100 W. Randolph St.

James R. Thompson Center

Ste 11-500

Chicago, IL 60601

PC#41

To Whom It May Concern;

There are numerous reasons to oppose the garbage transfer station at the Cary boundary:

1. The smell of the garbage
2. The noise of the trucks
3. The pollution of Lake Atwood in the adjacent Hollows Conservation area and Lake Killarney
4. The rush hour traffic tie-ups on Route 14
5. The sights and smells of the diesel trucks
6. The vermin such as flies, rodents, raccoons
7. The negative impression of Cary for travelers on route 14
8. The devaluation of homes near the site, which includes Bright Oaks and Lake Killarney Subdivisions
9. The McHenry County Pollution Control Facility Siting Committee has recommended denying the Lowe applications
10. The McHenry County Board has rejected the Lowe application

Thank you,

Eugene R. Schwary
