71-80

Concurring Opinion (by Mr. Currie):

I agree this variance should be denied for reasons given in the Board's opinion. As indicated in my dissent in # 71-77, *Wachta v. EPA* (July 12, 1971), I am not in accord with the majority that homes completed or nearing completion qualify for variances, in the absence of unusual circumstances. I agree with today's opinion except for its statement that in such cases the hardship is clearly unreasonable.
