Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
5. GP-382 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
6. GP-382 (13-15) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium

Subject: RE: 3892-300-03 -- 300 West - Marengo, IL (SPLP Analyses Request)

Craig,

Pursuant to our discussions, please analyze the following soil samples for the SPLP metals indicated with a standard turnaround time.

1. GP-380 (1-3) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
2. GP-380 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
3. GP-380 (13-15) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
4. GP-382 (1-3) (Lab ID 15100861): Beryllium, Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
5. GP-382 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
6. GP-382 (13-15) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
7. GP-396 (1-3) (Lab ID 15100752): Arsenic
8. GP-396 (5-7) (Lab ID 15100752): Arsenic
9. GP-418 (1-3) (Lab ID 15100825): Aluminum, Selenium, Silver, Sodium, Thallium
10. GP-418 (5-7) (Lab ID 15100825): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
11. GP-430 (1-3) (Lab ID 15100825): Aluminum, Beryllium, Chromium, Cobalt, Iron, Selenium, Silver, Thallium
12. GP-430 (5-7) (Lab ID 15100825): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
13. GP-431 (1-3) (Lab ID 15100825): Arsenic
14. GP-432 (6-8) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
15. GP-432 (12-14) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
16. GP-433 (6-8) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
17. GP-433 (12-14) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
18. GP-434 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
19. GP-434 (12-14) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
20. GP-435 (6-8) (Lab ID 15100861): Aluminum, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Magnesium, Selenium, Silver, Sodium, Thallium, Vanadium
21. GP-435 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
22. GP-436 (6-8) (Lab ID 15100861): Selenium, Silver, Sodium, Thallium
23. GP-436 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
24. GP-437 (6-8) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
25. GP-437 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
26. GP-438 (1-3) (Lab ID 15100825): Aluminum, Cobalt, Copper, Iron, Lead, Potassium, Selenium, Silver, Sodium, Thallium

27. GP-438 (5-7) (Lab ID 15100825): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium

If you should have any questions concerning the aforementioned, please feel free to contact me at 630-717-4848.

Regards,

Carl

Analytical Report for STAT Work Order: 15100861 Revision 2

RE: 300 N. West, Marengo

Dear Bob Jaydos:

STAT Analysis received 31 samples for the referenced project on 10/26/2015 2:28:00 PM. The analytical results are presented in the following report.

This report is revised to reflect additional analysis requested after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Craig Chawla
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

CASE NARRATIVE

Due to sample matrix, the SVOC/PNA results for sample GP416 1 - 3 (15100861-016) are reported with elevated reporting limits.

The Metals Initial Calibration Verification (ICV) had recovery outside of control limits for the following elements:
Potassium: 111% recovery (QC Limits 90-110%)
Sodium: 111% recovery (QC Limits 90-110%)

Subject: RE: 3892-300-03 -- 300 West - Marengo, IL (SPLP Analyses Request)

Craig,

Pursuant to our discussions, please analyze the following soil samples for the SPLP metals indicated with a standard turnaround time.

1. GP-380 (1-3) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
2. GP-380 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
3. GP-380 (13-15) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
4. GP-382 (1-3) (Lab ID 15100861): Beryllium, Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
5. GP-382 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
6. GP-382 (13-15) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
7. GP-396 (1-3) (Lab ID 15100752): Arsenic
8. GP-396 (5-7) (Lab ID 15100752): Arsenic
9. GP-418 (1-3) (Lab ID 15100825): Aluminum, Selenium, Silver, Sodium, Thallium
10. GP-418 (5-7) (Lab ID 15100825): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
11. GP-430 (1-3) (Lab ID 15100825): Aluminum, Beryllium, Chromium, Cobalt, Iron, Selenium, Silver, Thallium
12. GP-430 (5-7) (Lab ID 15100825): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
13. GP-431 (1-3) (Lab ID 15100825): Arsenic
14. GP-432 (6-8) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
15. GP-432 (12-14) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
16. GP-433 (6-8) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
17. GP-433 (12-14) (Lab ID 15100861): Copper, Selenium, Silver, Sodium, Thallium
18. GP-434 (6-8) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
19. GP-434 (12-14) (Lab ID 15100861): Calcium, Magnesium, Selenium, Silver, Sodium, Thallium
20. GP-435 (6-8) (Lab ID 15100861): Aluminum, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Magnesium, Selenium, Silver, Sodium, Thallium, Vanadium
21. GP-435 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
22. GP-436 (6-8) (Lab ID 15100861): Selenium, Silver, Sodium, Thallium
23. GP-436 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
24. GP-437 (6-8) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
25. GP-437 (12-14) (Lab ID 15100861): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium
26. GP-438 (1-3) (Lab ID 15100825): Aluminum, Cobalt, Copper, Iron, Lead, Potassium, Selenium, Silver, Sodium, Thallium
27. GP-438 (5-7) (Lab ID 15100825): Calcium, Magnesium, Potassium, Selenium, Silver, Sodium, Thallium

Analytical Report for STAT Work Order: 15120413 Revision 0

RE: 3892-300-03-04, 300 West Marengo, Marengo, IL

Dear Carl Dawes:

STAT Analysis received 1 sample for the referenced project on 12/14/2015 5:50:00 PM. The analytical results are presented in the following report.

All analyses were performed in accordance with the requirements of 35 IAC Part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Frank Capoccia
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Analytical Report for STAT Work Order: 16010754 Revision 1

RE: Marengo, IL

Dear Bob Jaydos:

STAT Analysis received 4 samples for the referenced project on 1/29/2016 5:30:00 PM. The analytical results are presented in the following report.

This report is revised to reflect changes made after the last report revision.

All analyses were performed in accordance with the requirements of 35 IAC part 186 / NELAC standards. Analyses were performed in accordance with methods as referenced on the analytical report. Those analytical results expressed on a dry weight basis are also noted on the analytical report.

All analyses were performed within established holding time criteria, and all Quality Control criteria met EPA or laboratory specifications except when noted in the Case Narrative or Analytical Report. If required, an estimate of uncertainty for the analyses can be provided. A listing of accredited methods/parameters can also be provided.

Thank you for the opportunity to serve you and I look forward to working with you in the future. If you have any questions regarding the enclosed materials, please contact me at (312) 733-0551.

Sincerely,

Craig Chawla
Project Manager

The information contained in this report and any attachments is confidential information intended only for the use of the individual or entities named above. The results of this report relate only to the samples tested. If you have received this report in error, please notify us immediately by phone.This report shall not be reproduced, except in its entirety, unless written approval has been obtained from the laboratory. This analytical report shall become property of the Customer upon payment in full. Otherwise, STAT will be under no obligation to support, defend or discuss the analytical report.

Groundwater Sampling Field Form

Date: 4/1/2015

Site: 300 West Marengo **Location:** Marengo IL

Project # 3892-300-03

Name of Person(s) Sampling: S. McGInnis **Title:**

Monitoring Well: MW - 102 Well Gradient:

Top of the Procover: MSL Top of PVC: MSL Ground Surface: MSL

GW Depth (from top of PVC): FT MSL Total Well Depth: 30 FT MSL

Water Volume in Casing: 2.4 Gal Well Diameter (in.): 2

Total Volume Purged: 78 Gallons Well Bailed Dry? (Y/N)

Purge Equipment:

Field Meters Myron

Field Equipment Method of Decontamination Liquinox Bath

Sample Appearance:

Sampling Time : 1045 - 1105

Field Measurements:	#1	#2	#3	#4	#5	#6	
Temp	9.7	9.9	10.2	10.1	10.2		°C
SC	615.2	614.6	617.1	621.7	623.5		umhos/cm
pH	7.78	7.73	7.64	7.72	7.86		std. units
DO							ppm
Eh							mV
Time							

Well Recharge: (Poor ----Fair-----Very Good)

Weather Conditions:

Skies: Temp: °F Precipitation

Wind:

Notes / Observations:

Site: 300 West Marengo **Location:** Marengo IL

Project # 3892-300-03

Name of Person(s) Sampling: S. McGInnis **Title:**

Monitoring Well: MW - 103 Well Gradient:

Top of the Procover: MSL Top of PVC: MSL Ground Surface: MSL

GW Depth (from top of PVC): FT MSL Total Well Depth: 50 FT MSL

Water Volume in Casing: 24 Gal Well Diameter (in.): 2

Total Volume Purged: 75 Gallons Well Bailed Dry? (Y/N)

Purge Equipment: Bailer-Sample/Trash Pump- Disposable

Field Meters Myron

Field Equipment Method of Decontamination Liquinox Bath

Sample Appearance:

Sampling Time : 0900 - 0930

Field Measurements:	#1	#2	#3	#4	#5	#6	
Temp	708	8.3	8.8	8.8	8.5	8.6	°C
SC	570.1	570.8	570.9	572.3	575.3	578.5	umhos/cm
pH	8.15	7.93	7.79	7.85	7.93	7.88	std. units
DO							ppm
Eh							mV
Time							

Well Recharge: (Poor ----Fair-----Very Good) Moderate

Weather Conditions:

Skies: Clear Temp: 38 °F Precipitation N/A

Wind:

RE: Drinking Water Analysis - Marengo

Dear Bill Lennon:

Suburban Laboratories, Inc. received 19 sample(s) on 1/21/2015 for the analyses presented in the following report.

All data for the associated quality control (QC) met EPA, method, or internal laboratory specifications except where noted in the case narrative. If you are comparing these results to external QC specifications or compliance limits and have any questions, please contact us.

This final report of laboratory analysis consists of this cover letter, case narrative, analytical report, dates report, and any accompanying documentation including, but not limited to, chain of custody records, raw data, and letters of explanation or reliance. This report may not be reproduced, except in full, without the prior written approval of Suburban Laboratories, Inc.

If you have any questions regarding these test results, please call me at (708) 544-3260.

Sincerely,

Kelly Culhane

Case Narrative

Client: Environmental Group Services Limited
Project: Drinking Water Analysis - Marengo
WorkOrder: 1501C13
Temperature of samples upon receipt at SLI: 6 C

Date: February 02, 2015
PO #:
QC Level:
Chain of Custody #: EV

General Comments:
- All results reported in wet weight unless otherwise indicated. (dry = Dry Weight)
- Sample results relate only to the analytes of interest tested and to sample as received by the laboratory.
- Environmental compliance sample results meet the requirements of 35 IAC Part 186 unless otherwise indicated.
- Waste water analysis follows the rules set forth in 40 CFR part 136 except where otherwise noted.
- Accreditation by the State of Illinois is not an endorsement or a guarantee of the validity of data generated.
- For more information about the laboratories' scope of accreditation, please contact us at (708) 544-3260 or the Agency at (217) 782-6455.
- All water analyses that are required to be performed in the field (e.g., pH, residual chlorine, sulfite, temperature, etc.) but are analyzed in the lab are identified as "in lab" and are considered past holding time. Following industry practices these results do not contain an "H" flag but are qualified as being analyzed in the lab.

Abbreviations:
- Reporting Limit: The concentration at which an analyte can be routinely detected on a day to day basis, and which also meets regulatory and client needs.
- Quantitation Limit: The lowest concentration at which results can be accurately quantitated.
- J: The analyte was positively identified above our Method Detection Limit and is considered detectable and usable; however, the associated numerical value is the approximate concentration of the analyte in the sample.
- ATC: Automatic Temperature Correction. - TNTC: Too Numerous To Count
- TIC: Tentatively Identified Compound (GCMS library search identification, concentration estimated to nearest internal standard).
- SS (Surrogate Standard): Quality control compound added to the sample by the lab.

Method References:
For a complete list of method references please contact us.
- E: USEPA Reference methods
- SW: USEPA, Test Methods for Evaluating Solid Waste (SW-846)
- M: Standard Methods for the Examination of Water and Wastewater
- USP: Latest version of United States Pharmacopeia

Workorder Specific Comments:

G = Samples subcontracted to American Water (618-222-4066) for some of the analysis requested.

Volatiles:
Sample 1501C13-001A: S=The MS percent recovery for Bromomethane (69.2%) was outside laboratory control limits (70.0% - 130.0%).

RE: Workorder: 283140 EGSL DIOXANE 1501C13
Workorder: 1284 E.G.S.L.

Dear Kelly Culhane:

Enclosed are the analytical results for sample(s) received by the laboratory on Thursday, January 22, 2015. All analyses are performed using approved drinking water methodologies and meet method requirements unless otherwise noted. Enclosed are the analytical results for this Workorder only. Each state may not offer certification for all analyses reported.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Bill Deckelmann (Digitally Signed)

Qualifier Definitions

WO#: **1501C13**
Date: **2/2/2015**

Qualifiers:

*/x	Value exceeds Maximum Contaminant Level
B	Analyte detected in the associated Method Blank
C	Value is below Minimum Concentration Limit
c	Analyte not in SLI scope of accreditation
E	Estimated, detected above quantitation range
G	Refer to case narrative page for specific comments
H	Holding times for preparation or analysis exceeded
J	Analyte detected below quantitation limit (QL)
N	Tentatively identified compounds
ND	Not Detected at the Reporting Limit
P	Present
Q	Accredidation is not available from Wisconsin
R	RPD outside accepted recovery limits
S	Spike Recovery outside accepted recovery limits

RE: Drinking Water Analysis

Dear Sarah McGinnis:

Suburban Laboratories, Inc. received 19 sample(s) on 5/5/2015 for the analyses presented in the following report.

All data for the associated quality control (QC) met EPA, method, or internal laboratory specifications except where noted in the case narrative. If you are comparing these results to external QC specifications or compliance limits and have any questions, please contact us.

This final report of laboratory analysis consists of this cover letter, case narrative, analytical report, dates report, and any accompanying documentation including, but not limited to, chain of custody records, raw data, and letters of explanation or reliance. This report may not be reproduced, except in full, without the prior written approval of Suburban Laboratories, Inc.

If you have any questions regarding these test results, please call me at (708) 544-3260.

Sincerely,

Kelly Culhane

Case Narrative

Client: Weaver Consultants Group
Project: Drinking Water Analysis
WorkOrder: 1505412
Temperature of samples upon receipt at SLI: 8 C

Date: June 03, 2015
PO #:
QC Level:
Chain of Custody #: EV

General Comments:
- All results reported in wet weight unless otherwise indicated. (dry = Dry Weight)
- Sample results relate only to the analytes of interest tested and to sample as received by the laboratory.
- Environmental compliance sample results meet the requirements of 35 IAC Part 186 unless otherwise indicated.
- Waste water analysis follows the rules set forth in 40 CFR part 136 except where otherwise noted.
- Accreditation by the State of Illinois is not an endorsement or a guarantee of the validity of data generated.
- For more information about the laboratories' scope of accreditation, please contact us at (708) 544-3260 or the Agency at (217) 782-6455.
- All water analyses that are required to be performed in the field (e.g., pH, residual chlorine, sulfite, temperature, etc.) but are analyzed in the lab are identified as "in lab" and are considered past holding time. Following industry practices these results do not contain an "H" flag but are qualified as being analyzed in the lab.

Abbreviations:
- Reporting Limit: The concentration at which an analyte can be routinely detected on a day to day basis, and which also meets regulatory and client needs.
- Quantitation Limit: The lowest concentration at which results can be accurately quantitated.
- J: The analyte was positively identified above our Method Detection Limit and is considered detectable and usable; however, the associated numerical value is the approximate concentration of the analyte in the sample.
- ATC: Automatic Temperature Correction. - TNTC: Too Numerous To Count
- TIC: Tentatively Identified Compound (GCMS library search identification, concentration estimated to nearest internal standard).
- SS (Surrogate Standard): Quality control compound added to the sample by the lab.

Method References:
For a complete list of method references please contact us.
- E: USEPA Reference methods
- SW: USEPA, Test Methods for Evaluating Solid Waste (SW-846)
- M: Standard Methods for the Examination of Water and Wastewater
- USP: Latest version of United States Pharmacopeia

Workorder Specific Comments:

G = Samples subcontracted to American Water (618-222-4066) for some of the analysis requested.

Qualifier Definitions

WO#: **1505412**
Date: **5/29/2015**

Qualifiers:

*/x	Value exceeds Maximum Contaminant Level
B	Analyte detected in the associated Method Blank
C	Value is below Minimum Concentration Limit
c	Analyte not in SLI scope of accreditation
E	Estimated, detected above quantitation range
G	Refer to case narrative page for specific comments
H	Holding times for preparation or analysis exceeded
J	Analyte detected below quantitation limit (QL)
N	Tentatively identified compounds
ND	Not Detected at the Reporting Limit
P	Present
Q	Accredidation is not available from Wisconsin
R	RPD outside accepted recovery limits
S	Spike Recovery outside accepted recovery limits
T	Analyte detected in sample trip blank

RE: Workorder: 302428 Weaver Boos Dioxane
Workorder: 1419 Weaver Boos

Dear Kelly Culhane:

Enclosed are the analytical results for sample(s) received by the laboratory on Thursday, August 13, 2015. All analyses are performed using approved drinking water methodologies and meet method requirements unless otherwise noted. Enclosed are the analytical results for this Workorder only. Each state may not offer certification for all analyses reported.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Bill Deckelmann (Digitally Signed)

RE: Drinking Water Analysis

Dear Sarah McGinnis:

Suburban Laboratories, Inc. received 19 sample(s) on 11/30/2015 for the analyses presented in the following report.

All data for the associated quality control (QC) met EPA, method, or internal laboratory specifications except where noted in the case narrative. If you are comparing these results to external QC specifications or compliance limits and have any questions, please contact us.

This final report of laboratory analysis consists of this cover letter, case narrative, analytical report, dates report, and any accompanying documentation including, but not limited to, chain of custody records, raw data, and letters of explanation or reliance. This report may not be reproduced, except in full, without the prior written approval of Suburban Laboratories, Inc.

If you have any questions regarding these test results, please call me at (708) 544-3260.

Sincerely,

Shane Clarke
Business Development Manager

Case Narrative

Client: Weaver Consultants Group
Project: Drinking Water Analysis
WorkOrder: 1512001
Temperature of samples upon receipt at SLI: 1 C

Date: January 15, 2016
PO #:
QC Level:
Chain of Custody #: EV

General Comments:
- All results reported in wet weight unless otherwise indicated. (dry = Dry Weight)
- Sample results relate only to the analytes of interest tested and to sample as received by the laboratory.
- Environmental compliance sample results meet the requirements of 35 IAC Part 186 unless otherwise indicated.
- Waste water analysis follows the rules set forth in 40 CFR part 136 except where otherwise noted.
- Accreditation by the State of Illinois is not an endorsement or a guarantee of the validity of data generated.
- For more information about the laboratories' scope of accreditation, please contact us at (708) 544-3260 or the Agency at (217) 782-6455.
- All water analyses that are required to be performed in the field (e.g., pH, residual chlorine, sulfite, temperature, etc.) but are analyzed in the lab are identified as "in lab" and are considered past holding time. Following industry practices these results do not contain an "H" flag but are qualified as being analyzed in the lab.

Abbreviations:
- Reporting Limit: The concentration at which an analyte can be routinely detected on a day to day basis, and which also meets regulatory and client needs.
- Quantitation Limit: The lowest concentration at which results can be accurately quantitated.
- J: The analyte was positively identified above our Method Detection Limit and is considered detectable and usable; however, the associated numerical value is the approximate concentration of the analyte in the sample.
- ATC: Automatic Temperature Correction. - TNTC: Too Numerous To Count
- TIC: Tentatively Identified Compound (GCMS library search identification, concentration estimated to nearest internal standard).
- SS (Surrogate Standard): Quality control compound added to the sample by the lab.

Method References:
For a complete list of method references please contact us.
- E: USEPA Reference methods
- SW: USEPA, Test Methods for Evaluating Solid Waste (SW-846)
- M: Standard Methods for the Examination of Water and Wastewater
- USP: Latest version of United States Pharmacopeia

Workorder Specific Comments:
G = Samples subcontracted to American Water Lab for the 1,4 Dioxane (Method 522) analysis requested. Their data is included in the report.

Volatiles
Sample 1512001-017A: S=The MS percent recovery (149.60%) and the MSD percent recovery (142.20%) were outside laboratory control limits (70% - 130%). The RPD (5.07%) was in control, and the sample was non-detect.

Qualifier Definitions

WO#: **1512001**
Date: **1/15/2016**

Qualifiers:

*/x	Value exceeds Maximum Contaminant Level
B	Analyte detected in the associated Method Blank
C	Value is below Minimum Concentration Limit
c	Analyte not in SLI scope of accredidation
E	Estimated, detected above quantitation range
G	Refer to case narrative page for specific comments
H	Holding times for preparation or analysis exceeded
J	Analyte detected below quantitation limit (QL)
N	Tentatively identified compounds
ND	Not Detected at the Reporting Limit
P	Present
Q	Accredidation is not available from Wisconsin
R	RPD outside accepted recovery limits
S	Spike Recovery outside accepted recovery limits
T	Analyte detected in sample trip blank

RE: Workorder: 310196 Weaver Dioxane
Workorder: 1419 Weaver Boos

Dear Shane Clarke:

Enclosed are the analytical results for sample(s) received by the laboratory on Thursday, December 03, 2015. All analyses are performed using approved drinking water methodologies and meet method requirements unless otherwise noted. Enclosed are the analytical results for this Workorder only. Each state may not offer certification for all analyses reported.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Bill Deckelmann (Digitally Signed)

SRO for Soil Ingestion Exposure Route or Background within MSAs [1] / Below RO?		**2.1**	**YES**	**0.8**	**YES**	**41,000**	**YES**	**13**	**YES**

Notes:

Indicates hot spot removal is proposed in this location. Therefore, sample concentration was not used for averaging.

1.5 Indicates sample concentrations in excess of Tier 1 SROs for the Soil Ingestion Exposure Route and/or Backgrounds within MSAs

[1] TACO Concentrations of Chemicals in Background Soils used for concentrations of PNAs/Inorganics in Background Soils in MSAs obtained from 35 IAC 742, Appendix A, Tables G-H.

[1] Metropolitan Statistical Areas (MSAs) mean populated areas that are located within various counties listed in Appendix A, Table G, footnote a; which includes McHenry County.

All soil sample constituent and average concentrations above expressed in units of milligrams per kilogram (mg/kg).

UCL - Upper Confidence Limit

D/ND - Detect or Non-Detect

D/ND: (1) Indicates constituent concentrations above laboratory detection limits

D/ND: (0) Indicates constituent concentrations below laboratory detection limits, laboratory detection limit utilized as constitutent concentration for 95% UCL averaging

Gamma ROS Statistics using Imputed Non-Detects

GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs

GROS may not be used when kstar of detected data is small such as < 0.1

For such situations, GROS method tends to yield inflated values of UCLs and BTVs

For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

95% KM (z) UCL	4761	95% KM Bootstrap t UCL	208765
90% KM Chebyshev UCL	7174	95% KM Chebyshev UCL	9594
97.5% KM Chebyshev UCL	12953	99% KM Chebyshev UCL	19550

Gamma GOF Tests on Detected Observations Only

A-D Test Statistic	8.497	**Anderson-Darling GOF Test**
5% A-D Critical Value	0.94	Detected Data Not Gamma Distributed at 5% Significance Level
K-S Test Statistic	0.49	**Kolmogrov-Smirnoff GOF**
5% K-S Critical Value	0.177	Detected Data Not Gamma Distributed at 5% Significance Level

Detected Data Not Gamma Distributed at 5% Significance Level

Gamma Statistics on Detected Data Only

k hat (MLE)	0.163	k star (bias corrected MLE)	0.169
Theta hat (MLE)	11570	Theta star (bias corrected MLE)	11181
nu hat (MLE)	10.14	nu star (bias corrected)	10.49
MLE Mean (bias corrected)	1891	MLE Sd (bias corrected)	4599

Gamma Kaplan-Meier (KM) Statistics

k hat (KM)	0.0342	nu hat (KM)	2.188
Approximate Chi Square Value (2.19, α)	0.179	Adjusted Chi Square Value (2.19, β)	0.161
95% Gamma Approximate KM-UCL (use when n>=50)	22383	95% Gamma Adjusted KM-UCL (use when n<50)	24841

Gamma (KM) may not be used when k hat (KM) is < 0.1

Gamma ROS Statistics using Imputed Non-Detects

GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs

GROS may not be used when kstar of detected data is small such as < 0.1

For such situations, GROS method tends to yield inflated values of UCLs and BTVs

For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

Minimum	0.01	Mean	1832
Maximum	57000	Median	14

City of Marengo Annual Drinking Water Quality Reports

Electronic Filing - Received, Clerk's Office : 06/27/2016 - PCB 2016-097***

Annual Drinking Water Quality Report

City of Marengo - IL1110650

For the period January 1 to December 31, 2010

This report is designed to inform the Citizens of Marengo about the quality water and services that we deliver every day. Our constant goal is to provide a safe and dependable supply of drinking water. We are continually striving to improve the water treatment process and protect our water resources. We are committed to ensuring the quality of Marengo's drinking water. This report will not be mailed to Marengo water customers; however, the reports are available upon request. For more information regarding this report or to request a copy of this report, please call the Water Department at (815) 568-1418, extension 224.

Este informe contiene informacion muy importante sobre el agua que usted bebe. Traduzcalo o hable con alguien que lo entienda bien.

The City of Marengo routinely monitors for constituents in its drinking water according to Federal and State laws. This report indicates the results of our monitoring for the period of January 1 to December 31, 2010. The employees of the City of Marengo Water Department work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

Source of Drinking Water

The source of drinking water used by Marengo is Ground Water. The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and groundwater wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.

Inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.

Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at (800) 426-4791.

In order to ensure that tap water is safe to drink, the EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available form the Safe Drinking Water Hotline at (800) 426-4791.

Source Water Assessment

We want our valued customers to be informed about their water quality. If you would like to learn more, please feel welcome to attend any of our regularly scheduled meetings. The source water assessment for our supply has been completed by the Illinois EPA. If you would like a copy of this information, please stop by City Hall. To view a summary version of the completed Source Water Assessments, including: "Importance of Source Water"; "Susceptibility to Contamination Determination"; and documentation/recommendation of Source Water Protection Efforts, you may access the Illinois EPA website at http://www.epa.state.il.us/cgi-bin/wp/swap-fact-sheets.pl.

To determine Marengo's susceptibility to groundwater contamination, the following documents were reviewed: a Well Site Survey, published in 1989 by the Illinois EPA; a Hazard Review, published in 1990 by the Illinois EPA; and a Source Water Protection Plan prepared by the City of Marengo and published by the Illinois Rural Water Association in May of 1997. Based on the information obtained in these documents, there are 9 potential sources of groundwater contamination that could pose a hazard to groundwater utilized by the City's community water supply wells. Furthermore, information provided by the Leaking Underground Storage Tank and Remedial Project Management Sections of Illinois EPA indicated several additional sites with ongoing remediations which may be of concern. Based upon this information, the Illinois EPA has determined that Marengo's Community Water Supply's source water has a high susceptibility to VOC and SOC contamination. The basis for this determination includes the detection of VOC in Well No. 6 and the land use within the recharge areas of the wells. This land use includes both industrial and agricultural properties. However, as a result of monitoring conducted at the wells and entry point to the distribution system, the land use activities and source water protection initiatives by Marengo (refer to the following section of this report), the Marengo Community Water Supply's source water has a low susceptibility to IOC contamination.

2010 Regulated Contaminants Detected

Lead and Copper

Definitions:

Action Level Goal (ALG): The level of a contaminant in drinking water below which there is no known or expected risk to health. ALG's allow for a margin of safety.

Action Level (AL): The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements, which a water system must follow.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in the drinking water is primarily from materials and components associated with service lines and home plumbing. We are responsible for providing high-quality drinking water, but we cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to two minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at [illegible]

Lead and Copper	Date Sampled	MCLG	Action Level (AL)	90th Percentile	No. Sites Over AL	Units	Violation	Likely Source of Contamination
Copper	12/14/09	1.3	1.3	0.633	0	ppm	N	Erosion of natural deposits; leaching from wood preservatives; corrosion of household plumbing systems
Lead	12/14/09	0	15	6.39	2	ppb	N	Corrosion of household plumbing systems; erosion of natural deposits

Water Quality Test Results

Definitions: The following tables contain scientific terms and measures, some of which may require explanation.

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the Maximum Contaminant Level Goal as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL): The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Electronic Filing - Received, Clerk's Office : 06/27/2016 - PCB 2016-097***

Maximum Residual Disinfectant Level (MRDLG): The level of disinfectant in drinking water below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
ppb: micrograms per liter or parts per billion - or one ounce in 7,350,000 gallons of water.
N/A: not applicable
Avg: Regulatory compliance with some MCLs are based on running annual average of monthly samples.
ppm: milligrams per liter or parts per million - or one ounce in 7,350 gallons of water.

Regulated Contaminants:

Disinfectants & Disinfection By-Products	Collection Date	MCLG	MCL	Highest Level Detected	Range of Levels Detected	Units	Violation	Likely Source of Contamination
Chlorine		MRDLG = 4	MRDL =4	0.8	0.6925 - 0.83	ppm	No	Water additive used to control microbes
TThm [Total Trihalomethanes]		No goal for the total	80	1.65	1.65-1.65	ppb	No	By product of drinking water chlorination
Not all sample results may have been used for calculating the Highest Level Detected because some results may be part of an evaluation to determine where compliance sampling should occur in the future.								
Inorganic Contaminants	**Collection Date**	**MCLG**	**MCL**	**Highest Level Detected**	**Range of Levels Detected**	**Units**	**Violation**	
Barium	10/19/09	2	2	0.095	0.05 - 0.095	ppm	No	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Fluoride	10/19/09	4	4	0.89	0 - 0.89	ppm	No	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Iron		N/A	1.0	1.6	1.43 – 1.53	ppm	No	This contaminant is not currently regulated by the USEPA. However, the state regulates. Erosion of natural deposits.
Manganese		150	150	196	157 – 212	ppb	No	This contaminant is not currently regulated by the USEPA. However, the state regulates. Erosion of natural deposits
Nitrate (measured as Nitrogen)		10	10	1	0 - 0.96	ppm	No	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Sodium	10/19/09			49	25 – 49	ppm	No	Erosion from naturally occurring deposits; used in water softener regeneration
Zinc	10/19/09	5	5	0.011	0.006 – 0.011	ppm	No	This contaminant is not currently regulated by the USEPA. However, the state regulates. Naturally occurring; discharge from metal
Radioactive Contaminants	**Collection Date**	**MCLG**	**MCL**	**Highest Level Detected**	**Range of Levels Detected**	**Units**	**Violation**	
Gross Alpha excluding radon and uranium	2/23/09	0	15	1.93	1.93 – 1.93	pCi/L	No	Erosion of natural deposits
Combined Radium 226/228	2/23/09	0	5	0.875	0.875 – 0.875	pCi/L	No	Erosion from naturally occurring deposits

** Arsenic: While your drinking water meets EPA standards for arsenic, it does contain low levels of arsenic. EPA's standards balance the current understanding of arsenic's possible health effects

Electronic Filing - Received, Clerk's Office : 06/27/2016 - PCB 2016-097***

against the costs of removing arsenic from drinking water. EPA continues to research the health effects of low levels of arsenic, which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems.

Annual Drinking Water Quality Report

City of Marengo – IL1110650

For the period January 1 to December 31, 2011

This report is designed to inform the Citizens of Marengo about the quality water and services that we deliver every day. This report indicates the results of our monitoring for the period of January 1 to December 31, 2013. The employees of the City of Marengo Water Department work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

Sources of Drinking Water
The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick-up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.

Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPAs Safe Drinking Water Hotline at (800) 426-4791.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

Source Water Assessment
We want our valued customers to be informed about their water quality. If you would like to learn more, please feel welcome to attend any of our regularly scheduled meetings. The source water assessment for our supply has been completed by the Illinois EPA. If you would like a copy of this information, please stop by City Hall or call the Water Department at 815-568-7112, ext. 217. To view a summary version of the completed Source Water Assessments, including: Importance of Source Water; Susceptibility to Contamination Determination; and documentation/recommendation of Source Water Protection Efforts, you may access the Illinois EPA website at http://www.epa.state.il.us/cgi-bin/wp/swap-fact-sheets.pl.

To determine Marengo's susceptibility to groundwater contamination, the following documents were reviewed: a Well Site Survey, published in 1989 by the Illinois EPA; a Hazard Review, published in 1990 by the Illinois EPA; and a Source Water Protection Plan prepared by the Village of Marengo and published by the Illinois Rural Water Association in May of 1997. Based on the information obtained in these documents there are 9 potential sources of groundwater contamination that could pose a hazard to groundwater utilized by the Marengo community water supply wells. Furthermore, information provided by the Leaking Underground Storage Tank and Remedial Project Management Sections of Illinois EPA indicated several additional sites with on-going remediation's which may be of concern. Based upon this information, the Illinois EPA has determined that the Marengo Community Water Supply's source water has a high susceptibility to VOC and SOC contamination. The basis for this determination includes the detection of VOC in Well #6 and the land use within the recharge areas of the wells. This land use includes both industrial and agricultural properties. However, as a result of monitoring conducted at the wells and entry point to the distribution system, the land use activities and source water protection initiatives by the City (refer to the following section of this report), the Marengo Community Water Supply's source water has a low susceptibility to IOC contamination.

Electronic Filing - Received, Clerk's Office : 06/27/2016 - PCB 2016-097***

Lead and Copper

Definitions:
Action Level Goal (ALG): The level of a contaminant in drinking water below which there is no known or expected risk to health. ALGs allow for a margin of safety.
Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Lead and Copper	Date Sampled	MCLG	Action Level (AL)	90th Percentile	# Sites Over AL	Units	Violation	Likely Source of Contamination
Copper	09/29/2012	1.3	1.3	0.67	0	ppm	N	Erosion of natural deposits; Leaching from wood preservatives; Corrosion of household plumbing systems.
Lead	09/29/2012	0	15	1.06	0	ppb	N	Corrosion of household plumbing systems; Erosion of natural deposits.

Water Quality Test Results

Maximum Contaminant Level Goal or MCLG:	The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
Maximum Contaminant Level or MCL:	The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
Maximum residual disinfectant level goal or MRDLG:	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
Maximum residual disinfectant level or MRDL:	The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
Definitions:	The following tables contain scientific terms and measures, some of which may require explanation.
ppb:	micrograms per liter or parts per billion - or one ounce in 7,350,000 gallons of water.
na:	not applicable.
Avg:	Regulatory compliance with some MCLs are based on running annual average of monthly samples.
ppm:	milligrams per liter or parts per million - or one ounce in 7,350 gallons of water.

Regulated Contaminants

Disinfectants and Disinfection By Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Chlorine	12/31/2013	0.9	0.4 - 1	MRDLG = 4	MRDL = 4	ppm	N	Water additive used to control microbes.
Inorganic Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Arsenic	10/26/2012	1.6	0 - 1.6	0	10	ppb	N	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes.
Barium	10/26/2012	0.1	0.064 - 0.1	2	2	ppm	N	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits.
Fluoride	10/26/2012	1.09	1.07 - 1.09	4	4.0	ppm	N	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Iron	2013	1.6	1.12 - 1.6		1.0	ppm	N	This contaminant is not currently regulated by the USEPA. However, the State regulates. Erosion of natural deposits.
Manganese	2013	161	108 - 189	150	150	ppb	N	This contaminant is not currently regulated by the USEPA. However, the State regulates. Erosion of natural deposits.
Sodium	10/26/2012	49	31 - 49			ppm	N	Erosion from naturally occuring deposits; Used in water softener regeneration.
Radioactive Contaminants	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Combined Radium 226/228	02/23/2009	0.875	0.875 - 0.875	0	5	pCi/L	N	Erosion of natural deposits.
Gross alpha excluding radon and uranium	02/23/2009	1.93	1.93 - 1.93	0	15	pCi/L	N	Erosion of natural deposits.

Annual Drinking Water Quality Report

MARENGO

IL1110650

Annual Water Quality Report for the period of January 1 to December 31, 2014

This report is intended to provide you with important information about your drinking water and the efforts made by the water system to provide safe drinking water.

The source of drinking water used by MARENGO is Ground Water

For more information regarding this report contact:

Source of Drinking Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pickup substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPAs Safe Drinking Water Hotline at (800) 426-4791.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Some people may be more vulnerable to contaminants in drinking water than the general population.

Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.
