Dear Illinois Pollution Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 2014-010) to let five coal plants violate Illinois air pollution limits for the next five years.

Last year's drought is not a fluke! Climate change is real and we must keep the coal in the ground. We must find other ways of supplying our energy (also not natural gas)-- other ways that will create green jobs that are sustainable.

We set standards for a reason and politicians should not be allowed to give companies like Dynegy a free 'pass' to pollute our air.

Sincerely,  
Krista Johnsen

How long will we let profits override health interests--the health of those immediately exposed to the pollution of these plants, and the health of the globe (air and the pollutants it contains is not contained by local or national boundaries)?

How long will we let private industry override community needs, as they seek to eek out the last profits from an antiquated technology?

It's time to commit to the future health and welfare of ALL our citizens.

Sincerely,  
Phyllis Bird

I am not at all alarmed that Illinois might lose 2 coal plants. I am very much in favor of encouraging the development of renewable and "clean" energy technology using our riverways, wind turbines, solar panels and other non-nuclear, non-fossil fuel sources.

Sep 12, 2013

Illinois Pollution Control Board, cc: Dynegy CEO Robert Flexon

Subject: No Free Pass for Dynegy to Pollute! Case Number: PCB 2014-010

Dear Illinois Pollution Control Board,

Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 2014-010) to let five coal plants violate Illinois air pollution limits for the next five years. Being allowed to continue to poison the air, water and agricultural landscape is in actuality a State sanctioned subsidy that is paid for by residents of Illinois, involuntarily, in the currency of their degraded health. State of Illinois officials tasked with the responsibility to decide the outcome of this case should accept their role as stewards of both the economy and the health of the people of Illinois. Apparently Dynegy can not profit unless it is at the expense of the peoples health, in essence a tax on the Public that is collected with every breath. Allowing Dynegy to produce dirty energy with the most unethical of public subsidies works against the development of less polluting more sustainable alternatives.

Please act for your children's, and ours, future.

Dale Lehman
