Informational Notes

1. [Illinois] Environmental Protection Act: 415 ILCS 5/4.
2. Illinois Pollution Control Board: 35 Ill. Adm. Code, Subtitle G.
3. Statutory and regulatory references herein are provided for convenience only and should not be construed as legal conclusions of the Agency or as limiting the Agency's statutory or regulatory powers.
4. The provisions of subsection (p) of Section 21 of the [Illinois] Environmental Protection Act shall be enforceable either by administrative citation under Section 31.1 of the Act or by complaint under Section 31 of the Act.
5. This inspection was conducted in accordance with Sections 4(c) and 4(d) of the [Illinois] Environmental Protection Act: 415 ILCS 5/4(c) and (d).
6. Items marked with an "NE" were not evaluated at the time of this inspection.
7. Statutory effective date: through 1/10/95.
8. Regulatory effective date: through 7/21/94.

MEMORANDUM

DATE: July 10, 1996
TO: BOL File
FROM: Michael D. Grant *MDG*
SUBJECT: LPC#: 1894925001 -- Washington County
Wamac / Prior Oil Company
FOS

On June 4, 1996, Chris Cahnovsky received a complaint that Prior Oil was discharging tank bottoms into an abandoned mine shaft which is located next to an incinerator at the facility. I contacted Mines and Minerals to discuss the allegation about the dumping since they have primary authority governing oil well production waste. I discussed this situation with Mr. Alan Whitler, District Manager in the Centralia Office. Mr. Whitler explained that Prior Oil did not have the appropriate permits for any of his vehicles to haul any type of oil field waste. He also informed me that they also did not have any disposal permits issued through his office. I informed him of the alleged location of the old mine shaft. He said he would try to verify its existence and the exact location. We scheduled to meet in Wamac at 10:00 a.m. on June 13, 1996.

On June 13, 1996, Mr. Cahnovsky and I met Mr. Whitler in Wamac and attempted to view the area in question. Mr. Whitler had confirmed the existence and location of the shaft. The shaft could not be viewed without entering Prior Oil's facility. Mr. Cahnovsky and I then went to the facility to do a complaint investigation. We were accompanied during the inspection by Mr. Juvenile Hixenbaugh, an employee of Prior Oil Co. We observed the old incinerator and confirmed that it was not operable. North of the incinerator was a pile of scrap tires. We then observed a Prior Oil tanker truck parked just north of the old incinerator. As I approached the truck, I observed a hose connected to the truck which led down into what appeared to be an open mine shaft. The hose did not have any discharge at the time of our inspection. The soil around this opening was stained black. When questioned, Mr. Hixenbaugh stated that "clean storm water" collected from the tank batteries was being pumped into the old mine. The tanker truck's Illinois license plate number was 3359 MR.

In addition to the tanker truck and the pile of tires we also observed two open drums of what appeared to be oil. A considerable amount of stained soil was also observed in the area of these drums. Photographs of these areas were taken.

We then drove to Mr. Whitlers' office and informed him of our findings. He told us that storm water collected from tank batteries could not be disposed in this matter. Since these wastes are from crude oil production activities, this material is a solid waste, however it is excluded from being classified as a hazardous waste pursuant to 721.104b5).
