Subject: opposition to permit appeal and adjusted standard- Noveon

I am a land owner of Henry, IL and have 4 children. I am sending this to put in writing my opposition to the permit appeal PCB 91-17 and the adjusted standard AS02-05 for the Noveon plant. I strongly urge this company be held to the standards already in place. The amount of ammonia discharged into the river along with the air pollution is alarming and ridiculous. I'm sending this as the voice of my children also. We would like an immediate review hearing for the citizens of the community to attend.

Thank you-
Brian Maubach
