# NARRATIVE INSPECTION REPORT

Date: August 29, 2003 Inspector: Sheila Williams

Site Code: 1810105001 County: Union

Site Name: Alto Pass/Coleman Time: 9:45 A.M. – 10:35 A.M.

### GENERAL REMARKS

On August 29, 2003 I conducted an inspection of the Alto Pass/Coleman dump site. I was accompanied by Doug Hayward, also, of the Illinois EPA. A Non-Compliance Advisory (NCA) referencing a July 15, 2003 inspection conducted by Scott Arnold of the Bureau of Air (BOA), Illinois EPA, has been sent to Chris Coleman, the owner & operator of this site. According to Agency records, the BOA had received at least two complaints prior to the July 15, 2003 inspection. One of the complainants explained that Mr. Coleman operates a second hand store at this location. Mr. Arnold reported in his July 22, 2003 memo that waste had been burned on site. It is apparent from photographs taken by Mr. Arnold on July 15, 2003 that refuse has been burned on site. Two complaints received in August 2003 expressed Mr. Coleman continues to dump & burn waste. According to one of the complainants, since receiving the NCA from the BOA, Mr. Coleman burns in the evening & on weekends. The August 29, 2003 inspection was conducted as a result of complaints that violations are ongoing.

No one other than Mr. Hayward & myself was present during the course of the inspection. Two permanent buildings, two trailers, one truck/trailer & three covered portable structures were observed at the site. Observations support a type of second hand business is operated at this site. Two areas of apparent violations were observed.

These have been designated as Area A & Area B. Other than the designated areas, a wide range of items were noted to not be covered or protected from the elements in any manner. These materials included, but were not limited to, approximately nine computer towers & monitors, two copy machines, eighteen appliances, a television, several pieces of cloth covered & wooden furniture, books, clothes, & a clothes washing machine liner & a clothes drying machine liner both containing ash & burned refuse. It was apparent some of the items had been staged whereas other things were scattered about. Two types of what appeared to be fresh rock were present along the southwest corner of the site, near the tree line. One type of rock appeared to be a 2"-3" river rock. The other rock looked to be a road pack type of rock. It was apparent the rock was fresh because of the comparison of conditions noted during the August 29, 2003 inspection with photographs taken on July 15, 2003 by the BOA. Also, the gravel covering the rest of the site had small pieces of general debris scattered through it whereas the road pack & river rock appeared to be virtually free of any debris. It should be noted the new rock is now present in areas where waste had been observed during the July 15, 2003 inspection.

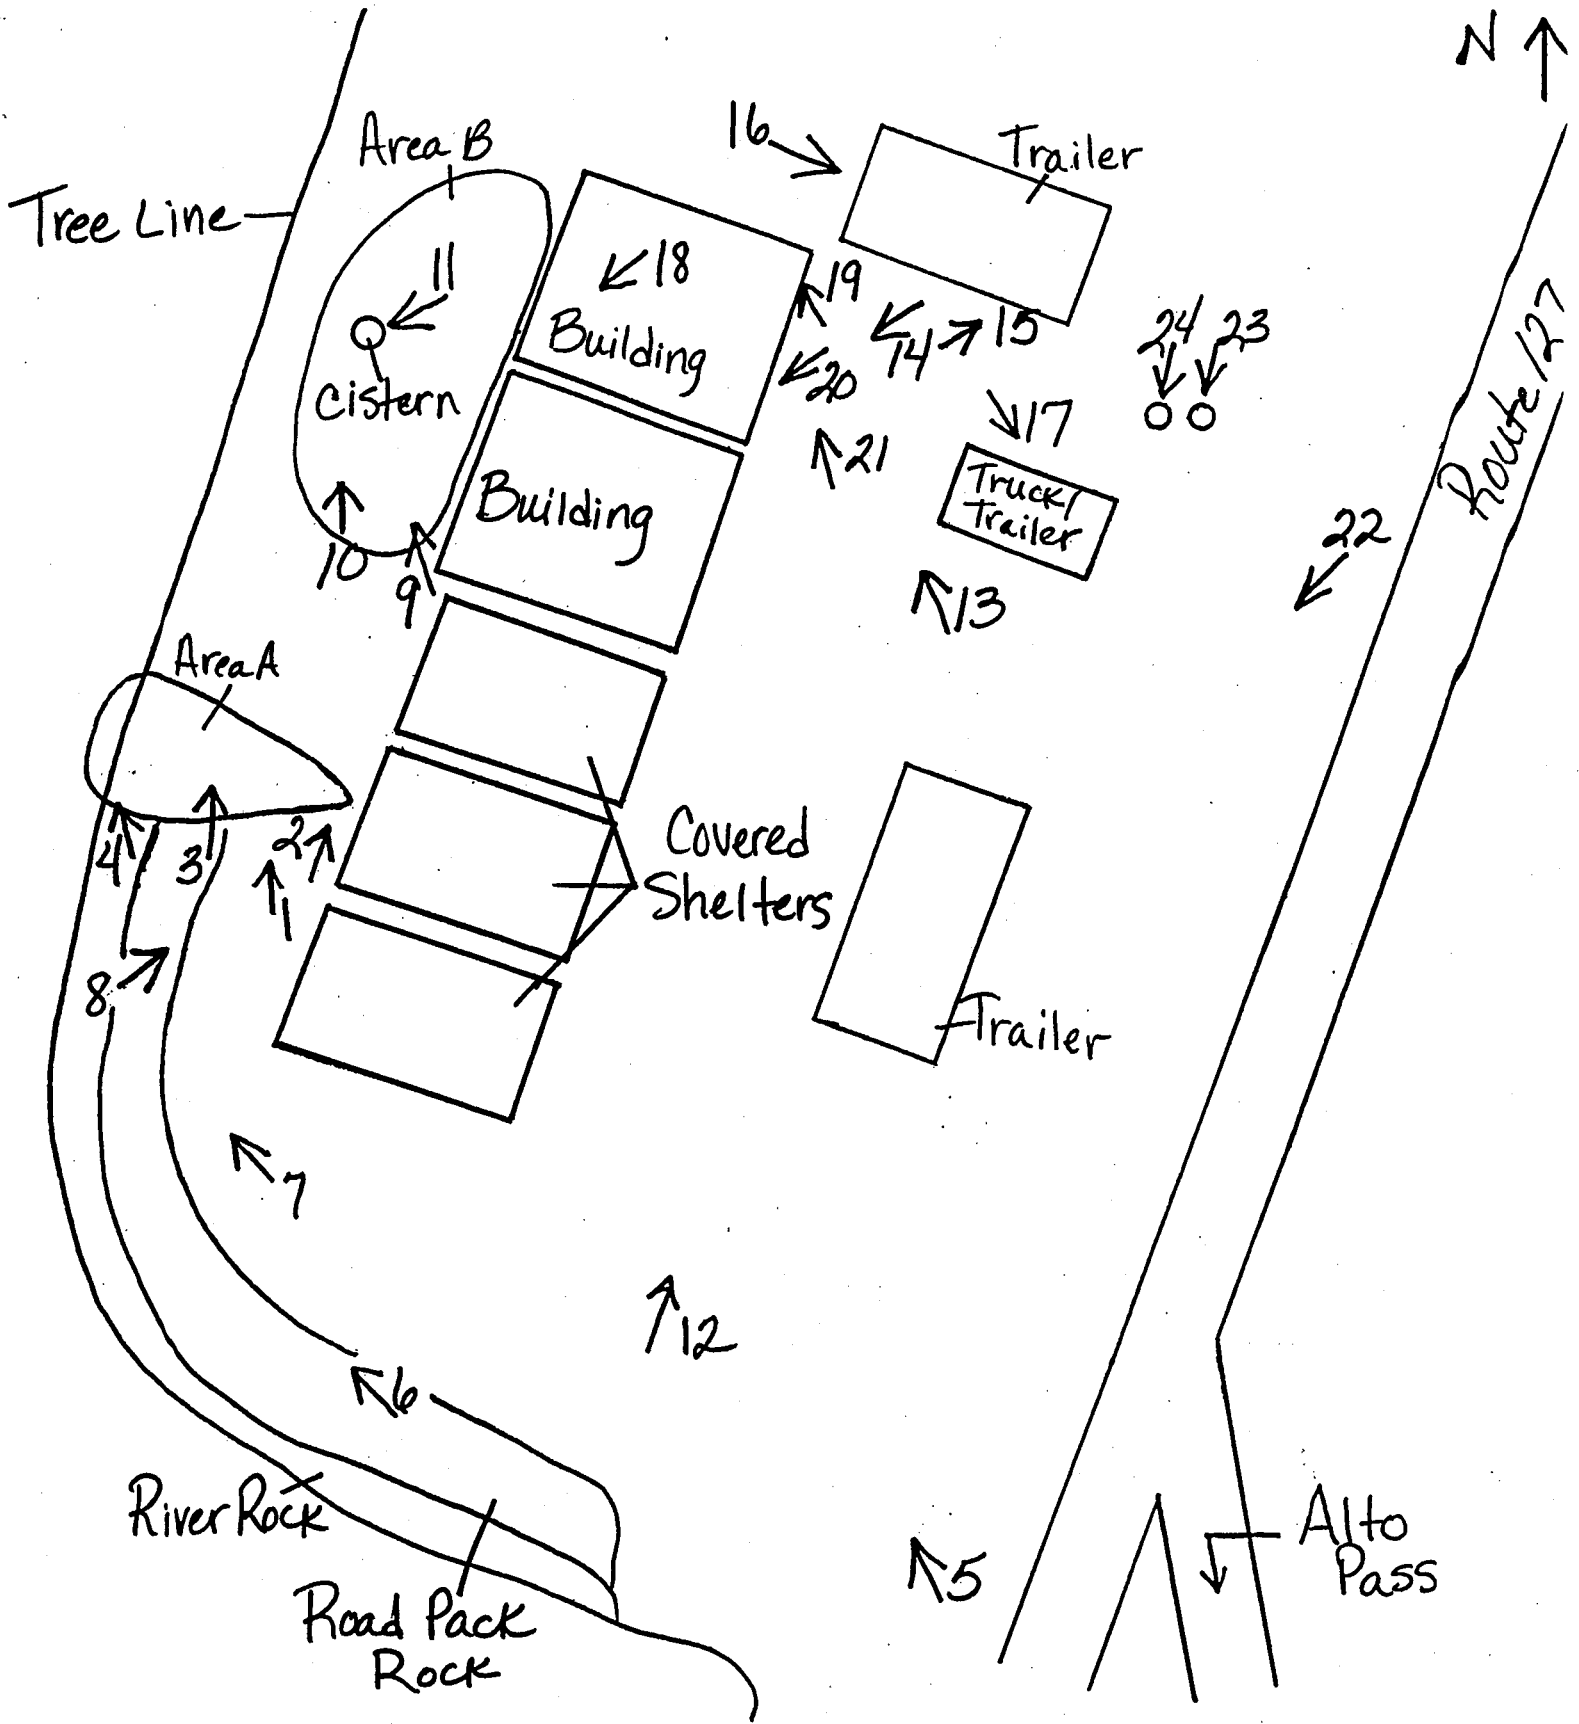

Refuse in Area A included, but was not limited to demolition debris, plastics, a variety of metal, cardboard boxes that did not appear to be the least bit weathered, ash, charred debris, clothing & general refuse. The debris in Area A was observed trailing down gradient into a wooded area. Area A was estimated to be approximately eleven cubic yards (25'x4'x3') in size. Among the waste in Area B were eleven ~5-gallon buckets labeled "Fibrous Roof & Foundation Coating", five tires, a variety of metal, hoses & general refuse. Due to thick vegetation, it is possible additional waste in Area B was present but not visible. Area B was estimated to be approximately 10 cubic yards (15'x12.5'x1.5') in size.

According to the Union County Supervisor of Assessments, the two acre piece of property on which this site is situated was purchased by Christopher Coleman of Cobden, Illinois in March 2003.

The following apparent violations were observed at the Alto Pass/Coleman site:

Line #5 & #8: Cause or allow open dumping. Cause or allow the open dumping of any waste in a manner which results in any of the following occurrences at the dump site: litter; deposition of general construction or demolition debris. A variety of waste was observed on the ground in Area A & Area B. Area A also contained demolition debris.

Line #6, #7 & #10: Conduct any waste-storage, waste-treatment or waste-disposal operation: without a permit; in violation of any Regulations or Standards adopted by the Board. Dispose, treat, store or abandon any waste or transport any waste into the state at/to sites not meeting requirements of the Act and Regulations. Failure to submit an application for a permit to develop & operate a landfill. Agency files do not reflect that there has been a permit applied for or issued by the IEPA which would allow the development for and/or operation of waste activities at this site, thus not fulfilling requirements of the Act & Regulations. Due to the apparent business operated at this location & the presence of several of the same items (computers, appliances, copiers, etc.), it is apparent waste has been brought from off site.
