Re: Public Comment in **Support** of Illinois Power Holdings' Petition, Docket No. 2014-010
(Air-Variance)

Dear Honorable Members of the Illinois Pollution Control Board,

As a chemical supplier of Dynegy, our company and its employees depend upon a vibrant Illinois power generation industry for our livelihood. Unfortunately, the industry has been hard hit by the national economic crisis and market conditions, particularly here in Illinois. As an employer, I am writing to share my support for approval of the above mentioned variance request by Illinois Power Holdings (IPH), a Dynegy subsidiary.

Dynegy has stepped up to help support much-needed union jobs and economic activity in Illinois through IPH's proposed acquisition of Ameren Energy Resources (AER). With this transaction, Dynegy plans to double its operations and investment in Illinois as a responsible neighbor and major employer of highly-skilled, well-paying union jobs.

In September 2012, the Illinois Pollution Control Board granted AER's variance request, recognizing both the environmental and economic benefits of doing so. IPH is seeking similar relief and is committed to complying with the compliance conditions previously imposed by the Board. As a closing condition under the transaction agreement, if this petition for temporary relief is not granted these environmental and economic benefits will be at risk.

A successful transfer of the plants to IPH offers the best opportunity for hundreds of workers, their families and our communities in addition to a stable tax base that provides critical support for our local schools, emergency response organizations and countless local governments.

AER and Dynegy are important economic engines for the state of Illinois and our local communities, especially in economically challenged Central and Southern Illinois. On behalf of our company, which has supported jobs and paid taxes in Illinois for 40 years, I urge the Board to improve air quality and support much-needed Illinois jobs and economic activity by granting IPH's petition for the requested temporary relief.

Sincerely,

Regional Business Manager

**Re: Public Comment in Support of Illinois Power Holdings' Variance
Petition Docket No. 2014-010**

Dear Honorable Members of the Illinois Pollution Control Board:

On behalf of the communities and businesses in our region, we are writing in support of the variance petition filed by Illinois Power Holdings (IPH), a Dynegy subsidiary, currently pending before the Illinois Pollution Control Board. It is our understanding that IPH has reached an agreement to purchase power plants currently owned by Ameren Energy Resources (AER).

As a regional development organization, we continue to advocate for a balanced approach to environmental regulations that provides flexibility for companies in implementing compliance strategies. In September 2012, this Board saw fit to grant AER's variance request, recognizing both the environmental and economic benefits of doing so. IPH is seeking similar relief and is committed to complying with the compliance conditions previously imposed by the Board.

The petition, if granted, will provide continued certainty to the AER employees, their families and communities that count on the economic benefit the energy centers provide. Obtaining the variance is a closing condition under the Ameren-IPH transaction agreement. Without the variance, Ameren will be forced to pursue other options for the AER energy centers, creating uncertainty about the plants' futures.

These energy centers not only provide well-paying jobs in our community, but also serve as an important source of property tax revenue to help support important public services, including support for our cash-strapped schools. We again ask the Board to give careful thought to the impact to our communities if any of the energy centers were to close due to costly regulations and a dire economic outlook.

Sincerely,
Helmkamp Construction Company

Re: Public Comment in **Support** of Illinois Power Holdings' Petition, Docket No. 2014-010 (Air-Variance)

Dear Honorable Members of the Illinois Pollution Control Board,

As Iron Workers St Louis and Vicinity District Council President and General Organizer for the Iron Workers International, I write to you today to express our support for approval of the above mentioned variance request by Illinois Power Holdings (IPH), a Dynegy subsidiary.

Ameren Energy Resources (AER) and Dynegy are important employers of unionized Illinois workers and both companies provide strong economic benefits to the State of Illinois and their local communities. Their support for working families and local economies across Illinois is particularly important during the continued trying economic times, which remain especially harsh in Central and Southern Illinois.

Dynegy has stepped up to help support much-needed union jobs and economic activity in Illinois through IPH's proposed acquisition of AER. With this transaction, Dynegy plans to double its operations and investment in Illinois as a responsible neighbor and major employer offering highly-skilled, well-paying union jobs.

In September 2012, the Illinois Pollution Control Board granted AER's variance request, recognizing both the environmental and economic benefits of doing so. IPH is seeking similar relief and is committed to complying with the compliance conditions previously imposed by the Board. As a closing condition under the transaction agreement, if this petition for temporary relief is not granted these environmental and economic benefits will be at risk.

A successful transfer of the plants to IPH offers the best opportunity for the hard-working union members, their families and our communities in addition to a stable tax base that provides critical support for our local schools, emergency response organizations and countless local governments.

We urge the Board to improve air quality and support much-needed union jobs by granting IPH's petition for the requested temporary relief.

Sincerely,

David Beard

Re: Public Comment in Support of Illinois Power Holdings' Petition, Docket No. 2014-010
(Air-Variance)

Dear Honorable Members of the Illinois Pollution Control Board,

The Indiana Rail Road Company strongly supports the petition of the above mentioned variance request by Illinois Power Holdings (IPH), a Dynegy subsidiary. As a vendor for Dynegy we believe they play a large role in the improvement of the quality of life in Illinois. The granting of IPH's petition is vital in continuing the availability of reliable, low-cost energy to support the Illinois manufacturing community and keep it competitive.

Dynegy has stepped up to help support much-needed union jobs and economic activity in Illinois through IPH's proposed acquisition of Ameren Energy Resources (AER). With this transaction, Dynegy plans to double its operations and investment in Illinois as a responsible neighbor and major employer of highly-skilled, well-paying union jobs.

In September 2012, the Illinois Pollution Control Board granted AER's variance request, recognizing both the environmental and economic benefits of doing so. IPH is seeking similar relief and is committed to complying with the compliance conditions previously imposed by the Board. As a closing condition under the transaction agreement, if this petition for temporary relief is not granted these environmental and economic benefits will be at risk.

A successful transfer of the plants to IPH offers the best opportunity for hundreds of workers, their families and our communities in addition to a stable tax base that provides critical support for our local schools, emergency response organizations and countless local governments.

AER and Dynegy are important economic engines for the state of Illinois and our local communities, especially in economically challenged Central and Southern Illinois. On behalf of our company, which has supported jobs and paid taxes in Illinois for 27 years, I urge the Board to improve air quality and support much-needed Illinois jobs and economic activity by granting IPH's petition for the requested temporary relief.

Sincerely,

Re: Public Comment in **Support** of Illinois Power Holdings' Petition, Docket No. 2014-010
(Air-Variance)

Dear Honorable Members of the Illinois Pollution Control Board,

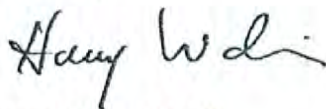

As a local businessman and resident, I write to you today to express my support for the above mentioned variance request by Illinois Power Holdings (IPH), a Dynegy subsidiary. In September 2012, the Illinois Pollution Control Board saw fit to grant Ameren Energy Resources' (AER) variance request, recognizing both the environmental and economic benefits of doing so. The variance request applies to Dynegy and Ameren facilities in my community. I urge the Board to grant IPH's petition so that the benefits to my community are not lost.

If granted, IPH will provide continued certainty to the employees and communities in Central and Southern Illinois that count on the economic benefit of the continued operation of these facilities. Dynegy is an Illinois employer with a strong environmental track-record. The variance is a closing condition under the Ameren-IPH transaction agreement. Without the variance, Ameren will be forced to pursue other options for the AER energy centers, creating uncertainty for the future of the plants and those who depend upon them – including our community and our regional economy.

A vibrant business climate is essential for the residents in our communities, and even the prospect of potential shutdowns would stifle economic growth and development in Central and Southern Illinois. A successful transfer of the plants to IPH offers the best opportunity for the workers, their families and for our communities, a stable tax base that provides critical support for our local schools, emergency response organizations, and countless local governments.

Considering the harsh facts and the opportunity to improve air quality, while supporting much-needed union jobs and economic benefits, I urge the Board to please support IPH's petition for the requested temporary relief. The welfare of our future depends on it.

Sincerely,

Harry Wolin, FACHE
