ORDER OF THE BOARD (by Mr. Henss)

The parties have filed Joint Motion for Extension of Time Within Which to File Report and Recommendations with the Board. They state that they have completed their testing program and compilation of data but need additional time to draw final conclusions and negotiate a final settlement. We shall allow the additional time for submitting proposal for a final settlement and for submitting reports of stack analysis, stack emission measurements, ground level measurements and other odor testing.

However, the Joint Motion also requests extension of variance. The variance request fails to give basic information or comply in any way with our Procedural Rule 401. The Petition for extension of variance is therefore inadequate and will be dismissed without prejudice.

It is Ordered that the proposal for final settlement (paragraph 6 of our November 8, 1972 Order) shall be submitted by January 15, 1974 or a hearing shall be held for determination of the issues. The reports of stack analysis, stack emission measurements, ground level measurements and other odor testing (paragraph 7 of the Board Order of November 8, 1972) shall be filed with the Pollution Control Board by January 15, 1974. The Petition for Variance Extension is dismissed without prejudice.

Mr. Marder abstained.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted this 13th day of December 1973 by a vote of 4 to 0.

Christan L. Moffett
