

Dear Illinois Pollution Control Board and Governor Pat Quinn,

PC#115

We are pleased to present you with this petition affirming this statement:

"Don't give Illinois coal plants a free pass to pollute. I urge you to reject the request (PCB 2014-010) to let five coal plants violate Illinois air pollution limits for the next five years."

Attached is a list of individuals who have added their names to this petition, as well as additional comments written by the petition signers themselves.

Sincerely,
Robin Garlish

When IPH/Dynegy bought the plants they should have been prepared to commit to plant clean up and have the money to do it!

Beth Goodpaster

Dynegy wants a pass to run old, dirty coal plants nearly risk free, while residents near and far breathe in its harmful pollution and suffer from the acid rain and other nasty impacts increased SO2 pollution produces. if Dynegy is too poor to run the plants with required pollution controls, it is too poor to run the plants. Period.

Ameren and its predecessor Cilco have had more than ample time to install upgrades and make changes to these plants to make them compliant with the laws. Coal is a great resource for energy, but only if used in a responsible and ethical way. If they can't do it right, they shouldn't be allowed to do it at all. Either make them comply or shut them down.

Come to Central Illinois and enjoy Advanced Cancer and Deadly Asthma. A great place to live from Peoria/Pekin going west to the Mississippi River. You can die at a very young age but because the largest County in the Area--Fulton County--is better known as "Forgotonia" it is never talked about in Springfield Illinois or in Washington D.C. Enjoy your shortened life and don't open your mouth.

I live in the Illinois River valley within a few dozen miles from this plant. I agree with Robin. Why do we bother to have pollution regulations (intended to protect us) if those charged with protecting us bend to the influence of corporations to keep these polluting facilities running.

Since Illinois is now a net exporter of electricity. Let's start shutting down polluting power plants until Illinois is totally free of Coal fired power plants. If an emphasis is made on solar energy like we did on wind energy, we can make this happen in less than a decade!

Dynegy is asking the Illinois Pollution Control Board to violate its own rules! Why should Dynegy be rewarded by IPCB for its bad business plan? If Dynegy operate the plants in accordance with the law, then it shouldn't buy them.

I live within 2 miles of a proposed coalmine in east central Illinois. How can you allow for building of new coalmines when even President Obama is attempting to stop use of dirty coal in US. Coal pollutes our air, water and land! And why take some of the BEST prime farmland in the world to store & wash coal, and then collect dangerous coal sludge containing heavy metals.
