Subject: McHenry County Waste Transfer Station

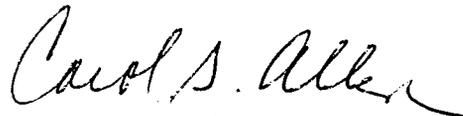

Dear Dorothy Dunn:

We wanted to let you know that we fully support the McHenry County Board's decision to deny Marshall Lowe's application for a waste transfer facility next to Cary, Illinois along Illinois Route 14. The location is adjacent to a sensitive conservation area, the Hollows, and is just over 1000 feet from the largest residential subdivision in Cary. The location also borders a parcel of land that has been approved for residential and commercial development.

The proposed waste transfer facility is too small, would generate a large volume of noise pollution to surrounding property owners, there would be potential for groundwater pollution, increased litter along Route 14, increased traffic, and, of course, there would be smell. Clearly, the public health, safety and welfare would be impossible to protect with the proposed design.

Sincerely,

Joseph P. Allen

Carol S. Allen
