

## **Board Proposes Second-Notice Amendments to Non-Hazardous Special Waste Manifest Rules**

On May 21, 2020, the Board issued a second-notice opinion and order proposing to amend its manifesting regulations on transporting non-hazardous special waste. In doing so, the Board addressed each of the public comments received during the first-notice period and submitted the proposed amendments to the Joint Committee on Administrative Rules (JCAR) for review.

As proposed, the amendments would allow transporters of State-regulated non-hazardous special waste to use manifests that are functionally identical to the Uniform Hazardous Waste Manifest of the United States Environmental Protection Agency (USEPA)—but without the financial and regulatory burdens associated with USEPA’s new e-Manifest System. The Board’s proposal is expected to be considered by JCAR at its June 16, 2020 meeting.

This rulemaking, which began with the Illinois Environmental Protection Agency’s proposal, is captioned Amendments to Manifesting Requirements: Special Waste Hauling 35 Ill. Adm. Code 809, docket R19-18. Here is a link to the Board’s [second-notice opinion and order](#), which includes the text of the proposed rule amendments.
