Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Allison O'Brien

Thank you for standing up for Illinois's rivers and streams.

I have spoken at public hearings against the proposed Fracking rules that are before the IDNR. I have also worked with the C.A.R.E. group in Lockport against the crude oil depot in Lockport. The GoGen project. I am also on the Homer Glen Environment Committee. And for all of these reasons, we stand Tall and Hard for protecting the environment.

You can have good economics AND care for the environment. But for that to actually happen, elected officials, such as yourself, need to take a stand for the Environment.

Illinois does not need Fracking! We do not need to be open pit mining for Fracking sand!

Sincerely,  
Randy Juras

Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Debbie Natoli

Thank you for standing up for Illinois's rivers and streams. A lot of pollution is already over the dam. It is much better to prevent pollution than to recover from it. Corporate agribusiness can adjust to sensible regulation. Our lakes and rivers can't. Please help curb their abuse.

Sincerely,  
Daniel Goldman
