Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,
Alexander Honigsblum

I have been truly privileged to have been able to enjoy our great state's rural and scenic values in addition to the great cultural places of our cities. If we do not keep a balance, trash the land and borrow from the future, we will lose our freedom of nature and the outdoors forever. And this issue is raised for the unhealthy practice of factory farming which is an atrocious practice in these times of technology and understanding. I am a voter and I trust you will make the right decision. Thank you Governor Quinn.

Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,
Tony Menechella

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

I am contacting you to ask that you please stand up to big agri business, and support the Pollution Control Board's proposed rule pertaining to factory farms.

Waste and pollution from these huge feedlot type cattle farms is a serious threat to our streams and rivers. With climate change advancing, causing higher temperatures and droughts, our sources for water are going to be even more important, so we must take prudent steps to safe guard them.

I strongly support the IPCB's proposal which will:

ban manure spreading practices which are a serious threat to our drinking water coming from our streams, rivers and lakes.

Preserve our right to know of the existence of every factory farm across the state, so that we will know where any pollution is originating.

These facilities pose a serious threat of contamination from manure and chemicals, so much stronger steps need to be taken. These, at least, are good first steps, so I hope that you will strongly support their implementation.

Thank you for standing strong to protect our waterways from feedlot contamination! It's extremely important---it's our health at stake, if we don't do this!!

Sincerely,
