Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Rita Killean

I teach environmental biology for a living. I know that the consuming public wants low food prices and hence the factory farms. I propose that these farms be zoned to require an extensive buffer zone of plants around the areas where the manure is spread. Outside of these areas trees should be planted to mop up any leachate. It would also be helpful to pass legislation requiring that factory farms be placed well away from bodies of water.

Sincerely,  
Michael Kaplan

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,  
Douglas Harder

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

The dramatic expansion of corporate agribusinesses' livestock factory farms within the "land of Lincoln" is currently posing a growing threat to our cleaner water. [Larger-scale releases of animal wastes have polluted some of our rivers and streams to the point that they are now unsafe for wildlife species (and populations)--and also unsafe for providing us with drinking water, along with outdoor recreational opportunities for swimming and fishing.] Speaking as a naturalist and an environmental researcher who has visited many of our state parks (such as Illinois Beach and Volo Bog), county forest preserves and conservation areas, botanic gardens, arboretums, and city parks: Thank you for standing up for cleaner water by protecting Illinois' rivers and streams from livestock factory farm pollution! I am one of the original, modern environmental activists dating back to around the very first "EARTH DAY" (Wednesday, April 22, 1970), now going on 44 terrific years! I have a Bachelor of Science (B.S.) Degree in Biology and Environmental Studies from Dana College, Blair, Nebraska. Besides supporting a tougher federal Clean Water Act (CWA), I have also been advocating more stringent statewide measures to "crack down" on the pollutants (i.e., animal wastes and chemicals) from livestock factory farms.

Sincerely,  
DENNIS NELSON
