---

IPC Board,

I support the PFAS ground water quality standards in IPCB R2022-018. As a grandma of six I am concerned about a healthy future for the next generation. As a person of faith I see water as a life-giving gift that should be treasured and respected, and I see the care and dignity of all humanity to be our focus.

Please do what you can to make our water pure and safe.

Thanks-you  
Lorrie Tracy
