PROFESSIONAL SUMMARY

Safety minded facility and process maintenance manager with unionized and non-unionized management experience. Bi-lingual Spanish speaking problem solver with State of Illinois, municipal and contract vendor management skill set. Budget focused Lean practitioner utilizing Kaizen, Six Sigma and Conway training to reduce waste and increase productivity. Facilitator of computerized enterprise asset management tools (mp2) to establish and maintain facility and process reliability. Continuous improvement team coach and motivator servicing plant-wide departments for manufacturing process support and growth.

2008-2011 POWER PACKAGING AN EXEL COMPANY **St. Charles IL**

Facility and Process Maintenance Manager
Motivated and developed a 12 person hourly maintenance staff to provide trouble-shooting and PM maintenance and support for a seven line flexible two shift co-pack dry food and savory product manufacturing process.

- Led the maintenance department effort through training and SOP creation to bring SQF certification to the St Charles Plant with compliance standard achieved in 2010.
- Achieved cost savings @ 25K per annum utilizing part-time trained and certified fork lift repair mechanic. Decreased need for outside contractor repair.
- Directed maintenance operations for all annual OSHA required facility electric fork truck vehicle inspections and compliance activities.
- Initiated in-house annual Fork truck licensing program and site specific desk and behind the wheel training program.
- Initiated all plant production consumable purchasing through MP2 utilization for JIT ordering. (Glues, inks, adhesive tape, safety supplies) resulting in decreased out of stock conditions for plant.
- Hired and trained and disciplined multilingual mechanics to support daily production metrics pertaining to daily and weekly start-ups and compliance with all plant Safety, GMP's and HACCP controls and Allergen awareness policies.
- Executed new equipment and facility capital purchasing justifications and provided capital submissions for projects over $2500.00
- Partnered with new customers and engineering department to formulate in house production modifications necessary to support new business at St Charles Plant.

2005 -2008 **CHIQUITA - FRESH EXPRESS SALADS**, Franklin Park, IL
Maintenance and Facility Supervisor- Process Fruit **2005-2008**
Directed a multi-disciplined three shift six person maintenance team responsible for a refrigerated fruit processing plant utilizing high pressure steam to clean and sanitize exterior fruit surfaces prior to bulk packaging.

- Initiated ultra sonic leak detection of facility pneumatic systems at Edgington Fruit Plant site with 2007 program saving of $10k/year contributing to $25 K yearly savings for Chicago region.
- Administered and trained staff for compliance with relevant OSHA/EPA /IDOT and MWSD and Tier Two Illinois reporting requirements.
- Scheduled and directed continual internal GMP and safety audits and ensured daily compliance with all customer driven third party audit standards for PepsiCo YUM Brands, ABI, and Military procurement requirements.
- Implemented all Lean - Kaizen team generated process events and continuous improvement ideas.
- Developed concepts, led training and engineered hardware for increased fruit shelf life, grew from five to ten shelf-life days
- Increased product yields while generating plant utilities savings of compressed air, steam systems, water, and natural gas.
- Developed recommended and justified building and process capital improvement requests for all items over $10 K expensed all purchases below $3K.

Maintenance Supervisor-Process Vegetable **1998-2005**
Directed a three shift maintenance operation servicing all leafy products and onion line process, packaging, building and shipping and receiving operations.

- Supervisor of thirty person four language three shift maintenance team.
- Coached and trained ethnically diverse multi-disciplined vegetable processing maintenance crew to minimize downtime eliminate waste and adhere to all governmental and customer driven food safety and GMP standards.
- Planned and scheduled cost savings and process improvements on packaging lines which improved line safety and increased capacity for vertical form and seal packaging operations.
- Approved daily and weekly payroll worksheets for Kronos time keeping and Sarbanes Oxley reporting

1996-1998 **BAKE MARK - KARP'S BAKERY**, Elk Grove Village IL
Electro-Mechanical Maintenance Technician

- Responsible for production support, planned maintenance, repair and troubleshooting from waste water to ammonia refrigerated spiral chiller processing areas.
- Modified and implemented design changes to an automatic multi-layer dough manufacturing line which reduced the amount of time needed to clean, wash and sanitize this production process. Modification lowered production costs by decreasing downtime between product changes

1990-1996 MASTER FOODS - M & M MARS SNACK FOODS, Burr Ridge, IL
Electro-Mechanical Maintenance Technician

- Performed electro-mechanical maintenance including troubleshooting, new installations and debugging and preventative maintenance.
- Analyzed process systems and initiated modification and repair of equipment using vibration baseline analysis routines, PLC programs modifications, high speed video recorders and thermographic imaging equipment, oil analysis routines as well as multimeters and electrical data collection tools.
- Selected as a member of the plant "Emergency Organization" member of Incipient Fire Brigade that responded to in-house emergencies including SCBA ammonia related events.

1985-1990 TANDY-RANK VIDEO SERVICES ORG, Northbrook, IL
Lead Systems Technician

- Debugged a unified PLC controlled cell manufacturing area producing blank and loaded VHS video cassette manufacturing from raw stock to finished product untouched by human hands.
- Responsible for night shift maintenance support for Bodine Automatic Assembly Machines with direction of shift technicians.
- Increased machine efficiency to a 97% yield rate over a 24-month period.

1983-1985 GENERAL AMERICAN TERMINALS CORP, Bedford Park, IL
Maintenance Technician

- Provided accountability for total maintenance activities to support the installation and beginnings of a semi-automatic liquid fill petro-chemical custom-contract packaging line.
- Increased finished goods yield from start up of 300 cases per day to 3,000 cases per day.

To: Ruben Pineda <RPineda@westchicago.org>
Subject: Objection of Garbage Waist Transfer Station -West Chicago

Dear Mr. Pineda.

I would like to add to the list of people who are **Against** the Project for the **New Garbage Waste Transfer Station** which is planned to be located in our neighborhood.

I moved to West Chicago about 10 years ago, and I purchased my home with the analysis that this was one of the best regions to live in. (Great commute to work, Great school Systems, Great support on Shopping and Grocery stores, Government data that the area was appreciating good, etc.

Since then, (And understanding that there have been several economical challenges), we have lost a lot of those benefits of our community. Several Businesses have moved out, restaurants, companies, and with the actual crisis, the trend is everywhere that real estate is either stable or going down for this recession. Our major Asset is at risk of not being appreciated overall speaking because of these global effects.

In addition, Economy and Jobs are starting to slow down and the possibility of jobs lost with company restructuring will potentially affect our Assets.

In addition to that, the area is starting to not being so attractive because of lost of Mall (St Charles), lost of Restaurants, a super bad of odor coming out from Smithfield Food company, and if we add to that the fact that with this additional Waste transfer station, there will be more heavy traffic, a visual-environment negative repercussions, and a more constant uggly odor coming out of that business.

I hope you consider all these reasons to formally consider me as one of the Mayor Objectors of this Project.

I understand that the county needs to get more investment, but I would like you to please consider extending other types of benefits for New Business - Companies to move in , but the ones that do not damage our Assets in a bad way like this Waste Garbage Transfer station.

If you need me in Person or add my name to the Activist to Reject this Project, I am happy to do so, and represent my community (Because many of my Neighbours think the same).

Thanks for your support.

Regards:

Martin Avila

Subject: Re: Application for sitting approval

Hey, thank you so much!

Here is my list of questions, I know there might not be time for all of them, so I will list them in order of importance.
Thanks again, I really do appreciate it!
Jasper Rubino

1) How will LSR and the City of West Chicago make sure that the trash trucks, when it's raining heavily, won't expel water containing hazardous waste, sewage and other contaminants onto the roadway and on the ground which could affect the quality of groundwater, which much of the city uses in our water wells. I know the streets have stormwater infrastructure but there are many areas where the storm water system is old and discharges water onto the ground which will end up in our water. How will this be prevented as I have personally seen trash trucks spewing discolored water while driving?

2) How will West Chicago keep the city appealing to new homeowners and investors once this transfer station is approved and functioning? Wasn't the Thorium spill enough to keep home prices down and investments out of West chicago? How will this help the cities already scared reputation? Should we just accept that West Chicago is a dirty, hazardous place to live?

3) Why is West Chicago the only city in DuPage county to have a waste transfer station and why does this community need to have two?

4) What are West Chicago's plans to fix the wear and tear that these hundreds of trucks will cause on our shared roads and What road routes are being proposed?

5) How much time and effort has LSR done in exploring other locations for this facility?

6) Who is in charge of the approval process and when will they be eligible for reelection?

7) What are the tax benefits for the city of West Chicago, How much will the city recoup per year and how will residents expect to see as far as tax changes?

Letter: Environmental reasons to support waste station

Posted1/9/2023 1:00 AM

As chair of the local Sierra Club, I am following the waste transfer station issue in West Chicago. Members of our executive committee met with concerned citizens from local groups discussing this topic.

Initially, we were concerned with "a waste dump in West Chicago" as an environmental justice issue. In addition, we also met with Lakeshore Recycling Systems (LRS) to hear about their plan.

This plan is not for a landfill or waste dump. It is an expansion of existing services on the property they now own and are doing recycling of materials such as construction waste. LRS now wants to add household garbage to their services.

The property is in an industrial park. Of particular concern to us is the attention to environmental impact. It appears that there is considerable attention to mitigate environmental concerns with an enclosed state-of-the-art building and air filtration system to protect the workers, and quickly closing doors as the trucks enter to protect the community.

This waste transfer station will make it possible for the collection vehicles to travel less distance on roads, decreasing their particulate emissions and fossil fuel usage, two concerns for air quality.

We also loaned the citizen group air monitors to ascertain the current impact on local air quality. Data shows there is no serious impact now.

We are dismayed that it appears influences have led residents to believe that this facility will do more harm than good. We advocate for aggressive monitoring to ensure compliance with commitments made in this process. With careful consideration, the River Prairie Group of the Sierra Club has determined that we will not oppose this permit request, and in fact support it.

West Chicago City Clerk: **January 10, 2023.**

Reference:
Application for Local Siting Approval – West DuPage Recycling and Transfer Station.

I am in favor of allowing the new transfer station in West Chicago. Before I state the reasons why, I would like to tell you a little bit about me.

I've lived in West Chicago for close to 20 years. All these years were spent in the Corner Stone Lake subdivision.
I've recently moved about a half a mile from my last residence in Corner Stone Lake.
I work in West Chicago and have done so for over 25 years.
I currently serve as a Commissioner on the DuPage Airport Authority.
I have friends and family that live in Corner Stone and their children attend Corner Stone School

I just want to make sure that anyone who reads this letter understand that I care very much about the surrounding area of where I live. My willingness to support this project is based on the value that this project brings to our community.

Why I agree with the new recycling facility:

1. It brings competition where there was none. When that happens the community wins.
2. It will bring a NEW source of revenue to West Chicago and DuPage County.
3. The effect of noise and truck traffic are virtually zero, to homeowners.
4. The sorting and transferring that will take place is enclosed. This eliminates the odor that can come from open air sites, such as the Groot site on the corner of Powis and North Ave.
5. It's a state of the art, safe and environmentally friendly facility.

Thank you.

Regarding Application for Local Siting Approval – West DuPage Recycling and Transfer Station

City government officials of West Chicago,

Living in West Chicago my entire life and working on Powis Road just down the street from our existing waste transfer station (very near the proposed site for another one), I am more than familiar with the amount of litter generated by this type of business. I work at Blachford Acoustics Laboratory at 1445 Powis Road, where the passing trash trucks deposit incredible amounts of garbage along the road every single day. The garbage collects on our property and blows around getting caught in the woods. Multiple times, the city has attempted to impose fines on us for trash on our property, when it is in fact from poorly secured loads of garbage driving by all day, every day. On multiple occasions now, I have seen giant stretches of plastic come out of a trash truck spanning in one giant piece from Hawthorne all the way past our building, causing mayhem on Powis. Doubling this activity will only increase harm to our environment. Groot and Lakeshore are already similarly responsible for incredible littering and messes, and both do nothing to attempt cleanup unless their hand is forced by angry companies like us fighting against wrongful fines repeatedly contacting them until they send a few people to walk around and clean up (usually not very thorough). No amount of regulation will suffice to ensure these businesses do simple tasks expected of them like to properly secure their loads between locations, not to mention the other forms of destruction brought on by large increases in truck traffic.

West Chicago has already had enough disasters take place from radioactive waste, our terrible-smelling wastewater treatment, stream contamination, litter from Groot's waste transfer station, the existing Lakeshore facility, and plenty more. Please do not reinforce West Chicago's ever-growing reputation for processing human waste in its many forms, and do not forget the ultimate duty of government officials - to be a government of, by, and for the people. The people of this town and the surrounding area do not want this type of business here.

Thank you for your time and consideration, and please feel free to contact me for clarity or other information.

West Chicago IL 60185

Blachford
ACOUSTICS GROUP

January 11, 2023

To the council members, administrators, and other pertinent parties associated with the West DuPage Transfer Station siting process for Lakeshore Recycling Services:

As a corporate citizen in West Chicago since the 1980s, Blachford Incorporated has invested millions of dollars, developed three facilities very near the proposed transfer station site, and employed many people from the local population. We have endured many years of littering from the existing transfer station, as well as from the existing Lakeshore facility nearby. Large amounts of trash blow out of passing Lakeshore vehicles every day from full trucks, as well as smaller pieces of trash blowing out of emptied trucks. Developing this Lakeshore location into another waste transfer station will only exacerbate the current problems.

On multiple occasions, the City of West Chicago has attempted to impose fines on our property at 1445 Powis Road for loose trash on the ground. This location is our world-class R&D facility built by us in 2003, which also has a natural wetland area occupying a large amount of the property. When confronted with citations, Blachford Incorporated has presented evidence of the culprits, including Lakeshore Recycling Services garbage stickers. Blachford Incorporated was informed by the City of West Chicago that the source of the litter did not matter and that we were responsible for it anyway.

In addition to various sites throughout the US, Canada, and the United Kingdom, Blachford owns a large site in Milwaukee, which has much cleaner neighbors. If the City of West Chicago continues to fill our industrial park with waste transfer sites and their associated pollution, Blachford will choose to invest in this location in the future rather than in West Chicago. Our businesses, our properties, our natural areas, and our people must not be continually besieged by waste-handling companies with poorly executed waste-handling policies and a lack of accountability.

Blachford Incorporated stands firmly against the Lakeshore Recycling Systems waste transfer facility and demands that the city officials of West Chicago keep the sentiment of our well-established businesses and neighbors at the forefront of their minds throughout this decision-making process.

Subject: Waste Transfer Station

I am vehemently opposed to this waste transfer station. For the taxes we pay to live in West Chicago I feel our residents deserve better. West Chicago already has a reputation of a less than desirable community for families. Why would you approve this is beyond me! I will not vote for any of my representatives that approve this waste station!

Subject: LSR transfer station

Has an environmental study been performed on the impact of hundreds of diesel trucks idling 24/7 or for extended periods of time in the winter months? How will this affect the visibility or air quality (smog) at DuPage Airport? It will definitely have some impact on visibility.

How about the cost of additional road repairs? 10 years ago Winfield Township looked into consolidating all the different garbage services to only one to reduce the impact on our streets and cost to residents. Hundreds of additional garbage trucks will definitely have an impact! What say you? Thanks, Adam C - West Chicago resident

Subject: garbage transfer station

To whom it may concern

I have been living in West Chicago for the last 18 years at the address : 40 W. Hawthorne Lane.
Over the years we have been going through different troubles like being in potential flood plain. However, the city council and the city engineer managed to make a project and save our home and our neighbors from the flood plain. We have also witnessed the reconstruction of the Hawthorne Lane and we were very happy to see a better street with sidewalk.

We are very much opposing the construction of the Garbage Transfer Station by Lakeshore Recycling Systems. We already have one garbage company and allowing LRS expanding will harm our community. The city council should represent the community and our benefits. We are paying really high taxes and I am wondering for what I am paying high taxes. I do not want to live in the town that allows harmful constructions like this. Why not attracting and bring different kind of business. Garbage companies should be distributed among the towns not centered in one town only.

I do not know what it will imply, living at Hawthorne Lane , we are not that far from it. There could be smell, there could be more garbage trucks and semitrucks on Hawthorne Lane which already has semi-trucks breaking the traffic rules and travelling on it.
Once they expand they will not enforce anything that is how it sounded at the public hearing. They proposed the route for the garbage trucks and semitrucks but the semitrucks are already travelling through Hawthorne Lane. It will be hard to prevent them from breaking the rules.

People will not want to move to town that is the garbage center of DuPage. We pay high taxes not for having another garbage company that will lower values of our houses.
Please, do not allow the construction of LRS transfer station.

Subject: Please forward to Aldermen and Mayor for their consideration

Dear Elected Officials of West Chicago

My name is Barbara Laimins - a resident of West Chicago. Just to provide some background. My husband and I chose to raise our family in West Chicago over 50 years ago. We chose West Chicago so our son would grow up in a community that was culturally and economically diverse with excellent schools, a city government that welcomed citizen input, and had city services that would provide a good quality of life.

While West Chicago has grown over the years, it has maintained the feeling of a small town where people care about each other. It is a community that celebrates and embraces its diversity.

Excellent planning and vision by successive city leadership has grown our industrial base that has benefited the citizens of West Chicago by maintaining our low property taxes that are the envy of surrounding communities.

I learned about the proposed Waste Transfer Station through a headline in the Daily Herald that stated West Chicago residents fear that their city would become the Garbage Capitol of the Western Suburbs, lower home prices and affect the quality of life for the citizens. Shortly after a mass mailing arrived at my home filled with assertions of increased odors, lower property values and damage to our environment and encouraged residents to attend the meetings.

As a result, I have attended all the hearings. I have listened to the petitioner and the opponents and have concluded that the fear mongering, unfounded, and unsubstantiate concerns raised by the opposition are more of a danger to the perceptions held about West Chicago than the transfer station itself.

Testimony that has been presented has demonstrated that the petitioner has met the required criteria for the siting of a transfer station and are willing to agree with additional caveats that have been identified. And in fact, the petitioner proposes a state-of-the-art facility that would seemingly exceed the procedures and practices of the current transfer facility located a quarter of a mile away from the proposed site.

Importantly, the petitioner has shown

There will be no increased odors, environmental impacts, or traffic on residential streets of West Chicago

The transfer station will support the DuPage County Solid Waste Plan of 2022 and the environment by increasing recycling opportunities for homeowners and those who live in apartments.

West Chicago, DuPage County and the DuPage Airport will benefit financially from negotiated host agreements which will in turn keep residential property taxes low.

The establishment of the waste transfer station will also allow for competition in the waste industry that will ultimately bring benefits to consumers through lower prices due to competitive bidding on waste hauling contracts.

A second waste transfer station located in an established industrial area will not negatively impact the property values of West Chicago residences. It is those who continue to malign west Chicago by negatively labeling the community as the garbage capitol of the western suburbs that will do that.

My only concern and disappointment after attending the hearings is that the opposition group Protect West Chicago have not been transparent about their membership or released any financial information regarding donors and/or funding that would explain how they can support two lawyers, multiple experts, signs, and mass mailings. My request to the organization for this information has gone unanswered. and therefore, created a lack of trust in my mind, and the minds of many, about whose interests they are actually protecting.

In contrast, I have found the City of West Chicago to be fully transparent and in fact The City of West Chicago has been commended by the Daily Herald for their efforts to inform and engage the community on this issue. As a result, I have faith and trust the City of West Chicago will do their due diligence in supervising the construction and operation of the facility to see that the site is developed and operated as proposed. Therefore, the project has my full support, and I will encourage my neighbors and friends in West Chicago to do the same.

Blachford
ACOUSTICS GROUP

January 16, 2023

To the council members, administrators, and other pertinent parties associated with the West DuPage Transfer Station siting process for Lakeshore Recycling Services:

Having dealt with unintentional litter for many years, Blachford Incorporated is no stranger to our neighbors in the waste handling business, including Lakeshore Recycling Services (LRS). Our company properties and wetland area have been continually peppered with various types of blown debris, which we witness coming out of unsecured or poorly secured full loads, as well as remaining small pieces from emptied containers on LRS trucks driving by our facility at 1445 Powis Road.

Following our review of the West DuPage Waste Transfer Station Application for Lakeshore Recycling Systems, Criterion 2, Section 2.4.8 (Litter Control), we observe that the current resources provided to hold LRS accountable for debris associated with their business are insufficient to meet current and future needs of nearby businesses and the surrounding community. Previous citations for litter on our property have not been accompanied by support from the City of West Chicago to hold responsible parties accountable. The requirements included in Section 2.4.8 address only sweeping and cleaning of Powis Road, when in fact the roadway itself is not the biggest threat to the surrounding community. The already deplorable collection of blown debris in the forested areas, wetlands, culverts, and recessed areas on and around nearby properties would only worsen with the proposed dramatic increase of activity at the LRS location. Blachford Incorporated has struggled to gain cleanup assistance from LRS in the past and requires accountability from the City of West Chicago for perpetrators of activities that are already illegal, including littering, as described in articles including but not limited to current West Chicago Municipal Code § 11-162(f) and § 11-103(b).

In the event of siting approval for any business activities with a high risk of accidental littering, such as the proposed LRS waste transfer station, Blachford Incorporated requests the City of West Chicago include terms in the siting approval to authorize any property within a reasonable area to impose regular and frequent cleanup efforts to be conducted by the littering company. Properties adjoining and nearby regular routes to and from the waste handling facility, and within a reasonable distance of the waste handling facility are most important for inclusion in such terms. For the proposed LRS transfer station expansion, Blachford incorporated requests the minimum areas and frequencies for cleanup to include:

- The entirety of properties within one hundred meters of any point on the route from IL Rt. 38 to IL Rt.64 via Kress Road, Hawthorne Lane, and Powis Road
- All areas within one kilometer of the waste handling property extents
- Required cleanup frequency along the aforementioned route's roadways and immediate tree lines, fences, culverts, etc. of at least one time per month by the waste handling company via hand pick-up
- Localized hand pick-up as requested by any individual property described in the aforementioned areas with a frequency of up to two times per month per property

Blachford
ACOUSTICS GROUP

Though plans and procedures are put in place to mitigate negative effects on surrounding areas, they do not appropriately address the cause of environmental harm. Current LRS practices do not sufficiently control litter, and the plan set forth for expansion does not include any language to rectify those issues, which will therefore only worsen following any expansion or growth in their business. Blachford Incorporated demands that the city officials of West Chicago keep the sentiment of our well-established businesses and neighbors at the forefront of their minds throughout this decision-making process.

Subject: Waste Transfer Facility, Public Comment

Good morning,

As a resident of unincorporated West Chicago and a parent of a former and future WeGo students, I would like to share my concerns any the potential second waste transfer facility.

I do not think it is necessary to add this business to our community. First, the current facility is still below capacity. Second, the public attitude towards West Chicago will only plummet further. Most people in the surrounding area already view our town as "subpar" in attractiveness, education, opportunity, and economic standing. Many people in more affluent communities drive past villages with waste treatment and transfer communities with their noses plugged, both because of the smell, and the idea that the area itself is dirty, less, and not worth stopping for. Why would you subject our very valuable community to such action and opinion?

It is no secret that businesses are leaving West Chicago for surrounding areas because those areas are considered more "favorable". Why wouldn't leadership seek to BUILD UP our town instead of PUSHING IT DOWN? For example, Aurora, which is also predominantly similar to our demographics, is investing in their downtown area. Hosting events, attracting businesses, and building up their properties. Why doesn't West Chicago instead consider the opportunity that exists to do something similar? We have such rich cultural opportunities and space to become something absolutely beautiful. Please do not further associate us with garbage. We deserve better.

Thank you,
Katharine Hart

Dear West Chicago City Council Member,

Our community will suffer if Lakeshore Recycling Systems is allowed to construct another garbage waste transfer station in West Chicago. It would mean more litter, increased odors, more traffic resulting in wear and tear on our roads, lowering our property values and hurting our environment.

West Chicago is already the only community in DuPage County with a garbage waste transfer station within its borders. If Lakeshore Recycling Systems' proposal is approved,

West Chicago would be the only community in the entire State of Illinois, other than the City of Chicago, to have two garbage dumps in their community.

This is wrong. Our community should not be Chicagoland's dumping ground!

I don't want 4 million pounds of garbage and 400 trucks in our community every day!

I oppose the construction of another garbage waste transfer station in West Chicago and I urge you to support the community against this big company.

Please protect our community! Thank you.

Subject: Waste Transfer Station

I am writing in opposition of the proposed second transfer station. As a resident of West Chicago for 24 years, I find it concerning that the city wants to be he "dumping ground" for the neighboring area when we already have one location. The additional truck traffic and unsightly nature of such facilities will have a detrimental impact on property values and perception of West Chicago. We should seek to elevate the status of West Chicago and not be viewed as a dump for everyone else's trash. Please fight against this proposed transfer station.
Thank you!

Subject: Opposed to a second waste transfer station

I could not make it to the public comment session at the city council meeting so let me express my opposition to the second transfer station here. I helped to form TAG in the early 90s; that's Thorium Action Group. TAG helped to get Kerr-McGee to get the nuclear waste out of West Chicago rather than bury it here. We would have been know as the Nuclear Waste dump of Illinois and DuPage County. I don't want to be know as the garbage dump of DuPage county.

Please note my opposition to a second waste transfer site. If it goes trough I will be voting and campaigning against the mayor and others in the next election.

Subject: Proposed Trash Dump

Dear West Chicago City Officials-

I wanted to express my concern for the proposed trash dump.

We live close to this proposed site and oppose the decision to move forward with this project.

Not only will it reduce the overall reputation of the community, but it will significantly drag down property values in the area.

Illinoians already struggle with many economic challenges that surpass other states. Adding this additional problem to those living in our area will further impact us financially.

Please do not move forward with this project.

Thanks,

Subject: Transfer station AKA trash dump

City Clerk

I've been a resident of West Chicago for 20 years. During that time I've seen some good things happen for our community but for the most part it's been stagnant.

You never go to St. Charles, Geneva, Winfield, Glen Ellyn or any other surrounding town and hear folks talking about how their visit to West Chicago was or they can't wait to get to that establishment because it's so good. Fact is, the people who live in West Chicago go to other towns to spend money. There is very little to attract anyone to our community other then Sonny Acres and a couple shops.

Now their grand scheme to bring in revenue is to build a 2nd transfer station. It's almost fitting that other communities need to dump all their garbage here since we frequent their establishments.

I am adamantly opposed to a second transfer station/dump in our community. Let someone else have it! Our property values that have remained straight lined since I moved in will plummet. North Ave will be a trash dump with more garbage flying out of more trucks!

For once do something that supports your community and vote no to this!! It's not welcome and we don't want it!!!

Thank you for your consideration

Subject: Comments in Opposition to Waste Transfer Station

Hello,
I would like to submit a comment against the development of a garbage waste transfer station in West Chicago for consideration by the Village Council.

My wife and I moved to West Chicago with the intent on raising a family. We recently had our first child, and were given a newspaper from the day of his birth as a gift. One of the headline stories was that West Chicago is feared to be the new garbage capital of the suburbs. Our community deserves better than this title, and the creation of this station would tarnish not only the City's image but also the quality of life of our residents. I understand the municipalities desire to bring business and development to the community, but please consider the impact of waste processing on our local families and communities.

I adamantly oppose the Lakeshore Recycling Systems' plan to build another garbage waste transfer station in our community.

Respectfully,
Zach Wirtz

Hello,
I am against another waste station in our town. I'd prefer to not to have to deal with more truck traffic on all our city roads. I'd prefer to have my property value rise instead of dropping. West Chicago needs to really think how it wants to present itself in the future and have a plan. We don't need another auto parts, vape shop or resale shop as well as another waste station in our area. Try to figure out how we can make out downtown profitable so we can have others shop in our town instead of going elsewhere.

Thank you,

1/25/23

To the attention of the City Clerk and City Council:

As a lifelong resident (50 years) of the City of West Chicago I have always been proud of our City. Decisions the City have made have always moved us forward, improved the city, and benefitted the lifestyle and community experience.

We tackled the Kerr-McGee problem and rid the city of toxic waste. We have put that behind us with a great deal of work and community effort. Now we are offered a chance to BRING MORE WASTE INTO THE COMMUNITY!!! Seriously - not a move that will enhance the community.

I realize we have a station now that has worked well for waste — but I can assure you that doubling it will only bring problems - and NOT PEOPLE - to our lovely community. I do not want waste recycling to be the hallmark of our community.

I don't believe that the tax relief it may offer the community will offset the damage it will do to the community overall. It is not the image I want for my community!!

Please vote NO on the expansion of the recycling transfer station. Hoping for a bright future for our City with your help.

Sincerely yours,

Subject: Opposition of Waste Transfer Station - West Chicago

To Whom It May Concern Regarding the Opposition of the Waste Transfer Station being built in West Chicago:

As residents for over two decades, we feel as if our concerns have been not addressed in opposition of the upcoming hearing on the Lakeshore Waste Transfer Station. We not only have several major intersections of Illinois rumbling through our streets at all hours of the day and night (garbage and more) which tremble our homes (much like living right next to an airport), we now feel completely helpless and insignificant when it comes to our voices not being heard. All of the notes we received about attending any meeting came in snail mail, way after the fact of the local meeting, how absolutely convenient so our voices were silenced! Walking my now blind pup alongside Route 59 near St Andrews Golf Course, you would think we lived in a war zone, or the worst part of the city in Chicago where streets are overlooked due to bad budgeting. There are concrete chunks all over the median, the road, the lawns (which I have collected for five very long years now in buckets which are inconveniently in our landscape sadly) there is no place that is safe to walk or even mow your lawn in the summertime. These streets are patched up by IDOT, often with gravel (death rattle for bikers), sometimes with cheap blacktop that lasts one good day (a total waste of tax money) saying they ran out of funds to do anything else along this route when Naperville between 75th and 115th got completely new pavement (they'll probably tell me it is because it's in a different county that has more money)! Heck, the streets just down the road (smith and others in oak meadows had the money to be redone because that money is allocated for that but not ours! It has been allowed to happen, we have been a doormat for big builders using Route 59 to drag their massive loads and other trucks which are not allowed on Randall or Route 53 which shaves bucks off their tollway bills and adds stress to the locals . It is insane. Most of the homes here are not only settling due to their age, the stress cracks are simply never going to be addressed by anyone other than the homeowners who have lost their voice, equity in their properties and the civil right to complain and get the convenient run around. Once the lanes were opened to two decades ago between Army Trail Road on the North and Route 64 on the South, there have been deaths, accidents, rollovers and vehicles in our front yards, no one cares, no numbers to call, no one to complain to. We pay our taxes and they keep going up and up every year and now this Waste Transfer Station! Dumping on us yet once again and we have had absoluetly enough! I am also sending this to CBSnews investigates so they can understand what we as residents have been going through for years. Broken promises and stuff that should've been answered but left unfinished.

Hello,

I understand that West Chicago is considering adding a waste transfer station.
Although I was not able to attend the hearings, I would like it to be recorded that my family and I oppose the proposal for adding this waste transfer station.
We have lived in West Chicago for almost 23 years.
Although the waste transfer station may be bring in some revenue, it will ultimately also bring more trucks on our roads, more noise in our neighborhoods, and the potential for more pollution to our area.
We need to protect our city and find better ways to attract businesses with positive impacts to increase commercial revenue.

Thank you for your consideration,

Subject: We oppose waste transfer station in West Chicago.

I am a resident of West Chicago for the last twenty years and love living in this beautiful city.
Please DO NOT approve the proposed waste transfer station as it will pollute the environment and compromise the health of the residents.
The revenues you will generate will far outweigh the consequences.

Please do not approve this proposal.

Thanks,
Mohamed Akqil

Subject: Opposing second waste transfer station

I live in unincorporated West Chicago and am concerned about plans for a second waste transfer station. We already have seen an enormous increase in traffic, especially trucks, in the neighborhood I live in which is MacQueen. Also I am concerned and question why this area has to be the garbage dump of the county. The area I live in is unfairly impacted. The east side of the tracks doesn't allow trucks to go through. This area remains residential. We have enough- no more!

Sincerely,
Pat Rouille

Subject: Waste transfer station opinion

Hi,
I am emailing to voice that we are AGAINST the waste transfer station.
West Chicago already has one waste transfer we do not need a 2nd The smell and the garbage blowing around.
I have been a resident of west Chicago since 2006 and my husband since the mid 90s

This town has so much potential but west Chicago continues to Miss the mark We have little to no restaurants except fast food and the majority of them are Mexican. The only sit down restaurant that draws a large crowd is hawthorns and the smell from the trash will certainly affect the outdoor dining area... who wants to sit at a restaurant and smell garbage?

And now we might have not one but two garbage transfer sites and on the corner of 59 and 64 there is a possibility of a truck stop and we will have a gas station right behind a gas station not to mention the additional pollution and truck traffic that the transfer station will bring and the truck stop The elected officials in the town need to do better we pay HIGH taxes here yet we have nothing to show.
Once my child is done with school in 6 years I don't know if I can envision myself continuing to live in West Chicago is there aren't positive changes for the residents.
It is sad I live here but rarely do I spend any money here in this town we have to go outside of west Chicago for a decent restaurant, and shopping

Do better and say no for the residents

Thank you,
Denise Kolode

Subject: Proposed Waste Facility in West Chicago

I am sending this email to state my and my husbands concern over the creation of another waste facility in our town, West Chicago. The slogan posted on the signs when entering our town say "Where Progress and History Meet". I really don't think building another waste facility is progress because it could have a negative effect on people thinking of relocating to West Chicago. There's plenty of open land further West of our town that would be suitable for the development of said facility.

We do not want my home town to be a trash dump. I see many negatives; but no benefit to more trash. We don't need another garbage waste transfer station – one is enough! Our community would become a dumping ground!

Our community will suffer if Lakeshore Recycling Systems is allowed to construct another garbage waste transfer station in West Chicago. It would mean more litter, odors, and traffic -resulting in wear and tear on our roads, lowering our property values and hurting our environment.

West Chicago is the only community in DuPage County with a garbage waste transfer station. We can be unique in better smelling ways. This is wrong. Our community should not be Chicagoland's dumping ground!

We oppose the construction of another garbage waste transfer station in West Chicago and I urge you to support the community as we have supported you. Please protect our community!

Please don't approve this unless you are prepared to pay each homeowner a substantial amount of money to cover the loss of property value that could be realized by this action. Furthermore, there are other locations in Kane County, for example the old Groot facility on Rt. 25 that should be considered. West Chicago had to live thru the Kerr McGee disaster and we don't need another industrial incident. We already have one transfer
station, only Chicago has two, please find another location.

Subject: Waste Transfer Station

As a longtime resident, I oppose the addition of a second waste transfer station in West Chicago.
Having one seems more than enough in this city which is one of the least, if not the least, thriving and innovative cities in DuPage county and lacks a great deal of appeal. It's clear from many instances that while the city is quick to collect money, there is not much interest in investing wisely in the community and its beautification. PLEASE do not allow another garbage processing station to operate here for surrounding communities who themselves do not want this in their own backyards.
If the proposal of this station is accepted by the city of West Chicago, at least put a very outwardly concentrated focus on making it a non-conspicuous location and use the monies generated to bring in and encourage a unique and diverse array of businesses that will attract business from people in other communities as well as our own and bring pride to West Chicago. We have a downtown area that has great potential and needs a complete overhaul. It isn't enough to focus on strictly industrial pursuits because this is also a community of residents who want West Chicago to have appealing businesses that cater to lifestyle, entertainment and personal interests. It is unfortunate, but West Chicago already has a reputation for being an undesired location and the addition of a second garbage transfer station will certainly confirm that even further. This should be a very serious consideration.
Thank you,

Jay Van Proyen

Subject: OPPOSING COMMENTS: Waste Transfer Station

To Whom It May Concern
I am a resident of West Chicago. I've lived here for almost 6 years. I have several concerns about the proposed second waste transfer station as well as the public hearings.

I attended the first hearing and was extremely disappointed to see that the lawyer who functioned as judge was so clearly biased in his enthusiastic support of LRS and so obviously disdainful and disrespectful of the PODER counsel. Additionally, the method and manner for citizens to speak at the hearings was not made clear. In fact, it was extremely confusing and difficult to find information regarding how we could speak up. Every resident I spoke to believed, as did I, that we would be able to voice concerns in an orderly manner at the end of each hearing. We had to find counsel to clear up how to speak and were all disappointed to hear that we had to request, via letter or in person, to speak.

Regarding the proposal, on that first night PODER counsel clearly explained that the proposal should be dismiss because the engineering firm had not delivered the appropriate legally required documentation to the appropriate interested railroads either to the accurate address or accurate company. In fact, they had not even confirmed receipt. Rather than dismiss the proposal there the "judge" rudely told counsel to, essentially , hurry up.

There is clearly no need for a second waste transfer station in our town. Though he reluctantly admitted it, It was made clear, by LRS's own engineering firm that there us plenty of healthy competition already.

There is too much noise and pollution in the current situation. With additional trucks driving on and off Route 64, which already affects rush hour traffic, the situation will worsen. And there is already quite a bit of garbage and refuse that "sails" off those garbage trucks as they speed down the road. They drive over the limit, recklessly as it is.

According to the State of Illinois, there are 14 current transfer stations in DuPage County, most of which are operating far below capacity. There is no proven need for another station, neither for capacity nor for competition.

This situation is an obvious circus, mandated by law, that the City is participating in because they must but will do what they want, regardless of the desire of their citizens. None of us want this station. None of us want to live in the garbage capital of DuPage County. If LRS truly believes they need another transfer station, there are plenty of other towns and cities in the County they can choose.

The hearings were a biased farce and the City will lose what little respect it has left and many of its citizens will leave. The housing prices will suffer, as will the schools. The town is already in crisis, having just barely recovered from the Kerr McGee fiasco and now they want to jeopardize our health and safety again.

I am in direct opposition to this proposal. Should it pass, I and many of my neighbors, will likely leave. Our City government is placed in their offices for US and should be listening to our concerns.

Please take this letter to heart - I am very concerned about what is happening to my town.

Sincerely,
Wendy Christman

Subject: Opposition - Lakeshore

Hi,

I am writing to state my families opposition to a new recycling center by LakeShore within or near West Chicago.

We have lived in West Chicago since 2001, north of the airport and on some days within smelling distance of the existing recycling center on the corner of Powis & 64. Currently we observe recycling trucks in and out all day long and around this intersection and lead in for miles. We observe trash flying from their trucks all along 64. We observe lost trucks driving Smith and Powis. We observe trucks not stopping at the traffic lights at Powis & 64. We observe trucks speeding and driving aggressively.

Our understanding is that this proposed facility will increase the truck traffic by hundreds of percent. Bringing in trucks from all over Cook County as well. I am sure with the mass exodus in Cook county there is space better suited and better located to expressways that would work.

West Chicago is barley keeping it's image. Being known as the great dump will not help the existing residents, students, businesses or home owners - including anyone considering moving to West Chicago. The easily observed trucks will not make the roads safer or cleaner.

We say NO. If there is doubt of the citizens and businesses wanting a new recycling dump - put it to a public vote on a ballot.

Sincerely,

-scott ligocki

Subject: Opposition to second waste dump in West Chicago

We are West Chicago residents and highly oppose a second waste dump in our city. We have a very nice home and know definitely the increased dump waste and truck traffic will have a negative effect on the the value of our home. That alone is enough to veto another dump station in our city. What we find incredibly obnoxious is the fact that the city would even listen to outside opinions from anyone not residing in West Chicago. It is highly offensive that someone living in another city or town dictates the policy for West Chicago. Why would officials voted in by residents consider outsider comments. Do what's right and say no to another dump site which would have a detrimental effect on West Chicago residents.

Subject: Garage facility #2

To whom it may concern-
I adamantly oppose an additional garage facility in West Chicago. We already have one! The garbage on our streets and roads is already overwhelming secondary to the garbage traffic near our neighborhood. I moved into Cornerstone Lakes, because it was tucked away and more quiet and it seemed clean at the time – I am now realizing that one garbage facility has been relentless with traffic and roadside filth. If another garbage facility is approved, we will definitely be moving to the west side of Saint Charles as soon as possible. We previously felt comfortable with our decision moving to West Chicago but fear we may have been extremely wrong.

Subject: Opposed to Second Waste Transfer Site in our City of West Chicago

I would like to voice my concern about permitting the building of a second waste transfer site in our city. I am a long time resident of West Chicago and am proud of our city. I am concerned that having two waste transfer sites in our city will create a negative opinion of our city. It is my understanding that no other city in Illinois has two sites except Chicago which makes sense given the size of their population. The opinion of the public is important for our home real estate values, as well as attracting potential future business owners.

I am also concern about the extra truck traffic. Myself and many of my neighbors travel through the corner of Route 64 and Powis Roads. More traffic and large trucks that have been known to drop small debris as they travel through this area, is a concern for me. I myself have been in an accident at the corner due to a large vehicle that was not able to control their speed as they were coming down the hill going west bound on Route 64.

Lastly, I am concern of the potential impact on the quality/smell of our air in West Chicago.

I am hopeful that our City Council of West Chicago will prevent our city from becoming the "dumping ground of Kane and DuPage Counties". Is this extra site really necessary for the needs of those in the West Chicago and their immediate neighboring cities? If not, then I would recommend that those other cities find a site closer to their community vs. trucking it to West Chicago.

Sincerely,
Michaela Hull

Subject: Waste Transfer Station

We have lived in West Chicago for 24 years. Raised our children here. Participated in the WC Park District programs for them. We are NOT happy with the way the West Chicago City Council has been putting business of garbage ahead of the residents and property values that cover the annual city budget. Cornerstone Lakes has had to fight several times to keep this community and the city of West Chicago appealing to it's current and future residents.

A SECOND transfer station in the city will deplete property values, which in turn will reduce property taxes and therefore reduce your city budget.

It's not just about value. It is also about the physical health of the communities around the business of a garbage transfer station. All the talk about the "safety" of that business is very questionable, as to whether the company will hold to modern standards of construction.

Why does this particular community have to always fight for what's right for families, and the environment around it.

Take the transfer station to another part of the county, and away from residential communities. One transfer station is enough for West Chicago.

Will the West Chicago City Council really listen and do what is right? You know we are right, don't you?

Naperville, IL 60148

Dear Mr. Hock P.E.,

Canadian National Railway (CN) is in receipt of notice regarding the proposed project for the West DuPage Recycling and Transfer Station on August 24, 2022, at CN's corporate headquarters at 935 Rue De La Gauchetiere Rue, Montreal, H3B2M9, Canada.

The CN rail lines directly east of the West DuPage Recycling and Transfer Station are part of the Leighton Subdivision. The Leighton sub is a vital part of the CN network and on average sees about 21 trains per day. CN has no plans to decommission this rail line. The Leighton sub is part of the old Elgin Joliet & Eastern Railway (EJ&E) which was purchased by CN in 2009 and is doing business as the Wisconsin Central LTD which is a wholly owned subsidiary of Canadian National Railway.

CN has spent hundreds of millions of dollars in capital improvements since acquiring the EJ&E. The EJ&E connects the entire network together in the Chicago area. It ties together CN's southern region and its western and eastern regions. The EJ&E not only connects the CN network together, but it also connects with all the major railroads in the Chicago area. It is also home to CN's largest rail yard in the U.S. The EJ&E serves steel mills, petrochemical customers, and a diverse group of distribution centers.

This active rail line improves CN's rail operations on the entire CN system and the rest of the Chicago rail network. It has streamlined rail operations, reduced congestion, and will play an important role in CN's future. We do not have any comments regarding the proposed West DuPage Recycling and Transfer Station.

Sincerely,

K T. Donahue

Subject: Lakeshore Recycling Systems and West Chicago

I have sent numerous emails about this in the past and could not attend the meeting because I was ill. I live in West Chicago and oppose another or an enlarged waste facility. The implications that it holds for current residents and tax payers have already been discussed, I am sure. I do not want the facility because I do not desire extra road traffic, possible contamination of our city and the land surrounding it. I do not want wear and tear on our roads because of the traffic and noise disturbance and I certainly to not want to pay more taxes for road repair. My annual real estate taxes are already $16,000 per year and this is already too much to bear. West Chicago is finally recovering from the McKee plant pollution and disease that it caused in our community. We already have a large enough industrial area compared to the number of citizens that we have. I think it is time to put this disposal project into another area or even in another county. Let some other folks share the "wealth" that this type of industry brings . If West Chicago wants to improve the community then they should concentrate on projects that actually benefit the families and not the city and county coffers . In this day and age we all wonder where our tax money goes. We purchased our home in 2000 and it was a relatively quiet place. Now not only has this been proposed but we have seen great increases of traffic down our road - drivers that want to bypass the intersection at North Ave and Rte 59. Those responsible for the roads and the police cannot even control the speeders that speed, run red lights, and endanger everyone. What additional problems does West Chicago have to put up with? Put this terrible idea to bed in West Chicago and move it somewhere else please. I am sure there is vacant land elsewhere that can be used outside of our town full of families and children. I would ask the question - what is Lakeshore giving back to our community in exchange for bastardizing the place we live and want to retire in?

Subject: Neighbors for a Cleaner West Chicago

Dear West Chicago City Council Member,
This will equally affect the historically significant community of Wayne due to the proposed location & transportation links.

Our community will suffer if Lakeshore Recycling Systems is allowed to construct another garbage waste transfer station in West Chicago. It would mean more litter, increased odors, more traffic resulting in wear and tear on our roads, lowering our property values and hurting our environment.

West Chicago would be the only community in the entire State of Illinois, other than the City of Chicago, to have two garbage dumps in their community.

I oppose the construction of another garbage waste transfer station in West Chicago and I urge you to support the community against this big company.

Please protect our community! Thank you.

Subject: Opposition to the 2nd Waste Transfer Station

February 2, 2023
Nancy and Jose' Orozco
345 Arbor Avenue
West Chicago, IL 60185

Dear City Council Members:

As citizens of West Chicago for over 35 years, my husband and I write concerning the proposed waste transfer station. People should understand this transfer station will negatively impact our lives here in West Chicago. Arguably, it will not literally be in our backyards, but it will be close enough to affect our livelihood. Being from a town with 2 waste transfer stations will undeniably lower the value of our property. It will create the perception of odors, litter, torn-up roads from garbage trucks, and excessive truck traffic. Years ago, when we moved from Texas, our realtor attempted to dissuade us from buying a lovely treed lot near the downtown area by telling us we should not be living in a blue-collar town with a troublesome issue like Kerr-McGee. But we bought and built despite her recommendation because we believed West Chicago was a peaceful and friendly community with hills, beautiful parks, trees, wildlife, and very little traffic. The problem of Kerr-McGee was ultimately rectified, and now the realtors will have a different detraction to keep perspective buyers away. If we as citizens do not respond or voice our opinion to our city leaders, it will be our fault when our town becomes the waste capital of Illinois. I'm hoping enough people care sufficiently about their town to speak up and do their best to keep this transfer station from becoming a reality. Dollar signs should not be the deciding factor. I appeal to The City Council that we, as citizens, do not want or require another garbage transfer station here. You, The City Council, are here to defend us against this type of injustice. Please do your job.

Sincerely,

Nancy and Jose' Orozco

Subject: Opposition of the Waste Transfer Station

To Whom It May Concern Regarding the Opposition of the Waste Transfer Station being built in West Chicago:

As residents for over two decades, we feel as if our concerns have been not addressed in opposition of the upcoming hearing on the Lakeshore Waste Transfer Station. We not only have several major intersections of Illinois rumbling through our streets at all hours of the day and night (garbage and more) which tremble our homes (much like living right next to an airport), we now feel completely helpless and insignificant when it comes to our voices not being heard. All of the notes we received about attending any meeting came in snail mail, way after the fact of the local meeting, how absolutely convenient so our voices were silenced! Walking my now blind pup alongside Route 59 near St Andrews Golf Course, you would think we lived in a war zone, or the worst part of the city in Chicago where streets are overlooked due to bad budgeting. There are concrete chunks all over the median, the road, the lawns (which I have collected for five very long years now in buckets which are inconveniently in our landscape sadly) there is no place that is safe to walk or even mow your lawn in the summertime. These streets are patched up by IDOT, often with gravel (death rattle for bikers), sometimes with cheap blacktop that lasts one good day (a total waste of tax money) saying they ran out of funds to do anything else along this route when Naperville between 75th and 115th got completely new pavement (they'll probably tell me it is because it's in a different county that has more money)! Heck, the streets just down the road (smith and others in oak meadows had the money to be redone because that money is allocated for that but not ours! It has been allowed to happen, we have been a doormat for big builders using Route 59 to drag their massive loads and other trucks which are not allowed on Randall or Route 53 which shaves bucks off their tollway bills and adds stress to the locals . It is insane. Most of the homes here are not only settling due to their age, the stress cracks are simply never going to be addressed by anyone other than the homeowners who have lost their voice, equity in their properties and the civil right to complain and get the convenient run around. Once the lanes were opened to two decades ago between Army Trail Road on the North and Route 64 on the South, there have been deaths, accidents, rollovers and vehicles in our front yards, no one cares, no numbers to call, no one to complain to. We pay our taxes and they keep going up and up every year and now this Waste Transfer Station! Dumping on us yet once again and we have had absoluetly enough! I am also sending this to CBSnews investigates so they can understand what we as residents have been going through for years. Broken promises and stuff that should've been answered but left unfinished.

Respectfully,

Subject: Waste Transfer Station

Good Morning,

I live on Sweetbay Ln in West Chicago.
We are 100% against building another garbage waste center in our town. We've been here since 2005 and the town is changing. We are also against an huge truck stop on rte59 directly across from our subdivision. Our real estate taxes are incredibly high at almost $1,000 a month, $12,000 annually. Please don't turn this town into an industrial city. Why would residents pay such high taxes to live in a town with two garbage waste stations and a huge truck stop in residential areas? West Chicago will lose a lot of residents if this waste station comes to fruition. We will sell and move before these two projects are finished. The future could very well be less residents and tax revenue, higher crime and not a good place for families. The exact opposite of where we are now. We don't need this. We were voted very highly for beat places to raise a family in Illinois. Please keep our town as is!

I believe it is absolutely ridiculous to approve a second waste transfer station. First off there are plenty of other waste transfer stations in the area that are nowhere near full capacity. Secondly, why risk a possible environmental problem when it is not necessary. West Chicago gets it's drinking water from wells. Why risk contamination. Thirdly, the economic impact would be horrendous. Property values would drop, downtown area would bring in less businesses, and people would not what to move here. Lastly, the site for the second waste transfer station is directly west of the downtown area. The wind normally blows from west to east. That means the downtown area would smell l like a trash Heap! Not good for anybody who lives in this town.

Subject: Lakeshore Recycling Systems

To eyes that see:

Entering West Chicago from the east on Geneva Road, you see on the north side, across from High Lake, a picture of serenity: a large pond covered with marshes and lily pads in the summer, and in the winter blanketed with pristine snow. In the spring, you may observe a heron or egret flying conspicuously over the water or else waiting stock-still near the bank for a fish to swim by. In autumn the woods behind the pond form a backdrop of luxuriant colors.

You drive by this stretch of road for half a minute, and at the light on Prince Crossing cross into West Chicago, You are not aware of it, but that long glimpse of a living, breathing pond along Geneva Road just made you, in your car, a little happier and a lot more calm. What does nature charge for this therapy? Nothing.

Now think of what a second waste transfer station would do to the psyche of our community. Instead of a green, shimmering pond, you see puddles of oily water and scraps of windblown trash on the road, courtesy of Lakeshore Recycling Systems. Instead of enjoying the view from your seat, you want to shut your eyes.

Sure, municipal tax revenue might increase from locating another stinking eyesore in West Chicago, but inevitably home property values will suffer, and with them the city's tax base. Public morale will go down. Quality of living will go down.

You have a choice: favor the city's coffers, or listen to your soul. It's a no-brainer.

Vote NO to the proposition.

Yours,
Alexander Lee

West Chicago City Hall

475 Main Street

West Chicago, IL 60185

To: City Plannning and Zoning

This letter is in regard to the proposed LRS garbage transfer station that is being considered to go in on Powis Road in West Chicago.

I have lived in West Chicago for almost 30 years and have worked very hard to keep my property clean, updated and looking beautiful. I am totally against more garbage trucks coming through any part of this city. I am in unincorporated Lakewood and each week have 5 different garbage companies coming through this subdivision, each company goes down my street 4 times: once for trash on the inside circle, once for trash on the outside circle, and the same for recycling. A few years ago, we got a new street, the old street was so torn up that it looked like a patch work quilt. Obviously, the patching did not match the old street and it was a horrible sight for many years. Currently our new street is starting to show cracks that are probably being caused by all the trucks coming through here.

In case you haven't heard, West Chicago does not have a great reputation and when you tell individuals from other communities where you live you do not get a great response. This is due to some of the areas in this city that could use some up-to-date remodeling. Downtown needs a total overhaul, there is one restaurant that is nice, and the rest of the buildings need to look like a downtown area not a bunch of run-down strange places. WHY DOES ST. CHARLES, GENEVA, BATAVIA HAVE BEAUTIFUL DOWNTOWN AREAS? WHY DO THEY ATTRACT NICE BUSINESS? WHY DOESNT WEST CHICAGO ON RT 59 HAVE NICE RESTAURANTS (EXCEPT FOR THE BREAKFAST/LUNCH RESTAURANT), THOUSANDS OF CARS GO DOWN THIS WAY EACH DAY!!!!

When I moved here, we had this lovely mall called Charlestown, it had everything you could want, and it was great! You all know what we currently have: Von Maur and the movie

theater. If this ever gets developed, do you think someone is going to want to build housing, restaurants or shopping on a street that has garbage trucks going by possibly one a minute! How about the shopping and restaurants that line North Avenue from Powis to Kirk currently, are they going to want to look at a constant line of garbage trucks going by and what about the public who like me, go to these places all the time, do you think I want to see and put up with this. This past Thursday I was coming back from Geneva Commons down Rt. 64 (North Ave) and saw an LRS garbage truck coming by and turning onto Randall Rd. And I thought to myself even this one truck was not a pretty sight.

One has to stop and think, and as yourself, why are we surrounded by lovely towns like Bartlett, Winfield, Warrenviille, St. Charles etc.that are building beautiful complexes, adding more housing, restaurants and retail and we are looking at building more garbage!!! And a diesel truck stop!!!

I'm not sure if the residents of West Chicago have any say into what is built in this community, but I don't think there is one person that would be in favor of LRS bringing more garbage trucks into our town. Hard to understand why West Chicago would even consider something like this? Do we need money that badly? Taxes here are not cheap and for those taxes we the taxpayers want a say what goes into our town. Someone at one of the meetings said why can't we have a Trader Joe's or a Fresh Market or a Marianno's, probably because we have too many other undesirable factors?

I'm not sure if what I heard was correct, but I was told it would be approximately 400 additional garbage trucks a day and if the workday at LRS is 8 hrs that is roughly one truck a minute turning from Powis onto North Ave and going to Kirk. If we lose this battle, why can't LRS have their trucks drive South on Powis to Roosevelt Rd. And make their way to Rt 88 that way? Please consider what the people living in this town want: we want improvements and more desirable development!!! We don't want more garbage trucks!!!

Thank you for your time and consideration

Subject: LRS WASTE TRANSFER STATION PROPOSAL

Good afternoon. I am sending this Email to let you know that I am opposed to the Waste Transfer proposal from Lakeshore Recycling Systems being considered by the City council of West Chicago.

I live at 910 Woodside Dr, the northwest corner of Woodside & Hawthorne. I have lived there now for going on 10 years and have really enjoyed my time here. My wife, Marlena , and I are very happy we chose to live here.

WEGO is a great place to live. The Police & Fire Departments are very professional and have always been very polite and concerned with our welfare any time we have had to interact with them. The same can be said of all the city employees. Always very helpful & informative.

We all ready have one waste transfer station, operated by Groot here in WEGO and the one meeting I was able to attend, at the High School, I heard it was not near capacity yet. So I question do we really need another one here? Someone argued our bill would go down because of less transportation costs. Again, it's already here. This is where I am lost.

One of the speakers who mentioned she was for the new transfer station was because LRS already had a transfer station for waste construction materials and the good things they did with these recycled materials. I have to believe there is a big difference between lumber, sheetrock , bricks and regular household garbage, so didn't understand that.

I heard comments about this being a state of the art, fully enclosed facility that would prevent a lot of people's concerns, smells, bugs, etc.. But what about the trucks that will more than likely be lined up outside the facility, waiting to get in to unload? And after they unload what prevents the smells, spills & bugs. The station is proposed to operate 6 days a week. How will these trucks get there, how many and how often? I think these are questions that really cannot be answered here and now. Change is inevitable and that is what needs to be considered today.

Hawthorne has it's own issues, keeping semitrucks off of it and stopping the race cars that show up in the spring. I have even seen them drag race down Hawthorne. I foresee the garbage trucks going up and down it to save time. People who have been able to use Powis to get down to Roosevelt, downtown, or Reed/Kepler, without having to go to ST Charles or RT 59 will encounter problems as well I imagine.

I was once told by someone, representing a facility being built by my house in Lombard, off of Roosevelt that was going to increase traffic and make a left turn dangerous, that if I wanted to go west to Glen Ellyn, I should just endure the inconvenience, turn right, go into Lombard, turn right at Finley, go to Downers Grove, Turn right onto Butterfield and go west until I hit a street to take me to Glenn Ellyn and back to Roosevelt road.

He was at the hearing. Glad I didn't have to listen to him. On the other hand, all the people that I did get to listen to were all in support of LRS's proposal. The interesting thing was except for maybe one they all lived somewhere other than West Chicago. I heard Wayne, Wheaton and elsewhere. As long as it is not built in my town I would be all for it was the message given by these folks.

Please turn down this proposal. And look for other businesses to attract to our city. Highlight all the good things that are WEGO. I know you all care or you would not take the time to serve on the City Council

Thanks for your time and consideration.

Subject: Neighbors for a Cleaner West Chicago

Dear West Chicago City Council Member,

Our community will suffer if Lakeshore Recycling Systems is allowed to construct another garbage waste transfer station in West Chicago. It would mean more litter, increased odors, more traffic resulting in wear and tear on our roads, lowering our property values and hurting our environment.

West Chicago is already the only community in DuPage County with a garbage waste transfer station within its borders. If Lakeshore Recycling Systems' proposal is approved,

West Chicago would be the only community in the entire State of Illinois, other than the City of Chicago, to have two garbage dumps in their community.

This is wrong. Our community should not be Chicagoland's dumping ground!

I don't want 4 million pounds of garbage and 400 trucks in our community every day!

I oppose the construction of another garbage waste transfer station in West Chicago and I urge you to support the community against this big company.

Please protect our community! Thank you.

Dear West Chicago City Council Member,

Our community will suffer if Lakeshore Recycling Systems is allowed to construct another garbage waste transfer station in West Chicago. It would mean more litter, increased odors, more traffic resulting in wear and tear on our roads, lowering our property values and hurting our environment in addition to making our roadways less safe.

West Chicago is already the only community in DuPage County with a garbage waste transfer station within its borders. If Lakeshore Recycling Systems' proposal is approved,

West Chicago would be the only community in the entire State of Illinois, other than the City of Chicago, to have two garbage dumps in their community.

This is wrong. Our community should not be Chicagoland's dumping ground!
Illinois residents are leaving our state at a staggering one every three minutes as reported by major news outlets. Why provide another reason for tax paying residents an additional reason to leave?

I don't want 4 million pounds of garbage and 400 trucks in our community every day!, do you?

I oppose the construction of another garbage waste transfer station in West Chicago and I urge you to not support this company in opposition to your voting constituents. Your voters will not forget what you are doing to our community.

Please protect our community, our children and our home values.
Thank you, Greg Fantozzi

Subject: Thoughts on the Waste transfer station
Attachments: Ray_Ave_Flooding_Rain_Strom_water.MOV; After_ejection_water_sitting.jpeg; Me_in_flood_rain_water.jpeg

Hello,

I greatly oppose the waste transfer station coming to our community. I attended the town hall meetings open minded and unconvinced and over the course of these long nightly meetings I was swayed to strongly oppose the project.

1) Yes, LSR claims all of their trash trucks will be covered or at least have a manual tarp, however, they hold no authority over the other, non-company trucks that will deliver a wide array of trash and products that could be potentially harmful. They will have no authority or mandate for the public, junkers or construction trash to be covered and not spill potentially hazardous material onto our roadways, into our sewer system and eventually into the groundwater. With much of West Chicago using shallow wells for water could put the community at additional harm. I was there when the rain system and spillage was discussed but I know that the proposed area and a massive amount of spilled waste will be hitting soil and will be entering our groundwater. There is just no way around that. Plus, W.Chicago doesn't even fully control all of the rainwater systems. For example near me (on the east side of r-59), it's W.Chicago AND DuPage that deal with storm and rain water and to further complicate things, the PARKS department is in charge of another section of it (at least in my area). I know this as the storm drain at the end of my street was not functioning correctly and thousands of gallons of storm-water was EJECTING out of an opening meant to collect the storm water. The water was being expelled right next to my well-water-cap. I will even attach a video showing RAINWATER ejecting out of a basin and flooding part of a neighborhood, A pic of the water, after ejection sitting on residential property and a picture of me in the rain-water-flood. My point being, there is no way to guarantee that storm and rain water will not make it back into people's water sources. Adding an attraction, like another transfer station, for those carrying potential hazardous waste and material to this site will undoubtedly put the surrounding areas at a greater health risk. There is just no way around that.

2) The comments by the engineer saying there is no logistical need for the station. This engineer showed some diagrams and LSR attempted to discredit his research. I understand some of the critiques, like, how and where did he come up w/ his 15 mile radius for accessibility. However, I want to push back on some of those views. 1) In one case, a station was not needed but was approved to help fuel competition <this location was on the north side I believe> and yes, competition is good, however w/ LSR already having one location, the competition argument holds no weight here. 2) Another location was approved by this engineer for a transfer station even though a landfill was nearby <this location i believe was south of I-88 in the Sugar Grove area-ish> And members of the committee asked why he approved this site though a landfill was nearby, and it seemed like the engineers analisis where being questioned due to him approving this site and opposing the LSR proposed site. However he approved that site to bring the ability to recycle to that entire area and correctly helped recycling efforts overall reducing the amount of waste going into the landfill. So, Although this engineer seemed to be questioned, like his analysis was flawed, it was not flawed at all. When this engineer said there was no need for an additional waste transfer station in West Chicago, he was being accurate, truthful and correct, no matter who hired him.

3) We are JUST getting over the thorium spill. When my family and I began looking for our home West Chicago stood out as a unique up and coming area. Many surrounding towns and friends (strongly) advised me

to ignore West Chicago due to the radioactive thorium spill that was still having work done to mitigate danger up until 2017 (maybe even 2019, I can't remember exactly) However I trusted the local government that the people had been put first and trusted our scientific and governmental efforts to contain and fix the problem. Now, only about 5-ish years after that massive stain on West Chicago's name and tons of work for the clean up, NOW we want to add another trash station??? Do we care about how our town is perceived at all? DO we care about the additional health hazards? This leads me to my next point

4) Un-investable. My wife and I loved some of the new coffee shops and existing local restaurants in the area and had/are planning to open an establishment (hopefully downtown) in the coming years. Well now, we question W.Chicago's reputation and if people will want to have a nice dinner in a town known for radioactive waste and trash stations and trash trucks... Its just really sad so see the city take this obvious wrong turn. W.Chicago has SO much potential to have a cool downtown and be just as unique and awesome as some other surrounding downtowns. There is no way that can happen by taking a step in the direction I hoped the town was moving away from, the direction and stigma of trash, waste, and health hazards. This "view" will not be a healable scar, it will be branded as the health hazard town. It is really sad.

5) Trash station jobs. So I called the current trash station and an employee said that the station operates on less than 20 people (not counting truck drivers coming and going). Is all of this worth it? Are all the hazards worth 15-25 jobs? I was also extremely disappointed that the only public comment (one night) was that of an employee voicing her opinion that these jobs will "help put kids in college". As this employee took her seat, all of her superiors and her boss supported her and thanked her for making the comment. Is that fair to you? that an employee got to voice their concerns IN PERSON while residents get nearly no public say?

I want to thank you for reading this lengthy email. It is clearly an important topic to me and I was really planning my future here in West Chicago. I urge you to take the residents into strong consideration for this proposal. Please feel free to reach out with any questions or concerns.
480-861-8303

Please, have a safe and healthy day,

Subject: Waste Transfer Station

Dear Mayor and City Council Members,
We moved to West Chicago 9 years ago. During the last few years we have been pleased with the progress in the improvement of parks and recreation areas.
We are now distressed and feel betrayed that you would even consider allowing a garbage transfer station in West Chicago. We live a large residential area just east of Powis Rd. We have seen trucks sneaking through our neighborhood and we already have noise and pollution smells in the air. We do NOT need the added traffic and pollution from a garbage transfer station. There are too many trucks and manufacturing buildings in West Chicago!!!
Please work to continue to make West Chicago a clean and family friendly city by voting
NO TO THE TRANSFER STATION.

PLEASE PROTECT OUR COMMUNITY.

Subject: Proposed 2nd waste transfer station in West Chicago

Mayor and all City Council,

I have been a resident of West Chicago for 70 years, attended schools here, married in a Church here, raised six children here who attended our schools and were very involved in sports. Our second son taught at the High School for over ten years, coached football and wrestling, and was a leader for the Snowball program among other things. My father was a graduate of our school system from elementary school on and lived and worked in this town for years. Needless to say, I have a very long history here and have witnessed the changes that have occurred, most of them not exactly favorable.

I received information about the proposed addition of a waste transfer station in our town. Not from you as our city officials but from an interested citizen. Every resident, every address in the city should have received an informational letter outlining the who, what, when, where, and why of this venture when it was first presented to you. But of course, we did not. It was all a hush; hush situation and the information did not go out to the community at large.

I found out about the various meetings being held far too late to attend and voice my opinion. I VEHEMENTLY OPPOSE ANOTHER GARBAGE DUMP IN OUR TOWN. As it is, there a too many trucks and semi-trailers using out streets spewing garbage out the backs. Our street has become a thorough fare for those trucks and cars who do not adhere to the 25-mph limit.

Again, I oppose allowing the addition of another trash dump in our city.

Ms. Passini,

The email being used for the comment period associated with Lakeshore Recycling System's application for a Waste Transfer Station on Powis Road is the same one usually used for basic service inquiries. I was unaware that it had an automatic reply.

The City Council members are not able to respond to anyone about the application, hearings or feedback received during the required comment period. The Mayor and Aldermen serve like judges and, just like a judge, are not allowed to talk about a case during its pendency, the same is true here. This is part of the State of Illinois' statutes and there is nothing that can be done locally to handle such differently.

Also, no City Council member can pre-judge a siting application and under the law the City cannot simply say no to the transfer station and must determine whether the nine criteria under the Act have been met based upon the contents of the application and the sworn testimony provided during the hearings. If you are interested in learning more about the process and the City's role in it, you may find that information here.

Have a nice rest of your weekend.

City of West Chicago
475 Main Street
West Chicago, IL 60185

To All City Council Members and Members of the Community,

I have been a resident of West Chicago for over 11 years. I have owned two homes near the downtown area and live in one currently. Both homes were in deplorable condition, vacant and off the tax rolls when I purchased them. I extensively renovated one home at 419 Joliet Street in 2009 and the home I know occupy at 323 West Washington in 2011.

The City of West Chicago Historical commission also honored me with an award for the renovation at 419 Joliet for converting a dilapidated, vacant two flat back into a stunning single-family home. I have also completely renovated the home I reside in now.

My point is that I have invested both time and treasure into the improvement of West Chicago. I further believe that West Chicago has great potential for I have found it to be family oriented with its excellent schools, cultural diversity and friendly people.

With that said, I firmly believe that an additional waste transfer station is not something we need nor want. We don't need the additional heavy truck traffic with its inherent Littering of our neighborhoods. I live On Washington Street and have experienced first hand the difficulty pulling onto Washington when the trains are either in transit or stopped. Extra garbage trucks mean extra difficulties and hardship in our neighborhoods. I believe it unfair for our residents to accrue more hardship and expenses so a private company may benefit financially by dumping their loads where convenient for them, but not us.

Previous to moving to West Chicago in 2010 I lived in Wheaton for 25 years. While living in Wheaton, I became aware of the contaminated soils issue from the Kerr-McGee plant and the stigma that created outside the community and the effect on property values within the community. Having followed the federal remediation plan in the news and understanding the community's passion for the eventual success of the remediation work, I was confident that West Chicago would be a worthy investment and the stigma of Kerr-McGee would be in the rear view mirror.

We don't need any more negative publicity with West Chicago being seen as garbage dump on an industrial scale. As a resident and your constituent, I believe our energy can be better spent in building things that support and enhance the lives of its residents. The new public park on the Kerr-McGee site is a great start in adding character and value to West Chicago.

Sincerely,

Thomas Cherrington

Subject: Waste Station In West Chicago

Good Afternoon,
My husband and I live in West Chicago, and ABSOLUTELY DO NOT want ANOTHER waste transfer station in our town. We should never have allowed the 1st one. The people of West Chicago work very hard, just as all other communities, to keep their neighborhoods safe and beautiful for ourselves, our children and the generations to come. We have enough struggles with the rising costs of the economy today just to stay afloat and feed our families, and certainly CANNOT afford for our taxes to go up in order to repair all the streets that this traffic will destroy. We already pay way too much in taxes and don't see much result of anything nicer in our town as it is. I am sure they will do nothing to help West Chicago or give back to our families and community. They won't worry if our families or children get sick from what they do. They just want our land and to make our town a stinky disgusting place where no one will want to live. WE SAY NO!!

As a community, we certainly cannot afford ANOTHER transfer station. We do NOT want more traffic on our streets. We do NOT want everybody's garbage in OUR backyard. We do NOT want the health and safety of our loved ones in jeopardy so Lakeshore can dump whatever they choose into our town. How do we even know what they are "transfering"?

WE- THE PEOPLE- are the ones that have to pay for our community and make sure it is safe and beautiful for our future. Not some garbage company. They do not care what happens to us as long as they can make money. We already have a waste transfer station WAY TOO CLOSE to our familys. One is too much, and now they want to add another? I speak for everyone in the community when I sat that we certainly do NOT want another one. WE SAY NO!

Lakeshore needs to find a different place in the world put their garbage and keep West Chicago out of it. They do not care because it is not their family that lives here. Let's challenge them to see how they would like it in their neighborhood, endangering the health and safety of their children and loved ones. Raising their taxes. Making it unsafe to live or raise a family. West Chicago is NOT and should NOT be a dumping ground for Lakeshore or ANY OTHER GARBAGE COMPANY. We cannot allow this to happen! Our town turning into a dumping ground is NOT WELCOME. Not now. Not ever. We need to stand as a community against Lakeshore and just say NO!

Keep West Chicago safe and beautiful. Don't let this dump turn our community into a dump.

Sincerely,
Liz Wojtas

Subject: new waste treatment plant

Good afternoon,

I'm writing to you with our concerns with a new waste treatment facility in our area. After reading Lakeshore Recycling's proposal, it appears as though they have covered their bases for the most part. One point does concern us, though. With Kress Creek and some wetlands are on their property - albeit at the edges - there is a potential for water contamination. LRS stated that they have never had an issue with leakage, and therefore it shouldn't be a concern. What they currently recycle, which is construction debris, is much different that garbage debris and hygro-excavation waste. Since water contamination does not stay in a set area, but travels far and wide, and with nearly 2,000 additional daily tons of this new waste going to their facility there a much greater risk of contamination for citizens and wildlife, As you well know removal of contaminants in water and ground is expensive and it is not possible to completely remove all carcinogens from those areas. LRS states that they will have measures in place to mitigate any bleeding into those areas, but nothing man-made is ever fool proof. There is always opportunities for leakage.

Another issue is the increase of truck traffic and pollution of air and noise. They have created a proposal for in and out procedures of their facility, but one can not deny that main and side streets and air quality won't be effected. There will be a huge increase in truck traffic bringing in and distributing to other locations.

Thank you for giving us a chance to give our feedback on this issue. The people of West Chicago and surrounding areas work hard to maintain safe, well kept communities. Just because a company checks off all the boxes it doesn't mean that their desire is in the best interest of the area.

Sincerely,
Carole M. Ferrill

Subject: Garbage

As a long time resident of West Chicago, I do not want to see another garbage transfer station. I'm afraid it hurt the resale value of my house if and when I would try to sell. There are plenty of other towns that have the open space to acommodate such a facility. Let Naperville enjoy the aroma instead of
us.

Thank

you

SUBJECT: WASTE TRANSFER PROPOSAL
LAKE SHORE RECYCLING SYSTEMS

GREETINGS TO ALL. MY NAME AND ADDRESS IS JOE McALEER
910 WOODSIDE DR WEST CHICAGO, IL 60185

I JUST WANT TO LET YOU KNOW THAT MY WIFE, MARLENA AND I ARE OPPOSED TO THE OPENING OF ANOTHER WASTE TRANSFER STATION HERE IN WEST CHICAGO.

THE LOCATION OF MY HOUSE MAKES IT A VERY PERSONAL OBJECTION AND I CLARIFIED SOME OF THOSE POINTS IN AN EMAIL I SENT EARLIER.

TODAY'S LETTER IS ONE OF OBJECTION FOR THE ENTIRE CITY. WE HAVE LIVED HERE FOR ALMOST 9-10 YEARS. MOVED HERE APRIL, 2014 AND IT HAS BEEN GREAT.

I WALK HAWTHORNE ALMOST EVERYDAY AND SEE CHANGES FOR THE GOOD. I WOULD LIKE TO SEE THE GROWTH AND THE GOOD CONTINUE. I AM AFRAID THAT TO ADD ANOTHER WASTE TRANSFER STATION WOULD ONLY HARM THAT GROWTH.

A FLEET OF GARBAGE TRUCKS ROLLING IN AND DOWN OUR STREET WOULD NOT BE GOOD FOR THE CITY.

2-14-2023

As I had mentioned in my email, almost all of the people who are for this are people who don't live here and spend time here. They are for it because they don't want it in their town.

The area around us is changing and let's try and have the change to West Chicago be a good one and not something that possibly stagnate growth for the good.

Thank you once again for listening to me.

Go West Chicago

A great place to live.

Sincerely,

Joe McAleer

Dear West Chicago City Council Member,

Our community will suffer if Lakeshore Recycling Systems is allowed to construct another garbage waste transfer station in West Chicago. It would mean more litter, increased odors, more traffic resulting in wear and tear on our roads, lowering our property values and hurting our environment.

West Chicago is already the only community in DuPage County with a garbage waste transfer station within its borders. If Lakeshore Recycling Systems' proposal is approved,

West Chicago would be the only community in the entire State of Illinois, other than the City of Chicago, to have two garbage dumps in their community.

This is wrong. Our community should not be Chicagoland's dumping ground!

I don't want 4 million pounds of garbage and 400 trucks in our community every day!

I oppose the construction of another garbage waste transfer station in West Chicago and I urge you to support the community against this big company.

Please protect our community! Thank you.

Subject: Petition for the new West Chicago Garbage transfer station.

To the West Chicago administration for the proposed West Chicago Garbage Transfer Station,

I have lived in West Chicago for the past 20 years now. We have an amazing community and school system and my husband and I raised our two children here who have both become successful members of society. Our kids attended Norton Creek elementary school which is directly across the street to the proposed garbage transfer station and we live in the Corner Stone neighborhood. We are adamantly "against" this proposal in our community! Who in their right mind would want to live next to a trash dump? Placing the transfer station directly across the street from an elementary school is going to negatively impact my community in so many ways. The increased traffic in the area, garbage trucks coming and going at all times, the pollution to our neighborhoods, the smell, our property values will decrease as a result; and these are just a few side-fects. As a tax payer and a registered voter I would like to voice my opinion "against" the proposed West Chicago Garbage Transfer Station. If this proposal passes my husband and I and many of my neighbors will likely choose to sell our homes and leave the community. Thank you for taking my opinion into consideration.

Sincerely,

Helen and Leo Gershun

Subject: Second Waste Transfer Station

To the West Chicago City Clerk,

I am writing to you to express my opposition to the second (new) waste transfer station.
We have been in the same house in the Arbors, West Chicago for nearly 20 years. Even though the neighborhood is very attractive and well kept the value of my home has languished! In 2019 we attempted to refinance and discovered that our house was valued $50,000 less than the original 2003 purchase price! Our home value finally went above its original purchase price with the advent of the post Covid exodus from the city. The addition of another waste station and the increased trash traffic and whatever else it will bring cannot help West Chicago home values or the cities residents.

What would the benefits be? I have not heard anything positive! My property taxes have more than doubled since I purchased my home. Will the transfer station provide tax relief? I doubt it! West Chicago's public image will suffer which in turn will only hurt its residents.

Again, I strongly oppose this new Waste Station!

Dear City Clerk and town officials,

I have been living in West Chicago since 1986 and am very concerned with the direction our community is headed. Please reconsider the addition of another trash dump in our city. It will most likely lower property values, and will negatively impact our quality of life. It will create more traffic, foul odors, toxic air quality, torn up roads and excessive truck traffic. It is not a good decision from a financial standpoint because the extra revenue from allowing another dump is far outweighed by the probability that no one will want to live here.

Thank you for your consideration of this issue.

Subject: Lakeshore Recycling Systems construction proposal

February 16, 2023

Message from Timothy and Nancy Kinsley
0N450 Indian Knoll Rd.
West Chicago, IL 60185
DuPage County Residents

To whom it may concern,

This letter is in regard to the proposed new waste transfer facility to be constructed at the existing Lakeshore Recycling Systems, Powis Rd, West Chicago.

We have been West Chicago residents since 1980. During those years we have personally witnessed how an environmental impact effects a city. We are speaking of the Kerr-McGee cleanup. That was a large environmental issue that took more than a decade to be resolved. It has taken longer for the stigma of this exposure to be resolved.

Now we are facing a new type of environmental stigma that we feel should be avoided and should not be placed in West Chicago just for convenience and profitability for Lakeshore Recycling Systems (LRS). LSR's proposal will best suit LSR's operational needs and provide them with a more profitable facility but will not necessarily be a benefit to the local community. If LSR is controlling the transfer of waste to the out of county landfills, they can then direct those loads to their owned and operated landfill. We believe that this may be in LSR's best interest, but the current location that is proposed by LSR is at the most western edge of DuPage county, a more centrally located site for an additional transfer station would be more practical.

Not sure what the status is regarding the DuPage county wide waste transfer needs, if there is a capacity issue, and LSR is interested in entering this additional business service, they should propose such a new facility at another address that is more centrally located in DuPage county.

We appreciate your consideration of our views and concerns.

Subject: Stop the Garbage Waste Transfer Station

To Whom It May Concern,

Please, Please, Please - Stop the building of another waste transfer station in West Chicago. Please reject the application and refuse to approve the building of another waste transfer station in West Chicago.
West Chicago should not be the garbage dump of DuPage County. Other communities must be asked to share the load of their garbage, not put this burden on the residents of West Chicago.
We do not need 4 million pounds of garbage near our homes, 400 additional garbage trucks on our roads. The increase in traffic, wear and tear on our roads, increased odors, litter, and likely lower property values will be a punishment on the citizens of West Chicago.
My husband and are angered that we are once again having to deal with the possibility of another waste transfer station in our town. We have been residents of West Chicago for over 20 years, we have happily raised our family here, and are for the first time considering moving from West Chicago due to this outrage of once again threatened with the possibility of another waste transfer station in our community.
Please vote NO to the building of another waste transfer station in West Chicago.

Sincerely yours,

Mrs. Mary B. Peterson

Subject: Transfer Station

Dear West Chicago City Council,

My husband and I moved to West Chicago for the "country" feel, the bike path, the train commute to downtown Chicago and the nature preserves. That was over 30 years ago. As recent retirees we joined the ARC recreation center (what a beautiful place to exercise and walk on the indoor track!!!) and we also enjoy walking our dog in Reed Keppler Park (that park is stunning).

I wish to express my view to deny the current proposed Transfer Station in West Chicago. West Chicago is too important and too beautiful to add to the existing LRS site to develop a transfer station. Other areas in Dupage County, after thoroughly explored would be a better location.

Over time, cities and towns may evolve to create a negative impression for what is allowed to develop. Is that what West Chicago stands for now; where history meets environmental degradation?

Please do not approve the proposed Transfer station in West Chicago.

Kind regards,
-Annette Musil

February 17, 2023

To city council members and other pertinent personnel associated with the decision-making process for the LRS Municipal Waste Transfer Station proposal:

Throughout the hearing process and the time leading up to it, I have seen and heard many facts, opinions, and unwarranted claims relating to the expansion of the Lakeshore Recycling Systems facility. Despite many residents not having a thorough understanding of the proposed transfer station or its ramifications, passions still boil with yard signs and fierce debate about the potential for disaster. I learned a lot about this proposal and the benefits Lakeshore could bring to our area throughout the hearing process, but I also have great concerns about worsening litter, road wear, and air pollution. I witnessed a great deal of irony at hearings where we all discussed what is best for West Chicago, recycling as a concept, and the environment, as people arguing various sides of this topic drank from single-use plastic bottles and leafed through thousands of pages of printed documents. The core concepts of why we must carefully weigh environmental issues like this seem lost in formalities and details.

I testified as a fact witness demonstrating current littering issues in the immediately surrounding area, I wrote 2 letters officially on behalf of Blachford Inc., and submitted 2 personal letters regarding this transfer station. All letters I wrote previously reflect disapproval from myself as well as Blachford Incorporated. Personally, my sentiment has shifted slightly based on what I learned in the hearing process and from the proposal documents. I see that there can be some great benefits to expansion of this facility, but only if very careful consideration is taken for issues that otherwise fall through the cracks, like litter escaping tarped loads and blowing onto private properties. I ask that during this process you remember social and environmental factors play a great role in deciding whether this adds to a series of stains along West Chicago's history, or if this becomes part of the growing wave of environmentally conscious communities that lead by example. In the event of approval, the clearest path to a positive outcome is to add very strict conditions to hold Lakeshore accountable for messes associated with their business.

Please look beyond the formalities and details to make sure the concept of community improvement is not lost along the way.

Thank you

Colin Hale

Subject: Waste Transfer Station

To Whom It May Concern:

I'm opposed to the waste transfer station. My concerns are the health of the community and our investments in our properties.

The continuous site and smell of garbage truck traffic with dripping hydraulics is enough to make anyone emotionally and physically ill.

Regarding Criterion 3. This requires the facility location to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property". The surrounding properties extend to more than just square footage. It's the bigger picture of the town and its reputation. Like Hanover Park has MT Trashmore. West Chicago will be the garbage dump of DuPage County. You can't just erase a town's reputation and nicknames. Sooner or later this will affect all property values just like Kerri Magee and the thorium did. It will be harder to sell our homes and values will drop as well. Knowing of this current proposal I personally would not move to West Chicago. The stench of garbage truck traffic would cause me to look elsewhere.

Since this is county garbage it should go to the county seat. I'm sure Wheaton would love for you to relocate.

Thank you,

Susan Corriero

Subject: Objection to waste transfer station.

Dear Sir or Madam,

In regard to Lakeshore Recycling's application. I voice the following objections:

Waste transfer stations can be **sources of air pollution and other threats to public health as well as noise, odors, and excessive truck traffic on local roads**. These impacts can substantially reduce property value. It is for these reasons that waste transfer stations should not be located near residences.

In addition, there is no competing analysis to the info that Lakeshore has provided. They are, of course, going to write a biased report based on gaining approval.

This is not in the best interests of West Chicago residents. We already have one waste transfer station. Isn't that enough ?

Why should West Chicago be the dumping ground for DuPage County garbage?

This is a community that is still suffering the effects of Kerr – McGee forty years after the fact.

It's time the residents are put first, not the additional tax revenue for the city.

In the Matter of: APPLICATION FOR LOCAL SITING APPROVAL FOR LAKESHORE RECYCLING SYSTEMS, LLC, FOR THE WEST DUPAGE RECYCLING AND TRANSFER STATION, 1655 POWIS ROAD, WEST CHICAGO.

Public Comments of PODER - Immigrant Solidarity DuPage in Opposition to the Application for Local Siting Approval submitted by Lakeshore Recycling Systems, LLC.

People Opposing DuPage Environmental Racism (PODER), a committee of Immigrant Solidarity DuPage (ISD), submits this public comment in opposition to Lakeshore Recycling System (LRS)'s application to site a waste transfer station at 1655 Powis Road, West Chicago, Illinois. PODER is dedicated to fighting for environmental justice for minority communities in DuPage County; approving the LRS application would be an unacceptable continuation of environmental racism in West Chicago. West Chicago already hosts the only waste transfer station in DuPage County, and—if a second one is approved—West Chicago, with its large low-income and Latinx communities, will bear the entire burden of the waste transfer services for the generally wealthier and whiter DuPage County at large. Concentrating polluting facilities and polluting truck traffic in the minority and immigrant community of West Chicago is an act of environmental injustice. PODER urges the City Council make a break from the City's history of environmental racism and protect its residents by denying LRS's application.

At the outset, PODER would like to register its outrage at the ways in which the LRS application process has excluded or frustrated the involvement of the Latinx community of West Chicago. As explained further below, the process was conducted in ways offensive to and with the direct effect of creating barriers to the meaningful engagement of the Latinx community and, in particular, of Spanish speakers, even though 52.7% of West Chicago residents speak a language other than English at home.[1] The hearing was not translated into Spanish and did not provide for any translation of the relevant documents or testimony. As a result, this process has been fundamentally unfair to PODER and the non-English speaking residents of West Chicago.

LRS's proposed expansion would impose significant burdens on West Chicago and LRS has failed to demonstrate that the public health, safety, and welfare of West Chicago will be protected from its negative impacts. LRS claims its proposed waste transfer station will provide benefits in the form of lower waste hauling prices from increased competition, more convenient waste disposal, and additional tax revenues.[2] However, instead of focusing on West Chicago, the actual host community, LRS touts these benefits that would be enjoyed for DuPage County and beyond.[3] LRS's proposed facility may increase the capacity for processing waste throughout DuPage County, but only by compounding the air pollution burdens already faced by the minority communities of West Chicago. DuPage County is a county with a white majority, and a median household income of $100,292 in 2021. Conversely, West Chicago is only 35.7% white, and has a much lower median household income, at $83,379.[4] While DuPage County residents are only about 15% Latino and/or Hispanic, 48.9% of West Chicago residents identify as Latino and/or

[1] PODER Exhibit 1.
[2] Transcript, Day 1, p.85.
[3] LRS Application, Criterion 1, p. 37.
[4] PODER Exhibit 1.

Hispanic, with over 50% of persons over the age of five speaking a language other than English at home.[5] LRS's proposed waste transfer facility will negatively impact the public health, safety, and welfare of these communities in West Chicago, in exchange for purported benefits that will be shared among the majority white communities around the County. Concentrating environmental and public health burdens near lower-income and more minority communities while dispersing benefits of a polluting facility across a wider, wealthier, and whiter population is the very definition of environmental racism. And that is precisely what LRS proposes and now asks the City to endorse.

Within the broader historic and social context of West Chicago, PODER asks the City Council to reject LRS's application for failure to comply with the applicable law, the nine criteria under § 39.2 of the Illinois Environmental Protection Act. On February 21, 2023, PODER will also submit to the hearing officer, at his instruction, proposed Findings of Fact and Conclusions of Law, which will provide detailed arguments demonstrating that the LRS application does not meet applicable statutory criteria and that the LRS application process and hearing failed the statute's requirement of fundamental fairness.[6] This public comment is intended to complement and not to restate that upcoming filing, to offer broader perspective on PODER's legal positions, and to provide additional information related to environmental justice principles that was erroneously excluded from the hearing.

[5] PODER Exhibit 1; Please note that these numbers are from the United States Census Bureau, which likely undercounts minority populations.

[6] Per the hearing officer's instruction, that submission will be made on February 21, 2023, though PODER asks that the City Council review it directly in addition and as incorporated into these comments.

I. West Chicago has a History of Environmental Injustice.

Given West Chicago's history, and to protect the health, safety, and welfare of its present minority community in the context of that history, the City Council should deny LRS's application. The City Council's decision should be informed by West Chicago's particular situation; LRS's proposed facility would not be sited in a vacuum, but in a diverse city facing preexisting environmental burdens. West Chicago is a predominantly minority community, and the environmental hazards within the City have historically been so great that at one time, the City had four Superfund sites polluted with radioactive contamination. PODER respectfully requests that the City Council take into account West Chicago's environmental history and current needs.

This is not the first time West Chicago residents have faced business practices that threaten both the environment and their health. The history of West Chicago, to the bitter dismay of many residents, is often defined by the long shadow of radioactive waste from now-defunct chemical companies. West Chicago has a lengthy history of productive industry that was the natural outgrowth of its prime location along the railroads. The combination of railroads and factories resulted in an influx of Latinx immigrant labor, and West Chicago became the home of these Mexican and Puerto Rican migrants and their families.[7] There were, and continue to be, other industrial companies beside chemical manufacturers that operate in West Chicago, but none have left quite a scar on West Chicago like that of Kerr-McGee and its predecessors at the Rare Earths Facility.

The Rare Earths Facility in West Chicago was built in the 1930s by the Lindsay Light and Chemical Company. Lindsay Light used the facility to produce radioactive material for use in various gas and electrical products and nuclear research. The facility started with naturally

[7] https://westchicago.org/history-of-west-chicago/

radioactive monazite ore and then extracted pure radioactive elements, primarily thorium and uranium. The byproduct of this extraction process was tons of dirt-like radioactive tailings, which the company piled up outside its factory.[8] The liquid waste from the factory was dumped into unlined pits, where it seeped into the groundwater and found its way into the nearby Kress Creek and the DuPage River.[9] Faced with a growing pile of material that looked like dirt, the facility started offering the tailings to residents to use as fill for landscaping. As a result, during the 1940s and 1950s residents unwittingly spread radioactive waste all over their town and in their own backyards. Lindsay Light was eventually sold to American Potash and Chemical Corporation, which was then absorbed by Kerr-McGee. Kerr-McGee shut the facility down in 1973 and the company itself changed forms until, eventually, a successor named Tronox went bankrupt in 2009.[10]

In the nearly one hundred years since the facility first started operating, Kerr-McGee, West Chicago, and other government actors have been locked in a long and complicated battle over understanding and addressing the harm that these companies have inflicted on West Chicago.[11] The various government actors were not always supportive of the interests of West Chicago's residents. Some residents moved away, but those who remained or who moved to West Chicago were left with no choice but to start their own activism demanding justice.[12] Eventually, in 1991, four different sites in West Chicago were formally designated by the United States EPA as

"Superfund Sites," and since then progress has been made to remediate those areas. Unfortunately, this saga has not yet ended: there is still groundwater contamination to remediate, and two locations remain on the Superfund list.[13] Even when the clean-up is officially considered complete, the legacy of Kerr-McGee will continue to haunt West Chicago residents, some of whom have long-term health issues potentially linked to the radioactive thorium they grew up in close contact with.[14]

II. Environmental Harm Disproportionately Impacts Minority Communities in West Chicago.

The harms of thorium waste in West Chicago go beyond illness and stigma, and the legacy of radioactive waste has disproportionately harmed people of color. Latinx families bought homes in West Chicago without knowing the danger that lurked in their own backyards. Information about thorium contamination was not readily shared by realtors, possibly even intentionally obscured, and even less information was available in Spanish.[15] Radiation contamination is not easily remedied, as thorium has a half-life of fourteen billion years, causing residents constant concern about their health and property values.[16] This legacy of contamination is borne by Latinx families that moved to West Chicago long after the pollution was created. Even as late as 2015 there were still homes with radioactive contamination in their yards.[17]

Of course, environmental harms being concentrated in a minority community is not unique to West Chicago. Across the state of Illinois, minority communities bear the burden of polluting industries.[18] A study by University of Illinois-Chicago School of Public Health found that facilities that release toxic pollutants in Chicago are likely to be concentrated near public schools in Latino communities.[19] Similarly, a study by the United States EPA-funded Air, Climate and Energy Solutions found that communities of color, across region and income level, suffer from significantly higher levels of air pollution.[20] The impacts of environmental injustice are significant and continue to proliferate due to ignorance of and inaction by governmental institutions.

The disproportionate impact of environmental harms on minority communities and the importance of environmental justice has recently received government acknowledgement and even spurred some government action. In 2011, Illinois enacted the Environmental Justice Act, most recently amended in 2017, which created the Commission on Environmental Justice to analyze the impact of environmental injustice and advise the state government on environmental justice issues. The Act also defined environmental justice as a principle built on three pillars:

> (i) the principle of environmental justice requires that no segment of the population, regardless of race, national origin, age, or income, should bear disproportionately high or adverse effects of environmental pollution; (ii) certain communities in the State may suffer disproportionately from environmental hazards related to facilities with permits approved by the State; and (iii) these environmental hazards can cause long-term health effects.[21]

[20] https://www.epa.gov/sciencematters/study-finds-exposure-air-pollution-higher-people-color-regardless-region-or-income

[21] 415 Ill. Comp. Stat. Ann. 155/5.

Additionally, the federal government has also begun to implement policies that support environmental justice. As a recent example, the Biden Administration issued an Executive Order directing agencies to implement the Inflation Reduction Act by prioritizing "environmental and climate justice through an all-of-government approach."[22]

Government decisions must be informed by considerations of environmental justice and if municipalities ignore environmental justice in making local land use decisions, they can violate the civil rights of their residents.[23] Indeed, West Chicago need look no further than its larger nearby namesake for a cautionary tale: the City of Chicago presently faces the potential loss of millions of dollars in federal funding because—through both specific land use decisions and its underlying land use decision-making processes—the City has created, perpetuated, and failed to ameliorate conditions in which minority populations bear disproportionately the public health and environmental harms of industrial facilities.[24]

III. LRS's Waste Transfer Station Should be Denied Under Environmental Justice Principles.

Approving LRS's application would not only fail to take into account the environmental justice as defined by state law but would be an act in direct contradiction of that principle. As such, PODER asks the City Council to deny LRS's application because LRS has failed to demonstrate that the public health, safety and welfare of West Chicago residents will be protected as required by Illinois law. The Illinois Environmental Protection Act (IEPA) governs the

application process for pollution control facilities.[25] Section 39.2 requires certain procedures for the application process and provides a rubric to be applied by the local governing body, in this case the City Council of West Chicago, in making decisions on approval or disapproval.[26] Under § 39.2(a), there are nine distinct criteria that LRS must satisfy to receive the City Council's approval. While, as discussed in PODER's forthcoming proposed Findings of Fact and Conclusions of Law, LRS's application fails to satisfy other criteria, the insufficiency of LRS's application on this second criteria is particularly glaring when viewed in the light of environmental justice. Criterion 2 requires that "the facility is so designed, located and proposed to be operated that the public health, safety and welfare will be protected."[27] The phrase "public health, safety, and welfare" requires that LRS consider the community wherein it is requesting to site its facility. In this case, that community is West Chicago.

LRS fails to adequately address its proposal's impacts on public health, safety, and welfare on West Chicago, choosing instead to focus on a broader geography. In its application's treatment of public health, safety, and welfare, LRS focused on the needs of DuPage County as a whole, while failing to examine the health safety and welfare of West Chicago in particular. In fact, an analysis cited by DuPage County in its 2007 update to its Solid Waste Management Plan stated "the only areas that might benefit from a waste transfer station are located in the southern portion of the County."[28] Taking into account West Chicago's demographics and history with environmental pollution, the fact that West Chicago already contains the only waste transfer station in all of DuPage County, and the fact that the waste transfer station will benefit a much broader

geographic area, LRS's application stands in contradiction to the environmental justice principles set forth by the state and federal governments. Increased environmental impacts on a minority community—described in the following section—must be a part of the public health, safety and welfare analysis. Without considering environmental justice, LRS has turned a blind eye to the context and needs of West Chicago. The City Council should reject that ignorance and protect West Chicago residents from potential harm.

IV. LRS's Application has not Addressed Increased Air Pollution Likely to Exacerbate Environmental Injustice in West Chicago.

a. LRS's Proposed Facility will Negatively Impact Air Quality.

PODER is concerned about how the operation of the proposed waste transfer station will negatively impact on air quality in West Chicago. LRS has failed to submit any information regarding air quality impacts, and there is thus insufficient evidence that the facility will protect the health, safety and welfare of West Chicago residents from poor air quality. LRS's proposed operations would include increased traffic from diesel garbage container trucks, and these diesel trucks will emit significant quantities of particulate matter, which is a regulated air pollutant under the Clean Air Act. The type of particulate matter associated with diesel engine combustion has long and conclusively been linked to health issues like asthma, heart disease, and other respiratory problems.[29] The United States EPA sets a limit on the level in the ambient air of the type of particulate matter associated with diesel engine combustion and that limit is currently set at 12 micrograms of such particulate matter per cubic meter of ambient air.[30] However, the United

[29] https://www.epa.gov/dera/learn-about-impacts-diesel-exhaust-and-diesel-emissions-reduction-act-dera#:~:text=Human%20health%2C%20our%20environment%2C%20global,all%20affected%20by%20diesel%20emissions.&text=Human%20Health%20%2D%20Exposure%20to%20diesel,in%20children%20and%20the%20elderly.

[30] 40 CFR § 50.18.

States EPA is in the process of lowering that limit to 9 micrograms per cubic meter—or potentially even lower.[31] The United States EPA sets these limits specifically by reviewing the best science and setting a limit that is sufficient to protect public health.[32] Air pollution precisely like that from the diesel trucks that will run in and out of the proposed LRS facility has well-established negative impacts on public health and Criterion 2 requires that LRS's facility be "so designed, located and proposed to be operated that the public health, safety and welfare will be protected."[33]

LRS did not submit air quality data in either its application materials or during its public hearing testimony and therefore did not meet its burden under Criterion 2. In contrast, PODER did submit monitoring data on the current air quality in West Chicago and that data show that LRS's failure to conduct any monitoring is a fatal flaw in its application. Ms. Julieta Alcantar-Garcia of PODER used a commercially-available sensor to measure particulate matter outside both the Groot and LRS facilities on Powis Road. On all but two occasions, the levels of particulate matter outside the facilities exceeded both the current limit imposed by the EPA (12 micrograms per cubic meter) and the proposed new limit (9 micrograms per cubic meter). One of the other two readings taken landed right at the 12 microgram per cubic meter limit, and the only reading below the limit was taken inside a building. Ms. Alcantar-Garcia took these particulate matter measurements while LRS is operating its current facility. If LRS expands, there will be even more diesel truck traffic around the facility, and therefore more emissions and particulate matter pollution in West Chicago. LRS failed to address possible increased emissions in its application and did not consider wind patterns and the potential cumulative impacts on air quality.

---

[31] https://www.epa.gov/pm-pollution/proposed-decision-reconsideration-national-ambient-air-quality-standards-particulate

[32] 42 U.S.C. § 7409(b).

[33] 415 ILCS 5/39.2(a)(ii).

LRS's application cannot be approved when LRS has refused to address whatsoever this known and anticipated harm to the public health and welfare.

b. The Proposed LRS Facility's Negative Impact on Air Quality Would Perpetuate Environmental Injustice.

Negative impacts on air quality from LRS's proposed facility trigger environmental justice concerns. Alarmingly, minority communities experience higher than average exposure to particulate matter pollution and this heightened exposure occurs without regard to income levels of the community.[34] West Chicago, with a population that is approximately 64% people of color, is at risk for this type of disparate impact already and adding a second waste transfer facility will only increase that risk. Heightened exposure to pollution on the basis of race or national origin is one of the dangers that the Illinois statute's principle of environmental justice identifies as requiring remedy and LRS's proposed facility fails to demonstrate that it will not perpetuate environmental injustice by exposing a significant Latinx and immigrant communities to increased air pollution.

LRS's proposed expanded facility is not coming to a blank slate in West Chicago—there is already one waste transfer station in the community and a number of other sources of emissions beyond that. Air pollution is inherently mobile and cumulative because air does not respect the boundaries of business and property. When considering "public health, safety and welfare," LRS failed to account for the larger context of the current situation in West Chicago. It did not consider how the already poor air quality in West Chicago will be further diminished by its proposed expanded facility and therefore did not adequately consider if its facility will protect the public health, safety and welfare as required by Criterion 2.

[34] https://www.science.org/doi/10.1126/sciadv.abf4491#body-ref-R3

V. Electric Garbage Trucks Could Partially Address Air Quality Concerns.

Switching to an all-electric fleet of garbage and container trucks could alleviate some of the air pollution that would otherwise be caused by an increase in diesel truck traffic at LRS's proposed expanded facility. LRS's Training and Community Partner, Joy Rifkin, whose job at LRS is to "lead…sustainability, diversity, equity, and inclusion and social impact partnerships across the communities [LRS] serve[s]", stated at the public hearing that "[w]hen electric trucks are readily available, environmentally sound, and have a longer battery life, LRS will be at the forefront of that transition."[35] Right now, ComEd—the electric utility that serves West Chicago—is awaiting approval of its proposed Beneficial Electrification plan for vehicles by the Illinois Commerce Commission in ICC Docket Nos. 22-0432 & 0442. ComEd's Beneficial Electrification Plan is likely to provide the opportunity for LRS to make good on its public commitment to "be at the forefront of that transition" to electric trucks.[36] ComEd's proposed Beneficial Electrification Plan offers support in the form of rebates and fleet assessment services to assist with the electrification of medium- and heavy-duty trucks.[37] For commercial and industrial customers such as LRS, ComEd proposes to provide third-party fleet electrification assessments. The third-party vendor would analyze fleet operations to determine electrification opportunities, costs, and benefits and help to develop an electrification plan.

If the City Council approves LRS's application despite the anticipated increase in deleterious air pollution from diesel trucks and LRS's lack of evidence as to its likely air quality harms, the City Council should only approve the application on the condition that LRS investigate and pursue funding under the ComEd Beneficial Electrification Plan to rapidly transition its fleet

[35] Transcript, Day 6, p. 198
[36] ComEd Beneficial Electrification Plan, ICC Docket Nos. 22-0432 & 044, p. 34
[37] ComEd Beneficial Electrification Plan, ICC Docket Nos. 22-0432 & 044, p. 34

to electric trucks. LRS should be required to report its proposed course of action back to the City Council within a reasonable time not to exceed six months after the approval of ComEd's plan.

VI. The Application Process was Fundamentally Unfair and Did Not Protect the Civil Rights of West Chicago's Residents.

The City should reject LRS's application because the way this process has unfolded has been fundamentally unfair and disrespected the civil rights of West Chicago's residents.

The timing of LRS's application and the City's review process frustrated public participation and delivered unsubtle messages of disrespect to the community at almost every juncture. LRS filed its application for siting approval on September 16th, Mexican Independence Day, which some residents felt was an affront to the celebration of their Mexican identity and heritage. On a day of cultural importance to a signific portion of Latinx West Chicagoans, LRS proposed a second pollution control facility in the city which is nearly 50% Latinx.

LRS's decision to file its application on that date triggered deadlines under state law that meant the public hearings would be forced to fall during or just after the holiday season. The hearing officer originally proposed to schedule statutorily-required hearings during the Christmas holiday, which would have made it substantially more difficult for the public to participate. A hearing during the holidays is inconvenient for almost anyone. Such timing is prohibitive and insulting for those West Chicagoans whose faith calls them to dedicate time to religious observation, and for the significant groups of West Chicagoans who are immigrants or first-generation Americans and who travel internationally to be with family for those religious holidays. While the hearings were not ultimately scheduled during the Christmas holiday, they began immediately after the new year, meaning any preparation for the hearings would have to occur

during the holiday season and, therefore, mitigating those inequitable burdens to only a small degree.

Once the hearings began, PODER's testimony in opposition to the proposed facility was set for Martin Luther King Jr. Day. West Chicagoans who sought to oppose the siting of another garbage transfer station in their community were forced to put on their case on a day when schools were closed, rendering usual childcare resources unavailable.[38] On a day meant to honor the legacy of a man who was assassinated while supporting protests against the racially inequitable burdens of the municipal solid waste industry, PODER was told—both explicitly by the hearing officer and implicitly through the timing and structure of the hearing—that race and environmental justice were irrelevant to the City's decision of whether to route a white county's garbage through a majority-minority community.

Furthermore, throughout this process, Spanish speakers did not have equal access or an equally meaningful opportunity to contribute. PODER recognizes that the City maintained a Spanish translation of the website it created to post information about the LRS application process; that is important and appreciated. That step is also insufficient. First, while the website itself had an option to translate into Spanish, none of the application materials were translated into Spanish, making meaningful review for Spanish-speakers impossible. Second, in general, outreach to the Spanish-speaking community was abysmal. Although there were moments in the process where Spanish speakers could engage, there was so little outreach to that community that many of them

[38] Even when PODER was permitted to testify, its witnesses' testimony was devalued and inappropriately attacked by the hearing officer who is charged with impartially collecting evidence for the City. During PODER's testimony, the hearing officer, on his own initiative, was apparently performing google searches on his cell phone and made statements on the record that attacked and discredited information being provided by PODER's witnesses.

were not even aware they could engage. This was particularly true of the means for members of the public to provide oral comments during the hearing: the registration process for oral public comment was opaque and unnecessarily required registration weeks in advance. Setting up oral public comments this way made it easy for participation by LRS employees and difficult for participation by actual West Chicagoans, leading to oral public comment predominated by employee opinions that did not reflect views of the actual community. Moreover, there was no option to register or make comments in Spanish, the first (and often the only) language spoken by many West Chicagoans. Indeed, the public hearing was conducted entirely in English and there were no translation services available. One PODER witness was forced to testify in her second language, which is a direct and avoidable barrier to her right and ability to communicate her testimony as easily and effectively as witnesses whose first language was English or if she had been able to testify in Spanish.

Title VI of the Civil Rights Act of 1964 states that "[n]o person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance."[39] The Civil Rights Act defines "program" to include any "department, agency, special purpose district, or other instrumentality of a State or of a local government."[40] The local government of West Chicago is responsible for protecting its citizens and their civil rights. West Chicago should reject LRS's application because the process to review that application excluded West Chicagoans of color and from immigrant communities and that process was conducted in a way that discriminatorily and disproportionately inhibited their participation.

[39] 42 U.S.C. § 2000d.
[40] 42 U.S.C. § 2000d-4a.

***

The City Council must protect the people of West Chicago by denying LRS's application to site another waste transfer station in their City. The City of West Chicago has already suffered disproportionate impacts from environmental pollution, and currently is the only municipality in DuPage County to host even one waste transfer station. The siting of another waste transfer station in the City would result in increased air pollution that would impact the health of the people who live there, and which LRS's application does not adequately address. To sacrifice the health, safety, and welfare of the lower-income Latinx community of West Chicago for the benefit of wealthier, majority-white localities would perpetuate environmental injustice. Furthermore, the application process itself was fundamentally unfair and violative of the public's civil rights, and accepting this process as an accurate reflection of the West Chicago community's values represents an additional injustice. For the reasons stated above and the reasons articulated in PODER's forthcoming proposed Findings of Fact and Conclusions of Law, PODER respectfully requests that the City Council deny Lakeshore Recycling Systems' application to site a waste transfer station at 1655 Powis Road.

Subject: Stop the Garbage Waste Transfer Station

To Whom It May Concern,

Please, Please, Please - Stop the building of another waste transfer station in West Chicago. Please reject the application and refuse to approve the building of another waste transfer station in West Chicago.
West Chicago should not be the garbage dump of DuPage County. Other communities must be asked to share the load of their garbage, not put this burden on the residents of West Chicago.
We do not need 4 million pounds of garbage near our homes, 400 additional garbage trucks on our roads. The increase in traffic, wear and tear on our roads, increased odors, litter, and likely lower property values will be a punishment on the citizens of West Chicago.
My husband and are angered that we are once again having to deal with the possibility of another waste transfer station in our town. We have been residents of West Chicago for over 20 years, we have happily raised our family here, and are for the first time considering moving from West Chicago due to this outrage of once again threatened with the possibility of another waste transfer station in our community.
Please vote NO to the building of another waste transfer station in West Chicago.

Sincerely yours,

Don Peterson

Subject: Waste Transfer Station - Resident Comment 2-17-23

We are strongly opposed to the approval of Lakeshore Recycling Systems (LRS) application to build a garbage waste transfer station in West Chicago. Our opposition stems from the following:

- The city already has a waste transfer station which is not at capacity and is competently serving the needs of the county. As such, the *need* for another waste transfer station is ZERO. Approval of the LRS application would only be in their best interest... NOT IN THE BEST INTEREST OF WEST CHICAGO RESIDENTS.

- It appears that acceptance of LRS's application means City Council is willing to change the zoning law to accommodate a company... rather than a community that does not want it.

- Powis is a two lane road with no dedicated turn lane into the current LRS property. The substantial increase in truck traffic turning into the LRS facility will inevitably lead to significant backup frustration.

- Increased truck traffic through the residential portion of Hawthorne: semi-trailers, large construction vehicles and various other trucks well over the 5 ton weight limit constantly traverse through the restricted residential part of Hawthorne and go mostly unchecked by law enforcement. There's just too many illegal vehicles barreling down the street. The substantial increase in LRS truck traffic will only add to the existing truck traffic issue. Of course during the hearings LRS "could almost guarantee" that none of their garbage semi's or trucks would travel along this portion of Hawthorne, but we have no confidence this promise will be kept and will have no recourse to have it stop once it starts.

We sincerely hope City Council members listen to the community they represent and vote NO.

Thank you for taking the time to read these comments.

Sue and Tom Wilczak
West Chicago residents

Subject: Juvenal Espino Public Comment

Dear West Chicago City Officials,

I am submitting my public comment in opposition to the Lakeshore Recycling Systems Expansion of their Waste Transfer Station in West Chicago Illinois.
I am very concerned about the increase in waste and diesel trucks that will multiply as a result of this expansion.
I am also very disappointed at the City's inefficiency to inform our 52% Latino Community in Spanish at the Public Hearings this past January. We are also residents here.

Estoy sometiendo mi comentario publico en contra de la expansion de la estación de desechos de LRS en West Chicago, Illinois.
Estoy muy preocupado por el incremento en desechos y en camiones diesel que multiplicaran en nuestro pueblo a causa de esta expansion.
También estoy muy desilusionado de que la Ciudad fue muy ineficiente en proveer todas estas audiencias e información en español para la población 52% latina quienes somos residentes aquí.

Subject: Garbage transfer written comment

Dear West Chicago City Council Member,

I am a resident and business owner of West Chicago in Hampton Hills Subdivision. I have been following the public hearings closely from both sides and I oppose LRS to construct another garbage waste transfer station in West Chicago.

There are many reasons residents of West Chicago will suffer from LRS. There would be a increase of more litter even if they claim trucks will be tied down I drive down North Ave/ Powis Rd. daily and see garbage trucks having garbage flying out the sides of trucks even with " tie downs". In fact, some don't even have them on!! Why would West Chicago want increased odors to the environment, going over that bridge daily it smells horrible, imagine another transfer station adding 4+ million of garbage a day on top that yikes! There already is a heavy presence with truck traffic in that area! They daily hogging up the roads and act as they own the roads not driving on right side of the road, constantly backing traffic up and I been cut off many times by garbage trucks in that area throughout the years, imagine adding that many more trucks traveling to the same area destination.. Who's going to pay for the wear and tear on our roads tax payers from heavy 400+ trucks daily. Is City of West Chicago prepared to pay each homeowner a substantial amount of money to cover the loss of property value that could be realized by this action.

Furthermore, there are other locations
in Kane County, for example the old Groot facility on Rt. 25 that should be considered.

West Chicago had to live thru the Kerr McGee disaster and we don't need another industrial incident. We already have one transfer station there, only Chicago has two, please find another location.

West Chicago is already the only community in DuPage County with a garbage waste transfer station within its borders. If Lakeshore Recycling Systems' proposal is approved.

West Chicago would be the only community in the entire State of Illinois, other than the City of Chicago, to have two garbage dumps in their community.Do you think Wheaton or Naperville or Hinsdale would let this fly??

This is wrong on many levels and the community should not be Chicagoland's dumping ground the future is clearly a bad decision to move forward with this.

Please do the right thing and protect the many residents of this great city and our future generation!

Sincerely,

Clint Fanter

Dear West Chicago City Officials,

I am writing my written public comment today in opposition to the proposed expansion of the Waste Transfer Station currently located in West Chicago, Illinois from Lakeshore Recycling Systems.
I am very concerned about the air pollution that it will affect our town and population enormously.
We will have an increased traffic of diesel engine trucks and waste coming from other towns into our City.
I am a taxpayer and resident of West Chicago.
I find disrespectful that our community was not informed in our Spanish language.
The public hearings were not accessible in our language and we were all discouraged to participate.
An English only City Council was not going to listen to us..

Estoy escribiendo hoy mi comentario publico en oposición a la propuesta expansion de la estación de transferencia de desechos LRS en West Chicago, Illinois.
Estoy muy preocupado por la polución en el aire que va a afectar a nuestra comunidad enormemente.
Esto va a hacer incrementar el trafico de camiones de diesel y los desechos de otras ciudades a la nuestra.
Encuentro una gran falta de respecto a nuestra comunidad que nunca fuimos informados en nuestro idioma español.
Soy contribuyente y residente de West Chicago.
Las audiencias publicas no fueron accesibles en nuestro idioma y fuimos desanimados a participar.
Un gobierno municipal que solamente habla ingles no os iban a escuchar.

Sincerely,

Subject: NO to Expand Waste Transfer Facility on Powis Road, WC

No to expand Waste Transfer Facility in West Chicago.

Our police cannot even manage the existing illegal simi truck traffic on residential west Hawthorn Ave. The occasional police stops for show don't curb the large number of big trucks taking this shortcut with impunity every day ("Oh, Google Maps sent me this way").
Imagine additional garbage hauling semi trucks combined with more regular garbage trucks rolling by your homes.

Makes West Chicago a less desirable community to live in and limits our potential property values.

More traffic congestion of the worst smelly kind on our main streets and yes through our neighborhood street on Hawthorn.

For the betterment of the residents I urge our City Council to abandon this proposal and any special interests tied to its fulfillment.

Thank you.

In the Matter of: APPLICATION FOR LOCAL SITING APPROVAL FOR LAKESHORE RECYCLING SYSTEMS, LLC, FOR THE WEST DUPAGE RECYCLING AND TRANSFER STATION, 1655 POWIS ROAD, WEST CHICAGO

Public Comments of Jackson Paller on Behalf of Citizen Advocacy Center – Requesting Any Siting Approval Granted to Lakeshore Recycling Systems, LLC Have Conditions

My name is Jackson Paller. I am a Community Lawyer with Citizen Advocacy Center, a legal nonprofit based in Elmhurst, Illinois. Our focus is encouraging civic advocacy, civic engagement, and helping to create government at all levels that is open, accountable, and **responsive** to its residents. I am submitting this written public comment to encourage you all, regardless of how you decide on the issue of siting approval, to ensure that the residents of West Chicago remain protected.

Citizen Advocacy Center became aware of the LRS application, and the upcoming hearings, when I was approached by members of PODER. Citizen Advocacy Center did not directly represent PODER at any of the hearing dates, nor did we have any other kind of formal legal involvement in these proceedings. However, as with the routine work of the Citizen Advocacy Center in helping people understand government decision-making and how to make their voice heard, I did help PODER understand how the hearings were going to proceed, and was present for every hearing date except for one. I listened to the testimony from most of the LRS witnesses, as well as most of the public comment. I want to draw attention to some portions of both the testimony and the public comment that came from those affiliated with the application.

There were several times during the hearing that promises were made about the application implementation if siting approval was granted. Members of the West Chicago City Council, whether you choose to grant siting approval is your decision. Citizen Advocacy Center takes no position on this question. However, I implore you, if you do choose to grant siting approval, do so with conditions and recourse that will hold the applicant accountable to what was said during the hearing regarding their proposed actions, and hold the City of West Chicago accountable for ensuring how the applicant will act.

I want to draw your attention to some specific examples. Several times in the application, in testimony, and in public comment, individuals affiliated with LRS

made several references to "hiring locally." They have suggested that new jobs generated from a new waste transfer station, would go to West Chicago residents, however, there was no specificity with respect to how they would do that or how many new jobs would be created from this new waste transfer station. Conditions can be imposed to remedy this. For example, West Chicago could require a commitment that a certain percentage of any new jobs that are created, would go to West Chicago residents. I encourage you to do so.

LRS has also made mention of $20,000 in "tuition benefits." Again, it is my understanding that there is a lack of specificity about what that means or how such a program would work. They made a promise to utilize electric vehicles as soon as it becomes feasible but have made no commitments on pushing development of electric vehicles, or when precisely they would adopt wide-spread use of electric vehicles. Here again, you can impose the specifics yourselves. I encourage you to do so.

Another issue arose during testimony by LRS witnesses and PODER witnesses about the route trucks would take to and from the facility. LRS proposed routes that would avoid residential areas. Currently, trucks travel to and from the GROOT waste transfer station, and there should be no need for those trucks to travel through residential neighborhoods. However, sometimes they do. The City of West Chicago could require LRS to not enter residential neighborhoods. This would **require** that LRS abide by the proposed routes.

Members of the West Chicago City Council, when you are reading this comment and considering your decision, you will have the entire record of proceedings before you. You will be able to see what specific promises LRS has made, how they have proposed this new waste transfer station will be run, if siting approval is granted. All I am asking is that you give yourselves a way to hold LRS accountable to those promises. If you grant siting approval, do so with conditions. Make sure you protect your residents.

Sincerely,
Jackson Paller

Subject: Reject LRS's application

To whom it may concern,

I am a resident from West Chicago, I have lived here for 23 years. I am very disappointed to hear about the LRSs application, and what they want to do to our beautiful town.

I am asking for your help to please help put a stop to it, you are our towns voice. This new project should not be allowed to come to our town. We may be a small community but we don't deserve to be treated like garbage. Which is why I am asking for your help, you are our towns voice. Our town has chosen you all, and it is now time for you all to work and fight for our town, our health, and our future.

We expect you to please reject this application and for it to not reach and affect our City of West Chicago.

It is time to act now and say no to this LRS application.

Thanks for your attention.

West Chicago Waste Transfer Station

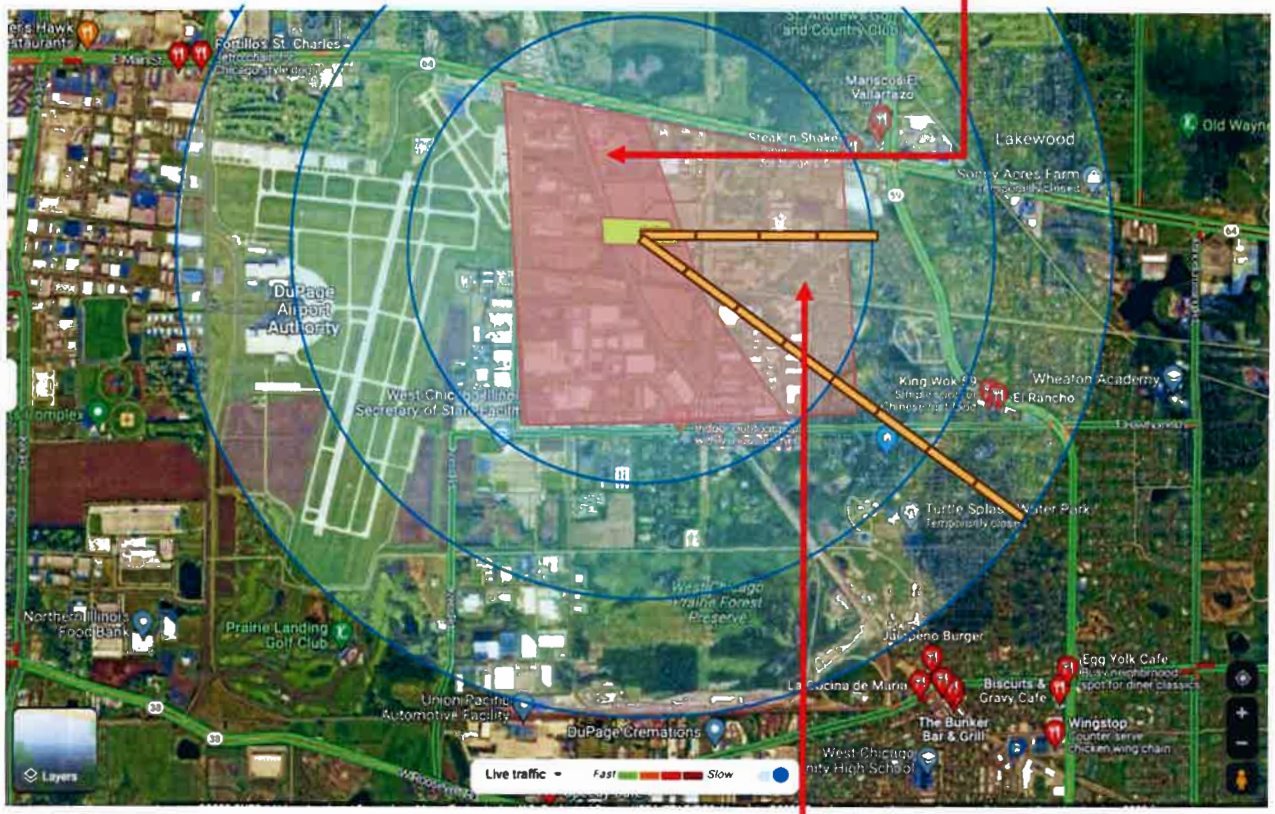
Prepared by Kathleen Leski &
Kenna Johnson

10+ year residents on Crabapple Ct

Overview

West Chicago Counsel,

I and my wife live on Crabapple Ct, just south of Hawthorne, my home is about a mile from the site. We've lived here for over 10 years. I have multiple concerns after attending and reading through all the transcripts and attending hearings as well as outside research.



SECTION HEADING

- The placement of a waste transfer station within 9000ft (about a 1¾ mile) of residents can have severe consequences for the health and well-being of those living in the area. **The witnesses by LRS focused on a narrow area not on the full community impacted (see map included).**
- Waste transfer stations emit a wide range of pollutants, including volatile organic compounds (VOCs), particulate matter, and hazardous air pollutants (HAPs). Exposure to these pollutants can lead to respiratory problems, allergies, and other health issues, especially for those with pre-existing respiratory conditions such as **asthma**. I am one of those individuals who have Asthma. While I understand that LRS says they will place a filtration system to reduce pollutants. I don't think they're going far enough. **Reverse air and misting are both pieces of equipment to mitigate the pollution.** If the plant is serious about environmental protection they will install these.
- The constant **noise** of heavy machinery and trucks can be incredibly disruptive to those living in the area, causing stress and reducing the quality of life for residents.
-
- In addition to health concerns, waste transfer stations can also have a **significant impact on property values.** The placement of a waste transfer station within a 9000ft of residents can reduce the value of homes in the area, making it difficult for homeowners to sell their properties or obtain loans.
- **Traffic congestion, creating a significant risk for accidents and injuries.** The constant movement of large trucks can also damage roads, leading to increased repair costs for the local government. The traffic report did not go far enough in their assessment. Widening for a left turn from Powel is great. However, the 3 way stop at Hawthorne will become difficult to get through quickly and I fear the same will happen to Kirk Road & North Ave if you want to go south on Kirk. I don't understand why they are not taking Hawthorne to State (38) to Kirk. That would the trucks through true industrial to get to Kirk.

Criterion 1- Needed Capacity

- In the first arguments, it was shown by Protect West Chicago that due diligence in sending out the notices was not done by LRS. They further proved that capacity wasn't being used. The argument back from LRS was one of cost.
- This is at the heart of this request in my opinion- **$$$.** The three big companies are squeezing out the little guys. However, that's exactly what LRS has been doing- buying up smaller operations. I don't think for a moment that West Chicago will get any benefit, at least not one that will be passed along to residents. Instead, we will have more truck traffic, more pollution, pests and more trucks illegally driving west on Hawthorn from 59 and going east on Hawthorne past Atlantic. **Will LRS be improving Hawthorn???**
- PWC also showed that there was open capacity in Kane and Cook county. Again, the only argument from LRS witnesses was that it will be more efficient for them to have a closed loop waste system.
- Uncovering the real benefit for LRS is to support their Chicago/Cook awards that would make West Chicago an ideal location.
- **In my opinion, they did not meet this criteria.**

Impact goes beyond industrial area- Criterial 3

This darker red area is what Mr Werthmann reviewed. Didn't really look At other intersections.

I believe there was a strategic effort to limit the scope of expert research, because the story is not as great if neighborhoods are included. This map shows in YELLOW, the LRS site. The red/coral color was used by Mr Hock and Mr Werthmann who provided the traffic patters.

The center circle represents ONE MILE radius, the second a 1.5 Mile radius and finally a 2mile radius. The arrow is made up of ¼ mile segments. Once could use to measure distance.

In this map, note how many Residential & Commercial, specifically restaurants are within 1mi and 1.5 miles specifically. At just 1.5 miles Reed Kepler park comes into view.

Mr Hock referred to a slight larger area, but did Not include any residential.

Criterion 6- Traffic impact

Mr. Werthmann from LRS testified on traffic.

I don't believe LRS considered the amount of traffic in the area- There are 3 areas of concern that were not all shown in Mr Werthmann traffic impact:

- Kirk Road & North 64- While turning south on Kirk has a double turn lane, it only has two lanes vs 3 lanes near airport. This interaction is far busier than Powell and North. Waiting on a left turn can back traffic into West Chicago today, what's it going to look like with transfer trucks using this path. Why isn't Hawthorne to Kress to 38 to Kirk being considered?
- 3 way stop sign at Hawthorne & Powell. This intersection, when trucks are being added, causes a backup to the tracks.
- The 2 lanes of Powell requires a dedicated left turn lane, one that I would hope will be built immediately.

The city rightly decided not to allowing that Dupage Airport could use their property as a Waste Transfer station. Because they new then it was going to have a negative affect on the surrounding area. Why then is a property feets away not going to have a negative affect?

In Closing

I love this diverse city and especially love my neighborhood. Being downwind from this facility makes me a big NO on this siting!

I am NOT in favor of siting LRS. However, if you do vote to allow (and frankly it seems it was decided before the hearings happened), **I highly recommend that there is a community panel made up of our area councilwoman, residents and business owners** within 1-1/2 miles of the facility. They would hold audits twice a year for first 2 years and once a year there after to ensure the following:

- LRS widens Powis to accommodate left turn lane to be completed by 2024
- West Chicago requires the facility is ISO 9001 certified as part of this application. This would ensure they are always following the same safe processes. Can't be certified if you cut corners.
- Installation of reverse air, filtration and misting system.
- Ensures high-speed motors for facility doors (to close immediately after truck enters to dump load and reduce pests.
- Traffic report after the plant is up and running.
- If ANY of these are not in place, they get a notice of 90 days to comply and if they don't, their ability to continue operating as a Solid Waste facility is revoked.

Published in pamphlet form by the authority of the City Council of the City of West Chicago, DuPage County, Illinois, on the 21st day of August 2012.

ORDINANCE NO. 12-O-0030

AN ORDINANCE AMENDING THE CODE OF ORDINANCES OF THE CITY OF WEST CHICAGO REGARDING POLLUTION CONTROL FACILITY SITE APPROVAL PROCEDURES

WHEREAS, the City of West Chicago (hereinafter referred to as "city") is a home-rule Illinois municipality organized and existing under the Illinois Municipal Code, 65 ILCS 5/1-1-1 *et seq.*; and

WHEREAS, the Illinois Municipal Code, 415 ILCS 5/1 *et seq.* assigns the responsibility of approving the location, or siting, of pollution control facilities to local government, and spells out the process that local governments must follow to approve or deny local siting approval; and

WHEREFORE, pursuant to this authority, the city desires to establish procedures and requirements pertaining to the review and approval of pollution control facilities in conformance with the Illinois Municipal Code; and

WHEREAS, the Mayor and Aldermen of the City Council of the city hereby find that it is in the best interest of the city to revise Chapter 14 of the West Chicago Code of Ordinances as it pertains to pollution control facility site approval procedures.

NOW, THEREFORE, BE IT ORDAINED BY THE CORPORATE AUTHORITIES OF THE CITY OF WEST CHICAGO, DUPAGE COUNTY, ILLINOIS, DULY ASSEMBLED AT A REGULAR MEETING, AS FOLLOWS:

SECTION 1: The foregoing recitals shall be, and are hereby incorporated into and made a part of this Ordinance as if fully set forth in this Section One.

SECTION 2: Chapter 14 of the Code of Ordinances of the City of West Chicago is hereby amended by adding Article VII, as follows:

"ARTICLE VII.
POLLUTION CONTROL FACILITY SITE APPROVAL PROCEDURES

Sec. 14-90. Definitions.
Sec. 14-91. City approval of pollution control facilities.
Sec. 14-92. Pollution control facility siting hearing officer.
Sec. 14-93. Procedure for filing an application for approval of a pollution control facility.
Sec. 14-94. Procedure for filing written comments to an application for site location approval for a PCF.
Sec. 14-95. Hearings on applications.
Sec. 14-96. Decisions.

Sec. 14-97. Rules and procedures.
Sec. 14-98. Administration of fees and costs.
Sec. 14-99. Ex Parte Communication Prohibited.
Sec. 14-100. Records.

Sec. 14-90. Definitions.

The following words, terms and phrases when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Act means the Illinois Environmental Protection Act, as amended from time to time. (415 ILCS 5/1, et seq.)

Applicant means any person, firm or partnership, association, corporation, company, limited liability company or organization of any kind proposing to obtain site location approval and IEPA permits for a new pollution control facility within the city's jurisdiction, and includes the fee owner of such site, the proposed Operator, and any other party with an interest in the site, such as a lessee, contract purchaser or land trust beneficiary.

West Chicago's jurisdiction refers to the corporate boundaries of the City of West Chicago.

Board refers to the Illinois Pollution Control Board.

city refers to the City of West Chicago, Illinois.

city council refers to City Council of West Chicago, Illinois.

County refers to the county in which the new pollution control facility is proposed to be located.

Hazardous waste disposal site means a site at which hazardous waste is to be managed, i.e., treated, stored or disposed. Hazardous waste is waste so defined in the Act.

Hearing officer refers to a person appointed by the mayor, with the advice and consent of the city council to conduct a public hearing and make findings of fact, conclusions of law and recommendations to the city council as provided by this article.

IEPA refers to the Illinois Environmental Protection Agency.

Operator means any person, firm or partnership, association, corporation, company, limited liability company or organization of any kind engaging in the activity of operating a pollution control facility within the city's jurisdiction,

PCF refers to a pollution control facility as defined in the Act. PCF includes a new pollution control facility and a transfer station as defined by the Act.

Rules and procedures refers to the "Rules and Procedures - Pollution Control Facility Siting - City of West Chicago, Illinois", established by the city council pursuant to section 14-97 this Code.

All other terms used in this article and defined in the Act shall have the same definitions and meanings as found in said Act, including, but not limited to those terms defined in Section 3, thereof. (415 ILCS 5/3)

Sec. 14-91. City approval of pollution control facilities.

No site location approval for the development or construction of a new PCF within West Chicago's jurisdiction may be granted by the city council unless an application is filed for approval of such site and is submitted for consideration to said city council in accordance with this Article, the Act and the Rules and Procedures.

Sec. 14-92. Pollution control facility siting hearing officer.

(a) Within fourteen (14) days following the receipt of the request for site location approval, the mayor, with the advice and consent of the city council, shall appoint a hearing officer to serve during any public hearing concerning an application for site location approval. The hearing officer shall serve at the pleasure of the Mayor. Compensation for the services of the hearing officer shall be agreed upon between the hearing officer and the city before the public hearing commences and shall be considered an expense for which the city may be reimbursed from the filing fee deposit. The duties of the hearing officer shall be as provided for herein and in the Rules and Procedures.

(b) All meetings and hearings on the siting application shall be at the call of the hearing officer at such times as may be required.

Sec. 14-93. Procedure for filing an application for approval of a pollution control facility.

(a) (1) To request siting approval for a new PCF within West Chicago's jurisdiction, an applicant must file an application with the City Clerk, with a minimum of one original and three (3) paper copies of the application showing sufficient details describing the proposed facility to demonstrate compliance with the Act and applicable regulations. The application shall include all site plans, engineering (including calculations), exhibits and maps, and all documents, if any, to be submitted to the IEPA as of the date of filing the application. At a minimum, the application shall comply with this Article and the Rules and Procedures incorporated herein. The Applicant shall also produce thirty (30) copies of the entire Application in .pdf or other searchable electronic format so that the application may be uploaded to the city website and so that read-only copies of the Application may be provided to the city council, city Staff, participants, interested parties, and members of the public that request same.

(2) A copy of the application and all related documents or other materials on file with the city council shall be made available for public inspection in the office of the City Clerk during normal business hours. Members of the public shall be allowed to obtain a copy of said application or any part thereof upon payment of the actual cost of reproduction as outlined in the Illinois Freedom of Information Act (5 ILCS 140/1, et seq.). A read-only copy of the application shall be made available on the city's website.

(3) In addition to the foregoing, the applicant shall deposit with the City Clerk at the time of filing the application for site location approval of a new PCF a filing fee deposit in the form of a certified or cashier's check of one hundred thousand dollars ($100,000.00), except that a filing fee deposit of two hundred fifty thousand dollars ($250,000.00) is required if said proposed facility is a landfill, is designed as a hazardous waste disposal site, or if the disposal or volume reduction of any waste will be by incineration or burning. If the applicant elects to file an amended application for site location approval for any PCF in accordance with this article, such filing shall be accompanied by payment of a supplemental fee of fifty thousand dollars ($50,000.00). The amount of the deposit may be reduced if prior to filing the application, such a request is approved by the city council.

The applicable filing fee is intended to defray the reasonable and necessary costs of processing the application, including, but not limited to: costs of site inspection, clerical expenses, copying costs, space rental, hearing officer compensation, court reporter expenses, transcription costs, public notice expenses, staff review time, if any, city attorney and city consultants (such as qualified professional engineers, planners, appraisers, environmental counsel, etc.) (including tests, exhibits, and testimony, if any, provided by said consultants), and other relevant costs incident to the consideration of an application, the costs incident to preparing the record for appeal, and the cost of representing the city on appeal in case of an appeal of a city council decision (collectively, and non-exclusively, the "City Costs"). Should the city incur any additional costs in excess of the applicable filing fee deposit, the applicant shall bear any and all such additional costs and shall promptly pay over such additional amount to the city upon request or demand. If at any time the funds deposited by the applicant are reduced below twenty five thousand dollars ($25,000.00), the applicant shall deposit an additional twenty five thousand dollars ($25,000.00) within fourteen (14) days from when the city provides written notice.

If there are funds remaining in the filing fee deposit after payment of the City Costs and the conclusion of the application process (including any appeals), such amount shall be refunded to the applicant upon the final resolution of the application process (including appeals to the Illinois Pollution Control Board, appellate court, Illinois Supreme Court, federal courts, and administrative review in the courts, if any).

(4) The application must contain all site plans, exhibits, maps and documents required by this article, the Act and by the Rules and Procedures. The date that the applicant files a complete application in proper form, together with the applicable filing fee deposit, with the City Clerk shall be considered the official filing date for all time limit purposes. The applicant remains solely responsible to demonstrate that the location approval criteria are all met.

At any time prior to completion by the applicant of the presentation of the applicant's factual evidence and an opportunity for cross-examination by the hearing officer, city representatives and any registered parties, the applicant may

file not more than one amended application upon payment of additional fees pursuant to Section 39.2(k) of the Act and this subsection. Provided, however, that the time limitation for final action set forth in Section 39.2(e) of the Act and subsection 14-96(b) shall be extended for an additional period of ninety (90) days.

(5) In the event a host agreement has been entered into between the city and the applicant, fees and costs will be paid in accordance with the host agreement in lieu of subsection (3) above. If, prior to making a final local siting decision, the city has negotiated and entered into a host agreement with the applicant, the terms and conditions of the host agreement, whether written or oral, shall be disclosed and made a part of the hearing record for that local siting proceeding. In the case of an oral agreement, the disclosure shall be made in the form of a written summary jointly prepared and submitted by the city and the applicant and shall describe the terms and conditions of the oral agreement.

(b) Applications shall include a written petition on recycled 8 ½" x 11" paper (except engineering plans and other drawings and plans) setting forth or including the following as may be applicable:

(1) The identification of the applicant, owner of the subject property and the proposed Operator of the PCF, which should also indicate for each whether the Applicant, the landowner and the Operator is an individual, partnership, limited liability company, corporation, trust or unit of government.

a. If the subject property is owned in a trust, then also identify the beneficiary(ies) of the trust(s).

b. In the case of an individual, list his or her address.

c. In the case of a partnership, submit the names of all partners.

d. In the case of a limited liability company, submit the names and addresses of all members and managers and attach a certificate of good standing for the LLC from the Secretary of State's office.

e. In the case of a corporation, submit the names and addresses of all officers and directors, and the names and addresses of all shareholders owning 10% or more of the capital stock of the corporation; together with certified copies of the articles of incorporation in the State of Illinois or, if not incorporated in the State of Illinois, its certificate of authority to do business in the State of Illinois.

(2) The legal description of the proposed site of the PCF and a street address or some other reasonable description of where the Facility is to be located.

(3) A description of the proposed PCF, its operation and the anticipated longevity thereof.

(4) The area to be served by the proposed PCF and a statement of the needs in such area for such a PCF.

(5) The expected types, amounts and methods of management, treatment or storage of all wastes proposed for the site and the origins of these wastes.

(6) The monitoring plan (including background analyses) for ground water and the procedure by which surface water and air will be monitored (including procedure by which the applicant will establish background levels).

(7) The plans for closure of the site and continued monitoring thereafter.

(8) Proof of notice pursuant to Section 39.2(b) of the Act.

(9) Site plans showing details of the proposed PCF.

(10) A detailed topographic survey of the subject property and the surrounding area--within 500 feet of the property line—indicating: topographical variations in no greater than 2 foot intervals for the subject property and USGS data for the property within 500 feet of the property line (unless otherwise required); existing land uses; existing zoning; and, if applicable, the boundary of any floodway or flood plain. For all purposes related to any siting application, "floodway" and "flood plain" shall mean the regulatory "floodway" and regulatory "flood plain" as defined by the Federal Emergency Management Agency (FEMA). These features may shown on one or more exhibits.

(11) A statement of the plan of operation for the proposed PCF including, but not limited to, the following as applicable:

a. Method of storage, landfilling, incineration, composting, resource recovery or other process;

b. Hours of operation;

c. Management personnel and their training;

d. Litter, vector, dust and odor control;

e. Surface drainage and erosion control (this information shall include proof of compliance with the DuPage County Countywide Stormwater and Floodplain Ordinance and/or the U.S. Clean Water Act);

f. Fire control;

g. Corrective actions for spills and other operational accidents; and

h. Coordination of operations with any other regional pollution control facility and/or recycling facility operated on, adjacent to, or within 500 feet of the PCF.

(12) A report analyzing the projected traffic impacts attributable to the proposed PCF and describing how the proposed PCF has been designed to minimize the impacts on existing traffic flows. The report shall include, but not be limited to the following as applicable:

a. Description of the anticipated number, type, size, origin, routing and expected distribution of arrival and departure times of all vehicles accessing the PCF site. If any of these factors are expected to vary significantly over the expected life of the PCF, details of the expected variance shall be presented along with the anticipated peak traffic data;

b. Description of any changes in traffic volumes or patterns to or from any existing development on the site that may be altered as a result of construction of the PCF;

c. Description of the roadway network adjacent to and surrounding the proposed PCF, including number of lanes, turning lanes at intersections, traffic controls, and vehicle turning and classification counts at the site entrances and exits, all signalized intersections and significant unsignalized intersections along principal routes of access. The area of detailed study shall extend along principal routes of access until the site traffic represents an insignificant percentage of the overall traffic stream. Traffic counts shall be taken during the expected daily peak periods of operation of the proposed PCF as well as the existing peak traffic periods on the surrounding roadways.

d. Descriptions of any traffic concerns identified by roadway jurisdictions within the area of detailed study;

e. Operational capacity analysis during peak periods at principal intersections within the area of detailed study for a minimum of two scenarios: (1) existing traffic volumes, and (2) with the addition of site traffic. If projected traffic volumes are analyzed, the report shall include the basis for the projections and the analysis should consider both build and no-build scenarios;

f. Analysis of vehicle accidents at intersections within the area of detailed study;

g. Detailed analysis of anticipated traffic at the entrance(s) and exit(s) to and from the proposed PCF, including either a traffic signal warrant analysis or gap study, and an intersection design study meeting the requirements of the agency having jurisdiction over the route providing access to the proposed PCF. This information should include information on traffic for

all regional pollution control facility and/or recycling facility located on, adjacent to or within 500 feet of the PCF.

(13) A written commitment (by Host Agreement or otherwise) to obtain certificates of insurance from companies having a Best rating of A VI or better that shall, at such time as the PCF is permitted, cover accidents such as fires, explosions, nonsudden accidental occurrences and pollution impairment.

(14) If the site is a proposed hazardous waste PCF, a copy of the Resource Conservation and Recovery Act Contingency Plan.

(15) A statement describing the past operating experience of the Applicant and, if different, the Operator in the field of solid or hazardous waste management. Also include a statement describing the past operating experience of subsidiaries of the parent corporation operating or licensed in Illinois in the field of solid or hazardous waste management.

(16) A statement setting forth a complete record of actual or alleged violations from the last 10 years of the Applicant and any proposed Operator with environmental laws and regulations governing solid or hazardous management operations or activities. Said statement shall include, but not be limited to, a citation of the applicable statute or ordinance violated or alleged to be violated and a brief written summary of the activities or operations giving rise to the actual or alleged violations and the ultimate outcome of the matter, including whether any fines or penalties were imposed.

(17) PCF construction quality assurance and quality control program.

(18) Personnel requirements for PCF operation and the training requirements for those personnel.

(c) It is the applicant's duty to comply with all notice requirements set forth in the Act. The applicant shall:

(1) No later than fourteen (14) days prior to filing an application for site location approval with the City Clerk, cause written notice of such application to be served either in person or by registered mail, return receipt requested, on the owners of all property within the subject area not solely owned by the applicant, and on the owners of all property within two hundred fifty (250) feet in each direction of the lot line of the subject property, said owners being such persons or entities which appear from the authentic tax records of the county in which the facility is to be located; provided, that the number of all feet occupied by public roads, streets, alleys and other public ways shall be excluded in computing the two hundred fifty (250) feet requirement; provided further, that in no event shall this requirement exceed four hundred (400) feet, including public streets, alleys and other public ways.

(2) The applicant shall serve such written notice upon each member of the general assembly from the legislative district in which the proposed facility is to be located, and this notice shall also be published in a newspaper of general circulation in the county in which the site is located.

(3) The applicant shall state in such notice the name and address of the applicant, the location of the proposed site, the nature and size of the development, the nature of the activity proposed, the probable life of the proposed activity, the date when the request for site approval will be submitted to the City Clerk, a description of the right of persons to comment on such request as hereafter provided, and any other information as may be required by the Rules and Procedures and the Act.

(4) The applicant shall include in the application proof of compliance with all pre-filing notice requirements, including verified or certified copies of those pre-filing notices required by Section 39.2(b) of the Act.

Sec. 14-94. Procedure for filing written comments to an application for site location approval for a PCF.

(a) Any person may file written comments with the City Clerk concerning the appropriateness of the proposed site for its intended purpose. The hearing officer shall consider any comment received or postmarked from the date of the application through and until thirty (30) days after the date of the last public hearing in making a final determination. Said written comments shall be mailed or delivered to the West Chicago City Clerk, 475 Main Street, West Chicago, Illinois 60185. Said written comments shall clearly designate reference to the PCF application to which they refer to ensure their consideration by the hearing officer. Upon receipt, the City Clerk shall date stamp the comments and refer them to the hearing officer.

(b) The above-mentioned written comments shall become part of the record of the proceedings.

Sec. 14-95. Hearings on applications.

(a) At least one (1) public hearing shall be held by the hearing officer no sooner than ninety (90) days but no later than one hundred twenty (120) days from and after the receipt of the application for PCF site location approval. Any city council member may attend such hearings and a transcript shall be made and retained of all portions of the public hearing. A quorum of the city council need not be present at any hearing.

(b) The applicant shall cause to be published in a newspaper of general circulation in the county of the proposed site and in a newspaper of general circulation in West Chicago a notice of such public hearing not later than fourteen (14) days prior to said hearing.

The applicant shall also serve written notice of such hearing by certified mail, return receipt requested, on all members of the Illinois General Assembly from the district in which the proposed site is located, to the governing authority of every municipality

contiguous to the proposed site or contiguous to the municipality in which the proposed site is to be located, to the county board of the county where the proposed site is to be located and to the IEPA. The applicant shall file with the City Clerk copies of each notice with proof of service of such notice prior to the commencement of said public hearing. Such evidence of notice shall become a part of the record on the application for PCF local site approval.

(c) The hearing officer shall notify the applicant in writing of the date and location of the public hearing at least twenty-one (21) days prior to such hearing.

(d) Members or representatives of the governing authority of any municipality contiguous to the proposed site or contiguous to the municipality in which the proposed site is to be located and members or representatives of the county board of the county in which the proposed site is to be located may appear at and participate in the public hearings, but must register in the same manner provided for other participants or parties.

(e) The public hearing shall develop a record sufficient to form the basis of appeal of the decision in accordance with Section 40.1 of the Act. During the course of the public hearing before the hearing officer, the hearing officer shall receive testimony from the applicant and witnesses whom the applicant may call in support of the application, any city witnesses, any objectors, and any other witnesses having relevant information, and shall recommend approval only if the proposed facility meets the following criteria (or such amended criteria as may be set forth from time to time in the Act).

(1) That the facility is necessary to accommodate the waste needs of the area that it is intended to serve; and

(2) That the facility is so designed, located, and proposed to be operated that the public health, safety and welfare will be protected; and

(3) That the facility is located so as to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property; and

(4) (A) for a facility other than a sanitary landfill or waste disposal site, the facility is located outside the boundary of the 100 year flood plain or the site is flood-proofed; (B) for a facility that is a sanitary landfill or waste disposal site, the facility is located outside the boundary of the 100-year floodplain, or if the facility is a facility described in subsection (b)(3) of Section 22.19a, the site is flood-proofed;

(5) That the plan of operations for the facility is designed to minimize the danger to the surrounding area from fire, spills, or other operational accidents; and

(6) That traffic patterns to or from the facility are so designed to minimize the impact on existing traffic flows; and

(7) That if the facility will be treating, storing or disposing of hazardous waste, an emergency response plan exists for the facility which includes notification, containment and evacuation procedures to be used in case of an accidental release; and

(8) That if the facility is to be located in a county where the county board has adopted a solid waste management plan consistent with the planning requirements of the

Local Solid Waste Disposal Act, or the Solid Waste Planning and Recycling Act, the facility is consistent with that plan; and

(9) That if the facility will be located within a regulated recharge area, any applicable requirements specified by the Illinois Pollution Control Board for such areas have been met.

The hearing officer and the city council may also consider as evidence the previous operating experience and past record of convictions or admissions of violations of the applicant (and any subsidiary or parent corporation of the applicant) in the field of solid waste management when considering criteria (2) and (5). The applicant shall affirmatively present oral testimony fairly showing the previous operating experience and past record of convictions or admissions of violations of the applicant (and any subsidiary or parent corporation of the applicant) in the field of solid waste management.

(f) A transcript shall be kept of all proceedings before the hearing officer. The hearing officer shall preside at the public hearing and shall make any decisions concerning the admission of evidence and the manner in which the hearing is conducted subject to this Article and the Rules and Procedures. However, the hearing officer shall make all rulings and decisions in accordance with fundamental fairness. No ruling of the hearing officer concerning admissibility of evidence or procedural issues at the public hearing shall be appealable to the city council. Issues of jurisdiction shall be finally determined by the city council.

(g) The applicant for site location approval shall have the burden of proof and the burden of going forward with evidence. The testimonial evidence introduced by the applicant may not exceed the scope of the application. Such oral testimony may only explain and clarify the application, not expand, supplement or amend the application except as otherwise provided in this Article for an amendment to the application.

(h) All persons desiring to provide public comment during the hearing, including members of the public, must submit written notification of said intent to the City Clerk before the first day of the public hearing or register with the hearing officer on the first day of the hearing. Any person so appearing at such public hearing shall have the right to present public comment relating to the pending application. No advance written notification shall be required to present written comment in the manner described in Section 14-94.

(i) Each person desiring to present evidence in the hearing and/or to cross-examine witnesses shall register as a party to the proceeding not less than ten days prior to the commencement of the hearing. Any person registered as a party shall have the right to present their own personal testimony, to be represented by an attorney and, through such attorney, to present the testimony of other persons or to cross-examine witnesses. The city shall be deemed a participant and a party to all proceedings and shall proceed last with its case and cross-examination.

(j) All hearings shall be conducted in a manner which is consistent with the Act, this Article and the Rules and Procedures.

(k) The recommendation of the hearing officer on the application shall be in writing, specifying the reason(s) for the decision, in accordance with subsection (e) above. The hearing officer shall submit a report to the city council as soon as practicable, but in no event earlier than the end of the 30-day comment period.

(l) The siting approval procedures and criteria provided for in the Act, in this Article and the Rules and Procedures for new PCF's shall be the exclusive siting procedures. Local zoning or other local land use requirement shall not be applicable to such siting decisions.

Sec. 14-96. Decisions.

(a) Once the hearing officer has made a recommendation and reduced it to writing, the written recommendation shall be submitted to the city council for its decision as to the ultimate approval or disapproval of the proposed site location. Eight (8) copies (why only 8, shouldn't it be the normal packet amount of 20?) of the record of the public hearing in .pdf or other searchable electronic format shall also be made available to the city council as soon as the transcript becomes available.

(b) The city council shall make a decision based on the record from the public hearing and review of the recommendation of the hearing officer. The decision of the city council shall be by resolution in writing, specifying the reasons for the decision, such reasons to be in conformity with Section 39.2(a) of the Act. In granting site location approval, the city council may impose such conditions as may be reasonable and necessary to accomplish the purposes of the Act to the extent that said conditions are not inconsistent with the Act and the regulations promulgated by the Illinois Pollution Control Board. Such decisions shall be available for public inspection at the office of the City Clerk and may be copied upon payment of the cost of reproduction. If there is no final action by the city council within one hundred eighty (180) days after the filing of the application for site location approval, the Applicant may deem the application approved unless the time for approval has been extended for an additional period of ninety (90) days pursuant to the Act and this Article.

(c) An applicant may not file an application for site location approval that is substantially the same as a request which was disapproved, pursuant to a finding against the applicant under any criteria in subsections 14-95(e)(1) through (9), above, and of Section 39.2(a) of the Act, within two (2) years.

(d) Siting approval obtained pursuant to this article is transferable and may be transferred to a subsequent owner or Operator. In the event that siting approval has been transferred to a subsequent owner or Operator, that subsequent owner or Operator assumes and takes subject to any and all conditions imposed upon the prior owner or Operator by the city. However, any such conditions imposed pursuant to this section may be modified by agreement between the subsequent owner or Operator and the city. Further, in the event that siting approval obtained pursuant to this section has been transferred to a subsequent owner or Operator, that subsequent owner or Operator assumes all rights and obligations and takes the facility subject to any and all terms and conditions of any existing host agreement between the prior owner or Operator and the city.

(e) A local siting approval granted under this section shall expire at the end of two (2) calendar years from the date upon which it was granted, unless the local siting approval granted under this section is for a sanitary landfill operation, in which case the approval shall expire at the end of three (3) calendar years from the date upon which it was granted, and unless within that period the applicant has made application to the agency for a permit to develop the site. In the event that the local siting decision has been appealed, such expiration period shall be deemed to begin on the date upon which the appeal process is concluded.

Sec. 14-97. Rules and procedures.

The rules and procedures set forth herein may be amended by resolution of the City Council from time to time, provided that any amendment which occurs following the filing date on an application for local site approval must be made in a manner which preserves fundamental fairness.

Sec. 14-98. Administration of fees and costs.

(a) All expenses incurred by the city, as described in Section 14-93(2) and otherwise in managing or reviewing of the request for site approval, conducting the public hearing, arriving at the site approval decision, and any appeals from the city council decision shall be paid from the filing fee deposit as provided in Section 14-93. The filing fee deposit shall be placed in an account in the name of the city, with rights of withdrawal limited to the city.

(b) The city's cost of providing the services of city employees in the receipt, review, processing of and response to the application shall be reimbursed to the city at the rate of 25% of the direct cost of such professional fees and costs as shall actually be incurred by the city, in the event that the city, in its sole and exclusive discretion, determines that it is necessary or desirable to obtain professional services, including, but not limited to, attorneys, engineers, planners, architects, surveyors, traffic, drainage or other consultants, and/or to incur costs related to any required notices or recordations, in connection with the application for site approval.

(c) Upon termination of proceedings (including appeals), a final accounting and summary of all authorized expenditures and reimbursements shall be presented to the city council by the City Administrator or his designee.

(d) Any portion of the filing fee deposit not required for payment of costs or expenses incurred by the city hereunder shall be returned to the applicant within a reasonable time. Should there be costs and/or expenses in excess of the amount paid by the applicant in the costs deposit, the applicant shall pay any and all additional costs within a reasonable time of presentment of a statement from the city.

(e) In order to expedite payment of all bills incurred as a result of administering the hearing process, all bills and questions concerning billing should be directed to the City Administrator or his designee.

Sec. 14-99. Ex-Parte Communication Prohibited:

In recognition of the quasi-judicial role of the Mayor and each Member of the city council, and the City Attorney, ex-parte communications with persons other than the Mayor, Council Members or the City Attorney concerning the Application are prohibited between the Date of Filing and the date of the final decision of the city council (or the 180th day after the Date of Filing).

Sec. 14-100. Records.

(a) The City Clerk shall be responsible for keeping the records of said hearing. The records shall consist of the following:

(1) The Application and all amendments thereto;

(2) Proofs of the required notices;

(3) Notices of Participation and Registration of Parties;

(4) Written comments filed by the public (either received by the City Clerk's office or postmarked between the Date of Filing and 30 after the close of the hearing);

(5) All reports, studies, exhibits, documents or statements received in evidence at the public hearing;

(6) The transcript of the public hearing;

(7) Any motions filed during the public hearing;

(8) All transcripts, when available, or disclosures of meetings, other than the public hearings held pursuant to this Article, at which the Mayor or a city council Member was in attendance and the Application was discussed.

(9) The Hearing Officer's proposed findings of fact and recommendations to the city council (including any conditions of approval).

(10) The resolution containing the final decision of the city council.

(b) The City Clerk shall be responsible for certifying all copies of the record of the public hearing."

SECTION 3: That all ordinances and resolutions or parts thereof in conflict with the provisions of this Ordinance are, to the extent of such conflict, expressly repealed.

SECTION 4: That the City Clerk of the City of West Chicago be and is hereby directed to publish this Ordinance in pamphlet form, pursuant to the statutes of the State of Illinois.

SECTION 5: That this Ordinance shall be in full force and effect from and after its passage, approval and publication in a manner provided by law.

CERTIFICATE

I, Nancy Smith, Certify that I am the duly elected and acting City Clerk of the City of West Chicago, DuPage County, Illinois.

I further certify that on August 20, 2012 the Corporate Authorities of such municipality passed and approved Ordinance No. 12-O-0030 entitled:

AN ORDINANCE AMENDING THE CODE OF ORDINANCES OF THE CITY OF WEST CHICAGO REGARDING POLLUTION CONTROL FACILITY SITE APPROVAL PROCEDURES

Which provided by its terms that it should be published in pamphlet form.

The pamphlet form of Ordinance No. 12-O-0030 including the ordinance and a cover sheet hereof was prepared, and a copy of such ordinance posted in the municipal building, commencing on August 21, 2012 continuing for at least ten days thereafter. Copies of such ordinance were also available for public inspection upon request in the Office of the City Clerk.

Dated at West Chicago, Illinois, this 20th of August 2012.

CITY OF WEST CHICAGO – 475 Main Street
CITY COUNCIL MINUTES
Regular Meeting
August 20, 2012

1. Call to Order. Acting Mayor Ruben Pineda called the meeting to order at 7:00 pm.

2. Pledge of Allegiance to the Flag. Alderman Fuesting led all in the pledge of allegiance.

3. Invocation. The City Clerk gave the invocation.

4. Roll Call and Establishment of a Quorum. Roll call found Aldermen Lori J. Chassee, James E. Beifuss, Jr., H. Ronald Monroe, James Smith, Russell Radkiewicz, Ruben Pineda, Sandy Dimas, Alan Murphy, John C. Smith, Nanette B. Connelly, Rebecca Stout, Nicholas Dzierzanowski, and Matt Fuesting present. Alderman Kurt Meissner was absent. The Acting Mayor announced a quorum.

City Clerk Nancy M. Smith and City Treasurer Donald F. Earley were also present. .

Also in attendance were City Attorney Patrick K. Bond, Public Works Director Rob Flatter, and City Administrator Michael L. Guttman.

5. Public Participation. The following person spoke during Public Participation:

Mr. Dave Libbey, SFI – Student Film Academy, 321 Allen Street, West Chicago, provided an update on the Film Academy's photo shoot at 114 Chicago Street. Mr. Libbey also remarked that he has found about 25 creative assets in the community. He said West Chicago is a unique community that can accommodate a lot of artists, but better connections are needed. His goal is to try to assemble those things. He would like to see a process that would make artists see West Chicago as a destination.

6. City Council Meeting Minutes – August 6, 2012. Alderman Radkiewicz made a motion, seconded by Alderman Chassee, to approve the minutes of August 6, 2012, with no changes. Voting Yea: Aldermen Chassee, Beifuss, Monroe, James Smith, Radkiewicz, Pineda, Dimas, Murphy, John Smith, Connelly, Stout, Dzierzanowski, and Fuesting. Voting Nay: 0. Motion carried.

7. Corporate Disbursement Report. Alderman Connelly made a motion, seconded by Alderman Radkiewicz, to approve the August 20, 2012, Corporate Disbursement Report in the amount of $ 846,588.55. Voting Yea: Aldermen Beifuss, Chassee, Monroe, James Smith, Radkiewicz, Dimas, John Smith, Connelly, Stout, Dzierzanowski, and Fuesting. Voting Nay: 0. Alderman Murphy and Acting Mayor Pineda abstained. Motion carried.

8. Consent Agenda – Consideration of an Omnibus Vote.

* **Development Committee:** Acting Mayor Pineda read and explained the following items:

A. Ordinance 12-O-0028 – An Ordinance Granting Deviations for Pavement Slope and Turf Grading – 1651 Atlantic Drive – West Chicago Fire Protection District

B. Ordinance 12-O-0029 – An Ordinance Granting Deviations for Pavement Slope and Turf Grading – 1080 Commerce Drive – West Chicago Fire Protection District

C. Add – Ancel Glink Diamond Bush DiCianni & Krafhefer to the List of Approved Attorneys

D. Ordinance 12-O-0030 – An Ordinance Amending the Code of Ordinances of the City of West Chicago Regarding Pollution Control Facility Site Approval Procedures

Alderman Monroe made a motion, seconded by Alderman Dimas, to adopt the above items. Voting Aye: Aldermen Beifuss, Chassee, Monroe, Jim Smith, Radkiewicz, Pineda, Dimas, Murphy, John Smith, Connelly, Stout, Dzierzanowski, and Fuesting. Voting Nay: 0. Motion carried.

* **Infrastructure Committee:** No report

* **Public Affairs Committee:** Alderman Chassee read the following item and invited State Representative Mike Fortner to explain.

E. Ordinance 12-O-0034 – An Ordinance Amending the Code of Ordinances of the City of West Chicago – Chapter 2, Section 2-8 – Wards Designated.

State Representative Fortner said after the Census (held every 10 years) government entities must look at the numbers and see if they comply with the law providing equal districts. If not, they must redistrict. West Chicago received their numbers in 2011, and based on them, there were sufficient deviations to require a redistricting. Each ward should have about the same number of population; from the largest to the smallest there should be no more than a 10% difference. The Federal Voting Rights Act also requires sensitivity to minority populations. Three wards were out of range. Representative Fortner prepared three possible plans. He wished to avoid splitting precincts and subdivisions. After discussion with the Public Affairs Committee, the recommendation was to go with Plan B. Representative Fortner explained the changes, such as the Prestonfield subdivision went from Ward 7 to Ward 4, and other ward lines were shifted as needed to keep equal population. Alderman Chassee thanked Representative Fortner on behalf of the Public Affairs Committee and the City Council for taking his time and mathematical prowess to develop the new ward map.

Alderman Chassee made a motion, seconded by Alderman Fuesting, to adopt Ordinance 12-O-0034. Voting Aye: Aldermen Beifuss, Chassee, Monroe, Jim Smith, Radkiewicz, Pineda, Dimas, Murphy, John Smith, Connelly, Stout, Dzierzanowski, and Fuesting. Voting Nay: 0. Motion carried.

* **Finance Committee:** No Report

* **Items Not Sent to Committee:** The Acting Mayor read and explained the following items:

F. Resolution 12-R-0058 – A Resolution Authorizing the Mayor to Execute a Certain Downtown Rehabilitation Façade Program Agreement with Isaac Chavez – 134 Main Street

G. Resolution 12-R-0072 – A Resolution Authorizing the Mayor to Execute a Contract Agreement with Boller Construction Company, Inc., for Services Related to the Digester #2 Improvement Project (for an amount not to exceed $781,000)

H. Resolution 12-R-0073 – A Resolution Authorizing the Mayor to Execute an Intergovernmental Agreement with the Village of Wayne Regarding the Establishment of a Quiet Zone on Smith Road

Alderman Murphy made a motion, seconded by Alderman Dimas, to adopt the above items. Voting Aye: Aldermen Beifuss, Chassee, Monroe, Jim Smith, Radkiewicz, Pineda, Dimas, Murphy, John Smith, Connelly, Stout, Dzierzanowski, and Fuesting. Voting Nay: 0. Motion carried.

11. New Business. None

12. Correspondence and Announcements.

Upcoming Meetings

- August 21, 2012	Plan Commission/Zoning Board of Appeals
- August 23, 2012	Finance Committee (cancelled)
- August 27, 2012	Public Affairs Committee
- August 28, 2012	Historical Preservation Commission

City Clerk Smith announced that the West Chicago Historical Society would be having their Annual Ice Cream Social and Silent Auction on September 8, 2012, from noon until 3:00 pm at the Kruse House. Afterwards, people can go to the VFW 19th District's fundraiser at the West Chicago VFW Post on the same day, from 2:00 – 9:00 pm for a steak dinner.

The Acting Mayor called upon Melissa Birch, Treasurer of the Ladies Auxiliary to West Chicago American Legion Post 300, to announce that there would be a Bowling for the American Legion fundraiser. Ms. Birch said the event would be held on September 14, 2012, from 9:30 pm to midnight. Cost is $20.00 per person. Acting Mayor Pineda said this is very important and he would like to get everyone there. There will be raffles and door prizes, and people will have a great time for a great cause.

Acting Mayor Pineda said there were two children reported missing on Saturday. One was an autistic 13 year old and the other was 5 years old. The Mayor praised the impressive coming

together of CERT, ESDA, the police, and the fire department. Furthermore, there were units from Warrenville, Wheaton, Forest Preserve Police, DuPage County, Kane County and even Cook County. Chief of Police Perez got a contact with Homeland Security which brought in a helicopter. The children were gone about 4 ½ - 5 hours and then were found eating pizza at Penske Truck near the bike path. The workers thought they were children of customers there. The Acting Mayor said it was very amazing how this community pulled together, and he would like to thank everyone personally.

13. Executive Session. There was no executive session.

14. Items to be Referred for Final Action from Executive Session. Not applicable.

15. Adjournment. At 7:26 pm, Alderman Chassee made a motion, seconded by Alderman Stout, to adjourn. Motion was carried by voice vote.

Respectfully submitted,

Nancy M. Smith
City Clerk

WHERE HISTORY & PROGRESS MEET

CITY COUNCIL MEETING
MONDAY, APRIL 1, 2019 - 7:00 P.M.
475 MAIN STREET, WEST CHICAGO, ILLINOIS

AGENDA

1. **Call to Order**

2. **Pledge of Allegiance to the Flag**

3. **Invocation**

4. **Roll Call and Establishment of a Quorum**

5. **Public Participation**

The opportunity to speak to the City Council is provided for those who have a question or comment on an agenda item or a City of West Chicago issue. The City Council appreciates hearing from our residents and your thoughts and questions are valued. The City Council strives to make the best decisions for the City and public input is very helpful.

Respect for the duties of the City Council and for the democratic process will be adhered to – in this regard, civility and a sense of decorum will be strictly followed. All speakers must address their comments to the Mayor. Comments that are personally condescending will not be permitted. Speakers shall be courteous and should not make statements that are personally disrespectful to members of the City Council or City staff.

Please use the podium in the center aisle as the proceedings are videotaped. Please announce your name and address (if acceptable) before commencing – all public comments are limited to three (3) minutes and each citizen will be permitted to speak only once. It is the City Council's policy not to engage in dialogue during Public Comment. Any questions raised will be addressed by City staff or an elected official outside of the City Council meeting.

Voting Aye: Alderman Chassee, Beifuss, Brown, Sheahan, Ferguson, Hallett, Dimas, Birch-Ferguson, Garling, Swiatek, Short, Stout, Gagliardi, and Ligino-Kubinski. Voting Nay: 0. Motion carried.

7. Corporate Disbursement Report. Alderman Dimas made a motion, seconded by Alderman Ferguson, to approve the April 1, 2019, Corporate Disbursement Report in the amount of $314,046.72. Voting Aye: Aldermen Chassee, Beifuss, Brown, Sheahan, Ferguson, Hallett, Dimas, Birch-Ferguson, Garling, Swiatek, Short, Stout, Gagliardi, and Ligino-Kubinski. . Voting Nay: 0. Motion carried.

8. Consent Agenda – Consideration of an Omnibus Vote.

*** Finance Committee:**

A. Resolution 19-R-0016 – A Resolution Authorizing the Mayor to Execute a Host Community Benefit Agreement Between the City of West Chicago and Lakeshore Recycling Systems, LLC for a Solid Waste Transfer Facility. (This item was removed from the Consent Agenda and voted upon separately.)

*** Public Affairs Committee:** Alderman Chassee read and explained the following items:

B. Ordinance 19-O-0004 – An Ordinance Amending Chapter 8, Article I, Administrative Adjudication System, of the West Chicago Code of Ordinances

C. Ordinance 19-O-0006 – An Ordinance Amending Chapter 11, Article II, Division 6, Animal Control and Care, of the West Chicago Code of Ordinances

D. Resolution 19-R-0021 – A Resolution Authorizing the Mayor to Enter into a Funding Agreement with the Mexican Cultural Center to Support the 2019 Mexican Independence Day Event

E. Approve – The West Chicago Community High School District 94 Homecoming Parade – Scheduled for Friday, October 18, 2019

F. Approve – The ABD Cycle Club Memorial Day Race – Scheduled for Monday, May 27, 2019

G. Approve – St. Mary Catholic Church Stations of the Cross – Scheduled for Friday, April 19, 2019

Alderman Chassee made a motion, seconded by Alderman Hallett, to adopt the above items. Voting Aye: Aldermen Chassee, Beifuss, Brown, Sheahan, Ferguson, Hallett, Dimas, Birch-Ferguson, Garling, Swiatek, Short, Stout, Gagliardi, and Ligino-Kubinski. . Voting Nay: 0. Motion carried.

*** Items Not Sent to Committee:** Mayor Pineda read and explained the following items:

H. Resolution 19-R-0018 – A Resolution Making a Determination Relative to the Release of Executive Session Minutes Pursuant to the Illinois Open Meetings Act

I. Resolution 19-R-0019 – A Resolution Authorizing the Destruction of Audio Recordings of Certain Closed Meetings

Alderman Brown made a motion, seconded by Alderman Garling, to approve the above items. Voting Aye: Aldermen Chassee, Beifuss, Brown, Sheahan, Ferguson, Hallett, Dimas, Birch-Ferguson, Garling, Swiatek, Short, Stout, Gagliardi, and Ligino-Kubinski. . Voting Nay: 0. Motion carried.

9. Reports by Committees.

A. Resolution 19-R-0020 – A Resolution Authorizing the Mayor to Execute a Certain Intergovernmental Agreement Between the City of West Chicago and Pace, the Suburban Bus Division of the Regional Transportation Authority. Alderman Chassee made a motion, seconded by Alderman Ligino-Kubinski,to approve Resolution 19-R-0020. During discussion, Alderman Chassee said this will enhance the Winfield Township bus services for seniors. Alderman Brown had a number of questions regarding the finances which City Administrator Guttman answered. Mayor Pineda said this will be good for West Chicago. Voting Aye: Aldermen Chassee, Beifuss, Brown, Sheahan, Ferguson, Hallett, Dimas, Birch-Ferguson, Garling, Swiatek, Short, Stout, Gagliardi, and Ligino-Kubinski. Voting Nay: 0. Motion Carried.

10. Unfinished Business. From **8A.** Resolution 19-R-0016 – A Resolution Authorizing the Mayor to Execute a Host Community Benefit Agreement Between the City of West Chicago and Lakeshore Recycling Systems, LLC for a Solid Waste Transfer Facility. Alderman Chassee made a motion, seconded by Alderman Stout, to approve Resolution 19-R-0016. During extensive discussion, concern was expressed about the hydro excavation waste provision and just exactly what that meant. Lakeshore's Consultant John Hock answered many questions. Alderman Garling was concerned that this is a second waste transfer station in West Chicago, and we get our water from the ground. He is also concerned about odors and the impact on existing businesses. He would like this matter to go back to Committee to get these questions answered. The Mayor introduced the City's Attorney Dennis Walsh. He said whether the City enters into a Host Agreement or not, Lakeshore has the right to file an application. The City Council will determine if they meet the nine criteria. If they do, then the City has to approve it. Alderman Beifuss had the same concerns as Alderman Garling. He was also concerned with the hydro-excavation waste, as he doesn't see any details. He does not know about the valuation for tipping. He would like staff to investigate the numbers. Alderman Garling made a motion to table, seconded by Alderman Beifuss. Alderman Garling withdrew his motion to table and Alderman Beifuss withdrew his second because he had a number of different questions about this Agreement. It looks like they can be moving more waste than the City of Chicago. Once the Agreement is signed it is done. He would like the City Administrator to ask if Lakeshore could provide a higher tipping fee. He has concerns about this hydro excavation waste and asked if there are any other cities in Illinois with this. Alderman Chassee, Stout and Hallett were in favor of the Agreement. Aldermen Beifuss and Garling still expressed concerns. Alderman Dimas said they will have an opportunity to ask

more questions. Alderman Ligino-Kubinski called the question. Seconded by Alderman Stout. Voting Aye: Aldermen Chassee, Sheahan, Ferguson, Hallett, Dimas, Birch-Ferguson, Swiatek, Short, Stout, Gagliardi, and LIgino-Kubinski. Voting Nay: Aldermen Beifuss and Garling. Voting Present: Alderman Brown. Motion Carried.

Voting Aye: Aldermen Chassee, Sheahan, Ferguson, Hallett, Dimas, Birch- Ferguson, Swiatek, Short, Stout, Gagliardi, and Ligino-Kubinski. . Voting Nay: Aldermen Beifuss and Garling. Alderman Brown voted present. Motion carried.

11. New Business. None

12. Correspondence and Announcements.

Upcoming Meetings

- April 2, 2019	Plan Commission/Zoning Board of Appeals
- April 4, 2019	Infrastructure Committee (cancelled)
- April 8, 2019	Development Committee

The City Clerk announced that the refurbishing of the tank and airplane at the VFW Post would occur on Saturday, April 13, and Sunday, April 14, 2019. Doing the work will be members of SMART 365, Local. Everyone is invited out to see this work get done.

13. Mayor's Comments. The Mayor said the Union Pacific is celebrating the last spike that connected the railroad. The event will be July 28 and 29 here in West Chicago. They are bringing in two steam engines. He is glad that they have chosen West Chicago. They will be parked right next to the Police Department. There will be two engines and he would like the entire community including schools to come out.

14. Executive Session. There was no executive session.

15. Items to be Referred for Final Action from Executive Session. Not applicable.

16. Adjournment. At 7:59 pm, Alderman Chassee made a motion, seconded by Alderman Stout, to adjourn. Motion was carried by voice vote.

Respectfully submitted,

Nancy M. Smith
City Clerk

15. Adjournment

CITY OF WEST CHICAGO – 475 Main Street
CITY COUNCIL MINUTES
Regular Meeting
September 19, 2022

1. **Call to Order**. Mayor Ruben Pineda called the meeting to order at 7:00 pm.

2. **Pledge of Allegiance.** Alderman Jakabcsin led all in the Pledge of Allegiance.

3. **Roll Call and Establishment of a Quorum.**

Roll call found James E. Beifuss, Jr., Heather Brown, Jayme Sheahan, Melissa Birch Ferguson, Sandy Dimas, Rebecca Stout, Christine Dettmann, Christopher Swiatek, Jeanne Short, John E. Jakabcsin and Joseph C. Morano present. Aldermen Lori Chassee and Alton Hallett were absent. The Mayor announced a quorum.

Alderman Matt Garling arrived at 7:04 p.m.

Also in attendance were City Administrator Michael Guttman, City Attorney Pat Bond, Mehul Patel, Director of Public Works, Mike Noa, Facilities Maintenance and Fleet Superintendent, and Jake Whiteaker, Streets Superintendent.

4. **Public Participation.**

- Mehul Patel introduced Mike Noa, Facilities Management and Vehicle Maintenance Superintendent, and Jake Whiteaker, Streets Superintendent.
- Brianne and Jeff Uecke spoke about the TIF Façade Grant for 104 Main Street.
- Steve Delarusa from Immigrant Solidarity of Wheaton spoke about his concern that the public hearing for the proposed LRS Waste Transfer Station is scheduled during Christmas time.
- Juliette Garcia from Immigrant Solidarity of Wheaton also spoke about the public hearing timing.

5. **City Council Meeting Minutes of August 15, 2022.** Alderman Brown made a motion, seconded by Alderman Swiatek, to approve the minutes of September 6, 2022, with no changes.

Voting Aye by Roll Call Vote: Beifuss, Brown, Birch Ferguson, Dimas, Stout, Sheahan, Jakabcsin, Dettmann, Swiatek, Short and Morano. Alderman Garling abstained. Motion carried.

6. **Corporate Disbursement Report.** Alderman Dimas made a motion, seconded by Alderman Dettmann to approve the September 19, 2022, Corporate Disbursement Report in the amount of $1,055,137.30.

Voting Aye by Roll Call Vote: Beifuss, Brown, Sheahan, Birch Ferguson, Dimas, Stout, Short, Dettmann, Swiatek, Garling, Jakabcsin and Morano. Motion carried.

7. **Consent Agenda**

*** Infrastructure Committee:**

A. Resolution No. 22-R-0047 – A Resolution Authorizing the Mayor to Execute a Contract with Excel Electric, Inc. of Frankfort, Illinois, for the Water Treatment Plant SCADA and VFD Replacement Project (in an amount not to exceed $850,000.00).

B. Resolution No. 22-R-0050 – A Resolution Authorizing the Mayor to Execute a Contract Agreement with Schroeder & Schroeder, Inc. of Skokie, Illinois, for the 2022 Sidewalk and Curb Maintenance Program (in an amount not to exceed $135,000.00).

Alderman Beifuss made a motion, seconded by Alderman Garling, to approve the above items.

Voting Aye by Roll Call Vote: Beifuss, Brown, Sheahan, Birch Ferguson, Dimas, Stout, Short, Dettmann, Swiatek, Garling, Jakabcsin and Morano. Motion carried.

*** Items Not Sent to Committee:**

C. Concur – With the Mayor's Appointment of Alyssa Rodway to the Environmental Commission for a Term Ending April 2025.

D. Ordinance No. 22-O-0033– An Ordinance Approving a Special Use Permit for Contractor's Equipment Sales and Leasing with Ancillary Outside Storage – 1219 West Washington Street.

E. Ordinance No. 22-O-0034 – An Ordinance Granting an Extension for Final Planned Unit Development and Special Use Permit Approval – 511 E Roosevelt Road.

F. Resolution No. 22-O-0052 – A Resolution Approving Durbas Plat of Consolidation – 181 North Prince Crossing Road.

Alderman Stout made a motion, seconded by Alderman Dimas, to approve the above items.

Voting Aye by Roll Call Vote: Beifuss, Brown, Sheahan, Birch Ferguson, Dimas, Stout, Short, Dettmann, Swiatek, Garling, Jakabcsin and Morano. Motion carried.

8. Reports by Committees: None

9. Unfinished Business:

A. Ordinance No. 22-O-0031 – An Ordinance Amending the Code of Ordinances of the City of West Chicago to Provide for the Reassignment of the Duties of the City Clerk.

B. Ordinance No. 22-O-0032 – An Ordinance Amending the Code of Ordinances of the City of West Chicago to Reflect the Elimination of the Elected City Clerk.

Alderman Swiatek made a motion, seconded by Alderman Stout to approve the above items.

Voting Aye by Roll Call Vote: Beifuss, Brown, Sheahan, Birch Ferguson, Dimas, Stout, Short, Dettmann, Swiatek, Garling, Jakabcsin and Morano. Motion carried.

10. New Business:

Alderman Morano expressed his concerns with portions of the SAFE-T Act, and requested that staff preparing a resolution to express the City's concerns with it for City Council. There were no objections from the Aldermen.

Addressing concerns raised during the Public Participation portion of the agenda, Michael Guttman provided background on the status of the Façade Program and shared that no public hearing date for the proposed waste transfer station has been set, and it will likely occur in the first couple of weeks of January 2023, to comply with the State requirement that the hearing be completed between 90 and 120 days from the date the formal application is filed.

11. Correspondence and Announcements

Upcoming Meetings

September 20, 2022	Plan Commission/ZBA

14. Items to be Referred for final Action from Executive Session. None.

15. Adjournment. At 7:43 pm, Alderman Stout made a motion, seconded by Alderman Beifuss, to adjourn. All Aldermen voted aye by Voice Vote.

Respectfully submitted,

Michael Guttman
City Administrator

CITY OF
WEST CHICAGO

WHERE HISTORY & PROGRESS MEET

CITY COUNCIL MEETING
MONDAY, OCTOBER 3, 2022 - 7:00 P.M.
475 MAIN STREET, WEST CHICAGO, ILLINOIS

AGENDA

1. **Call to Order**

2. **Pledge of Allegiance to the Flag**

3. **Roll Call and Establishment of a Quorum**

4. **Public Participation**

   The opportunity to speak to the City Council is provided for those who have a question or comment on an agenda item or a City of West Chicago issue. The City Council appreciates hearing from our residents and your thoughts and questions are valued. The City Council strives to make the best decisions for the City and public input is very helpful.

   Respect for the duties of the City Council and for the democratic process will be adhered to – in this regard, civility and a sense of decorum will be strictly followed. All speakers must address their comments to the Mayor. Comments that are personally condescending will not be permitted. Speakers shall be courteous and should not make statements that are personally disrespectful to members of the City Council or City staff.

   Please use the podium in the center aisle. Please announce your name and address (if acceptable) before commencing – all public comments are limited to three (3) minutes and each citizen will be permitted to speak only once. It is the City Council's policy not to engage in dialogue during Public Comment. Any questions raised will be addressed by City staff or an elected official outside of the City Council meeting.

CITY OF WEST CHICAGO – 475 Main Street
CITY COUNCIL MINUTES
Special Meeting
February 27-28, 2023

The Special City Council meeting of February 27-28, 2023, was held partly remote (via Zoom) and partly in person.

1. Call to Order. Mayor Ruben Pineda (in person) called the meeting to order at 6:00 p.m. on February 27, 2023. The Mayor said that he determined that fully in person meetings are not practical and prudent at this time.

2. Pledge of Allegiance. Alderman Morano led all in the Pledge of Allegiance.

3. Roll Call and Establishment of a Quorum.

Roll call found Lori Chassee, James E. Beifuss, Jr., Jayme Sheahan, Rebecca Stout, Melissa Birch Ferguson, Jeanne Short, Sandy Dimas, Christine Dettmann, Heather Brown, Matthew Garling, Joseph C. Morano, John E. Jakabcsin, Alton Hallett, and Christopher Swiatek present. Aldermen Brown and Garling were present via Zoom. The Mayor announced a quorum.

Also in attendance were City Administrator Michael Guttman and Special Legal Counsel Dennis Walsh and Dan Bourgault from Klein, Thorpe & Jenkins, and Derke Price, from Ancel Glink.

4. Executive Session (Roll Call Vote).

a. **5 ILCS 120/2 (C) (4) –** Evidence or testimony presented in open hearing or in closed hearing where specifically authorized by law, to a quasi adjudicative body, as defined in this Act, provided that the body prepares and makes available for public inspection a written decision setting forth its determinative reasoning.

At 7:03 p.m., Alderman Swiatek made a motion, seconded by Alderman Chassee, to go into Executive Session.

Voting Aye by Roll Call Vote: Chassee, Beifuss, Stout, Birch Ferguson, Short, Dimas, Dettmann, Morano, Garling, Sheahan, Hallett, Brown, Jakabcsin and Swiatek. Motion carried.

5. Roll Call to Return to Open Session. At 8:50 p.m., Alderman Dimas made a motion, seconded by Alderman Birch Ferguson, to return to Open Session.

Voting Aye by Roll Call Vote: Chassee, Beifuss, Stout, Birch Ferguson, Short, Dimas, Dettmann, Morano, Garling, Sheahan, Hallett, Brown, Jakabcsin and Swiatek. Motion carried.

6. Continue to February 28, 2023 at 6:00 p.m. at Community High School. Alderman Chassee made a motion, seconded by Alderman Short, to continue the meeting to February 28, 2023 at Community High School.

Voting Aye by Roll Call Vote: Chassee, Beifuss, Stout, Birch Ferguson, Short, Dimas, Dettmann, Morano, Garling, Sheahan, Hallett, Brown, Jakabcsin and Swiatek. Motion carried.

February 28, 2023 Agenda Continued

The Special City Council meeting of February 28, 2023, was held partly remote (via Zoom) and partly in person.

7. Call to Order. Mayor Ruben Pineda (in person) called the meeting to order at 6:00 p.m. on February 28, 2023. The Mayor said that he determined that fully in person meetings are not practical and prudent at this time.

8. Roll Call and Establishment of a Quorum

Roll call found Lori Chassee, James E. Beifuss, Jr., Jayme Sheahan, Rebecca Stout, Melissa Birch Ferguson, Jeanne Short, Sandy Dimas, Christine Dettmann, Heather Brown, Matthew Garling, Joseph C. Morano, John E. Jakabcsin, Alton Hallett, and Christopher Swiatek present. Aldermen Chassee and Garling were present via Zoom. The Mayor announced a quorum.

Also in attendance were Director of Community Development Tom Dabareiner, City Administrator Michael Guttman and Special Legal Counsel Dennis Walsh.

9. Adoption of an Ordinance relating to the APPLICATION FOR LOCAL SITING APPROVAL FOR LAKESHORE RECYLING SYSTEMS, LLC, FOR THE WEST DUPAGE RECYCLING AND TRANSFER STATION, 1655 POWIS ROAD, WEST CHICAGO.

Alderman Dimas made a motion, seconded by Alderman Swiatek, to approve Ordinance No. 23-O-0006 approving the siting application for Lakeshore Recycling Systems.

Alderman Beifuss stated that the applicant has not met Criteria #1, 2 or 8. Alderman Garling expressed that he feels that Criteria #1 and 3 have not been met. Alderman Chassee conveyed that she believes the applicant has met all of the Siting Criteria.

Voting Aye by Roll Call Vote: Chassee, Stout, Birch Ferguson, Short, Dimas, Dettmann, Morano, Sheahan, Hallett, Brown, and Swiatek. Alderman Beifuss, Garling and Jakabcsin voted Nay. Motion carried.

10. Public Participation (three minutes per speaker)
None

11. Adjournment

At 6:05 p.m., Alderman Stout made a motion, seconded by Alderman Dimas, to adjourn the meeting. All Aldermen voted aye by Roll Call Vote.

Respectfully submitted,

Michael Guttman
City Administrator

CITY OF
WEST CHICAGO

WHERE HISTORY & PROGRESS MEET

NOTICE OF A MEETING OF THE CITY COUNCIL OF THE CITY WEST CHICAGO

Notice is hereby given to all interested parties pursuant to the Illinois Open Meetings Act, that a majority of a quorum of the City Council for the City of West Chicago may be attending the public hearings relating to the Lakeshore Recycling Systems, LLC, Application for Site Location for the West DuPage Recycling and Transfer Station located at 1655 Powis Road in West Chicago.
At the following public hearing dates, times, and locations have been set but not all dates may be necessary to conclude the public hearings and/or more dates may be added for the public hearing:

Tuesday, January 3 from 6:00 p.m. to 10:00 p.m. at Wheaton Academy
(900 Prince Crossing Road)

Wednesday, January 4 from 6:00 p.m. to 10:00 p.m. at Wheaton Academy
(900 Prince Crossing Road)

Thursday, January 5 from 6:00 p.m. to 10:00 p.m. at Wheaton Academy
(900 Prince Crossing Road)

Tuesday, January 10 from 6:00 p.m. to 10:00 p.m. at Wheaton Academy
(900 Prince Crossing Road)

Thursday, January 12 from 6:00 p.m. to 10:00 p.m. at the West Chicago Community High School (326 Joliet Street)

There will be no agenda for this meeting of the members of the City Council but public comments regarding the Application will be allowed on the last day of the public hearings.

In Re:	)
	)
APPLICATION OF	)
LAKESHORE RECYCLING SYSTEMS, LLC	)
FOR SITING APPROVAL UNDER 415 ILCS 5/39.2	)
OF A NEW POLLUTION CONTROL FACILITY	)

REPORT OF HEARING OFFICER RECOMMENDED FINDINGS OF FACT AND RECOMMENDED CONDITIONS OF APPROVAL

INTRODUCTION

Lakeshore Recycling Systems, LLC ("Applicant") has applied for local siting approval of a new municipal waste transfer station on its property at 1655 Powis Road, West Chicago, Illinois. The Applicant owns the real property (the "Property") upon which the proposed pollution control facility ("Facility") is to be located. The Property is located within the corporate limits of the City. The Application was filed on September 16, 2022. The City is to render a decision on the Application in accordance with the criteria and procedures set forth in Section 39.2 of the Illinois Environmental Protection Act (415 ILCS 5/39.2) (the "Act") and its own Code of Ordinances establishing rules and procedures for pollution control facility siting. Among the procedures set forth in the Act and the Code of Ordinances is the requirement that the City conduct a public hearing on the Application, accept public comment, and make a formal decision on the Application within 180 days of the date of filing (March 15, 2023). The City opened the public hearing on January 3, 2023.

In accordance with the procedures and other terms and provisions of the Act and the Code of Ordinances, I reviewed the Application and initial filings. The following parties appeared at the Hearing by and through counsel:

The Applicant ("LRS"), represented by George Mueller;

Protect West Chicago ("PWC") represented by Ricardo Meza and Phil Luetkehans;

"P.O.D.E.R." represented by Robert A. Weinstock;

The City of West Chicago Staff ("City"), represented by Gerald Callaghan; and

The City of West Chicago Corporate Authorities ("Council"), represented by its corporate counsel, Dennis Walsh.

During the hearing, I admitted the Application, the Host Agreement, and testimony and exhibits from witnesses called by the Applicant in support of the Application. I also admitted exhibits and testimony from witnesses called by PWC and PODER in opposition to the Application. I also ruled some proffers of proof by PWC and PODER on "environmental justice related issues" to be irrelevant; an offer of proof on those issues was entered into the record. Further, PODER presented witnesses that testified as to their observations at the existing facility; however, I ruled that they were not experts and that they lacked a proper foundation for some of their offered testimony.

As discussed below, PWC filed a Motion to Dismiss the Application for Lack of Jurisdiction due to fatal defects in the Notice required by 415 ILCS 5/39.2(b) and due to the restrictions of 415 ILCS 5/22.14 concerning the setback from property zoned primarily for residential uses. The Applicant filed Responses in opposition to the Motion.

In addition to evidence and testimony, oral public comment was received throughout the hearing proceedings and written public comment has been received by the City from September

16 through (and including) February 18, 2023. "Comment" is distinguished from "testimony" in that "comment" is not provided under oath and is not subject to cross examination and therefore entitled to less weight than testimony.

I declared the hearing closed on January 19, 2023. In accordance with the Act, written comment was then received by the City for an additional 30 days (i.e., through 11:59:59 p.m. CDST on February 18, 2023, including any written comment post-marked on or before February 18, 2023). Substantial public comment was received in support of the Application; and there was public comment filed from various residents and PODER opposing the application. Notably, public comment was also offered after the close of the hearing by the Applicant including a letter from the Canadian National Railway. As indicated above, public comment is entitled to less weight because it is not subject to being tested by the opportunity for cross examination. I have not relied upon the public comment filed by the Applicant in reaching my findings of fact or conclusions of law.

I received proposed conditions of approval from City Staff; I received argument in favor of siting approval and proposed findings of fact and law from the Applicant; I received argument in opposition to siting approval as well as proposed findings of fact and conclusions of law from PWC; and argument in opposition to approval as well as proposed findings of fact, conclusions of law, and alternatively proposed special conditions from PODER.

RECOMMENDED ACTIONS

It is my recommendation that the City Council vote separately on the three propositions:

1) Whether to grant PWC's motion to dismiss for failure to effectuate proper notice under Section 39.2(b).

2) Whether to grant PWC's motion to dismiss claiming the Facility violates the 1,000 foot setback under Section 22.14.

3) Whether the Proposed Facility (with any special conditions imposed by the City Council) satisfies the siting criteria of Section 39.2.

For the reasons set forth below, my recommendation to the City is to deny the Motion to Dismiss under Section 39.2(b).

For the reasons set forth below, my recommendation to the City is to deny the Motion to Dismiss under Section 5/22.14.

For the reasons set forth below, my recommendation to the City is to impose Special Conditions (appended to my proposed Findings of Fact and Conclusions of Law) and with those Special Conditions approve the Application as satisfying the siting criteria of Section 39.2. More specifically, I find that the application as filed, and the testimony concerning the application as filed, did not establish that the proposed Facility satisfies all of the criteria for local siting approval set forth in Section 39.2 of the Act; however, I further find that, with the imposition of special conditions (and compliance by the Applicant with those conditions), the proposed Facility does satisfy all of the criteria for local siting approval.

MOTION TO DISMISS

Motion to Dismiss Under Section 39.2(b)

Whether the applicant provided proper notice under section 39.2(b) of the Act is a threshold question in the pollution control siting. *Maggio v. Pollution Control Board*, 2014 IL App (2d) 130260, ¶ 15. Compliance with the pre-filing Notice requirements of Section 39.2 is jurisdictional and substantial compliance is not sufficient. See, *Daubs Landfill v. Pollution*

Control Board, 166 Ill.App 3rd 778 (5th Dist. 1998). However, as *Daubs* indicates, perfection in providing the Notice is not the standard.

Section 39.2(b) requires, in relevant part, that the applicant shall cause written notice of its request for site approval "to be served either in person or by registered mail, return receipt requested, on the owners of all property within the subject area not solely owned by the applicant, and on the owners of all property within 250 feet in each direction of the lot line of the subject property, said owners being such persons or entities which appear from the authentic tax records of the County in which such facility is to be located…"). PWC has challenged whether the Applicant fulfilled this requirement with respect to the railroad property putatively owned by the Elgin, Joliet and Eastern Railway.

The evidence concerning the authentic tax records of DuPage County is as follows:

The records placed in evidence by PWC indicate that the owners of the railroad properties within 250 feet of the Facility are, for one parcel, the Union Pacific Railroad Company and, variously and alternatively for the second parcel, the "Elgin, Joliet & Eastern Railway," and/or the "Wisconsin Central, Ltd. (EJ&E Line) Company."

The DuPage County, Illinois 2022 Real Estate Tax Assessment Parcels Map placed in evidence by the Applicant indicates that the second parcel is owned by the "Canadian National Railway."

It is not disputed that the Applicant caused written notice of its request for site approval to be served by registered mail return receipt requested upon the Union Pacific Railroad Company. It is also not disputed that the Applicant did not cause notice of its request for site approval to be served on the Elgin, Joliet & Eastern Railway or on the Wisconsin Central, Ltd.

The publicly available information – of which I take judicial notice – is that the Elgin, Joliet & Eastern Railway was merged into the Wisconsin Central, Ltd. in December of 2012 and, further, that the Wisconsin Central, Ltd. is wholly owned by the Canadian National Railway.

It is not disputed that the Applicant did not serve the Canadian National Railway by personal service nor by registered mail return receipt requested. Instead, the Applicant caused written notice of the Applicant's request for site approval to be delivered via paid courier to the Canadian National Railway at the corporate offices of the Canadian National Railway in Montreal, Quebec, Canada, and that the Applicant's courier secured the signature of a representative of the Canadian National Railway documenting that delivery.

After reviewing the briefing concerning "service" under Illinois law filed by both PWC and the Applicant, I find that the Applicant's use of a paid courier to deliver written notice of the Applicant's request, where the paid courier documented the delivery, was sufficient to satisfy the requirements of Section 39.2(b) of the Act and that strict compliance with the requirements of formal service is not required as a matter of law where, as here, actual notice has been documented. See, e.g., *Waste Management of Illinois v. Illinois Pollution Control Board,* 365 Ill.App.3d 229 (3d Dist. 2005) (difference in delivery method not of "pivotal importance" when delivery method documents that the addressee received the letter); see also, *Olin Corp. v. Bowling,* 95 Ill.App.3d 1113, 1116-17 (5th Dist. 1981)).

Motion to Dismiss Under Section 5/22.14

Section 415 ILCS 5/22.14 states, in relevant part, that "no person may establish any pollution control facility for use as a garbage transfer station, which is located less than 1000 feet from the nearest property zoned for primarily residential uses or within 1000 feet of any

dwelling...." It is undisputed that no dwelling is within 1000 feet of the proposed Facility. However, the railroad properties are zoned ER-1 in the City and are located within 1000 feet of the proposed Facility. It is not disputed that property zoned "ER-1" in the City of West Chicago is property zoned primarily for residential uses. PWC's Motion to Dismiss asserts that Section 5/22.14 bars the Applicant from proceeding with this proposed Facility.

The Applicant argues that the size and the active use of the railroad properties make residential development of the parcels in compliance with ER-1 requirements improbable (and therefore the set-back requirement a nullity with respect to the railroad properties). The Applicant has submitted the testimony of John Hock and the August 23, 2022 letter of Tom Dabareiner, City Community Development Director and Zoning Administrator for the City of West Chicago, to support a finding that, due to the requirements of the ER-1 zoning (minimum lot area, minimum lot width, minimum setbacks, physical features of the property, the lack of access) it is not reasonably possible to develop the railroad properties for residential uses.

Conversely, PWC called Joe Abel, a planning expert, who testified that the Application does not meet the setback requirements of Section 5/22.14. He further testified that if the railroad properties at issue were abandoned by the railroads, and if the railroad properties were then assembled with other adjacent properties, and if those assembled properties were then rezoned to a residential zoning district, then the railroad properties could be put to residential uses.

No evidence was introduced that the conditions recited by Joe Abel as preconditions to residential use of the railroad properties are probable--or even potentially contemplated--for the foreseeable future.

The statutory language of Section 22.14 protects any existing dwelling within 1,000 feet of the facility (regardless of underlying zoning for that dwelling) and properties for which there is a reasonable expectation of future residential use and dwellings based initially upon the zoning designation. The PCB has taken a pragmatic approach to enforcement of Section 22.14. Where actual residential use of property (even though it is zoned for residential uses and even though homes exist on the properties) is not reasonably probable, Section 22.14 will not bar the facility. Although not a binding opinion, the Appellate Court agreed with the PCB's interpretation of Section 22.14 in *Roxana Landfill, Inc. v. Illinois Pollution Control Board,* 2016 WL 4005892, (Ill. App. 5 Dist. 2016).

Here, the proposed facility is not within 1,000 feet of any existing dwelling nor within 1,000 feet of any property zoned for residential use where such actual residential use is reasonably probable in the foreseeable future. Based upon the PCB's decision (ultimately affirmed in *Roxana*), Section 22.14 does not prohibit the siting of the facility in this case nor make the proposed facility incompatible with the character of the area.

JURISDICTION

The record, the statutes, and the case law discussed above establish that the Applicant owns the real property upon which the proposed pollution control facility will be located and that the property and the Facility are wholly located within the City of West Chicago. I have discussed the requirements of 415 ILCS 5/39.2(b) above and, over the objections and motions of PWC and PODER, found that the Applicant fulfilled these requirements. I have also discussed the application of Section 5/22.14 and found that in this case, Section 5/22.14 does not bar the proposed Facility.

I further find that the Applicant complied with all notice requirements of Section 39.2(c) concerning the notice requirements prior to the hearing on the Application. No objections were filed concerning compliance with Section 39.2(c).

Likewise, no objections were filed concerning compliance with the City Code of Ordinances. I find that the Applicant complied with all requirements of the City of West Chicago.

Accordingly, I find that the City has jurisdiction to consider the statutory criteria of Section 39.2.

SECTION 39.2 CRITERIA

These proceedings are governed by Section 39.2 of the Environmental Protection Act ("the Act"), 415 ILCS 5/39.2, which sets forth the exclusive siting procedures for pollution control facilities in Illinois. Section 40.1 of the Act and case law require that siting proceedings and the decision making be conducted in accordance with the requirements of fundamental fairness. The application (or request) must contain sufficient details of the proposed facility demonstrating that it satisfies each of the nine criteria by a preponderance of the evidence. *Land & Lakes Co. v. Illinois Pollution Control Board,* 319 111.App.3d 41, 743 N.E.2d 188, 191 (3d Dist. 2000.) If the applicant fails to establish any one of the criteria, the application should be denied. *Waste Management v. Pollution Control Board,* 175 Ill.App.3d 1023, 520 N.E.2d 682, 689 (2d Dist. 1988).

The Act requires that the Applicant for local siting approval prove compliance with each of nine different criteria (or alternatively demonstrate that they do not apply) and local siting approval shall be granted if the proposed facility meets each of those criteria. As a matter of

law, once an applicant makes a *prima facia* case on a criterion, the burden of proof shifts to the opponents to rebut the applicant's case. *People v. Nuccio*, 43 Ill.2d 375, 253 N.E. 2nd 353 (1969). In order to rule against an applicant on any criterion, the decision maker (the City Council in this case) must find competent rebuttal or impeachment evidence in the record. *Industrial Fuels and Resources v. Illinois Pollution Control Board*, 227 Ill.App.3d 553, 592 N.E. 2d 148 (1st Dist. 1992).

The Applicant called expert witnesses to offer evidence as to the statutory siting criteria. Counsel for PWC and PODER, as well as counsel for the City Staff, cross-examined the witnesses. PWC and PODER also called witnesses in rebuttal. The basis and rationale for my findings on each criterion is set forth below.

1. The Facility is necessary to accommodate the waste needs of the area it is intended to serve.

This Criterion is contested by PWC and PODER. I find that Criterion 1 is satisfied.

Criterion 1 has been the subject of litigation and the Courts have provided guidance as to its requirements. For example, to prove criterion 1, the courts have previously held the Applicant must show that the proposed Facility is reasonably required by the waste needs of the service area, taking into consideration the waste production of the area and the waste disposal capacity available to it. *Waste Management of Illinois, Inc. v. Pollution Control Board,* 175 Ill.App.3d 1023, 1031, 530 N.E.2d 682, 689 (2d Dist. 1988). Although a petitioner need not show absolute necessity, it must demonstrate that the new facility would be expedient as well as reasonably convenient. *Waste Management of Illinois, Inc. v. Pollution Control Board,* 234 Ill.App.3d 65, 69, 600 N.E.2d 55, 57 (1st Dist. 1992). The petition must show that the landfill is reasonably required by the waste needs of the area it is intended to serve, including the area's waste production and disposal capabilities. *Id.*

PWC and PODER both focused on the available transfer station disposal capacity for the area to be served (including facilities outside of, but still serving, the area intended to be served) and they argue that the existing excess capacity—which is not contested by the Applicant—means that the proposed Facility is not necessary and therefore does not satisfy Criterion 1.

However, in *Will County v. Village of Rockdale*, 2018 IL. App (3d) 160463, 121 N.E.2d 468, 484 (3d Dist. 2018), our Appellate Court held that Criterion 1 is not determined exclusively be reference to capacity analysis. Indeed, in *Rockdale,* the applicant submitted no capacity analysis at all. Instead, the Appellate Court agreed with Village and the Applicant that the "waste needs of the area" could include other factors such as improving competition, benefits through the host agreements, operational concerns and hours, and positive environmental impacts.

In this case, the Applicant called John Hock from Civil and Environmental Consultants, Inc. to testify on this criterion. Mr. Hock acknowledged the existing available capacity at other transfer stations but testified that the need for this Facility is found in the need to increase competition in the hauling market (through further vertical integration of disposal from curb-to transfer station-to landfill, this facility will increase competition for the hauling of waste in the area); in reduced environmental impacts (less diesel exhaust as a result of shorter travel distances); in increased recycling; in the meeting the need for the handling of hydro-wastes; and in operational benefits (hours of operation). Cross-examination focused on the available capacity and questioned the competitive impacts but did not overcome the substantive proof on the benefits to which Mr. Hock testified.

PODER focused on the premise that there are positive environmental impacts, arguing just the opposite that the added operations at this Property will necessarily increase diesel

emissions in the community. But PODER has offered no competent evidence to contradict the demonstrated savings in overall emissions as testified to by the Applicant concerning hauling and disposal activities presently (i.e., before siting) and the amount of reduced emissions from the availability of this transfer station. Moreover, a premise of PODER's analysis is that there would be no other new industrial uses of the Applicant's property of any kind that would involve diesel engines. No evidence was offered to support the validity of such a premise.

PWC called John Lardner. Mr. Lardner focused on the available capacity at transfer stations in and around the area. But Mr. Lardner also admitted that Criterion 1 now considers environmental factors, impacts on competition, and operational concerns--and Mr. Lardner further admitted that he has so opined in other siting proceedings—although he did not consider competitive or environmental matters in reaching his conclusions in this case. Mr. Lardner further admitted that there is a need for a transfer station to handle hydro-excavation waste.

2. The Facility is so designed, located, and proposed to be Operated that the Public Health, Safety and Welfare will be Protected.

This Criterion is contested by PWC and PODER. I find that Criterion 2 is satisfied through the imposition of--and compliance by the Applicant with--special conditions.

Like Criterion 1, Criterion 2 has been the subject of litigation and guidance is available from the Courts. To prove criterion 2, the Applicant must demonstrate that the proposed Facility is designed, located and proposed to be operated to protect the public health, safety and welfare. 415 ILCS 5/39.2 (a) (ii). This includes a demonstration that the facility is not flawed from a public safety standpoint and that its proposed operations are neither substandard nor unacceptably risky. Industrial Fuels and Resources, Inc. v. Illinois Pollution Control Board, 227 Ill.App.3rd 533, 592 N.E.2d. 148, 157 (1st Dist. 1992).

Mr. Hock testified that the Application met the location standards (wetlands, archeological sites, threatened species, wild and scenic rivers and the airport). PWC questioned Mr. Hock extensively on airport safety related issues and particularly operations in the Runway Protection Zone. The record also contains a letter from the DuPage Airport Authority in which LRS agreed to comply with several conditions and actions required of LRS by the Airport Authority to safeguard airport operations. Imposition and compliance with these conditions are essential to a finding that Criterion 2 can be satisfied. With the imposition of the conditions set forth in that letter, the Airport Authority concluded that proposed Facility did not pose a threat to the safety of the Airport. No expert testimony was introduced that challenged that determination by the Airport Authority.

Mr. Hock also described the proposed site plan and the proposed operations. The Facility as proposed will handle a maximum of 1950 tons of material per day composed of 650 tons of municipal solid waste, 300 tons per day of hydro-excavation waste, 750 tons per day of construction or demolition debris (for which the site is already permitted), and 250 tons per day of single-stream recyclables.

Mr. Hock testified as to the fact that the transfer building will be a "fully enclosed" facility (which is an important requirement to protect the airport) and testified as to the truck movements on site, the number and function of "spotters," the operation of the entrance doors, the movements and operations of the transfer trailers, and the movements and operations of the front-loaders on the tipping floor. Mr. Hock testified as to the anticipated sources of business and the equipment that is anticipated to be used by LRS to bring that equipment to the Facility. Mr. Hock described the stormwater management plan for the proposed facility and testified that

the stormwater management has been approved by DuPage County and the City. There was no substantive challenge to the stormwater management plan in place.

PWC challenged whether the Facility, as proposed, was "fully enclosed" and entered videos of a different LRS facility in the record to challenge the Applicant on whether the facility would, in practice, actually operate as described. Mr. Hock responded that timing and operational differences shown in the video is a consequence of the different sources of material (and equipment bringing that material) from that which is anticipated at the Facility.

PWC also raised issues concerning litter control and tarping of the trailers, as well as the speed and the efficiency of the movements of the front loaders as used in Mr. Hock's modeling and calculations. Based on an early pre-filing review of the design performed by the City's engineering consultant, PWC (and subsequently the City Staff) also raised questions about the design of the building, push walls and other structural elements. Under PWC's cross examination, and then again under cross examination by City Staff, Mr. Hock admitted that the imposition of certain special conditions would improve the Facility and add protections for public health, welfare and safety.

PODER called Steve DeLaRosa who raised concerns about employee safety and, particularly, the proposed use of ozone by the Applicant. There was no evidence, however, that what the Applicant was proposing did not comply with the applicable OSHA regulations.

PODER also inquired into the potential use of exclusively electric powered vehicles. The evidence, however, is that currently the technology does not exist to require the Applicant to use an exclusively electric-powered fleet of vehicles or equipment.

The application, modeling evidence, and testimony – with the special conditions in place -- demonstrated that the Facility could safely handle the proposed maximum tonnages per day. The special conditions are appended to the Proposed Findings of Fact and Conclusions of Law.

3. The Facility is located so as to minimize incompatibility With the Character of the Surrounding Area and to Minimize the Effect On the Value of Surrounding Property.

This Criterion is contested by PWC and PODER. I find that Criterion 3 is satisfied.

The Application sets out the land uses in the vicinity and manner in which the proposed Facility relates to the character of the area. Applicant called Dale Kleszynski, a licensed Illinois real estate appraiser and member of the Appraisal Institute. He testified to the historical use of the subject property and surrounding area--which includes current and historical uses related to the management and disposal of waste—and characterized the area as "industrial in character." The area is also segregated from other uses, especially residential uses.

In addition to concluding that the location minimizes incompatibility with uses in the surrounding area, Mr. Kleszynski also concluded that the Facility is located to minimize the effect on the value of surrounding property. Mr. Kleszynski submitted a highest and best use analysis of the subject property for purposes of analyzing impact on the values of surrounding property. He opined that this highest and best use analysis is related to the statutory siting criterion in that highest and best use of property is the use which would, by definition, minimize any deleterious effect on the values of the surrounding property. After reviewing the traditional criteria used to analyze highest and best use, he testified that development as a solid waste transfer station would fit within the highest and best use of the property.

In rebuttal, PWC called Kurt Kielisch who rendered the opinion that the highest and best use analysis employed by Mr. Kleszynski did not accurately determine the effect the Facility

would have on surrounding property values. Mr. Kielisch is not a licensed Illinois appraiser, has never previously testified in a Section 39.2 siting hearing, and further testified that he is not knowledgeable about the siting process. He testified that a matched pairs analysis (rather than a highest and best use analysis) should be used to determine "the least intrusive use of the property" and whether the proposed use would have "positive impact on the surrounding property values." He further admitted that such an analysis of sales would not be possible here due to the 20-year existence of the nearby Groot transfer station.

Because of his lack of familiarity with the actual siting criterion, the testimony of Mr. Kielisch was of no probative value. Criterion 3 requires an analysis as to whether the location minimizes incompatibility with the character of the surrounding area and minimizes the (obviously assumed negative) impact on property values--not (as he opined) whether the proposed use has a positive impact. The analysis relevant to Criterion 3 is simply not that to which Mr. Kielisch testified (he also offered no opinion on the character of the uses in the area). Contrary to Mr. Kielisch's opinion, the use of the highest-and-best use methodology as an analytical tool for determining the magnitude of potential impact of the proposed facility on surrounding property values has been recognized by the PCB as an appropriate methodology for expert opinions concerning Criterion 3.

4. The Facility is located outside the Boundary of the100 Year Floodplain.

I find that the Applicant demonstrated that the Facility meets Criterion 4.

The testimony and other evidence entered in the Record at the Hearing supports the finding that the Facility meets this Criterion. No challenge to this Criterion has been filed.

5. The Plan of Operations for the Facility is designed to Minimize the Danger to the surrounding Area from Fire, Spills and Other Operational Accidents.

I find that the Applicant demonstrated that the Facility meets Criterion 5 but I also find that the testimony of Mr. Hock, under cross examination, and the testimony of Colin Hale concerning existing litter problems with the current operations at the Property all support the imposition of and compliance with special conditions to further improve the Plan of Operations and minimize dangers to the surrounding area. In particular, I find that the testimony concerning where, when and how transfer trailers will be tarped and the handling of hydro-wastes will be improved to further minimize the danger to the surrounding area from litter or spills by the imposition of special conditions. No formal challenge to this Criterion has been filed.

6. The Traffic Patterns to and from the Facility Are So Designed as to Minimize the impact on Existing Traffic Flow.

I find that the Applicant demonstrated that the proposed Facility meets Criterion 6.

The Applicant called Michael Werthmann, a registered professional engineer and certified professional traffic operations engineer, with more than 25 years of traffic engineering experience for both the private and public sectors. Mr. Werthmann testified that he used standard methodology used by transportation planning officials. Mr. Werthmann testified he studied traffic volumes, distributions and movements at the site entrance and the potentially affected intersections. He described the local roadway system and detailed present and future improvements on that system. He testified that the location, existing operations, and proposed route for the transfer trailers all minimized the impact on existing traffic flows. No challenge to this Criterion has been filed; however, both the City and PODER proposed a special condition concerning the traffic routes and

such is included in the Special Conditions appended to the Findings of Fact and Conclusions of Law.

7. Hazardous Waste Emergency Plan

Per the Application and the Testimony of John Hock, the Facility will not be treating, storing or disposing of Hazardous Waste. This Criterion is therefore not applicable and therefore deemed satisfied. No challenge to this Criterion has been filed.

8. If the Facility is to be Located in a County Where The County Board has adopted a Solid Waste Management Plan Consistent With The Planning Requirements of the Local Solid Waste Disposal Act or the Solid Waste Planning and Recycling Act, The Facility is Consistent with that Plan.

This Criterion is contested by PWC and PODER. I find that Criterion 8 is satisfied.

John Hock reviewed the contents of the DuPage County Solid Waste Management Plan from its adoption to its most recent update. He reviewed the provisions concerning pollution control facilities in that plan including the recognized need for additional transfer stations, additional recycling and additional competition. On cross-examination by PWC, Mr. Hock agreed that the 2007 Plan Update recommended that an additional transfer station should be located in the "southern portion" of the County and that West Chicago is not in the southern portion of the County. However, he further testified that such a recommendation concerning the location of additional transfer stations did not appear in subsequent plan updates.

Mr. Hock also testified as to the secondary host agreement executed between LRS and DuPage County in which the County stated the proposed Facility appears to be consistent with the County's plan. PWC's witness, John Lardner, testified that "appears to be consistent" is not the same as "is consistent" and opined that the Facility is in fact not consistent with the County's

Plan. Lardner did acknowledge that the County's Plan does call for more transfer stations, more recycling, and more competition.

I find the PCB decision in *Rockdale* is again instructive. As in this case, both the PCB (and the court) in *Rockdale* found that the very existence of a secondary host agreement approved by the County weighs heavily in favor of a finding that Facility is consistent with the County's plan (as it is the County's plan to interpret and administer). Because the County approved the secondary host agreement for this Facility, I find the proposal to be consistent with the County's plan.

9. Recharge Area

Per the Application and the testimony of John Hock, the Facility is not located in a regulated recharge area. This Criterion is therefore not applicable and therefore deemed satisfied. No challenge to this Criterion has been filed.

10. Consideration of Previous Operating Experience

The Act permits the Corporate Authorities to consider the previous operating experience of an applicant. Specifically, the Act permits the City to consider the "past record of convictions or admissions of violations of the Applicant...". Here, the record contains no past convictions of violations by LRS nor admissions of violations by LRS, which favors approval of the Application.

PWC did enter videos showing actual operations at different LRS facility and PODER called witnesses about the current operations at the Property raising litter and air quality concerns and that testimony serves as the basis for the imposition of some special conditions, but that testimony did include any evidence of any actual violations of the regulatory standards and

therefore is not a sufficient basis to find the proposed Facility does not satisfy the criteria of Section 39.2.

PUBLIC COMMENTS

In addition to the public comment (oral and written) received during the Hearing, the City Clerk received written public comments after the hearing closed. The public comment supporting the Application focused on the benefits that the Facility would bring to the City. PODER, the Applicant, and persons associated with both also filed comment after the hearing closed. I found that the public comment, while important to understand the context of the application, was not focused on the statutory criteria in a relevant and "probative" way or, alternatively, lacked sufficient evidence about the sources cited (i.e., an evidentiary foundation) as required by the statute and case law and therefore the comment, neither singly nor collectively, caused any change in how I weighed the evidence received from the Application, the admitted exhibits, and the admitted testimony.

PROPOSED FINDINGS OF FACT

My proposed findings of fact are attached.

Respectfully submitted,

Derke J. Price

Ancel Glink, PC
140 South Dearborn, 6th Floor
Chicago, Illinois 60603

4828-0676-7394, v. 1

PROPOSED FINDINGS OF FACT AND CONCLUSIONS OF LAW

1. On September 16, 2022, Lakeshore Recycling Systems, LLC ("Applicant") applied to the City of West Chicago ("City") for local siting approval of a new municipal waste transfer station on its 27.66 acre parcel of real estate at 1655 Powis Road, West Chicago, Illinois, 60185 (as legally described in the application and hereafter referred to as the "Property").

2. The Applicant owns the Property upon which the proposed pollution control facility ("Facility") is to be located.

3. The Property is located within the corporate limits of the City, is the subject of a Host Community Benefit Agreement between the Applicant and the City, and the City has jurisdiction to consider the Application.

4. The public hearing on the application was opened on January 3, 2023.

5. The hearing closed on January 19, 2023.

6. In accordance with the Act, written comment was then received by the Office of the City Manager acting as City Clerk for and additional 30 days after the close of the Hearing (i.e., through 11:59:59 p.m. CDST on February 20, 2023, including any written comment post-marked on or before February 18, 2023).

7. Concerning the pre-filing notice requirements of Section 39.2(b) (which states, in relevant part, that the applicant shall cause written notice of its request for site approval "to be served either in person or by registered mail, return receipt requested, on the owners of all property within the subject area not solely owned by the applicant, and on the owners of all property within 250 feet in each direction of the lot line of the subject property, said owners being such persons or entities which appear from the authentic tax records of the County in which such facility is to be located…"):

A) with respect to all properties within 250 feet of the proposed facility, other than railroad properties, the applicant caused written notice of its request for site approval to be served by registered mail return receipt requested upon all such owners;

B) with respect to the railroad properties within 250 feet of the proposed facility, the owners as appears from authentic—and in some cases conflicting--tax records of DuPage County, are the Union Pacific Railroad Company and, variously and alternatively, the Elgin, Joliet & Eastern Railway, the Wisconsin Central, Ltd. (EJ&E Line) Company, and, per the DuPage County, Illinois 2022 Real Estate Tax Assessment Parcels Map, the Canadian National Railway;

C) the Applicant caused written notice of its request for site approval to be served by registered mail return receipt requested upon the Union Pacific Railroad Company;

D) the Applicant did not cause notice of its request for site approval to be served on the Elgin, Joliet & Eastern Railway;

E) the Elgin, Joliet & Eastern Railway was merged into the Wisconsin Central, Ltd. in December of 2012;

F) the Applicant did not cause notice of its request for site approval to be served on the Wisconsin Central, Ltd.;

G) the Wisconsin Central, Ltd. is a wholly owned subsidiary of the Canadian National Railway;

H) the Applicant caused written notice of the Applicant's request for site approval to be delivered via paid courier to the Canadian National Railway at the corporate offices of the Canadian National Railway in Montreal, Quebec, Canada;

I) the Applicant's courier secured the signature of a representative of the Canadian National Railway for that delivery;

J) the Applicant's use of the paid courier to deliver written notice of the Applicant's request, together with the documentation from the courier of that delivery, is sufficient to effectuate delivery of the request for site approval to the ultimate corporate parent/owner of the railroad property (not owned by the Union Pacific Railroad) and thereby satisfy the requirements of Section 39.2(b) of the Act.

8. Concerning 415 ILCS 5/22.14 (which states, in relevant part, that "no person may establish any pollution control facility for use as a garbage transfer station, which is located less than 1000 feet from the nearest property zoned for primarily residential uses or within 1000 feet of any dwelling"):

A) no dwelling is within 1000 feet of the proposed facility;

B) the railroad properties are zoned ER-1 in the City and are located within 1000 feet of the proposed facility;

C) property zoned "ER-1" in the City of West Chicago is property zoned primarily for residential uses;

D) the size and the active use of the railroad properties make residential development of the parcels in compliance with ER-1 requirements improbable as a practical and pragmatic matter (see August 23, 2022 letter of Tom Dabareiner, City Community Development Director and Zoning Administrator);

E) in applying Section 22.14 restrictions, the Pollution Control Board (and at least one Appellate Court) has interpreted and enforced Section 22.14 so as to protect actual residences or properties where residential development is probable (at least as an initial matter of zoning) (see, *Roxana Landfill, Inc. v. Illinois Pollution Control Board,* 2016 WL 4005892, (Ill. App. 5 Dist. 2016) (a Rule 23 opinion affirming the PCB which allowed siting even though actual housing structures and residentially zoned properties were within 1,000 feet of the facility because the residential properties were now vacant and deed restrictions against residential use had been recorded against the properties, making actual residential use improbable, though not impossible);

F) Accordingly, Section 22.14 does not bar this proposed facility.

9. The Applicant complied with all pre-filing notice requirements of Section 39.2(c) of the Act.

10. The siting proceedings herein, both procedurally and substantively, complied with the requirements of fundamental fairness:

A) PWC and PODER interposed an objection to the failure to make the Pre-Filing Notice available on the City's website in Spanish; however, the Act itself does not require that

the Pre-Filing Notice in these proceedings be made available in a language other than English and no case has applied language access requirements to a Section 39.2 Siting Hearing nor the Section 39.2 filings.

B) PWC and PODER interposed objections to the lack of a Spanish-language translator for the hearing proceedings; however, neither the Act itself does nor any other statute or case requires that Language Access Services be made available for a Section 39.2 Siting Hearing (compare 725 ILCS 140/1 requiring such services in the criminal law context).

C) PWC and PODER filed objections to the exclusion of proffered evidence concerning "environmental justice related issues;" however, the State of Illinois has not amended the Environmental Protection Act to add "environmental justice related issues" to the Section 39.2 criteria and neither the Pollution Control Board nor any Court has held that "environmental justice related issues" is now a part of any criterion under Section 39.2.

D) In the absence of a defined statutory criteria concerning "environmental justice related issues," testimony proffered about such issues is not relevant to the siting decision.

11. Based on the understanding of Criterion 1 as articulated by the Pollution Control Board and affirmed by the Illinois Appellate Court for the Third District in *Will County v. Village of Rockdale,* 121 N.E.3d 468 (3d Dist. 2018), the Applicant demonstrated that the proposed Facility meets Criterion 1: "the facility is necessary to accommodate the waste needs of the area it is intended to serve...."

12. The Applicant did not demonstrate that the Facility--as proposed in the Application--meets Criterion 2; however, with the imposition of the special conditions proposed by City Staff (and compliance therewith by the Applicant) which are attached hereto as Exhibit A, the proposed Facility does meet Criterion 2: "the facility is so designed, located and proposed to be operated that the public health, safety and welfare will be protected;"

13. The Applicant demonstrated that the proposed Facility meets Criterion 3: "the facility is so located so as to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property;"

14. The Applicant demonstrated that the proposed Facility meets Criterion 4; "for a facility other than a sanitary landfill or waste disposal site, the facility is located outside the boundary of the 100 year floodplain or the site is flood-proofed;"

15. The Applicant did not demonstrate—as proposed in the Application--that the Facility meets Criterion 5; however, with the imposition of the special conditions proposed by City Staff (and compliance therewith by the Applicant) which are attached hereto as Exhibit A, the proposed Facility does meet Criterion 5: "the plan of operations for the is designed to minimize the danger to the surrounding area from fire, spills, or other operational accidents;"

16. The Applicant demonstrated that the proposed Facility meets Criterion 6: "the traffic patterns to or from the facility are so designed as to minimize the impact on existing traffic flows;

17. The Applicant demonstrated that the facility will not be accepting hazardous waste and therefore demonstrated that Criterion 7 is not applicable.

18. Based on the analysis of Criterion 8 as articulated by the Pollution Control Board and affirmed by the Illinois Appellate Court for the Third District in *Will County v. Village of Rockdale,* 121 N.E.3d 468 (3d Dist. 2018), the Applicant demonstrated that the proposed Facility meets Criterion 8: "…where the county board has adopted a solid waste management plan consistent with the planning requirements of the Local Solid Waste Disposal Act or the Solid Waste Planning and Recycling Act, the facility is consistent with that plan; …"

19. The Applicant demonstrated that the facility is not located within a regulated recharge area and therefore Criterion 9 is not applicable.

20. The Applicant's operating history demonstrates that the Applicant is qualified to operate the Facility safely and properly and provides no basis to deny the Application.

21. The proposed Facility, when developed and operated in compliance with the special conditions, is consistent with all appropriate and relevant location standards, including airport setback requirements, wetlands standards, seismic impact zone standards, and residential setback requirements.

22. The Applicant has agreed to comply and approval is conditioned upon compliance with all terms of the Host Community Benefit Agreement between the City of West Chicago and Lakeshore Recycling Systems, LLC, dated April 1, 2019; the Secondary Host Community Benefit Agreement between DuPage County and Lakeshore Recycling Systems, LLC, dated March 10, 2020; and the Airport Agreement.

With the imposition of and compliance by the Applicant with the Special Conditions set forth above, the evidence demonstrates that the Application complies with each of the nine siting criteria in Sec. 39.2(a) of the Act and therefore the City should grant siting approval.

Respectfully submitted,

Derke J. Price

4847-5279-7990, v. 1

EXHIBIT A

Special Conditions

1. The maximum tonnage per day that may be received by the facility shall not exceed 1,950 tons per day, of which up to 650 tons per day may be municipal solid waste (MSW), up to 300 tons per day may be hydro excavation waste, up to 750 tons per day may be construction and demolition debris (C&D) and up to 250 tons per day may be single stream recyclables (SSR).

2. The Applicant shall keep the truck doors to the transfer facility closed, except for emergencies and to allow trucks to enter and exit the facility, during regular business hours. The doors shall be equipped with sensors such that they will open and close automatically as vehicles enter and exit the transfer building. Alternatively, an employee may open and close the doors when trucks access and exit the transfer facility.

3. The push walls in the transfer facility shall be designed to ensure to the satisfaction of the City that there will be no buildup of waste behind the walls which could result in fire, odor, or harborage for vectors. In addition, the Applicant shall provide a certification from a licensed structural engineer that the push walls will be capable of withstanding impact from waste loading equipment at 5 mph without shearing the beams or compromising the integrity of the building's walls.

4. All transfer vehicles utilizing the facility shall be equipped with auto tarping systems, and all loaded transfer trailers shall be tarped inside of the transfer building prior to exit.

5. The Applicant shall continue to operate the C&D recycling portions of the facility in accordance with the requirements of 415 ILCS 5/22.38 for so long as the current permit (2015-124-OP) remains in effect. If the current permit (2015-124-OP) is discontinued, replaced or terminated, the following conditions, as modified, shall remain in effect:

- *The facility shall be designed and constructed with roads and traffic flow patterns adequate for the volume, type and weight of traffic using the facility including, but not limited to hauling vehicles, emergency vehicles, and on-site equipment. Sufficient area shall be maintained to minimize traffic congestion, provide for safe operation, and allow for queuing of waste hauling vehicles.*
- *The operator shall provide adequate parking for all vehicles and equipment used at the facility and as necessary for queued hauling vehicles.*
- *Roadways and parking areas on the facility premises shall be designed and constructed for use in all weather, considering the volume, type and weight of traffic and equipment at the facility.*
- *The facility shall be designed and constructed so that site surface drainage will be diverted around or away from the recycling and waste transfer areas. Surface drainage shall be designed and controlled so that adjacent property owners encounter no adverse effects during development, operation and after closure of the facility.*
- *Run-off from roadways and parking areas shall be controlled using storm sewers or shall be compatible with natural drainage for the site. Best management practices (e.g., design features, operating procedures, maintenance procedures, prohibition of certain practices and treatment)*

shall be used to ensure that run-off from these areas does not carry wastes, debris or constituents thereof, fuel, oil or other residues to soil, surface water or groundwater.

- *The facility, including, but not limited to, all structures, roads, parking and recycling areas, shall be designed and constructed to prevent malodors, noise, vibrations, dust and exhaust from creating a nuisance or health hazard during development, operation and closure of the facility. Facility features (e.g., berms, buffer areas, paving, grade reduction), best available technology (e.g., mufflers, machinery enclosures, sound absorbent materials, odor neutralizing systems, air filtering systems, misting systems), and building features (e.g., enclosed structures, building orientation) shall be among the measures to be considered to achieve compliance.*
- *The facility shall be designed and constructed to prevent litter and other debris from leaving the facility property. Facility features (e.g., windbreaks, fencing, netting, etc.) shall be among the measures considered to ensure that the debris does not become wind strewn and that no other provisions of the Act are violated.*
- *No regulated air emissions shall occur from these facilities, except as authorized by a permit from the Illinois Environmental Protection Agency (IEPA)Bureau of Air (BOA). No process discharge to Waters of the State or to a sanitary sewer shall occur from these facilities, except as authorized by a permit from the IEPA Bureau of Water (BOW).*
- *The facility shall be designed and constructed with a water supply of adequate volume, pressure, and in locations sufficient for cleaning, firefighting, personal sanitary facilities, and as otherwise necessary to satisfy operating requirements (e.g., dust suppression, wheel washing) and the contingency plan.*
- *The facility shall be designed and constructed with exterior and interior lighting for roadways, and waste handling areas adequate to perform safely and effectively all necessary activities.*
- *The facility shall be designed and constructed with truck wheel curbs, guard rails, bumpers, posts or equivalents to prevent backing into fuel storage tanks, equipment, and other structures.*
- *The facility shall be designed and constructed with adequate shelter, sanitary facilities, and emergency communications for employees.*
- *The facility operator shall install fences and gates, as necessary, to limit entry. Except during operating hours, the gates shall be securely locked to prevent unauthorized entry.*
- *The facility may receive general construction and demolition debris at the site Monday through Saturday, 24 hours a day. The facility shall be closed on Sunday and the six major federal holidays (New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day). When the facility is operated before sunrise or after sunset, adequate lighting shall be provided. If it is required for the facility to be open beyond normal operating hours to respond to emergency situations, a written record of the date, time and reason the facility was open shall be maintained in facility operating records. The IEPA's Regional Office and the county authority responsible for inspection of the facility, per a delegation agreement with the IEPA, must be notified and must grant approval each day that the operating hours need to be extended. No later than 10:00 a.m. of the first operating day after the operating hours have been extended, the Applicant shall send a written report by email to the City Administrator, which describes the length of the extension of the operating hours and the reason for the extension.*
- *The facility may receive and transfer MSW, hydro excavation waste and SSR from 4:00 a.m. to 12:00 a.m. Monday through Friday and from 4:00 a.m. to 12:00 p.m. on Saturday, with no*

operation on Sunday or the six major federal holidays (New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day), provided that on the Saturday following a major federal holiday, regular business hours may be extended to 12:00 a.m. If it is required for the facility to be open beyond normal operating hours to respond to emergency situations, a written record of the date, time and reason the facility was open shall be maintained in facility operating records. The City of West Chicago must be notified by email to the City Administrator each day that the operating hours need to be extended. The IEPA's Regional Office and the county authority responsible for inspection of the facility, per a delegation agreement with the IEPA, must be notified and must grant approval each day that the operating hours need to be extended.

- *Fire safety equipment (fire extinguishers) shall be maintained in accordance with recommended practice.*
- *Non-recyclable waste may be kept temporarily in covered containers or transfer trailers for no more than 24 hours (except on weekends and holidays), provided that loaded or partially loaded trailers intended to be stored overnight or that will not be picked up and transported the same operating day are stored indoors and suitably covered.*
- *Piles of general construction or demolition debris shall be covered or wetted to prevent air-borne dust.*
- *The facility shall be designed and constructed to prevent unauthorized access to recycling areas, storage areas for unauthorized wastes, salvaged and recycled materials, and staging areas where loaded site equipment or vehicles may be parked. Facility features such as fences and gates shall be provided.*
- *Waste handling areas shall be designed and constructed to prevent exposure of wastes and recyclable materials to run-off and flooding.*
- *The sorting areas shall be properly graded and compacted to prevent ponding from forming leachate during storms.*
- *Records shall be maintained on-site at the facility office for each operating day. The operator shall record operating hours, load ticket information, load inspections, daily processing time, volume processed per day, transfer load out and waste disposition details.*
- *The operator shall, within 48 hours of receipt of the general construction or demolition debris at the facility, sort the general construction or demolition debris. The operator shall separate the recyclable general construction or demolition debris from nonrecyclable general construction or demolition debris and dispose of the non-recyclable general construction or demolition debris, in accordance with Section 22.38(b)(l) of the Act.*
- *The operator must place wood, tires, and other unacceptable materials in covered dumpsters or vehicles adequate to prevent the release of leachate.*
- *All non-recyclable general construction or demolition debris, and unacceptable material shall be moved to the waste transfer facility on the same day it is received, and disposal of such material shall be handled in accordance with all applicable federal, State, and local requirements and with these conditions.*
- *The operator shall transport all non-putrescible recyclable general construction or demolition debris for recycling or disposal within 6 months of its receipt at the facility, in accordance with Section 22.38(b)(4) of the Act.*

- *In accordance with Section 22.38(b)(6) of the Act, the operator shall employ tagging and record keeping procedures to identify the source and transporter of C&D material accepted by the facility.*
- *The operator shall use load tickets to control the site activities and comply with the tagging and record keeping procedures. These load tickets shall identify the source of the C&D material delivered to the site. The operator shall use these tickets to identify the location in the yard or in the covered dumpsters and the length of time stored at the site to achieve compliance.*
- *The operator is prohibited from receiving hazardous and asbestos containing materials.*
- *The operator may separate clean concrete and clean soil from the general construction or demolition debris as recyclable materials for use in construction. The operator is permitted to store recyclable concrete and clean soil for a maximum period of 3 months.*
- *The operator may store the steel separated from concrete or other construction or demolition debris for a maximum period of 6 months. After six months, the steel must be sent offsite for disposal or recycling.*
- *The operator shall ensure that site surface drainage, during development, during operation and after the site is closed, shall be such that no adverse effects are encountered by adjacent property owners.*
- *The best available technology (mufflers, berms and other sound shielding devices) shall be employed to minimize equipment noise impacts on property adjacent to the site during both development, operation and during any applicable post-closure care period.*
- *Management of Unauthorized Waste by the operator*
    - *Landscape waste found to be mixed with general construction and demolition debris shall be removed the same day and transported to a facility that is operating in accordance with the Illinois Environmental Protection Act (Act), Title V, Sections 21 and 39 (415 ILCS 5/21 and 39].*
    - *Lead-acid batteries mixed with general construction and demolition debris shall be removed the same day and transported either to a drop-off center handling such waste, or to a lead-acid battery retailer.*
    - *Special wastes including hazardous waste, non-hazardous special waste, and potentially infectious medical waste mixed with general construction and demolition debris shall be containerized separately and removed from the property no later than five hours after receipt by a licensed special waste hauler. Special wastes shall be transported to a licensed special waste management facility that has obtained authorization to accept such waste. The operator shall maintain a contract with haulers so that the immediate removal is ensured. The operator shall develop an emergency response/action plan for such occurrences.*
    - *Asbestos debris from general construction and demolition debris shall be managed in accordance with the National Emission Standards for Hazardous Air Pollutants (NESHAPS) regulations.*
    - *Tires found to be mixed with general construction and demolition debris shall be removed and managed in accordance with Section 55 of the Act [415 ILCS 5/55].*
    - *White good components mixed with general construction and demolition debris shall be removed and managed in accordance with Section 22.28 of the Act [415 LCS 5/22.28].*

- *No person may knowingly mix liquid used oil with general construction and demolition debris.*
- *After the unauthorized waste has been removed from the facility, a thorough cleanup of the affected area shall be made according to the type of unauthorized waste managed. Records shall be kept for three years and will be made available to the IEPA upon request. In addition, the Applicant shall provide an annual written report to the City of West Chicago not later than January 31 of each year, which report shall: list the types, quantities and dates of receipt of all unauthorized waste; the generators of such waste; and the sites to which the wastes were delivered for disposal, processing or handling.*
- *The following wastes shall not be accepted at the facility:*
  - *Hazardous substances (as defined by Section 3.215 of the Illinois Environmental Protection Act);*
  - *Hazardous waste (as defined by Section 3.220 of the Illinois Environmental Protection Act);*
  - *Potentially infectious medical wastes (as defined by the Illinois Environmental Protection Act in Section 3.84);*
  - *Universal waste (as defined by Title 35 of the Illinois Administrative Code Part 733 including batteries, pesticides, mercury-containing equipment and lamps);*
  - *Regulated asbestos containing materials;*
  - *Polychlorinated biphenyl wastes;*
  - *Used motor oil;*
  - *Source, special or by-product nuclear materials;*
  - *Radioactive wastes (both high and low level);*
  - *Sludge;*
  - *White goods (incidental white goods received at the proposed transfer station will be segregated and stored for pickup by an off-site recycler);*
  - *Lead-acid automotive batteries (incidental automotive batteries received at the transfer station will be segregated and stored for pickup by an off-site recycler);*
  - *Used tires (incidental tires received at the transfer station will be segregated and stored for pickup by an off-site recycler); and*
  - *Landscape waste.*
- *Special wastes generated at the site for disposal, storage, incineration or further treatment elsewhere shall be transported by the operator to the receiving facility utilizing the IEPA's Special Waste Authorization system and manifest system.*

6. Upon receiving final, non-appealable siting approval pursuant to 415 ILCS 5/39.2 to construct and operate the West DuPage RTS, and upon receiving an IEPA development permit, LRS shall, prior to commencing operation of the waste transfer facility, 1) execute and grant to the DuPage Airport Authority ("DAA") a new avigation easement, which is Exhibit A to the Agreement Between the DuPage Airport Authority, Oscar (IL) LLC, and Lakeshore Recycling Systems, LLC, dated January 19, 2022 ("Airport Agreement"), 2) LRS shall reduce the roof height of its existing transfer building so as to stay below all critical elevations in the new avigation easement, and 3) LRS shall not allow any penetrations whatsoever to the new avigation easement.

7. All improvements installed on and offsite by the Applicant shall be funded by and solely at the expense of the Applicant.

8. The tipping floor of the waste transfer building shall be cleaned and free of waste at the end of each operating day. Except as set forth in Condition 5, no waste or other material shall be left on the floor inside the transfer building or outside the transfer building overnight or when the facility is not operating.

9. The Applicant shall control litter by discharging and loading all waste within the enclosed portion of the Transfer Facility. After unloading, any remaining loose waste shall be removed or contained in the vehicle prior to exiting the site. The Applicant shall use its best efforts to assure that vehicles, hauling waste to or removing waste from the Transfer Facility, shall be suitably covered to prevent waste from leaving the vehicles. A fence to aid in the interception of any blowing litter shall surround the Transfer Facility. The Applicant shall diligently patrol the Subject Property during hours of operation to collect any litter. At a minimum the Applicant shall diligently patrol and remove litter from: the Subject Property; all property owned or controlled by the Applicant; and, before 10:00 a.m. each operating day, Powis Road between Hawthorne Lane and Route 64 (North Avenue) as well as Powis Court . In addition, the Applicant shall, at a minimum, patrol and remove litter from private property within 500 feet of the aforesaid public streets and corresponding rights-of-way with the written permission of the owner of said properties, which permission the Applicant shall diligently attempt to obtain. The Applicant shall provide the City of West Chicago the names, addresses, telephone numbers and email addresses of such owners granting permission. The Applicant shall also post on the company's website the name and email address of an employee of the company to whom any owner of property along Powis Court or Powis Road between Route 64 (North Avenue) and Hawthorne Lane may report litter from the facility or trucks using the facility, in which case the Applicant shall remove the litter with the written permission of the owner within two hours of receiving notification of the litter concern. Upon written request, logs showing the private owner, the property address for the request for litter removal, the time such was received and the time the concern was abated shall be available to the City and provided within one business day. Also, the Applicant shall diligently seek the written approval of the DuPage County Forest Preserve District to remove litter, which is visible from Route 64 (North Avenue), from the portion of the Pratts Wayne Woods Forest Preserve that is located within the City of West Chicago. If permission is granted, litter removal from the Forest Preserve shall occur not less than monthly; the City shall be provided written notice of each occurrence within one business day of such being completed.

10. The Applicant shall provide a street sweeper to remove mud and dust tracked onto hard surfaces inside and outside the Transfer Facility, on property owned or controlled by the Applicant as well as well Powis Court and Powis Road between Hawthorne Lane and Route 64 (North Avenue)on an as needed basis, but not less frequently than daily.

11. The Applicant shall retain a pest control service on an on-going basis to address the potential for infestation by rodents and other vectors. Such service shall inspect the Transfer Facility on an as needed, but no less than monthly, basis.

12. Transfer trailers entering and exiting the Subject Property shall use only the following roads: Powis Road (between the facility entrance and Route 64 (North Avenue), Route 64 (North Avenue), Kirk Road and Interstate 88. Except for waste collection trucks servicing property within the City of West Chicago, waste collection trucks entering and exiting the Subject Property shall use only the following streets within the City and no others: Powis Road south of Route 64, Route 64 (North Avenue), Route 38, and Kress Road. The Applicant shall have installed within City right-of-way to the satisfaction of the City, license plate readers in each of the following locations: Hawthorne Lane between Route 59 and Powis Road; Smith Road between Powis Road and Route 64; and Powis Road between Smith Road and Route 64. The license plate readers shall provide remote access to the City of West Chicago to be used for any lawful purpose. The specific make and model of license plate readers and the specific locations for installation of the license plate readers shall be subject to the written approval/direction of the West Chicago Police Chief, and may be relocated for operational need at the expense of the City; the initial and any annual costs associated with the license plate readers shall be at the Applicant's sole cost and expense. The Applicant shall be responsible for maintaining and, if necessary, replacing the license plate readers when in disrepair or at the end of their useful lives as determined by the City through documentation from the vendor. The Applicant shall also provide a set of certified portable scales to the City at its sole cost and expense, which thereafter shall be maintained and replaced by the City.

13. Trucks transporting hydro excavation waste shall be water-tight. Dump style trucks transporting solidified hydro excavation waste shall include liners that are sufficient to prevent leakage onto roads and other surfaces.

14. All incoming hydro-excavation waste loads shall be accompanied by a completed/signed manifest and shall be pre-approved using a waste profile sheet and other supporting documentation as necessary. These materials shall be reviewed to verify that the waste is non-hazardous as defined in Title 35 Illinois Administrative Code Part 722.111. Pre-approved waste streams and such profile packets shall be kept on file at the facility, shall accurately characterize the accepted material, and may not be more than one year old.

15. The facility shall be maintained with a negative pressure condition such that the ventilation system provides a minimum of 6 air changes per hour. The facility design shall include an ozone system to treat the ventilation air prior to exhaust. The facility shall also be equipped with a misting system that will assist in mitigation of dust and odors above the tipping floor.

16. The facility shall otherwise be constructed and operated in substantial conformance with the plans and operating procedures specified in the siting application.

17. Approval is further conditioned upon compliance with all terms of the Host Community Benefit Agreement between the City of West Chicago and Lakeshore Recycling Systems, LLC, dated April 1, 2019; the Secondary Host Community Benefit Agreement between DuPage County and Lakeshore Recycling Systems, LLC, dated March 10, 2020; and the Airport Agreement.

CITY OF WEST CHICAGO

ORDINANCE NO. 23-O-0006

AN ORDINANCE CONDITIONALLY APPROVING THE APPLICATION FOR LOCAL SITING APPROVAL OF LAKESHORE RECYCLING SYSTEMS, LLC FOR WEST DUPAGE RECYCLING AND TRANSFER STATION

ADOPTED BY THE
CITY COUNCIL
OF THE
CITY OF WEST CHICAGO
February 28, 2023

Published in pamphlet form by the authority of the City Council of the City of West Chicago, DuPage County, Illinois, on the 1st day of March, 2023.

ORDINANCE NO. 23-O-0006

AN ORDINANCE CONDITIONALLY APPROVING THE APPLICATION FOR LOCAL SITING APPROVAL OF LAKESHORE RECYCLING SYSTEMS, LLC FOR WEST DUPAGE RECYCLING AND TRANSFER STATION

WHEREAS, on September 16, 2022, Lakeshore Recycling Systems, LLC. ("Applicant") filed an application with the City of West Chicago for siting approval of a new pollution control facility within West Chicago, Illinois, for the development of a new transfer station as defined by Section 3.500 of the Illinois Environmental Protection Act located at 1655 Powis Road ("the Facility"), pursuant to Section 39.2 of the Illinois Environmental Protection Act (415 ILCS 5/39.2) ("Act"); and

WHEREAS, the waste accepted for transfer will be general municipal solid waste, hydro excavation waste, recyclables and construction or demolition debris generated by residential, commercial and industrial sources; and

WHEREAS, the proposed Facility falls within the definition of a "pollution control facility" under the Illinois Environmental Protection Act and, as such, requires site location approval by the municipality in which the proposed Facility will be located pursuant to 415 ILCS 5/39.2; and

WHEREAS, the City of West Chicago, DuPage County, Illinois, is the municipality in which the proposed Facility will be located if approved and Article VII of the City of West Chicago's Code of Ordinances (the "Siting Ordinance") enacted by the City Council of the City of West Chicago, establishes a procedure for pollution control facility site approval in the City of West Chicago, DuPage County, Illinois; and

WHEREAS, following notice, the City of West Chicago held public hearings on January 3, 2023, January 4, 2023, January 5, 2023, January 10, 2023, January 12, 2023, January 16, 2023, and January 19, 2023, pursuant to the Act and West Chicago's Siting Ordinance; and

WHEREAS, the Applicant, Protect West Chicago, People Opposing DuPage Environmental Racism and the City of West Chicago staff are parties that appeared at the public hearings. Protect West Chicago by and through counsel moved to dismiss the application asserting that the City of West Chicago lacked jurisdiction due to fatal defects in the pre-filing notice required by 415 ILCS 5/39.2, and argued that since the application fails to comply with the 1,000 foot set-back requirement of 415 ILCS 5/22.14 concerning the setback from property zoned primarily for residential uses, the siting approval must be denied. The Applicant filed a response in opposition to the Motion to Dismiss and a memorandum explaining why the 1,000 foot residential setback does not apply to this Facility due to impossibility.

WHEREAS, the Hearing Officer appointed to preside over the public hearing has made his report and recommendation regarding the Motion to Dismiss the residential setback issue and regarding conditional siting approval to the City Council of the City of West Chicago, based upon

the siting application, notifications, hearings, exhibits, public comment and the record, which includes the following determinations, subject to the decision of this City Council:

1. The Applicant complied with all pre-filing notice requirements of Section 39.2(b) of the Act and the pre-hearing notice requirements of Section 39.2(c) of the Act;

2. The City has jurisdiction to consider the Application;

3. Section 5/22.14 of the Act does not bar this proposed Facility;

4. The siting proceedings herein, both procedurally and substantively, complied with the requirements of fundamental fairness;

5. The Applicant has demonstrated that the proposed Facility meets Criterion 1: "the facility is necessary to accommodate the waste needs of the area it is intended to serve....;"

6. The Applicant has not demonstrated that the proposed Facility meets Criterion 2; however, with the imposition of and compliance with the special conditions provided below, the proposed Facility meets Criterion 2: "the facility is so designed, located and proposed to be operated that the public health, safety and welfare will be protected;"

7. The Applicant has demonstrated that the proposed Facility meets Criterion 3: "the facility is so located so as to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property;"

8. The Applicant has demonstrated that the proposed Facility meets Criterion 4: "for a facility other than a sanitary landfill or waste disposal site, the facility is located outside the boundary of the 100 year floodplain or the site is flood-proofed";

9. The Applicant has not demonstrated that the proposed Facility meets Criterion 5; however, with the imposition of and compliance with the special conditions provided below, the proposed Facility meets Criterion 5: "the plan of operations for the facility is designed to minimize the danger to the surrounding area from fire, spills, or other operational accidents;"

10. The Applicant has demonstrated that the proposed Facility meets Criterion 6: "the traffic patterns to or from the facility are so designed as to minimize the impact on existing traffic flows;"

11. The Applicant demonstrated that the facility will not be accepting hazardous waste and therefore demonstrated that Criterion 7 is not applicable;

12. The Applicant has demonstrated that the proposed Facility meets Criterion 8: "...where the county board has adopted a solid waste management plan consistent with the planning requirements of the Local Solid Waste Disposal Act or the Solid Waste Planning and Recycling Act, the facility is consistent with that plan ...;"

13. The Applicant demonstrated that the Facility is not located within a regulated recharge area and therefore Criterion 9 is not applicable;

14. The Applicant's operating history demonstrates that the Applicant is qualified to operate the Facility safely and properly and provides no basis to deny the Application;

15. The proposed Facility, when developed and operated in compliance with the special conditions, is consistent with all appropriate and relevant location standards, including airport setback requirements, wetlands standards, seismic impact zone standards, and residential setback requirements; and

16. The Applicant has agreed to comply and approval is conditioned upon compliance with all terms of the Host Community Benefit Agreement between the City of West Chicago and Lakeshore Recycling Systems, LLC, dated April 1, 2019; the Secondary Host Community Benefit Agreement between DuPage County and Lakeshore Recycling Systems, LLC, dated March 10, 2020; and the Airport Agreement.

WHEREAS, the City Council of the City of West Chicago met on February 27, 2023 to deliberate, and to review and consider the hearing record in light of each of the Criterion established for consideration of siting of pollution control facilities in Section 39.2, and to the extent applicable, the provisions of the Siting Ordinance; and

WHEREAS, Section 39.2 allows the City Council of the City of West Chicago, in granting siting approval, to impose such conditions as may be reasonable and necessary to accomplish the purposes of Section 39.2 and as are not inconsistent with Illinois Pollution Control Board regulations; and

WHEREAS, during the above deliberations, the City Council of the City of West Chicago found that the Applicant complied with all the pre-filing notice requirements of Section 39.2(b) of the Act, and the pre-hearing notice requirements of Section 39.2(c) of the Act and that the City of West Chicago has jurisdiction to consider the application and found further that the Applicant met Criterion (1), (3), (4), (6), (7), (8) and (9) of Section 39.2 without conditions, and that the Applicant met Criterion (2) and (5) of Section 39.2 subject to the special conditions provided below; and

WHEREAS, after careful review and consideration, the City Council of the City of West Chicago desire to adopt the Hearing Officer's Findings as the basis of their decision as to a whether the Applicant met the Criterion under Section 39.2.

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF WEST CHICAGO, DU PAGE COUNTY, ILLINOIS, pursuant to its home rule powers as provided by Article VII, Section 6 of the Illinois Constitution and the authority under Section 39.2 of the Illinois Environmental Protection Act (415 ILCS 5/39.2), that the Report of Hearing Officer Recommended Findings of Fact and Recommended Conditions of Approval, attached hereto as Exhibit A, is adopted by the City Council of the City of West Chicago.

BE IT FURTHER RESOLVED, that the City Council of the City of West Chicago has jurisdiction and hereby determines that Lakeshore Recycling Systems, LLC. has satisfied the applicable criteria, subject to the special conditions provided below; and

BE IT FURTHER RESOLVED, that the City Council of the City of West Chicago conditionally approves the request of Lakeshore Recycling Systems, LLC. for site approval of its proposed municipal solid waste transfer station, provided that the special conditions are not inconsistent with regulations of the Pollution Control Board or the terms of any development or operating permits approved by the Illinois Environmental Protection Agency.

SECTION 1: The preceding "Whereas" clauses are hereby incorporated into this Ordinance as if they were fully set forth herein.

SECTION 2: The City Council of the City of West Chicago denies Protect West Chicago's Motion to Dismiss the Application for lack of jurisdiction due to fatal defects in the notice required by 415 ILCS 5/39.2(b) and due to the restrictions of 415 ILCS 5/22.14 concerning the setback from property zoned primarily for residential uses and finds that it has jurisdiction to consider the application.

SECTION 3: The City Council of the City of West Chicago hereby adopt the Report of Hearing Officer Recommended Findings of Fact and Recommended Conditions of Approval and Proposed Findings of Fact and Conclusions of Law in its entirety, as attached hereto as Exhibit A and incorporated as if fully set forth herein, and by so doing, the City Council of the City of West Chicago expressly adopts, in expansion of, but not in limitation of the foregoing, the introduction, all findings of fact, all conclusions of law, citations, recommendations, analysis, references and incorporations made in the Report of Hearing Officer Recommended Findings of Fact and Recommended Conditions of Approval and Proposed Findings of Fact and Conclusions of Law as its own to the same extent as though fully set forth herein. The City Council of the City of West Chicago further find, in expansion of, but not in limitation of the foregoing, that it has proper jurisdiction to hear the Application, that all notices required by law were duly given, that the procedures outlined in Section 39.2 and the Siting Ordinance were duly followed, and such procedures were fundamentally fair to the Applicant, all parties, and all participants involved.

SECTION 4: Based on the Application, expert testimony and record, we find the following:

The determination of Criterion 2 is primarily a matter of assessing the credibility of expert witnesses. *Fairview Area Citizens Taskforce v. Illinois Pollution Control Board*, 198 Ill.App.3d 541, 552, 555 N.E.2d 1178, 1185 (3d Dist. 1990); *CDT Landfill Corp. v. City of Joliet*, 1998 WL 112497 (Ill. Pollution Control Board). In the City Council's opinion, Mr. Hock's testimony was the more thorough and credible testimony on this issue. Accordingly, we find that the Applicant has met its burden of proof as to Criterion 2 of Section 39.2, the Transfer Station Facility is designed, located and proposed to be operated so that the public health, safety and welfare will be protected, provided that the Applicant operates the Facility in accordance with the following special conditions:

1. The maximum tonnage per day that may be received by the Facility shall not exceed 1,950 tons per day, of which up to 650 tons per day may be municipal solid waste (MSW), up to 300 tons per day may be hydro excavation waste, up to 750 tons per day may be construction and demolition debris (C&D) and up to 250 tons per day may be single stream recyclables (SSR).

2. The Applicant shall keep the truck doors to the transfer Facility closed, except for emergencies and to allow trucks to enter and exit the Facility, during regular business hours. The doors shall be equipped with sensors such that they will open and close automatically as vehicles enter and exit the transfer building. Alternatively, an employee may open and close the doors when trucks access and exit the transfer Facility.

3. The push walls in the transfer Facility shall be designed to ensure to the satisfaction of the City that there will be no buildup of waste behind the walls which could result in fire, odor, or harborage for vectors. In addition, the Applicant shall provide a certification from a licensed structural engineer that the push walls will be capable of withstanding impact from waste loading equipment at 5 mph without shearing the beams or compromising the integrity of the building's walls.

4. All transfer vehicles utilizing the Facility shall be equipped with auto tarping systems, and all loaded transfer trailers shall be tarped inside of the transfer building prior to exit.

5. The Applicant shall continue to operate the C&D recycling portions of the Facility in accordance with the requirements of 415 ILCS 5/22.38 for so long as the current permit (2015-124-OP) remains in effect. If the current permit (2015-124-OP) is discontinued, replaced or terminated, the following conditions, as modified, shall remain in effect:

a) The Facility shall be designed and constructed with roads and traffic flow patterns adequate for the volume, type and weight of traffic using the Facility including, but not limited to hauling vehicles, emergency vehicles, and on-site equipment. Sufficient area shall be maintained to minimize traffic congestion, provide for safe operation, and allow for queuing of waste hauling vehicles.
b) The operator shall provide adequate parking for all vehicles and equipment used at the Facility and as necessary for queued hauling vehicles.
c) Roadways and parking areas on the Facility premises shall be designed and constructed for use in all weather, considering the volume, type and weight of traffic and equipment at the Facility.
d) The Facility shall be designed and constructed so that site surface drainage will be diverted around or away from the recycling and waste transfer areas. Surface drainage shall be designed and controlled so that adjacent property owners encounter no adverse effects during development, operation and after closure of the Facility.
e) Run-off from roadways and parking areas shall be controlled using storm sewers or shall be compatible with natural drainage for the site. Best management practices (e.g., design features, operating procedures, maintenance procedures, prohibition of certain practices and treatment) shall be used to ensure that run-off from these areas does not carry wastes, debris or constituents thereof, fuel, oil or other residues to soil, surface water or groundwater.
f) The Facility, including, but not limited to, all structures, roads, parking and recycling areas, shall be designed and constructed to prevent malodors, noise, vibrations, dust and exhaust from creating a nuisance or health hazard during development, operation and

closure of the Facility. Facility features (e.g., berms, buffer areas, paving, grade reduction), best available technology (e.g., mufflers, machinery enclosures, sound absorbent materials, odor neutralizing systems, air filtering systems, misting systems), and building features (e.g., enclosed structures, building orientation) shall be among the measures to be considered to achieve compliance.

g) The Facility shall be designed and constructed to prevent litter and other debris from leaving the Facility property. Facility features (e.g., windbreaks, fencing, netting, etc.) shall be among the measures considered to ensure that the debris does not become wind strewn and that no other provisions of the Act are violated.

h) No regulated air emissions shall occur from these facilities, except as authorized by a permit from the Illinois Environmental Protection Agency (IEPA) Bureau of Air (BOA). No process discharge to Waters of the State or to a sanitary sewer shall occur from these facilities, except as authorized by a permit from the IEPA Bureau of Water (BOW).

i) The Facility shall be designed and constructed with a water supply of adequate volume, pressure, and in locations sufficient for cleaning, firefighting, personal sanitary facilities, and as otherwise necessary to satisfy operating requirements (e.g., dust suppression, wheel washing) and the contingency plan.

j) The Facility shall be designed and constructed with exterior and interior lighting for roadways, and waste handling areas adequate to perform safely and effectively all necessary activities.

k) The Facility shall be designed and constructed with truck wheel curbs, guard rails, bumpers, posts or equivalents to prevent backing into fuel storage tanks, equipment, and other structures.

l) The Facility shall be designed and constructed with adequate shelter, sanitary facilities, and emergency communications for employees.

m) The Facility operator shall install fences and gates, as necessary, to limit entry. Except during operating hours, the gates shall be securely locked to prevent unauthorized entry.

n) The Facility may receive general construction and demolition debris at the site Monday through Saturday, 24 hours a day. The Facility shall be closed on Sunday and the six major federal holidays (New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day). When the Facility is operated before sunrise or after sunset, adequate lighting shall be provided. If it is required for the Facility to be open beyond normal operating hours to respond to emergency situations, a written record of the date, time and reason the Facility was open shall be maintained in Facility operating records. The IEPA's Regional Office and the county authority responsible for inspection of the Facility, per a delegation agreement with the IEPA, must be notified and must grant approval each day that the operating hours need to be extended. No later than 10:00 a.m. of the first operating day after the operating hours have been extended, the Applicant shall send a written report by email to the City Administrator, which describes the length of the extension of the operating hours and the reason for the extension.

o) The Facility may receive and transfer MSW, hydro excavation waste and SSR from 4:00 a.m. to 12:00 a.m. Monday through Friday and from 4:00 a.m. to 12:00 p.m. on Saturday, with no operation on Sunday or the six major federal holidays (New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day), provided that on the Saturday following a major federal holiday, regular business hours

may be extended to 12:00 a.m. If it is required for the Facility to be open beyond normal operating hours to respond to emergency situations, a written record of the date, time and reason the Facility was open shall be maintained in Facility operating records. The City of West Chicago must be notified by email to the City Administrator each day that the operating hours need to be extended. The IEPA's Regional Office and the county authority responsible for inspection of the Facility, per a delegation agreement with the IEPA, must be notified and must grant approval each day that the operating hours need to be extended.

p) Fire safety equipment (fire extinguishers) shall be maintained in accordance with recommended practice.
q) Non-recyclable waste may be kept temporarily in covered containers or transfer trailers for no more than 24 hours (except on weekends and holidays), provided that loaded or partially loaded trailers intended to be stored overnight or that will not be picked up and transported the same operating day are stored indoors and suitably covered.
r) Piles of general construction or demolition debris shall be covered or wetted to prevent air-borne dust.
s) The Facility shall be designed and constructed to prevent unauthorized access to recycling areas, storage areas for unauthorized wastes, salvaged and recycled materials, and staging areas where loaded site equipment or vehicles may be parked. Facility features such as fences and gates shall be provided.
t) Waste handling areas shall be designed and constructed to prevent exposure of wastes and recyclable materials to run-off and flooding.
u) The sorting areas shall be properly graded and compacted to prevent ponding from forming leachate during storms.
v) Records shall be maintained on-site at the Facility office for each operating day. The operator shall record operating hours, load ticket information, load inspections, daily processing time, volume processed per day, transfer load out and waste disposition details.
w) The operator shall, within 48 hours of receipt of the general construction or demolition debris at the Facility, sort the general construction or demolition debris. The operator shall separate the recyclable general construction or demolition debris from nonrecyclable general construction or demolition debris and dispose of the non-recyclable general construction or demolition debris, in accordance with Section 22.38(b)(l) of the Act.
x) The operator must place wood, tires, and other unacceptable materials in covered dumpsters or vehicles adequate to prevent the release of leachate.
y) All non-recyclable general construction or demolition debris, and unacceptable material shall be moved to the waste transfer Facility on the same day it is received, and disposal of such material shall be handled in accordance with all applicable federal, State, and local requirements and with these conditions.
z) The operator shall transport all non-putrescible recyclable general construction or demolition debris for recycling or disposal within 6 months of its receipt at the Facility, in accordance with Section 22.38(b)(4) of the Act.
aa) In accordance with Section 22.38(b)(6) of the Act, the operator shall employ tagging and record keeping procedures to identify the source and transporter of C&D material accepted by the Facility.

bb) The operator shall use load tickets to control the site activities and comply with the tagging and record keeping procedures. These load tickets shall identify the source of the C&D material delivered to the site. The operator shall use these tickets to identify the location in the yard or in the covered dumpsters and the length of time stored at the site to achieve compliance.

cc) The operator is prohibited from receiving hazardous and asbestos containing materials.

dd) The operator may separate clean concrete and clean soil from the general construction or demolition debris as recyclable materials for use in construction. The operator is permitted to store recyclable concrete and clean soil for a maximum period of 3 months.

ee) The operator may store the steel separated from concrete or other construction or demolition debris for a maximum period of 6 months. After six months, the steel must be sent offsite for disposal or recycling.

ff) The operator shall ensure that site surface drainage, during development, during operation and after the site is closed, shall be such that no adverse effects are encountered by adjacent property owners.

gg) The best available technology (mufflers, berms and other sound shielding devices) shall be employed to minimize equipment noise impacts on property adjacent to the site during both development, operation and during any applicable post-closure care period.

hh) Management of Unauthorized Waste by the operator

i. Landscape waste found to be mixed with general construction and demolition debris shall be removed the same day and transported to a facility that is operating in accordance with the Illinois Environmental Protection Act (Act), Title V, Sections 21 and 39 (415 ILCS 5/21 and 39].

ii. Lead-acid batteries mixed with general construction and demolition debris shall be removed the same day and transported either to a drop-off center handling such waste, or to a lead-acid battery retailer.

iii. Special wastes including hazardous waste, non-hazardous special waste, and potentially infectious medical waste mixed with general construction and demolition debris shall be containerized separately and removed from the property no later than five hours after receipt by a licensed special waste hauler. Special wastes shall be transported to a licensed special waste management facility that has obtained authorization to accept such waste. The operator shall maintain a contract with haulers so that the immediate removal is ensured. The operator shall develop an emergency response/action plan for such occurrences.

iv. Asbestos debris from general construction and demolition debris shall be managed in accordance with the National Emission Standards for Hazardous Air Pollutants (NESHAPS) regulations.

v. Tires found to be mixed with general construction and demolition debris shall be removed and managed in accordance with Section 55 of the Act [415 ILCS 5/55].

vi. White good components mixed with general construction and demolition debris shall be removed and managed in accordance with Section 22.28 of the Act [415 ILCS 5/22.28].

vii. No person may knowingly mix liquid used oil with general construction and demolition debris.

viii. After the unauthorized waste has been removed from the Facility, a thorough cleanup of the affected area shall be made according to the type of unauthorized waste

managed. Records shall be kept for three years and will be made available to the IEPA upon request. In addition, the Applicant shall provide an annual written report to the City of West Chicago not later than January 31 of each year, which report shall: list the types, quantities and dates of receipt of all unauthorized waste; the generators of such waste; and the sites to which the wastes were delivered for disposal, processing or handling.

ix. The following wastes shall not be accepted at the Facility:

- Hazardous substances (as defined by Section 3.215 of the Illinois Environmental Protection Act);
- Hazardous waste (as defined by Section 3.220 of the Illinois Environmental Protection Act);
- Potentially infectious medical wastes (as defined by the Illinois Environmental Protection Act in Section 3.84);
- Universal waste (as defined by Title 35 of the Illinois Administrative Code Part 733 including batteries, pesticides, mercury-containing equipment and lamps);
- Regulated asbestos containing materials;
- Polychlorinated biphenyl wastes;
- Used motor oil;
- Source, special or by-product nuclear materials;
- Radioactive wastes (both high and low level);
- Sludge;
- White goods (incidental white goods received at the proposed transfer station will be segregated and stored for pickup by an off-site recycler);
- Lead-acid automotive batteries (incidental automotive batteries received at the transfer station will be segregated and stored for pickup by an off-site recycler);
- Used tires (incidental tires received at the transfer station will be segregated and stored for pickup by an off-site recycler); and
- Landscape waste.

ii) Special wastes generated at the site for disposal, storage, incineration or further treatment elsewhere shall be transported by the operator to the receiving facility utilizing the IEPA's Special Waste Authorization system and manifest system.

6. Upon receiving final, non-appealable siting approval pursuant to 415 ILCS 5/39.2 to construct and operate the Facility, and upon receiving an IEPA development permit, LRS shall, prior to commencing operation of the waste transfer Facility, 1) execute and grant to the DuPage Airport Authority ("DAA") a new avigation easement, which is Exhibit A to the Agreement Between the DuPage Airport Authority, Oscar (IL) LLC, and Lakeshore Recycling Systems, LLC, dated January 19, 2022 ("Airport Agreement"), 2) LRS shall reduce the roof height of its existing transfer building so as to stay below all critical elevations in the new avigation easement, and 3) LRS shall not allow any penetrations whatsoever to the new avigation easement.

7. All improvements installed on and offsite by the Applicant shall be funded by and solely at the expense of the Applicant.

8. The tipping floor of the waste transfer building shall be cleaned and free of waste at the end of each operating day. Except as set forth in Condition 5, no waste or other material shall be left on the floor inside the transfer building or outside the transfer building overnight or when the Facility is not operating.

9. The Applicant shall control litter by discharging and loading all waste within the enclosed portion of the Transfer Facility. After unloading, any remaining loose waste shall be removed or contained in the vehicle prior to exiting the site. The Applicant shall use its best efforts to assure that vehicles, hauling waste to or removing waste from the Transfer Facility, shall be suitably covered to prevent waste from leaving the vehicles. A fence to aid in the interception of any blowing litter shall surround the Transfer Facility. The Applicant shall diligently patrol the Subject Property during hours of operation to collect any litter. At a minimum the Applicant shall diligently patrol and remove litter from: the Subject Property; all property owned or controlled by the Applicant; and, before 10:00 a.m. each operating day, Powis Road between Hawthorne Lane and Route 64 (North Avenue) as well as Powis Court. In addition, the Applicant shall, at a minimum, patrol and remove litter from private property within 500 feet of the aforesaid public streets and corresponding rights-of-way with the written permission of the owner of said properties, which permission the Applicant shall diligently attempt to obtain. The Applicant shall provide the City of West Chicago the names, addresses, telephone numbers and email addresses of such owners granting permission. The Applicant shall also post on the company's website the name and email address of an employee of the company to whom any owner of property along Powis Court or Powis Road between Route 64 (North Avenue) and Hawthorne Lane may report litter from the Facility or trucks using the Facility, in which case the Applicant shall remove the litter with the written permission of the owner within two hours of receiving notification of the litter concern. Upon written request, logs showing the private owner, the property address for the request for litter removal, the time such was received and the time the concern was abated shall be available to the City and provided within one business day. Also, the Applicant shall diligently seek the written approval of the DuPage County Forest Preserve District to remove litter, which is visible from Route 64 (North Avenue), from the portion of the Pratts Wayne Woods Forest Preserve that is located within the City of West Chicago. If permission is granted, litter removal from the Forest Preserve shall occur not less than monthly; the City shall be provided written notice of each occurrence within one business day of such being completed.

10. The Applicant shall provide a street sweeper to remove mud and dust tracked onto hard surfaces inside and outside the Transfer Facility, on property owned or controlled by the Applicant as well as Powis Court and Powis Road between Hawthorne Lane and Route 64 (North Avenue) on an as needed basis, but not less frequently than daily.

11. The Applicant shall retain a pest control service on an on-going basis to address the potential for infestation by rodents and other vectors. Such service shall inspect the Transfer Facility on an as needed, but no less than monthly, basis.

12. Transfer trailers entering and exiting the Subject Property shall use only the following roads: Powis Road (between the Facility entrance and Route 64 (North Avenue), Route 64 (North Avenue), Kirk Road and Interstate 88. Except for waste collection trucks servicing property within the City of West Chicago, waste collection trucks entering and exiting the Subject Property shall use only the following streets within the City and no others: Powis Road south of Route 64, Route 64 (North Avenue), Route 38, and Kress Road. The Applicant shall have installed within City right-of-way to the satisfaction of the City, license plate readers in each of the following locations: Hawthorne Lane between Route 59 and Powis Road; Smith Road between Powis Road and Route 64; and Powis Road between Smith Road and Route 64. The license plate readers shall provide remote access to the City of West Chicago to be used for any lawful purpose. The specific make and model of license plate readers and the specific locations for installation of the license plate readers shall be subject to the written approval/direction of the West Chicago Police Chief, and may be relocated for operational need

at the expense of the City; the initial and any annual costs associated with the license plate readers shall be at the Applicant's sole cost and expense. The Applicant shall be responsible for maintaining and, if necessary, replacing the license plate readers when in disrepair or at the end of their useful lives as determined by the City through documentation from the vendor. The Applicant shall also provide a set of certified portable scales to the City at its sole cost and expense, which thereafter shall be maintained and replaced by the City.

13. Trucks transporting hydro excavation waste shall be water-tight. Dump style trucks transporting solidified hydro excavation waste shall include liners that are sufficient to prevent leakage onto roads and other surfaces.

14. All incoming hydro excavation waste loads shall be accompanied by a completed/signed manifest and shall be pre-approved using a waste profile sheet and other supporting documentation as necessary. These materials shall be reviewed to verify that the waste is nonhazardous as defined in Title 35 Illinois Administrative Code Part 722.111. Pre-approved waste streams and such profile packets shall be kept on file at the Facility, shall accurately characterize the accepted material, and may not be more than one year old.

15. The Facility shall be maintained with a negative pressure condition such that the ventilation system provides a minimum of 6 air changes per hour. The Facility design shall include an ozone system to treat the ventilation air prior to exhaust. The Facility shall also be equipped with a misting system that will assist in mitigation of dust and odors above the tipping floor.

16. The Facility shall otherwise be constructed and operated in substantial conformance with the plans and operating procedures specified in the siting application.

17. Approval is further conditioned upon compliance with all terms of the Host Community Benefit Agreement between the City of West Chicago and Lakeshore Recycling Systems, LLC, dated April 1, 2019; the Secondary Host Community Benefit Agreement between DuPage County and Lakeshore Recycling Systems, LLC, dated March 10, 2020; and the Airport Agreement.

SECTION 5: To meet Criterion 5, the Applicant must show that there is a plan of operation designed to minimize the danger. As in any industrial setting, the potential exists for harm both to the environment and the residents. *Industrial Fuels & Resources v. Illinois Pollution Control Board*, 227 Ill.App.3d 533, 547, 592 N.E.2d 148, 157-58 (1st Dist. 1992). The key to this criterion is minimization. *Id.*, citing *Wabash and Lawrence Counties Taxpayers and Water Drinkers Assoc.*, 198 Ill.App.3d 388, 394, 555 N.E.2d 1081, 1086 (5th Dist. 1990). "There is no requirement that the applicant guarantee no accidents will occur, for it is virtually impossible to eliminate all problems. Id. Guaranteeing an accident-proof facility is not required." *Industrial Fuel*, 227 Ill.App.3d at 547, 592 N.E.2d at 157-58. As such, the City Council of the City of West Chicago find that the Applicant has met its burden of proof as to Criterion 5 of Section 39.2, provided that the Applicant operates the Facility in accordance with the following special conditions:

1. All transfer vehicles utilizing the Facility shall be equipped with auto tarping systems, and all loaded transfer trailers shall be tarped inside of the transfer building prior to exit.

2. Upon receiving final, non-appealable siting approval pursuant to 415 ILCS 5/39.2 to construct and operate the Facility, and upon receiving an IEPA development permit, LRS shall, prior to commencing operation of the waste transfer Facility, 1) execute and grant to the DuPage Airport Authority ("DAA") a new avigation easement, which is Exhibit A to the Agreement Between the DuPage Airport Authority, Oscar (IL) LLC, and Lakeshore Recycling Systems, LLC, dated January 19, 2022 ("Airport Agreement"), 2) LRS shall reduce the roof height of its existing transfer building so as to stay below all critical elevations in the new avigation easement, and 3) LRS shall not allow any penetrations whatsoever to the new avigation easement.

3. The Applicant shall control litter by discharging and loading all waste within the enclosed portion of the Transfer Facility. After unloading, any remaining loose waste shall be removed or contained in the vehicle prior to exiting the site. The Applicant shall use its best efforts to assure that vehicles, hauling waste to or removing waste from the Transfer Facility, shall be suitably covered to prevent waste from leaving the vehicles. A fence to aid in the interception of any blowing litter shall surround the Transfer Facility. The Applicant shall diligently patrol the Subject Property during hours of operation to collect any litter. At a minimum the Applicant shall diligently patrol and remove litter from: the Subject Property; all property owned or controlled by the Applicant; and, before 10:00 a.m. each operating day, Powis Road between Hawthorne Lane and Route 64 (North Avenue) as well as Powis Court. In addition, the Applicant shall, at a minimum, patrol and remove litter from private property within 500 feet of the aforesaid public streets and corresponding rights-of-way with the written permission of the owner of said properties, which permission the Applicant shall diligently attempt to obtain. The Applicant shall provide the City of West Chicago the names, addresses, telephone numbers and email addresses of such owners granting permission. The Applicant shall also post on the company's website the name and email address of an employee of the company to whom any owner of property along Powis Court or Powis Road between Route 64 (North Avenue) and Hawthorne Lane may report litter from the Facility or trucks using the Facility, in which case the Applicant shall remove the litter with the written permission of the owner within two hours of receiving notification of the litter concern. Upon written request, logs showing the private owner, the property address for the request for litter removal, the time such was received and the time the concern was abated shall be available to the City and provided within one business day. Also, the Applicant shall diligently seek the written approval of the DuPage County Forest Preserve District to remove litter, which is visible from Route 64 (North Avenue), from the portion of the Pratts Wayne Woods Forest Preserve that is located within the City of West Chicago. If permission is granted, litter removal from the Forest Preserve shall occur not less than monthly; the City shall be provided written notice of each occurrence within one business day of such being completed.

4. The Applicant shall provide a street sweeper to remove mud and dust tracked onto hard surfaces inside and outside the Transfer Facility, on property owned or controlled by the Applicant as well as Powis Court and Powis Road between Hawthorne Lane and Route 64 (North Avenue) on an as needed basis, but not less frequently than daily.

5. The Applicant shall retain a pest control service on an on-going basis to address the potential for infestation by rodents and other vectors. Such service shall inspect the Transfer Facility on an as needed, but no less than monthly, basis.

6. Trucks transporting hydro excavation waste shall be water-tight. Dump style trucks transporting solidified hydro excavation waste shall include liners that are sufficient to prevent leakage onto roads and other surfaces.

7. The Facility shall be maintained with a negative pressure condition such that the ventilation system provides a minimum of 6 air changes per hour. The Facility design shall include an ozone system to treat the ventilation air prior to exhaust. The Facility shall also be equipped with a misting system that will assist in mitigation of dust and odors above the tipping floor.

8. The Facility shall otherwise be constructed and operated in substantial conformance with the plans and operating procedures specified in the siting application.

SECTION 6: That all ordinances or parts of ordinances conflicting with any of the provisions of this Ordinance shall be and the same is hereby repealed.

SECTION 7: That the Executive Assistant is hereby directed to publish this Ordinance in pamphlet form.

SECTION 8: That this Ordinance shall be in full force and effect from and after its passage, approval and publication in pamphlet form as provided by law.

PASSED this 28th day of February, 2023.

STATE OF ILLINOIS
CITY OF WEST CHICAGO
BEFORE THE CORPORATE AUTHORITIES

In Re:	)
	)
APPLICATION OF	)
LAKESHORE RECYCLING SYSTEMS, LLC	)
FOR SITING APPROVAL UNDER 415 ILCS 5/39.2	)
OF A NEW POLLUTION CONTROL FACILITY	)

REPORT OF HEARING OFFICER RECOMMENDED FINDINGS OF FACT AND RECOMMENDED CONDITIONS OF APPROVAL

INTRODUCTION

Lakeshore Recycling Systems, LLC ("Applicant") has applied for local siting approval of a new municipal waste transfer station on its property at 1655 Powis Road, West Chicago, Illinois. The Applicant owns the real property (the "Property") upon which the proposed pollution control facility ("Facility") is to be located. The Property is located within the corporate limits of the City. The Application was filed on September 16, 2022. The City is to render a decision on the Application in accordance with the criteria and procedures set forth in Section 39.2 of the Illinois Environmental Protection Act (415 ILCS 5/39.2) (the "Act") and its own Code of Ordinances establishing rules and procedures for pollution control facility siting. Among the procedures set forth in the Act and the Code of Ordinances is the requirement that the City conduct a public hearing on the Application, accept public comment, and make a formal decision on the Application within 180 days of the date of filing (March 15, 2023). The City opened the public hearing on January 3, 2023.

In accordance with the procedures and other terms and provisions of the Act and the Code of Ordinances, I reviewed the Application and initial filings. The following parties appeared at the Hearing by and through counsel:

The Applicant ("LRS"), represented by George Mueller;

Protect West Chicago ("PWC") represented by Ricardo Meza and Phil Luetkehans;

"P.O.D.E.R." represented by Robert A. Weinstock;

The City of West Chicago Staff ("City"), represented by Gerald Callaghan; and

The City of West Chicago Corporate Authorities ("Council"), represented by its corporate counsel, Dennis Walsh.

During the hearing, I admitted the Application, the Host Agreement, and testimony and exhibits from witnesses called by the Applicant in support of the Application. I also admitted exhibits and testimony from witnesses called by PWC and PODER in opposition to the Application. I also ruled some proffers of proof by PWC and PODER on "environmental justice related issues" to be irrelevant; an offer of proof on those issues was entered into the record. Further, PODER presented witnesses that testified as to their observations at the existing facility; however, I ruled that they were not experts and that they lacked a proper foundation for some of their offered testimony.

As discussed below, PWC filed a Motion to Dismiss the Application for Lack of Jurisdiction due to fatal defects in the Notice required by 415 ILCS 5/39.2(b) and due to the restrictions of 415 ILCS 5/22.14 concerning the setback from property zoned primarily for residential uses. The Applicant filed Responses in opposition to the Motion.

In addition to evidence and testimony, oral public comment was received throughout the hearing proceedings and written public comment has been received by the City from September

16 through (and including) February 18, 2023. "Comment" is distinguished from "testimony" in that "comment" is not provided under oath and is not subject to cross examination and therefore entitled to less weight than testimony.

I declared the hearing closed on January 19, 2023. In accordance with the Act, written comment was then received by the City for an additional 30 days (i.e., through 11:59:59 p.m. CDST on February 18, 2023, including any written comment post-marked on or before February 18, 2023). Substantial public comment was received in support of the Application; and there was public comment filed from various residents and PODER opposing the application. Notably, public comment was also offered after the close of the hearing by the Applicant including a letter from the Canadian National Railway. As indicated above, public comment is entitled to less weight because it is not subject to being tested by the opportunity for cross examination. I have not relied upon the public comment filed by the Applicant in reaching my findings of fact or conclusions of law.

I received proposed conditions of approval from City Staff; I received argument in favor of siting approval and proposed findings of fact and law from the Applicant; I received argument in opposition to siting approval as well as proposed findings of fact and conclusions of law from PWC; and argument in opposition to approval as well as proposed findings of fact, conclusions of law, and alternatively proposed special conditions from PODER.

RECOMMENDED ACTIONS

It is my recommendation that the City Council vote separately on the three propositions:

1) Whether to grant PWC's motion to dismiss for failure to effectuate proper notice under Section 39.2(b).

2) Whether to grant PWC's motion to dismiss claiming the Facility violates the 1,000 foot setback under Section 22.14.

3) Whether the Proposed Facility (with any special conditions imposed by the City Council) satisfies the siting criteria of Section 39.2.

For the reasons set forth below, my recommendation to the City is to deny the Motion to Dismiss under Section 39.2(b).

For the reasons set forth below, my recommendation to the City is to deny the Motion to Dismiss under Section 5/22.14.

For the reasons set forth below, my recommendation to the City is to impose Special Conditions (appended to my proposed Findings of Fact and Conclusions of Law) and with those Special Conditions approve the Application as satisfying the siting criteria of Section 39.2. More specifically, I find that the application as filed, and the testimony concerning the application as filed, did not establish that the proposed Facility satisfies all of the criteria for local siting approval set forth in Section 39.2 of the Act; however, I further find that, with the imposition of special conditions (and compliance by the Applicant with those conditions), the proposed Facility does satisfy all of the criteria for local siting approval.

MOTION TO DISMISS

Motion to Dismiss Under Section 39.2(b)

Whether the applicant provided proper notice under section 39.2(b) of the Act is a threshold question in the pollution control siting. *Maggio v. Pollution Control Board*, 2014 IL App (2d) 130260, ¶ 15. Compliance with the pre-filing Notice requirements of Section 39.2 is jurisdictional and substantial compliance is not sufficient. See, *Daubs Landfill v. Pollution*

Control Board, 166 Ill.App 3rd 778 (5th Dist. 1998). However, as *Daubs* indicates, perfection in providing the Notice is not the standard.

Section 39.2(b) requires, in relevant part, that the applicant shall cause written notice of its request for site approval "to be served either in person or by registered mail, return receipt requested, on the owners of all property within the subject area not solely owned by the applicant, and on the owners of all property within 250 feet in each direction of the lot line of the subject property, said owners being such persons or entities which appear from the authentic tax records of the County in which such facility is to be located…"). PWC has challenged whether the Applicant fulfilled this requirement with respect to the railroad property putatively owned by the Elgin, Joliet and Eastern Railway.

The evidence concerning the authentic tax records of DuPage County is as follows:

The records placed in evidence by PWC indicate that the owners of the railroad properties within 250 feet of the Facility are, for one parcel, the Union Pacific Railroad Company and, variously and alternatively for the second parcel, the "Elgin, Joliet & Eastern Railway," and/or the "Wisconsin Central, Ltd. (EJ&E Line) Company."

The DuPage County, Illinois 2022 Real Estate Tax Assessment Parcels Map placed in evidence by the Applicant indicates that the second parcel is owned by the "Canadian National Railway."

It is not disputed that the Applicant caused written notice of its request for site approval to be served by registered mail return receipt requested upon the Union Pacific Railroad Company. It is also not disputed that the Applicant did not cause notice of its request for site approval to be served on the Elgin, Joliet & Eastern Railway or on the Wisconsin Central, Ltd.

The publicly available information – of which I take judicial notice – is that the Elgin, Joliet & Eastern Railway was merged into the Wisconsin Central, Ltd. in December of 2012 and, further, that the Wisconsin Central, Ltd. is wholly owned by the Canadian National Railway.

It is not disputed that the Applicant did not serve the Canadian National Railway by personal service nor by registered mail return receipt requested. Instead, the Applicant caused written notice of the Applicant's request for site approval to be delivered via paid courier to the Canadian National Railway at the corporate offices of the Canadian National Railway in Montreal, Quebec, Canada, and that the Applicant's courier secured the signature of a representative of the Canadian National Railway documenting that delivery.

After reviewing the briefing concerning "service" under Illinois law filed by both PWC and the Applicant, I find that the Applicant's use of a paid courier to deliver written notice of the Applicant's request, where the paid courier documented the delivery, was sufficient to satisfy the requirements of Section 39.2(b) of the Act and that strict compliance with the requirements of formal service is not required as a matter of law where, as here, actual notice has been documented. See, e.g., *Waste Management of Illinois v. Illinois Pollution Control Board,* 365 Ill.App.3d 229 (3d Dist. 2005) (difference in delivery method not of "pivotal importance" when delivery method documents that the addressee received the letter); see also, *Olin Corp. v. Bowling,* 95 Ill.App.3d 1113, 1116-17 (5th Dist. 1981)).

Motion to Dismiss Under Section 5/22.14

Section 415 ILCS 5/22.14 states, in relevant part, that "no person may establish any pollution control facility for use as a garbage transfer station, which is located less than 1000 feet from the nearest property zoned for primarily residential uses or within 1000 feet of any

dwelling...." It is undisputed that no dwelling is within 1000 feet of the proposed Facility. However, the railroad properties are zoned ER-1 in the City and are located within 1000 feet of the proposed Facility. It is not disputed that property zoned "ER-1" in the City of West Chicago is property zoned primarily for residential uses. PWC's Motion to Dismiss asserts that Section 5/22.14 bars the Applicant from proceeding with this proposed Facility.

The Applicant argues that the size and the active use of the railroad properties make residential development of the parcels in compliance with ER-1 requirements improbable (and therefore the set-back requirement a nullity with respect to the railroad properties). The Applicant has submitted the testimony of John Hock and the August 23, 2022 letter of Tom Dabareiner, City Community Development Director and Zoning Administrator for the City of West Chicago, to support a finding that, due to the requirements of the ER-1 zoning (minimum lot area, minimum lot width, minimum setbacks, physical features of the property, the lack of access) it is not reasonably possible to develop the railroad properties for residential uses.

Conversely, PWC called Joe Abel, a planning expert, who testified that the Application does not meet the setback requirements of Section 5/22.14. He further testified that if the railroad properties at issue were abandoned by the railroads, and if the railroad properties were then assembled with other adjacent properties, and if those assembled properties were then rezoned to a residential zoning district, then the railroad properties could be put to residential uses.

No evidence was introduced that the conditions recited by Joe Abel as preconditions to residential use of the railroad properties are probable--or even potentially contemplated--for the foreseeable future.

The statutory language of Section 22.14 protects any existing dwelling within 1,000 feet of the facility (regardless of underlying zoning for that dwelling) and properties for which there is a reasonable expectation of future residential use and dwellings based initially upon the zoning designation. The PCB has taken a pragmatic approach to enforcement of Section 22.14. Where actual residential use of property (even though it is zoned for residential uses and even though homes exist on the properties) is not reasonably probable, Section 22.14 will not bar the facility. Although not a binding opinion, the Appellate Court agreed with the PCB's interpretation of Section 22.14 in *Roxana Landfill, Inc. v. Illinois Pollution Control Board,* 2016 WL 4005892, (Ill. App. 5 Dist. 2016).

Here, the proposed facility is not within 1,000 feet of any existing dwelling nor within 1,000 feet of any property zoned for residential use where such actual residential use is reasonably probable in the foreseeable future. Based upon the PCB's decision (ultimately affirmed in *Roxana*), Section 22.14 does not prohibit the siting of the facility in this case nor make the proposed facility incompatible with the character of the area.

JURISDICTION

The record, the statutes, and the case law discussed above establish that the Applicant owns the real property upon which the proposed pollution control facility will be located and that the property and the Facility are wholly located within the City of West Chicago. I have discussed the requirements of 415 ILCS 5/39.2(b) above and, over the objections and motions of PWC and PODER, found that the Applicant fulfilled these requirements. I have also discussed the application of Section 5/22.14 and found that in this case, Section 5/22.14 does not bar the proposed Facility.

I further find that the Applicant complied with all notice requirements of Section 39.2(c) concerning the notice requirements prior to the hearing on the Application. No objections were filed concerning compliance with Section 39.2(c).

Likewise, no objections were filed concerning compliance with the City Code of Ordinances. I find that the Applicant complied with all requirements of the City of West Chicago.

Accordingly, I find that the City has jurisdiction to consider the statutory criteria of Section 39.2.

SECTION 39.2 CRITERIA

These proceedings are governed by Section 39.2 of the Environmental Protection Act ("the Act"), 415 ILCS 5/39.2, which sets forth the exclusive siting procedures for pollution control facilities in Illinois. Section 40.1 of the Act and case law require that siting proceedings and the decision making be conducted in accordance with the requirements of fundamental fairness. The application (or request) must contain sufficient details of the proposed facility demonstrating that it satisfies each of the nine criteria by a preponderance of the evidence. *Land & Lakes Co. v. Illinois Pollution Control Board,* 319 111.App.3d 41, 743 N.E.2d 188, 191 (3d Dist. 2000.) If the applicant fails to establish any one of the criteria, the application should be denied. *Waste Management v. Pollution Control Board,* 175 Ill.App.3d 1023, 520 N.E.2d 682, 689 (2d Dist. 1988).

The Act requires that the Applicant for local siting approval prove compliance with each of nine different criteria (or alternatively demonstrate that they do not apply) and local siting approval shall be granted if the proposed facility meets each of those criteria. As a matter of

law, once an applicant makes a *prima facia* case on a criterion, the burden of proof shifts to the opponents to rebut the applicant's case. *People v. Nuccio*, 43 Ill.2d 375, 253 N.E. 2nd 353 (1969). In order to rule against an applicant on any criterion, the decision maker (the City Council in this case) must find competent rebuttal or impeachment evidence in the record. *Industrial Fuels and Resources v. Illinois Pollution Control Board*, 227 Ill.App.3d 553, 592 N.E. 2d 148 (1st Dist. 1992).

The Applicant called expert witnesses to offer evidence as to the statutory siting criteria. Counsel for PWC and PODER, as well as counsel for the City Staff, cross-examined the witnesses. PWC and PODER also called witnesses in rebuttal. The basis and rationale for my findings on each criterion is set forth below.

1. The Facility is necessary to accommodate the waste needs of the area it is intended to serve.

This Criterion is contested by PWC and PODER. I find that Criterion 1 is satisfied.

Criterion 1 has been the subject of litigation and the Courts have provided guidance as to its requirements. For example, to prove criterion 1, the courts have previously held the Applicant must show that the proposed Facility is reasonably required by the waste needs of the service area, taking into consideration the waste production of the area and the waste disposal capacity available to it. *Waste Management of Illinois, Inc. v. Pollution Control Board,* 175 Ill.App.3d 1023, 1031, 530 N.E.2d 682, 689 (2d Dist. 1988). Although a petitioner need not show absolute necessity, it must demonstrate that the new facility would be expedient as well as reasonably convenient. *Waste Management of Illinois, Inc. v. Pollution Control Board,* 234 Ill.App.3d 65, 69, 600 N.E.2d 55, 57 (1st Dist. 1992). The petition must show that the landfill is reasonably required by the waste needs of the area it is intended to serve, including the area's waste production and disposal capabilities. *Id.*

PWC and PODER both focused on the available transfer station disposal capacity for the area to be served (including facilities outside of, but still serving, the area intended to be served) and they argue that the existing excess capacity—which is not contested by the Applicant—means that the proposed Facility is not necessary and therefore does not satisfy Criterion 1.

However, in *Will County v. Village of Rockdale*, 2018 IL. App (3d) 160463, 121 N.E.2d 468, 484 (3d Dist. 2018), our Appellate Court held that Criterion 1 is not determined exclusively be reference to capacity analysis. Indeed, in *Rockdale,* the applicant submitted no capacity analysis at all. Instead, the Appellate Court agreed with Village and the Applicant that the "waste needs of the area" could include other factors such as improving competition, benefits through the host agreements, operational concerns and hours, and positive environmental impacts.

In this case, the Applicant called John Hock from Civil and Environmental Consultants, Inc. to testify on this criterion. Mr. Hock acknowledged the existing available capacity at other transfer stations but testified that the need for this Facility is found in the need to increase competition in the hauling market (through further vertical integration of disposal from curb-to transfer station-to landfill, this facility will increase competition for the hauling of waste in the area); in reduced environmental impacts (less diesel exhaust as a result of shorter travel distances); in increased recycling; in the meeting the need for the handling of hydro-wastes; and in operational benefits (hours of operation). Cross-examination focused on the available capacity and questioned the competitive impacts but did not overcome the substantive proof on the benefits to which Mr. Hock testified.

PODER focused on the premise that there are positive environmental impacts, arguing just the opposite that the added operations at this Property will necessarily increase diesel

emissions in the community. But PODER has offered no competent evidence to contradict the demonstrated savings in overall emissions as testified to by the Applicant concerning hauling and disposal activities presently (i.e., before siting) and the amount of reduced emissions from the availability of this transfer station. Moreover, a premise of PODER's analysis is that there would be no other new industrial uses of the Applicant's property of any kind that would involve diesel engines. No evidence was offered to support the validity of such a premise.

PWC called John Lardner. Mr. Lardner focused on the available capacity at transfer stations in and around the area. But Mr. Lardner also admitted that Criterion 1 now considers environmental factors, impacts on competition, and operational concerns--and Mr. Lardner further admitted that he has so opined in other siting proceedings—although he did not consider competitive or environmental matters in reaching his conclusions in this case. Mr. Lardner further admitted that there is a need for a transfer station to handle hydro-excavation waste.

2. The Facility is so designed, located, and proposed to be Operated that the Public Health, Safety and Welfare will be Protected.

This Criterion is contested by PWC and PODER. I find that Criterion 2 is satisfied through the imposition of--and compliance by the Applicant with--special conditions.

Like Criterion 1, Criterion 2 has been the subject of litigation and guidance is available from the Courts. To prove criterion 2, the Applicant must demonstrate that the proposed Facility is designed, located and proposed to be operated to protect the public health, safety and welfare. 415 ILCS 5/39.2 (a) (ii). This includes a demonstration that the facility is not flawed from a public safety standpoint and that its proposed operations are neither substandard nor unacceptably risky. Industrial Fuels and Resources, Inc. v. Illinois Pollution Control Board, 227 Ill.App.3rd 533, 592 N.E.2d. 148, 157 (1st Dist. 1992).

Mr. Hock testified that the Application met the location standards (wetlands, archeological sites, threatened species, wild and scenic rivers and the airport). PWC questioned Mr. Hock extensively on airport safety related issues and particularly operations in the Runway Protection Zone. The record also contains a letter from the DuPage Airport Authority in which LRS agreed to comply with several conditions and actions required of LRS by the Airport Authority to safeguard airport operations. Imposition and compliance with these conditions are essential to a finding that Criterion 2 can be satisfied. With the imposition of the conditions set forth in that letter, the Airport Authority concluded that proposed Facility did not pose a threat to the safety of the Airport. No expert testimony was introduced that challenged that determination by the Airport Authority.

Mr. Hock also described the proposed site plan and the proposed operations. The Facility as proposed will handle a maximum of 1950 tons of material per day composed of 650 tons of municipal solid waste, 300 tons per day of hydro-excavation waste, 750 tons per day of construction or demolition debris (for which the site is already permitted), and 250 tons per day of single-stream recyclables.

Mr. Hock testified as to the fact that the transfer building will be a "fully enclosed" facility (which is an important requirement to protect the airport) and testified as to the truck movements on site, the number and function of "spotters," the operation of the entrance doors, the movements and operations of the transfer trailers, and the movements and operations of the front-loaders on the tipping floor. Mr. Hock testified as to the anticipated sources of business and the equipment that is anticipated to be used by LRS to bring that equipment to the Facility. Mr. Hock described the stormwater management plan for the proposed facility and testified that

the stormwater management has been approved by DuPage County and the City. There was no substantive challenge to the stormwater management plan in place.

PWC challenged whether the Facility, as proposed, was "fully enclosed" and entered videos of a different LRS facility in the record to challenge the Applicant on whether the facility would, in practice, actually operate as described. Mr. Hock responded that timing and operational differences shown in the video is a consequence of the different sources of material (and equipment bringing that material) from that which is anticipated at the Facility.

PWC also raised issues concerning litter control and tarping of the trailers, as well as the speed and the efficiency of the movements of the front loaders as used in Mr. Hock's modeling and calculations. Based on an early pre-filing review of the design performed by the City's engineering consultant, PWC (and subsequently the City Staff) also raised questions about the design of the building, push walls and other structural elements. Under PWC's cross examination, and then again under cross examination by City Staff, Mr. Hock admitted that the imposition of certain special conditions would improve the Facility and add protections for public health, welfare and safety.

PODER called Steve DeLaRosa who raised concerns about employee safety and, particularly, the proposed use of ozone by the Applicant. There was no evidence, however, that what the Applicant was proposing did not comply with the applicable OSHA regulations.

PODER also inquired into the potential use of exclusively electric powered vehicles. The evidence, however, is that currently the technology does not exist to require the Applicant to use an exclusively electric-powered fleet of vehicles or equipment.

The application, modeling evidence, and testimony - with the special conditions in place -- demonstrated that the Facility could safely handle the proposed maximum tonnages per day. The special conditions are appended to the Proposed Findings of Fact and Conclusions of Law.

3. The Facility is located so as to minimize incompatibility With the Character of the Surrounding Area and to Minimize the Effect On the Value of Surrounding Property.

This Criterion is contested by PWC and PODER. I find that Criterion 3 is satisfied.

The Application sets out the land uses in the vicinity and manner in which the proposed Facility relates to the character of the area. Applicant called Dale Kleszynski, a licensed Illinois real estate appraiser and member of the Appraisal Institute. He testified to the historical use of the subject property and surrounding area--which includes current and historical uses related to the management and disposal of waste—and characterized the area as "industrial in character." The area is also segregated from other uses, especially residential uses.

In addition to concluding that the location minimizes incompatibility with uses in the surrounding area, Mr. Kleszynski also concluded that the Facility is located to minimize the effect on the value of surrounding property. Mr. Kleszynski submitted a highest and best use analysis of the subject property for purposes of analyzing impact on the values of surrounding property. He opined that this highest and best use analysis is related to the statutory siting criterion in that highest and best use of property is the use which would, by definition, minimize any deleterious effect on the values of the surrounding property. After reviewing the traditional criteria used to analyze highest and best use, he testified that development as a solid waste transfer station would fit within the highest and best use of the property.

In rebuttal, PWC called Kurt Kielisch who rendered the opinion that the highest and best use analysis employed by Mr. Kleszynski did not accurately determine the effect the Facility

would have on surrounding property values. Mr. Kielisch is not a licensed Illinois appraiser, has never previously testified in a Section 39.2 siting hearing, and further testified that he is not knowledgeable about the siting process. He testified that a matched pairs analysis (rather than a highest and best use analysis) should be used to determine "the least intrusive use of the property" and whether the proposed use would have "positive impact on the surrounding property values." He further admitted that such an analysis of sales would not be possible here due to the 20-year existence of the nearby Groot transfer station.

Because of his lack of familiarity with the actual siting criterion, the testimony of Mr. Kielisch was of no probative value. Criterion 3 requires an analysis as to whether the location minimizes incompatibility with the character of the surrounding area and minimizes the (obviously assumed negative) impact on property values--not (as he opined) whether the proposed use has a positive impact. The analysis relevant to Criterion 3 is simply not that to which Mr. Kielisch testified (he also offered no opinion on the character of the uses in the area). Contrary to Mr. Kielisch's opinion, the use of the highest-and-best use methodology as an analytical tool for determining the magnitude of potential impact of the proposed facility on surrounding property values has been recognized by the PCB as an appropriate methodology for expert opinions concerning Criterion 3.

4. The Facility is located outside the Boundary of the100 Year Floodplain.

I find that the Applicant demonstrated that the Facility meets Criterion 4.

The testimony and other evidence entered in the Record at the Hearing supports the finding that the Facility meets this Criterion. No challenge to this Criterion has been filed.

5. The Plan of Operations for the Facility is designed to Minimize the Danger to the surrounding Area from Fire, Spills and Other Operational Accidents.

I find that the Applicant demonstrated that the Facility meets Criterion 5 but I also find that the testimony of Mr. Hock, under cross examination, and the testimony of Colin Hale concerning existing litter problems with the current operations at the Property all support the imposition of and compliance with special conditions to further improve the Plan of Operations and minimize dangers to the surrounding area. In particular, I find that the testimony concerning where, when and how transfer trailers will be tarped and the handling of hydro-wastes will be improved to further minimize the danger to the surrounding area from litter or spills by the imposition of special conditions. No formal challenge to this Criterion has been filed.

6. The Traffic Patterns to and from the Facility Are So Designed as to Minimize the impact on Existing Traffic Flow.

I find that the Applicant demonstrated that the proposed Facility meets Criterion 6.

The Applicant called Michael Werthmann, a registered professional engineer and certified professional traffic operations engineer, with more than 25 years of traffic engineering experience for both the private and public sectors. Mr. Werthmann testified that he used standard methodology used by transportation planning officials. Mr. Werthmann testified he studied traffic volumes, distributions and movements at the site entrance and the potentially affected intersections. He described the local roadway system and detailed present and future improvements on that system. He testified that the location, existing operations, and proposed route for the transfer trailers all minimized the impact on existing traffic flows. No challenge to this Criterion has been filed; however, both the City and PODER proposed a special condition concerning the traffic routes and

such is included in the Special Conditions appended to the Findings of Fact and Conclusions of Law.

7. Hazardous Waste Emergency Plan

Per the Application and the Testimony of John Hock, the Facility will not be treating, storing or disposing of Hazardous Waste. This Criterion is therefore not applicable and therefore deemed satisfied. No challenge to this Criterion has been filed.

8. If the Facility is to be Located in a County Where The County Board has adopted a Solid Waste Management Plan Consistent With The Planning Requirements of the Local Solid Waste Disposal Act or the Solid Waste Planning and Recycling Act, The Facility is Consistent with that Plan.

This Criterion is contested by PWC and PODER. I find that Criterion 8 is satisfied.

John Hock reviewed the contents of the DuPage County Solid Waste Management Plan from its adoption to its most recent update. He reviewed the provisions concerning pollution control facilities in that plan including the recognized need for additional transfer stations, additional recycling and additional competition. On cross-examination by PWC, Mr. Hock agreed that the 2007 Plan Update recommended that an additional transfer station should be located in the "southern portion" of the County and that West Chicago is not in the southern portion of the County. However, he further testified that such a recommendation concerning the location of additional transfer stations did not appear in subsequent plan updates.

Mr. Hock also testified as to the secondary host agreement executed between LRS and DuPage County in which the County stated the proposed Facility appears to be consistent with the County's plan. PWC's witness, John Lardner, testified that "appears to be consistent" is not the same as "is consistent" and opined that the Facility is in fact not consistent with the County's

Plan. Lardner did acknowledge that the County's Plan does call for more transfer stations, more recycling, and more competition.

I find the PCB decision in *Rockdale* is again instructive. As in this case, both the PCB (and the court) in *Rockdale* found that the very existence of a secondary host agreement approved by the County weighs heavily in favor of a finding that Facility is consistent with the County's plan (as it is the County's plan to interpret and administer). Because the County approved the secondary host agreement for this Facility, I find the proposal to be consistent with the County's plan.

9. Recharge Area

Per the Application and the testimony of John Hock, the Facility is not located in a regulated recharge area. This Criterion is therefore not applicable and therefore deemed satisfied. No challenge to this Criterion has been filed.

10. Consideration of Previous Operating Experience

The Act permits the Corporate Authorities to consider the previous operating experience of an applicant. Specifically, the Act permits the City to consider the "past record of convictions or admissions of violations of the Applicant...". Here, the record contains no past convictions of violations by LRS nor admissions of violations by LRS, which favors approval of the Application.

PWC did enter videos showing actual operations at different LRS facility and PODER called witnesses about the current operations at the Property raising litter and air quality concerns and that testimony serves as the basis for the imposition of some special conditions, but that testimony did include any evidence of any actual violations of the regulatory standards and

therefore is not a sufficient basis to find the proposed Facility does not satisfy the criteria of Section 39.2.

PUBLIC COMMENTS

In addition to the public comment (oral and written) received during the Hearing, the City Clerk received written public comments after the hearing closed. The public comment supporting the Application focused on the benefits that the Facility would bring to the City. PODER, the Applicant, and persons associated with both also filed comment after the hearing closed. I found that the public comment, while important to understand the context of the application, was not focused on the statutory criteria in a relevant and "probative" way or, alternatively, lacked sufficient evidence about the sources cited (i.e., an evidentiary foundation) as required by the statute and case law and therefore the comment, neither singly nor collectively, caused any change in how I weighed the evidence received from the Application, the admitted exhibits, and the admitted testimony.

PROPOSED FINDINGS OF FACT

My proposed findings of fact are attached.

Respectfully submitted,

Derke J. Price

Ancel Glink, PC
140 South Dearborn, 6th Floor
Chicago, Illinois 60603

4828-0676-7394, v. 1

PROPOSED FINDINGS OF FACT AND CONCLUSIONS OF LAW

1. On September 16, 2022, Lakeshore Recycling Systems, LLC ("Applicant") applied to the City of West Chicago ("City") for local siting approval of a new municipal waste transfer station on its 27.66 acre parcel of real estate at 1655 Powis Road, West Chicago, Illinois, 60185 (as legally described in the application and hereafter referred to as the "Property").

2. The Applicant owns the Property upon which the proposed pollution control facility ("Facility") is to be located.

3. The Property is located within the corporate limits of the City, is the subject of a Host Community Benefit Agreement between the Applicant and the City, and the City has jurisdiction to consider the Application.

4. The public hearing on the application was opened on January 3, 2023.

5. The hearing closed on January 19, 2023.

6. In accordance with the Act, written comment was then received by the Office of the City Manager acting as City Clerk for and additional 30 days after the close of the Hearing (i.e., through 11:59:59 p.m. CDST on February 20, 2023, including any written comment post-marked on or before February 18, 2023).

7. Concerning the pre-filing notice requirements of Section 39.2(b) (which states, in relevant part, that the applicant shall cause written notice of its request for site approval "to be served either in person or by registered mail, return receipt requested, on the owners of all property within the subject area not solely owned by the applicant, and on the owners of all property within 250 feet in each direction of the lot line of the subject property, said owners being such persons or entities which appear from the authentic tax records of the County in which such facility is to be located…"):

A) with respect to all properties within 250 feet of the proposed facility, other than railroad properties, the applicant caused written notice of its request for site approval to be served by registered mail return receipt requested upon all such owners;

B) with respect to the railroad properties within 250 feet of the proposed facility, the owners as appears from authentic—and in some cases conflicting--tax records of DuPage County, are the Union Pacific Railroad Company and, variously and alternatively, the Elgin, Joliet & Eastern Railway, the Wisconsin Central, Ltd. (EJ&E Line) Company, and, per the DuPage County, Illinois 2022 Real Estate Tax Assessment Parcels Map, the Canadian National Railway;

C) the Applicant caused written notice of its request for site approval to be served by registered mail return receipt requested upon the Union Pacific Railroad Company;

D) the Applicant did not cause notice of its request for site approval to be served on the Elgin, Joliet & Eastern Railway;

E) the Elgin, Joliet & Eastern Railway was merged into the Wisconsin Central, Ltd. in December of 2012;

F) the Applicant did not cause notice of its request for site approval to be served on the Wisconsin Central, Ltd.;

G) the Wisconsin Central, Ltd. is a wholly owned subsidiary of the Canadian National Railway;

H) the Applicant caused written notice of the Applicant's request for site approval to be delivered via paid courier to the Canadian National Railway at the corporate offices of the Canadian National Railway in Montreal, Quebec, Canada;

I) the Applicant's courier secured the signature of a representative of the Canadian National Railway for that delivery;

J) the Applicant's use of the paid courier to deliver written notice of the Applicant's request, together with the documentation from the courier of that delivery, is sufficient to effectuate delivery of the request for site approval to the ultimate corporate parent/owner of the railroad property (not owned by the Union Pacific Railroad) and thereby satisfy the requirements of Section 39.2(b) of the Act.

8. Concerning 415 ILCS 5/22.14 (which states, in relevant part, that "no person may establish any pollution control facility for use as a garbage transfer station, which is located less than 1000 feet from the nearest property zoned for primarily residential uses or within 1000 feet of any dwelling"):

A) no dwelling is within 1000 feet of the proposed facility;

B) the railroad properties are zoned ER-1 in the City and are located within 1000 feet of the proposed facility;

C) property zoned "ER-1" in the City of West Chicago is property zoned primarily for residential uses;

D) the size and the active use of the railroad properties make residential development of the parcels in compliance with ER-1 requirements improbable as a practical and pragmatic matter (see August 23, 2022 letter of Tom Dabareiner, City Community Development Director and Zoning Administrator);

E) in applying Section 22.14 restrictions, the Pollution Control Board (and at least one Appellate Court) has interpreted and enforced Section 22.14 so as to protect actual residences or properties where residential development is probable (at least as an initial matter of zoning) (see, *Roxana Landfill, Inc. v. Illinois Pollution Control Board,* 2016 WL 4005892, (Ill. App. 5 Dist. 2016) (a Rule 23 opinion affirming the PCB which allowed siting even though actual housing structures and residentially zoned properties were within 1,000 feet of the facility because the residential properties were now vacant and deed restrictions against residential use had been recorded against the properties, making actual residential use improbable, though not impossible);

F) Accordingly, Section 22.14 does not bar this proposed facility.

9. The Applicant complied with all pre-filing notice requirements of Section 39.2(c) of the Act.

10. The siting proceedings herein, both procedurally and substantively, complied with the requirements of fundamental fairness:

A) PWC and PODER interposed an objection to the failure to make the Pre-Filing Notice available on the City's website in Spanish; however, the Act itself does not require that

the Pre-Filing Notice in these proceedings be made available in a language other than English and no case has applied language access requirements to a Section 39.2 Siting Hearing nor the Section 39.2 filings.

B) PWC and PODER interposed objections to the lack of a Spanish-language translator for the hearing proceedings; however, neither the Act itself does nor any other statute or case requires that Language Access Services be made available for a Section 39.2 Siting Hearing (compare 725 ILCS 140/1 requiring such services in the criminal law context).

C) PWC and PODER filed objections to the exclusion of proffered evidence concerning "environmental justice related issues;" however, the State of Illinois has not amended the Environmental Protection Act to add "environmental justice related issues" to the Section 39.2 criteria and neither the Pollution Control Board nor any Court has held that "environmental justice related issues" is now a part of any criterion under Section 39.2.

D) In the absence of a defined statutory criteria concerning "environmental justice related issues," testimony proffered about such issues is not relevant to the siting decision.

11. Based on the understanding of Criterion 1 as articulated by the Pollution Control Board and affirmed by the Illinois Appellate Court for the Third District in *Will County v. Village of Rockdale,* 121 N.E.3d 468 (3d Dist. 2018), the Applicant demonstrated that the proposed Facility meets Criterion 1: "the facility is necessary to accommodate the waste needs of the area it is intended to serve...."

12. The Applicant did not demonstrate that the Facility--as proposed in the Application--meets Criterion 2; however, with the imposition of the special conditions proposed by City Staff (and compliance therewith by the Applicant) which are attached hereto as Exhibit A, the proposed Facility does meet Criterion 2: "the facility is so designed, located and proposed to be operated that the public health, safety and welfare will be protected;"

13. The Applicant demonstrated that the proposed Facility meets Criterion 3: "the facility is so located so as to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property;"

14. The Applicant demonstrated that the proposed Facility meets Criterion 4; "for a facility other than a sanitary landfill or waste disposal site, the facility is located outside the boundary of the 100 year floodplain or the site is flood-proofed;"

15. The Applicant did not demonstrate—as proposed in the Application--that the Facility meets Criterion 5; however, with the imposition of the special conditions proposed by City Staff (and compliance therewith by the Applicant) which are attached hereto as Exhibit A, the proposed Facility does meet Criterion 5: "the plan of operations for the is designed to minimize the danger to the surrounding area from fire, spills, or other operational accidents;"

16. The Applicant demonstrated that the proposed Facility meets Criterion 6: "the traffic patterns to or from the facility are so designed as to minimize the impact on existing traffic flows;

17. The Applicant demonstrated that the facility will not be accepting hazardous waste and therefore demonstrated that Criterion 7 is not applicable.

18. Based on the analysis of Criterion 8 as articulated by the Pollution Control Board and affirmed by the Illinois Appellate Court for the Third District in *Will County v. Village of Rockdale,* 121 N.E.3d 468 (3d Dist. 2018), the Applicant demonstrated that the proposed Facility meets Criterion 8: "…where the county board has adopted a solid waste management plan consistent with the planning requirements of the Local Solid Waste Disposal Act or the Solid Waste Planning and Recycling Act, the facility is consistent with that plan; …"

19. The Applicant demonstrated that the facility is not located within a regulated recharge area and therefore Criterion 9 is not applicable.

20. The Applicant's operating history demonstrates that the Applicant is qualified to operate the Facility safely and properly and provides no basis to deny the Application.

21. The proposed Facility, when developed and operated in compliance with the special conditions, is consistent with all appropriate and relevant location standards, including airport setback requirements, wetlands standards, seismic impact zone standards, and residential setback requirements.

22. The Applicant has agreed to comply and approval is conditioned upon compliance with all terms of the Host Community Benefit Agreement between the City of West Chicago and Lakeshore Recycling Systems, LLC, dated April 1, 2019; the Secondary Host Community Benefit Agreement between DuPage County and Lakeshore Recycling Systems, LLC, dated March 10, 2020; and the Airport Agreement.

With the imposition of and compliance by the Applicant with the Special Conditions set forth above, the evidence demonstrates that the Application complies with each of the nine siting criteria in Sec. 39.2(a) of the Act and therefore the City should grant siting approval.

Respectfully submitted,

Derke J. Price

4847-5279-7990, v. 1

EXHIBIT A

Special Conditions

1. The maximum tonnage per day that may be received by the facility shall not exceed 1,950 tons per day, of which up to 650 tons per day may be municipal solid waste (MSW), up to 300 tons per day may be hydro excavation waste, up to 750 tons per day may be construction and demolition debris (C&D) and up to 250 tons per day may be single stream recyclables (SSR).

2. The Applicant shall keep the truck doors to the transfer facility closed, except for emergencies and to allow trucks to enter and exit the facility, during regular business hours. The doors shall be equipped with sensors such that they will open and close automatically as vehicles enter and exit the transfer building. Alternatively, an employee may open and close the doors when trucks access and exit the transfer facility.

3. The push walls in the transfer facility shall be designed to ensure to the satisfaction of the City that there will be no buildup of waste behind the walls which could result in fire, odor, or harborage for vectors. In addition, the Applicant shall provide a certification from a licensed structural engineer that the push walls will be capable of withstanding impact from waste loading equipment at 5 mph without shearing the beams or compromising the integrity of the building's walls.

4. All transfer vehicles utilizing the facility shall be equipped with auto tarping systems, and all loaded transfer trailers shall be tarped inside of the transfer building prior to exit.

5. The Applicant shall continue to operate the C&D recycling portions of the facility in accordance with the requirements of 415 ILCS 5/22.38 for so long as the current permit (2015-124-OP) remains in effect. If the current permit (2015-124-OP) is discontinued, replaced or terminated, the following conditions, as modified, shall remain in effect:

- *The facility shall be designed and constructed with roads and traffic flow patterns adequate for the volume, type and weight of traffic using the facility including, but not limited to hauling vehicles, emergency vehicles, and on-site equipment. Sufficient area shall be maintained to minimize traffic congestion, provide for safe operation, and allow for queuing of waste hauling vehicles.*
- *The operator shall provide adequate parking for all vehicles and equipment used at the facility and as necessary for queued hauling vehicles.*
- *Roadways and parking areas on the facility premises shall be designed and constructed for use in all weather, considering the volume, type and weight of traffic and equipment at the facility.*
- *The facility shall be designed and constructed so that site surface drainage will be diverted around or away from the recycling and waste transfer areas. Surface drainage shall be designed and controlled so that adjacent property owners encounter no adverse effects during development, operation and after closure of the facility.*
- *Run-off from roadways and parking areas shall be controlled using storm sewers or shall be compatible with natural drainage for the site. Best management practices (e.g., design features, operating procedures, maintenance procedures, prohibition of certain practices and treatment)*

shall be used to ensure that run-off from these areas does not carry wastes, debris or constituents thereof, fuel, oil or other residues to soil, surface water or groundwater.

- *The facility, including, but not limited to, all structures, roads, parking and recycling areas, shall be designed and constructed to prevent malodors, noise, vibrations, dust and exhaust from creating a nuisance or health hazard during development, operation and closure of the facility. Facility features (e.g., berms, buffer areas, paving, grade reduction), best available technology (e.g., mufflers, machinery enclosures, sound absorbent materials, odor neutralizing systems, air filtering systems, misting systems), and building features (e.g., enclosed structures, building orientation) shall be among the measures to be considered to achieve compliance.*
- *The facility shall be designed and constructed to prevent litter and other debris from leaving the facility property. Facility features (e.g., windbreaks, fencing, netting, etc.) shall be among the measures considered to ensure that the debris does not become wind strewn and that no other provisions of the Act are violated.*
- *No regulated air emissions shall occur from these facilities, except as authorized by a permit from the Illinois Environmental Protection Agency (IEPA)Bureau of Air (BOA). No process discharge to Waters of the State or to a sanitary sewer shall occur from these facilities, except as authorized by a permit from the IEPA Bureau of Water (BOW).*
- *The facility shall be designed and constructed with a water supply of adequate volume, pressure, and in locations sufficient for cleaning, firefighting, personal sanitary facilities, and as otherwise necessary to satisfy operating requirements (e.g., dust suppression, wheel washing) and the contingency plan.*
- *The facility shall be designed and constructed with exterior and interior lighting for roadways, and waste handling areas adequate to perform safely and effectively all necessary activities.*
- *The facility shall be designed and constructed with truck wheel curbs, guard rails, bumpers, posts or equivalents to prevent backing into fuel storage tanks, equipment, and other structures.*
- *The facility shall be designed and constructed with adequate shelter, sanitary facilities, and emergency communications for employees.*
- *The facility operator shall install fences and gates, as necessary, to limit entry. Except during operating hours, the gates shall be securely locked to prevent unauthorized entry.*
- *The facility may receive general construction and demolition debris at the site Monday through Saturday, 24 hours a day. The facility shall be closed on Sunday and the six major federal holidays (New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day). When the facility is operated before sunrise or after sunset, adequate lighting shall be provided. If it is required for the facility to be open beyond normal operating hours to respond to emergency situations, a written record of the date, time and reason the facility was open shall be maintained in facility operating records. The IEPA's Regional Office and the county authority responsible for inspection of the facility, per a delegation agreement with the IEPA, must be notified and must grant approval each day that the operating hours need to be extended. No later than 10:00 a.m. of the first operating day after the operating hours have been extended, the Applicant shall send a written report by email to the City Administrator, which describes the length of the extension of the operating hours and the reason for the extension.*
- *The facility may receive and transfer MSW, hydro excavation waste and SSR from 4:00 a.m. to 12:00 a.m. Monday through Friday and from 4:00 a.m. to 12:00 p.m. on Saturday, with no*

operation on Sunday or the six major federal holidays (New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day), provided that on the Saturday following a major federal holiday, regular business hours may be extended to 12:00 a.m. If it is required for the facility to be open beyond normal operating hours to respond to emergency situations, a written record of the date, time and reason the facility was open shall be maintained in facility operating records. The City of West Chicago must be notified by email to the City Administrator each day that the operating hours need to be extended. The IEPA's Regional Office and the county authority responsible for inspection of the facility, per a delegation agreement with the IEPA, must be notified and must grant approval each day that the operating hours need to be extended.

- *Fire safety equipment (fire extinguishers) shall be maintained in accordance with recommended practice.*
- *Non-recyclable waste may be kept temporarily in covered containers or transfer trailers for no more than 24 hours (except on weekends and holidays), provided that loaded or partially loaded trailers intended to be stored overnight or that will not be picked up and transported the same operating day are stored indoors and suitably covered.*
- *Piles of general construction or demolition debris shall be covered or wetted to prevent air-borne dust.*
- *The facility shall be designed and constructed to prevent unauthorized access to recycling areas, storage areas for unauthorized wastes, salvaged and recycled materials, and staging areas where loaded site equipment or vehicles may be parked. Facility features such as fences and gates shall be provided.*
- *Waste handling areas shall be designed and constructed to prevent exposure of wastes and recyclable materials to run-off and flooding.*
- *The sorting areas shall be properly graded and compacted to prevent ponding from forming leachate during storms.*
- *Records shall be maintained on-site at the facility office for each operating day. The operator shall record operating hours, load ticket information, load inspections, daily processing time, volume processed per day, transfer load out and waste disposition details.*
- *The operator shall, within 48 hours of receipt of the general construction or demolition debris at the facility, sort the general construction or demolition debris. The operator shall separate the recyclable general construction or demolition debris from nonrecyclable general construction or demolition debris and dispose of the non-recyclable general construction or demolition debris, in accordance with Section 22.38(b)(l) of the Act.*
- *The operator must place wood, tires, and other unacceptable materials in covered dumpsters or vehicles adequate to prevent the release of leachate.*
- *All non-recyclable general construction or demolition debris, and unacceptable material shall be moved to the waste transfer facility on the same day it is received, and disposal of such material shall be handled in accordance with all applicable federal, State, and local requirements and with these conditions.*
- *The operator shall transport all non-putrescible recyclable general construction or demolition debris for recycling or disposal within 6 months of its receipt at the facility, in accordance with Section 22.38(b)(4) of the Act.*

- *In accordance with Section 22.38(b)(6) of the Act, the operator shall employ tagging and record keeping procedures to identify the source and transporter of C&D material accepted by the facility.*
- *The operator shall use load tickets to control the site activities and comply with the tagging and record keeping procedures. These load tickets shall identify the source of the C&D material delivered to the site. The operator shall use these tickets to identify the location in the yard or in the covered dumpsters and the length of time stored at the site to achieve compliance.*
- *The operator is prohibited from receiving hazardous and asbestos containing materials.*
- *The operator may separate clean concrete and clean soil from the general construction or demolition debris as recyclable materials for use in construction. The operator is permitted to store recyclable concrete and clean soil for a maximum period of 3 months.*
- *The operator may store the steel separated from concrete or other construction or demolition debris for a maximum period of 6 months. After six months, the steel must be sent offsite for disposal or recycling.*
- *The operator shall ensure that site surface drainage, during development, during operation and after the site is closed, shall be such that no adverse effects are encountered by adjacent property owners.*
- *The best available technology (mufflers, berms and other sound shielding devices) shall be employed to minimize equipment noise impacts on property adjacent to the site during both development, operation and during any applicable post-closure care period.*
- *Management of Unauthorized Waste by the operator*
    - *Landscape waste found to be mixed with general construction and demolition debris shall be removed the same day and transported to a facility that is operating in accordance with the Illinois Environmental Protection Act (Act), Title V, Sections 21 and 39 (415 ILCS 5/21 and 39].*
    - *Lead-acid batteries mixed with general construction and demolition debris shall be removed the same day and transported either to a drop-off center handling such waste, or to a lead-acid battery retailer.*
    - *Special wastes including hazardous waste, non-hazardous special waste, and potentially infectious medical waste mixed with general construction and demolition debris shall be containerized separately and removed from the property no later than five hours after receipt by a licensed special waste hauler. Special wastes shall be transported to a licensed special waste management facility that has obtained authorization to accept such waste. The operator shall maintain a contract with haulers so that the immediate removal is ensured. The operator shall develop an emergency response/action plan for such occurrences.*
    - *Asbestos debris from general construction and demolition debris shall be managed in accordance with the National Emission Standards for Hazardous Air Pollutants (NESHAPS) regulations.*
    - *Tires found to be mixed with general construction and demolition debris shall be removed and managed in accordance with Section 55 of the Act [415 ILCS 5/55].*
    - *White good components mixed with general construction and demolition debris shall be removed and managed in accordance with Section 22.28 of the Act [415 LCS 5/22.28].*

- *No person may knowingly mix liquid used oil with general construction and demolition debris.*
- *After the unauthorized waste has been removed from the facility, a thorough cleanup of the affected area shall be made according to the type of unauthorized waste managed. Records shall be kept for three years and will be made available to the IEPA upon request. In addition, the Applicant shall provide an annual written report to the City of West Chicago not later than January 31 of each year, which report shall: list the types, quantities and dates of receipt of all unauthorized waste; the generators of such waste; and the sites to which the wastes were delivered for disposal, processing or handling.*
- *The following wastes shall not be accepted at the facility:*
  - *Hazardous substances (as defined by Section 3.215 of the Illinois Environmental Protection Act);*
  - *Hazardous waste (as defined by Section 3.220 of the Illinois Environmental Protection Act);*
  - *Potentially infectious medical wastes (as defined by the Illinois Environmental Protection Act in Section 3.84);*
  - *Universal waste (as defined by Title 35 of the Illinois Administrative Code Part 733 including batteries, pesticides, mercury-containing equipment and lamps);*
  - *Regulated asbestos containing materials;*
  - *Polychlorinated biphenyl wastes;*
  - *Used motor oil;*
  - *Source, special or by-product nuclear materials;*
  - *Radioactive wastes (both high and low level);*
  - *Sludge;*
  - *White goods (incidental white goods received at the proposed transfer station will be segregated and stored for pickup by an off-site recycler);*
  - *Lead-acid automotive batteries (incidental automotive batteries received at the transfer station will be segregated and stored for pickup by an off-site recycler);*
  - *Used tires (incidental tires received at the transfer station will be segregated and stored for pickup by an off-site recycler); and*
  - *Landscape waste.*

- *Special wastes generated at the site for disposal, storage, incineration or further treatment elsewhere shall be transported by the operator to the receiving facility utilizing the IEPA's Special Waste Authorization system and manifest system.*

6. Upon receiving final, non-appealable siting approval pursuant to 415 ILCS 5/39.2 to construct and operate the West DuPage RTS, and upon receiving an IEPA development permit, LRS shall, prior to commencing operation of the waste transfer facility, 1) execute and grant to the DuPage Airport Authority ("DAA") a new avigation easement, which is Exhibit A to the Agreement Between the DuPage Airport Authority, Oscar (IL) LLC, and Lakeshore Recycling Systems, LLC, dated January 19, 2022 ("Airport Agreement"), 2) LRS shall reduce the roof height of its existing transfer building so as to stay below all critical elevations in the new avigation easement, and 3) LRS shall not allow any penetrations whatsoever to the new avigation easement.

7. All improvements installed on and offsite by the Applicant shall be funded by and solely at the expense of the Applicant.

8. The tipping floor of the waste transfer building shall be cleaned and free of waste at the end of each operating day. Except as set forth in Condition 5, no waste or other material shall be left on the floor inside the transfer building or outside the transfer building overnight or when the facility is not operating.

9. The Applicant shall control litter by discharging and loading all waste within the enclosed portion of the Transfer Facility. After unloading, any remaining loose waste shall be removed or contained in the vehicle prior to exiting the site. The Applicant shall use its best efforts to assure that vehicles, hauling waste to or removing waste from the Transfer Facility, shall be suitably covered to prevent waste from leaving the vehicles. A fence to aid in the interception of any blowing litter shall surround the Transfer Facility. The Applicant shall diligently patrol the Subject Property during hours of operation to collect any litter. At a minimum the Applicant shall diligently patrol and remove litter from: the Subject Property; all property owned or controlled by the Applicant; and, before 10:00 a.m. each operating day, Powis Road between Hawthorne Lane and Route 64 (North Avenue) as well as Powis Court . In addition, the Applicant shall, at a minimum, patrol and remove litter from private property within 500 feet of the aforesaid public streets and corresponding rights-of-way with the written permission of the owner of said properties, which permission the Applicant shall diligently attempt to obtain. The Applicant shall provide the City of West Chicago the names, addresses, telephone numbers and email addresses of such owners granting permission. The Applicant shall also post on the company's website the name and email address of an employee of the company to whom any owner of property along Powis Court or Powis Road between Route 64 (North Avenue) and Hawthorne Lane may report litter from the facility or trucks using the facility, in which case the Applicant shall remove the litter with the written permission of the owner within two hours of receiving notification of the litter concern. Upon written request, logs showing the private owner, the property address for the request for litter removal, the time such was received and the time the concern was abated shall be available to the City and provided within one business day. Also, the Applicant shall diligently seek the written approval of the DuPage County Forest Preserve District to remove litter, which is visible from Route 64 (North Avenue), from the portion of the Pratts Wayne Woods Forest Preserve that is located within the City of West Chicago. If permission is granted, litter removal from the Forest Preserve shall occur not less than monthly; the City shall be provided written notice of each occurrence within one business day of such being completed.

10. The Applicant shall provide a street sweeper to remove mud and dust tracked onto hard surfaces inside and outside the Transfer Facility, on property owned or controlled by the Applicant as well as well Powis Court and Powis Road between Hawthorne Lane and Route 64 (North Avenue)on an as needed basis, but not less frequently than daily.

11. The Applicant shall retain a pest control service on an on-going basis to address the potential for infestation by rodents and other vectors. Such service shall inspect the Transfer Facility on an as needed, but no less than monthly, basis.

12. Transfer trailers entering and exiting the Subject Property shall use only the following roads: Powis Road (between the facility entrance and Route 64 (North Avenue), Route 64 (North Avenue), Kirk Road and Interstate 88. Except for waste collection trucks servicing property within the City of West Chicago, waste collection trucks entering and exiting the Subject Property shall use only the following streets within the City and no others: Powis Road south of Route 64, Route 64 (North Avenue), Route 38, and Kress Road. The Applicant shall have installed within City right-of-way to the satisfaction of the City, license plate readers in each of the following locations: Hawthorne Lane between Route 59 and Powis Road; Smith Road between Powis Road and Route 64; and Powis Road between Smith Road and Route 64. The license plate readers shall provide remote access to the City of West Chicago to be used for any lawful purpose. The specific make and model of license plate readers and the specific locations for installation of the license plate readers shall be subject to the written approval/direction of the West Chicago Police Chief, and may be relocated for operational need at the expense of the City; the initial and any annual costs associated with the license plate readers shall be at the Applicant's sole cost and expense. The Applicant shall be responsible for maintaining and, if necessary, replacing the license plate readers when in disrepair or at the end of their useful lives as determined by the City through documentation from the vendor. The Applicant shall also provide a set of certified portable scales to the City at its sole cost and expense, which thereafter shall be maintained and replaced by the City.

13. Trucks transporting hydro excavation waste shall be water-tight. Dump style trucks transporting solidified hydro excavation waste shall include liners that are sufficient to prevent leakage onto roads and other surfaces.

14. All incoming hydro-excavation waste loads shall be accompanied by a completed/signed manifest and shall be pre-approved using a waste profile sheet and other supporting documentation as necessary. These materials shall be reviewed to verify that the waste is non-hazardous as defined in Title 35 Illinois Administrative Code Part 722.111. Pre-approved waste streams and such profile packets shall be kept on file at the facility, shall accurately characterize the accepted material, and may not be more than one year old.

15. The facility shall be maintained with a negative pressure condition such that the ventilation system provides a minimum of 6 air changes per hour. The facility design shall include an ozone system to treat the ventilation air prior to exhaust. The facility shall also be equipped with a misting system that will assist in mitigation of dust and odors above the tipping floor.

16. The facility shall otherwise be constructed and operated in substantial conformance with the plans and operating procedures specified in the siting application.

17. Approval is further conditioned upon compliance with all terms of the Host Community Benefit Agreement between the City of West Chicago and Lakeshore Recycling Systems, LLC, dated April 1, 2019; the Secondary Host Community Benefit Agreement between DuPage County and Lakeshore Recycling Systems, LLC, dated March 10, 2020; and the Airport Agreement.

STATE OF ILLINOIS)
COUNTY OF DU PAGE)

CERTIFICATE

I, Valeria Perez, Certify that I am the Executive Assistant of the City of West Chicago, DuPage County, Illinois.

I further certify that on February 28, 2023 the Corporate Authorities of such municipality passed and approved Ordinance No. 23-O-0006 entitled:

AN ORDINANCE CONDITIONALLY APPROVING THE APPLICATION FOR LOCAL SITING APPROVAL OF LAKESHORE RECYCLING SYSTEMS, LLC FOR WEST DUPAGE RECYCLING AND TRANSFER STATION

Which provided by its terms that it should be published in pamphlet form.

The pamphlet form of Ordinance No. 23-O-0006 including the ordinance and a cover sheet hereof was prepared, and a copy of such ordinance posted in the municipal building, commencing on March 1, 2023 continuing for at least ten days thereafter. Copies of such ordinance were also available for public inspection upon request in the Office of the City Administrator.

Dated at West Chicago, Illinois, this 28th of February, 2023.

SEAL

NOTICE OF INTENT TO FILE A REQUEST FOR LOCAL SITING APPROVAL OF A NEW POLLUTION CONTROL FACILITY WITH THE CITY OF WEST CHICAGO, ILLINOIS

YOU ARE HEREBY NOTIFIED THAT, pursuant to §39.2(b) of the Illinois Environmental Protection Act ("the Act") 415 ILCS 5/39.2(b), the Applicant, Lakeshore Recycling Systems, LLC ("LRS"), will file its Request for Siting Approval for a new pollution control facility with the City of West Chicago, Illinois, 475 Main St., West Chicago, Illinois, 60185, on September 16, 2022. In their request for siting approval, the Applicant will seek approval to site, permit, construct, develop and operate a transfer station as defined by Section 3.500 of the Illinois Environmental Protection Act (the "Act") (415 ILCS 5/3.500), the West DuPage Recycling and Transfer Station whose address is 1655 Powis Road, West Chicago, DuPage County, Illinois, 60185. Said location being in the City of West Chicago, Illinois.

The proposed facility encompasses approximately 27.66 acres and is legally described as follows:

THAT PART OF THE NORTH 1/2 OF SECTION 32, TOWNSHIP 40 NORTH, RANGE 9 EAST OF THE THIRD PRINCIPAL MERIDIAN, DUPAGE COUNTY, ILLINOIS, DESCRIBED AS FOLLOWS, TO WIT.

COMMENCING AT THE NORTHWEST CORNER OF SAID SECTION 32; THENCE NORTH 88 DEGREES 56 MINUTES 37 SECONDS EAST ALONG THE NORTH LINE OF SAID SECTION 32, A D1STANCE OF 1331.65 FEET TO THE NORTH AND SOUTH DIVIDING LINE OF THE NORTHWEST 1/4 OF SAID SECTION 32; THENCE SOUTH 00 DEGREES 36 MINUTES 17 SECONDS WEST ALONG SAID DIVIDING LINE, A DISTANCE OF 500.00 FEET TO THE SOUTHWEST CORNER OF A TRACT OF LAND CONVEYED TO THE DEFENSE PLANT CORPORATION BY DEED RECORDED IN BOOK 390 OF DEEDS ON PAGE 81 IN THE OFFICE OF THE DUPAGE COUNTY RECORDER; THENCE CONTINUING SOUTH 00 DEGREES 36 MINUTES 17 SECONDS WEST ALONG SAID DIVIDING LINE, A DISTANCE OF 685.0 FEET TO THE SOUTHWEST CORNER OF THE TRACT OF LAND DESCRIBED IN A SPECIAL WARRANTY DEED RECORDED

FEBRUARY 6, 2001 AS DOCUMENT NO. R2001-020758; THENCE NORTH 89 DEGREES 32 MINUTES 15 SECONDS EAST ALONG THE SOUTH LINE OF SAID TRACT, A DISTANCE OF 103.80 FEET FOR THE POINT OF BEGINNING; THENCE CONTINUING NORTH 89 DEGREES 32 MINUTES 15 SECONDS EAST, ALONG SAID SOUTH LINE (SAID LINE BEING PARALLEL WITH THE SOUTH LINE OF SAID DEFENSE PLANT CORPORATION TRACT), A DISTANCE OF 1880.12 FEET TO THE WESTERLY RIGHT OF WAY LINE FOR THE CHICAGO AND NORTHWESTERN RAILWAY; THENCE NORTH 20 DEGREES 30 MINUTES 46 SECONDS WEST, ALONG SAID WESTERLY RIGHT OF WAY LINE, A DISTANCE OF 729.01 FEET TO THE SOUTHEAST CORNER OF SAID DEFENSE PLANT CORPORATION TRACT, THENCE SOUTH 89 DEGREES 32 MINUTES 15 SECONDS WEST, ALONG SAID SOUTH LINE, A DISTANCE OF 1650.66 FEET TO A POINT ON THE EASTERLY RIGHT OF WAY LINE OF POWIS ROAD PER DOCUMENT NO. R2003-146376, SAID POINT ALSO BEING 81.96 FEET EAST OF THE SOUTHWEST CORNER OF SAID DEFENSE PLANT CORPORATION; THENCE SOUTH 2 DEGREES 29 MINUTES 05 SECONDS WEST, ALONG SAID EASTERLY RIGHT OF WAY LINE, A DISTANCE OF 536.49 FEET TO A POINT OF CURVATURE; THENCE SOUTHWESTERLY, ALONG SAID EASTERLY RIGHT OF WAY LINE BEING THE ARC OF A CURVE CONCAVE WESTERLY, HAVING A RADIUS OF 739.00 FEET AND WHOSE CHORD HAS A BEARING OF SOUTH 3 DEGREES 47 MINUTES 33 SECONDS WEST, AN ARC DISTANCE OF 149.66 FEET TO THE POINT OF BEGINNING, IN DUPAGE COUNTY, ILLINOIS.

Tax ID Numbers: 01-32-101-004 and 01-32-200-001

The proposed facility would be a non-hazardous solid waste transfer station which will accept non-hazardous waste, for temporary storage, sorting, solidification and consolidation, and further transfer to a waste disposal/treatment facility. The Applicant will develop and operate the transfer station only as approved by the Illinois Environmental Protection Agency, other applicable regulatory agencies, and as authorized by applicable statutes and regulations. The waste accepted for transfer will be general municipal solid waste, Hydro Excavation waste, recyclables and construction or demolition debris generated by residential, commercial and industrial sources. The facility proposes to handle a maximum of 1950 tons per day of material, of which no more than 650 tons per day will be municipal solid waste, no more than 300 tons per day will be hydro excavation waste, no more than 750 tons per day will be construction or demolition

debris, and no more than 250 tons per day will be single stream recyclables. The facility will not accept hazardous waste. The facility is projected to have an operating life of at least 20 years.

The Applicant is Lakeshore Recycling Systems, LLC, whose address is 5500 Pearl St., Rosemont, Il. 60018.

On September 16, 2022, the Applicant will file with the City of West Chicago, Illinois, their Request for Siting Approval. The request will include the substance of the Applicant's proposal and supporting documents.

The Request filed by the Applicant with the West Chicago City Clerk will be available for your inspection in the West Chicago City Clerk's Office located at 475 Main St., West Chicago, Illinois, 60185, during normal business hours daily, not including weekends or holidays. Copies of the request or any part thereof will be available from the West Chicago City Clerk upon payment of the actual cost of reproduction, as outlined in the Illinois Freedom of Information Act (5 ILCS 140/1 *et seq.*).

The City of West Chicago must hold at least one public hearing no sooner than 90 days but no later than 120 days from its receipt of the Request for Siting Approval. You may appear at the Hearing and may comment on the application or formally participate in the proceedings. All persons desiring to be formal participants in the hearing, including members of the public, must submit written notification of said intent to the city clerk before the first day of the public hearing or register with the hearing officer on the first day of the hearing. Any person so appearing at such public hearing shall have the right to present public comment relating to the pending application. No advance written

notification shall be required to present written comment in the manner described in Section 14-94 of the West Chicago Municipal Code. Each person desiring to present evidence in the hearing and/or to cross-examine witnesses shall register as a party to the proceeding not less than ten (10) days prior to the commencement of the hearing. Any person registered as a party shall have the right to present their own personal testimony, to be represented by an attorney and, through such attorney, to present the testimony of other persons or to cross-examine witnesses. The city shall be deemed a participant and a party to all proceedings and shall proceed last with its case and cross-examination.

Any person, including those not filing a notice of participation, may file written comments with the West Chicago City Clerk concerning the appropriateness of the proposed site for its intended purpose. The West Chicago City Council shall consider any comment received or postmarked from the date of acceptance of the Application through and until 30 days after the date of the last public hearing. Said written comment shall be mailed or delivered to the West Chicago City Clerk, 475 Main St., West Chicago, Illinois, 60185. For further information concerning the hearing procedures and your right to comment and participate, please consult the Act (415 ILCS 5/39.2) and Section 14-95 of the West Chicago Municipal Code.

Friday, December 23rd 2022

Dear Michael Gutman, City Administrator of West Chicago,

We of P.O.D.E.R.; People Opposing DuPage Environmental Racism are submitting our form to participate as a Party at the upcoming Public Hearings in January 2023, regarding the West DuPage LRS Waste transfer Station siting approval. We will be having concerned residents of West Chicago that want to participate with us as a Party. Should you have any questions please call, email us or reply to this email as well. We are submitting our form vía email due to the severe weather conditions that had everyone close including City Hall.

We wish you are safe, warm and a Merry Christmas to you and your Family,

Project Traffic Review #1

To: Michael Guttman
City Administrator – City of West Chicago

From: Antonio Maravillas, E.I.T.
Dan Brinkman, P.E., PTOE

Date: November 23, 2022

Subject: Proposed Waste Transfer Station
Lakeshore Recycling Systems
1655 Powis Road
West Chicago, Illinois

Per your request, Gewalt Hamilton Associates, Inc. (GHA) has reviewed the following documents provided for the above referenced project related to traffic, parking, and on-site circulation:

- Traffic Impact Study (TIS) prepared by Kenig, Lindgren, O'Hara, Aboona, Inc. (KLOA) dated September 12,2022.
- Final Site Plan prepared by Civil & Environmental Consultants, Inc. (CEC) dated September 27, 2019.

We offer the following comments for your consideration. As Powis Road is under the DuPage County Division of Transportation (DuDOT) jurisdiction, our comments should only be considered advisory and based on our own recent experience. Ultimately, DuDOT will have to approve any access changes and roadway improvements along Powis Road.

Traffic Study

1. The TIS prepared by KLOA is generally in conformance with the guidelines published by the Institute of Transportation Engineers (ITE).
2. As documented in the TIS, Powis Road is under the jurisdiction of DuDOT. It is also stated that the proposed roadway improvements along Powis Road have been conceptually approved by DuDOT. KLOA and the petitioner should provide copies of all correspondence with DuDOT.
3. We generally concur with the description of the surrounding land uses and existing roadway characteristics.
4. The traffic volumes used in the TIS were based on traffic counts conducted pre-pandemic in October 2019. GHA concurs with KLOA's methodology of conducting new (year 2022) traffic counts and comparing the volumes with pre-pandemic conditions. We agree with using the higher volumes (year 2019) for the study.
5. We generally concur with the estimated directional distribution used in the TIS. It was assumed that 100 percent of all transfer trailers would arrive/depart west of Powis Road along IL 64. Will this be a set route between the Site and the landfill for the transfer trucks? Otherwise, we would anticipate some portion of the transfer trucks arriving/departing south of Powis Road due to the slightly more convenient route to I-88. It should be noted, that based on the existing traffic counts, there are existing semi-trucks arriving/departing south of the Site along Powis Road.

6. We concur with the methodology used to estimate the trips generated by the proposed waste transfer station. We agree that the trip volumes used in the analyses represent a conservative approach, and the actual trips will likely be lower, especially during the weekday evening peak hour. As noted in the study, a large portion of the collection trucks will be stored overnight, which will reduce the amount of exiting traffic in the afternoon/evening.
7. GHA concurs with using a buildout +5-years horizon for the future traffic analysis. However, the CMAP projections used by KLOA were based on the March 2019 CMAP Travel Demand Model. KLOA did not request new projections when they did traffic recounts in 2022. It is recommended to obtain future traffic projections based on CMAP's more recent Travel Demand Model to see if there are any discrepancies or substantial changes in regional traffic projections. While we would not anticipate this to be significant, for accuracy the 2050 projections should be verified and if necessary, the TIS updated to reflect the current information.
8. We agree that the new site traffic will have minimal impact on the IL 64 / Powis Road intersection. The long delays experienced on the northbound/southbound approaches are a result of IL 64 given higher signal priority.
9. We agree that the new site traffic will have minimal impact on the Powis Road / Hawthorne Lane intersection and that no geometric or traffic control improvements are necessary at the intersection.
10. It is not noted in the report what the anticipated queue lengths are for the southbound left-turn movement from Powis Road into the Site. It should be ensured that the proposed turn-lane storage length can adequately handle typical queueing demands.
11. We concur with KLOA's methodology used in the gap study. We agree that there will be adequate gaps to accommodate traffic turning in and out of the site access driveways.
12. We concur with the recommended operations of providing one inbound-only access driveway and one outbound-only access driveway.

Site Plan

1. We would recommend that the CEC plans show both the existing and proposed pavement improvements for Powis Road.
2. The site plans should provide additional dimension details for the existing and proposed parking spaces and circulation drive aisles.
3. It appears that there may be approximately 100 feet or less between the edge of pavement on Powis Road and the existing / proposed gate at the site exit drive, this should be dimensioned and the pavement markings referenced in the TIS (i.e., separate left and right turn lanes) should be illustrated on the site plan.
4. It is not clear from the TIS or the Site plan if inbound vehicles need to be "checked" or "admitted" to the site with the proposed expansion. Notes or discussion should be included to ensure that inbound vehicle operations will not queue out onto Powis Road.

We hope you find these comments helpful in your assessment of the proposed development. A revised TIS and updated site plan should be completed, and a point-by-point disposition of the above comments provided. Should you have any questions please do not hesitate to contact GHA at 847-478-9700.

5954.900_West Chicago Waste Station_TPR#1.docx

BEFORE THE CITY OF WEST CHICAGO CITY COUNCIL

In Re: THE APPLICATION OF	)
LAKESHORE RECYCLING SYSTEMS,	)
LLC, FOR SITING APPROVAL OF A	)
TRANSFER STATION AT	)
1655 POWIS ROAD,	)
WEST CHICAGO, ILLINOIS 62418	)

MOTION TO DISMISS THE APPLICANT'S REQUEST FOR LOCAL SITING APPROVAL OF A TRANSFER STATION FOR INADEQUATE NOTICE

NOW COMES, Objector, Protect West Chicago, (the "Objector") in the above-mentioned matter, by and through their attorneys, Luetkehans, Brady, Garner & Armstrong, LLC and Meza Law, and brings this Motion to Dismiss for Lack of Jurisdiction of the City of West Chicago from voting on the Application of Lakeshore Recycling Systems, LLC, (the "Applicant") for Siting Approval of a new proposed Pollution Control Facility, which is the subject of the above-captioned matter, and, in support thereof, states as follows:

Local Siting Statute Requirement

1. As is true of all requests for local siting approval of a new pollution control facility in Illinois, the Application submitted to the City of West Chicago (the "City") by the Applicant must comply with 415 ILCS 5/39.2(b) ("Siting Statute").

2. The Siting Statute requires that the Applicant serve written notice of intent ("Pre-Filing Notice") on all owners of property within 250 feet in each direction of the lot line of the subject property (the "Subject Area Radius") no later than 14 days before the date on which the City receives the request for siting approval. 415 ILCS 5/39.2(b). Moreover, notice is only satisfied one of two ways: 1) Personal Service or 2) Registered Mail, Return Receipt Requested.

3. The Siting Statute also explicitly provides that the Applicant shall:

> … cause written notice of such request to be served either ***in person*** or ***by registered mail, return receipt requested***, on the owners of all property within the subject area not solely owned by the applicant, and on the ***owners of all property within 250 feet in each direction of the lot line of the subject property***, said owners being such persons or entities ***which appear from the authentic tax records of the County*** in which such facility is to be located; …

415 ILCS 5/39.2(b) (emphasis added).

4. "This requirement is jurisdictional and must be followed to vest the local siting authority with power to hear a (siting) request." *County of Kankakee v. Ill. Pollution Control Bd.*, 396 Ill. App. 3d 1000, 1008, 955 N. E.2d 1, 9 (3rd Dist. 2009) (citing *Waste Mgmt. of Illinois v. Ill. Pollution Control Board*, 356 Ill. App. 3d 229, 234, 826 N.E. 2d 586 (3d. Dist. 2005)).

5. The burden of proof rests with the Applicant to show that all procedural requirements relating to issuance and service of the Pre-Filing Notice have been met. *Id*; *see also* 415 ILCS 39.2(b).

The PINs Associated with Railroad Lines East of 1655 Powis Road, West Chicago

6. There are parcels owned by the railroads that exist within the Subject Area Radius (the "Railroad Parcels"). The two Railroad Parcels are located east of the Subject Property and Applicant admits in its Application are within the Subject Area Radius; thus, the Applicant is required to served them with the Pre-Filing Notice.

7. According to the DuPage County website (parcel viewer information) the two Railroad Parcels are identified by Parcel Identification Numbers (PINs) 01-32-505-011 and 01-32-506-001. *See* **https://gis.dupageco.org/parcelviewer/**.

8. On May 5, 2003, the City via Ordinance 03-O-0033 annexed the rights-of-ways of property belonging to Elgin, Joliet and Eastern Railway Company within the City. *See* **Exhibit 1**.

The Elgin, Joliet and Eastern Railway Company parcels that were annexed into the City specifically included PIN 01-32-506-001, which is within the Subject Area Radius. *Id.* Exhibit A.

Authentic Tax Records

9. The Act requires that applications for siting approval of pollution control facilities use the "authentic tax records" to determine to whom and where the pre-filing notice must be sent. 415 ILCS 39.2(b).

10. In Illinois, the County Treasurer, the County Clerk and the Assessor each have a role in the keeping of the authentic tax records. *Bishop v. Pollution Control Bd.*, 235 Ill. App. 3d 925, 932, 601 N.E.2d 310, 315 (5th Dist. 1992); *Scott v. City of Chicago*, 2015 IL App (1st) 140570, ¶ 6, 29 N.E.3d 592, 594. In *Scott,* the court held that *Bishop* requires that one look at all three of these offices when determining the proper entities and locations to send notice based on the authentic tax records. *Scott v. City of Chicago*, ¶ 12, 29 N.E.3d at 596.

11. However, the Illinois Department of Revenue sets the tax assessments for all properties owned by the railroad companies that are used in the operation of the railroad [35 ILCS 200/8-5; 35 ILCS 200/11-70(b) and (d); 35 ILCS 20/11-80]; accordingly, local assessors have no role in determining real estate taxes or property values for the Railroad Parcels.

12. Therefore, one must look at the authentic tax records contained in the offices of the DuPage County Treasurer and the DuPage County Clerk in determining to whom and where pre-filing notices must be served for the Railroad Parcels.

Authentic DuPage County Treasurer and Clerk Railroad Tax Records

13. As set forth in the sworn declarations from DuPage County Treasurer Gwen Henry, the authentic DuPage County tax records clearly show that the following six railroads (identified

by name, address, city, state, and zip code included in the authentic DuPage County tax records) are the *only railroads* that are assessed and pay taxes within DuPage County.

14. Those six railroads are as follows:

	Railroad	Address	City	State and Zip Code
1	Chicago Central & Pacific Railroad	Bus Dev N Real Estate 1 Administration Road	Concord	Ontario L4K1B9
2	Burlington Northern & Santa Fe Railway Company	Property Tax Department PO Box 961089	Fort Worth	Texas 76161
3	CSX Transportation Railroad	Tax Department J-910 500 Water Street	Jacksonville	Florida 32202
4	Soo Line Railroad Company	7th Floor Tax Department 120 S. 6th Street	Minneapolis	Minnesota 55402
5	Elgin, Joliet & Eastern Railway Company	17641 S. Ashland Avenue	Homewood	Illinois 60430
6	Union Pacific Railroad Company	Property Tax Department Stop 1640 1400 Douglas Street	Omaha	Nebraska 68179

See **Exhibit 2**.

15. As set forth in the sworn declarations from DuPage County Clerk Jean Kaczmarek, Railroad Assessment Certifications for DuPage County also reveal that the following six railroads are the *only railroads* assessed taxes within DuPage County. Those six railroads are as follows:

	Railroad	Address	City	State and Zip Code
1	Chicago Central & Pacific Railroad	Bus Dev N Real Estate 1 Administration Road	Concord	Ontario L4K1B9
2	Burlington Northern & Santa Fe Railway Company	Property Tax Department PO Box 961089	Fort Worth	Texas 76161
3	CSX Transportation Railroad	Tax Department J-910 500 Water Street	Jacksonville	Florida 32202
4	Soo Line Railroad Company	7th Floor Tax department 120 S. 6th Street	Minneapolis	Minnesota 55402
5	Wisconsin Central, Ltd. (EJ&E Line) Company	17641 S. Ashland Avenue	Homewood	Illinois 60430
6	Union Pacific Railroad Company	Property Tax Department Stop 1640 1400 Douglas Street	Omaha	Nebraska 68179

See **Exhibit 3**.

Applicant's Service Affidavit and Related Application Exhibits: Appendix 2-J

16. In its Siting Application, the Applicant included Appendix 2-J which contains a document entitled "Applicant's Affidavit of Compliance With 415 ILCS 5/39.2(b)", as well as the

related exhibits which depict copies of notices and receipts of such service, in which Applicant purports to have complied with the requirement of 45 ILCS 39.2(b). *See* **Exhibit 4**.

17. In its Siting Application, the Applicant also included a chart reflecting the identity of the entities Applicant served, including their respective addresses. Below is the portion of Applicant's chart reflecting purported service on three railroads:

Property Owner	Address	City	State	Zip Code	PIN or General Assembly
Union Pacific Railroad Company	Property Tax Department Stop 1640 1400 Douglas Street MS910	Omaha	Nebraska	68179-0910	01-32-505-011
Canadian National Railway	935 de La Gauchetiere Street Ouest	Montreal	Quebec, Canada	H3B 2M9	01-32-506-001
Chicago Central & Pacific Railroad	Bus Dev Real Estate 1 Administration Road	Concord	Ontario Canada	L4K 1B9	01-32-506-001

See **Exhibit 4**.

Service on Union Pacific Railroad Company Was Proper

18. Here, the Applicant caused service upon one of the two railroads within the Subject Radius Area, namely Union Pacific Railroad via registered mail, return receipt requested. Notice was provided to the correct address included in the authentic DuPage County tax records, namely: Property Tax Department Stop 1640, 1400 Douglass Street MS910, Omaha, NE 68179-0910.

19. The service on Union Pacific Railroad was thus proper per the siting statute.

Improper Service Attempt on Canadian National Railway

20. In its Siting Application, the Applicant attempted service upon Canadian National Railway for PIN 01-32-506-001; however, there is no indication in the authentic tax records of DuPage County that this entity owns the property identified by either PIN 01-32-505-011 or PIN

01-32-506-001 or owns any property within the Subject Area Radius.[1]

21. Moreover, Applicant's attempted service of the Pre-Filing Notice to Canadian National Railway via overnight express mail was improper notice under the siting statute. As set forth in 415 ILCS 5/39.2(b), there are only two methods prescribed by statute (personal service or registered mail, return receipt requested) which satisfy the Pre-Filing Notice service requirement set forth in Section 39.2(b). Overnight express is not one of the two methods.

Improper Service Attempt on Chicago Central & Pacific Railroad

22. In its Siting Application, the Applicant also attempted service upon Chicago Central & Pacific Railroad for PIN 01-32-506-001; however, there is no indication in the authentic tax records of DuPage County that this entity owns the property identified by either PIN 01-32-505-011 or PIN 01-32-506-001 or owns any property within the Subject Area Radius.[2]

23. For the same reason Applicant's attempted method of service of the Pre-Filing Notice to Chicago Central & Pacific Railroad via overnight express mail was improper notice under the siting statute as well. 415 ILCS 5/39.2(b).

Applicant Failed to Serve Elgin, Joliet and Eastern Railway Company

24. Despite the Siting Statute requirement that an Applicant provide all property owners within the 250-foot Subject Area Radius with the required notice as set forth at Section 39.2 (b), the Applicant failed to effectuate any service on Elgin, Joliet and Eastern Railway Company for PIN 01-32-506-001 even though:

---

[1] As shown above (paras. 14 and 15), there is no indication that the Canadian National Railway receives tax bills for any property located in DuPage County.

[2] A review of the authentic tax bill sent to Chicago Central & Pacific Railroad by the DuPage County Treasurer (Exhibit 2) and a review of the Illinois Department of Revenue PTAX-105-A form provided by the DuPage County Clerk (Exhibit 3), shows that there is no indication that the Chicago Central & Pacific Railroad receives tax bills for any property located in the City of West Chicago.

a. West Chicago Ordinance 03-O-0033, which annexed the rights-of-ways of property belonging to Elgin, Joliet and Eastern Railway Company, clearly reveals that PIN 01-32-506-001 belongs to Elgin, Joliet and Eastern Railway Company. *See* **Exhibit 1.**

b. The DuPage County Treasurer certified records unambiguously confirm that Elgin, Joliet and Eastern Railway Company, *not* Canadian National Railway, is the entity appearing on the ***authentic tax records of the County*** for PIN 01-32-506-001. *See* **Exhibit 5**.

c. The DuPage County Clerk certified records also confirm that Elgin, Joliet and Eastern Railway Company, and *not* Canadian National Railway, is the entity assessed real estate taxes in DuPage County generally and in particular for PIN 01-32-506-001. *See* **Exhibit 3.**

25. In fact, none of the tax records, let alone the ***authentic tax records of the County***, reveal that Canadian National Railway received tax bills or paid taxes and was thus entitled to notice for PIN 01-32-506-001.

26. Even if Canadian National Railway would somehow deemed an entity entitled to Pre-Filing Notice, as noted above, the method of service utilized by the Applicant does did not meet the notice requirements of the Siting Statute and, hence, was never perfected.

Applicant's Failure to Comply with the Siting Statute is Fatal

27. With respect to the Siting Statute, the Illinois Appellate Court has adopted the "Plain Language Doctrine" and, in doing so, has adopted a very strict interpretation as to how and whom must be served the Pre-filing Notice, as set forth in Section 39.2(b). *Waste Mgmt. of Illinois v. Ill. Pollution Control Board*, 356 Ill. App. 3d 229, 826 N.E. 2d 586, 591-92 (3d Dist. 2005).

28. The Court in *Waste Management* determined that the General Assembly had provided **only two** methods by which an applicant could satisfy the Pre-Filing Notice service requirements set forth within the Siting Statute, personal service or registered mail, return receipt requested, to the address appearing on the authentic tax records of the county. *Id*

29. Here, for the reasons set forth above, service of the Pre-Filing Notice is fatally flawed and insufficient as a matter of law because the Applicant has failed to establish that notice was properly served upon all owners within the Subject Area Radius entitled to notice as required by the Siting Statute, namely the Elgin, Joliet and Eastern Railway Company.

30. The Applicant has thus failed to demonstrate that one of the proper railroad entities, Elgin, Joliet and Eastern Railway Company, was properly served.

31. The service of Applicant's Pre-Filing Notice fails to comply with the notice requirements of the Siting Statute and is thus insufficient as a matter of law.

Wherefore, since the Applicant has failed to comply with the notice requirement of 415 ILCS 5/39.2 (b), the City of West Chicago has no jurisdiction to proceed with this hearing and, therefore, this matter must be dismissed for lack of jurisdiction.

Respectfully Submitted,

One of the attorneys for Protect West Chicago

CERTIFICATE

I, Nancy Smith, Certify that I am the duly elected and acting City Clerk of the City of West Chicago, DuPage County, Illinois.

I further Certify that on May 5, 2003 the Corporate Authorities of such municipality passed and approved Ordinance 03-O-0033 entitled

AN ORDINANCE ANNEXING PROPERTY TO THE CITY OF WEST CHICAGO – ELGIN, JOLIET AND EASTERN RAILWAY RIGHTS-OF-WAY

Which provided by its terms that it should be published in pamphlet form.

The pamphlet form of Ordinance No. 03-O-0033 including the ordinance and a cover sheet hereof was prepared, and a copy of such ordinance posted in the municipal building, commencing on May 6, 2003 and continuing for at least ten days thereafter. Copies of such ordinance were also available for public inspection upon request in the Office of the City Clerk.

Dated at West Chicago, Illinois, this 5th day of May 2003.

SEAL

Nancy M Smith
City Clerk

Mail to:
Mary Plansky
c/o City of West Chicago

West Chicago, IL 60185

ORDINANCE NO. 03-O-0033

AN ORDINANCE ANNEXING PROPERTY TO THE CITY OF WEST CHICAGO – ELGIN, JOLIET AND EASTERN RAILWAY RIGHTS-OF-WAY

WHEREAS, there has been filed with the City Clerk of the City of West Chicago, DuPage County, Illinois, a Petition under oath requesting that the property described in Exhibit "A" attached hereto and made a part hereof be annexed to the City; and

WHEREAS, said Petition was presented to the City on or about April 2, 2003, pursuant to the provisions of 65 ILCS 5/7-1-8, as amended; and

WHEREAS, said Petition has been signed by all of the owners of record of the property heretofore legally described in Exhibit "A"; and

WHEREAS, such property is not within the corporate limits of any municipality, and portions thereof are contiguous to the corporate limits of the City of West Chicago; and

WHEREAS, the statutes of the State of Illinois provide that upon the filing of such a Petition, the corporate authorities of the City of West Chicago may pass an ordinance annexing said territory to the City, if said ordinance is passed by a majority of the corporate authorities; and

WHEREAS, all notices required by law have been given; and

WHEREAS, the City of West Chicago and the owner of record of the subject property did, on or about the May 5, 2003 enter into a certain Annexation Agreement, (the "ANNEXATION AGREEMENT"); and,

WHEREAS, said ANNEXATION AGREEMENT required the City to annex the property legally described therein and as legally described on Exhibit "A"; and

NOW, THEREFORE, BE IT ORDAINED by the City Council of the City of West Chicago, Du Page County, Illinois, in regular session assembled, as follows:

Section 1. That subject to the terms of the ANNEXATION AGREEMENT, the property legally described on Exhibit "A" be and the same is hereby annexed to the City of West Chicago, DuPage County, Illinois, together with all adjacent streets and highways contiguous to said property, so that the new boundaries of the territory annexed shall extend to the far side of said adjacent streets and highways not within the corporate limits of any other municipality.

Section 2. That the City Clerk shall and she is hereby authorized to file with the County Clerk of DuPage County and Recorder of Deeds of DuPage County, certified copies of this Ordinance together with an accurate map of the territory annexed appended thereto.

Section 3. That the City Clerk shall and she is authorized to file with the Executive Director of the DuPage County Board of Election Commissioners a certified copy of this Ordinance together with an accurate map of the territory annexed appended thereto.

Section 4. That all ordinances and resolutions, or parts thereof, in conflict with the provisions of this Ordinance, to the extent of such conflict, hereby repealed.

Section 4. That this Ordinance shall be in full force and effect ten (10) days from and after its passage, approval and publication in pamphlet form as provided by law.

PASSED this 5th day of May, 2003.

We have certified our assessment of all railroad real operating property located in your county for the 2021 assessment year.

Enclosed is Form PTAX-105-A, Certification of Assessments of Railroad Property, that lists the Department's equalized assessed value of the railroads operating in your county and the equalized assessed value of each railroad by taxing district. Form PTAX-105-A consists of a summary page and additional pages that detail each taxing district.

You should write each certified equalized assessed value in your tax books for the 2021 assessment year for the extension of taxes. Because these values are already equalized, do not apply the state equalization factor or multiplier. Your should, however, apply the state equalization factor, or multiplier, to all locally assessed railroad property. The railroad certification should include taxing district changes made on or before December 31 of the assessment year, but only if we received notification of the changes before the extension of taxes. Our inclusion of any taxing district change on the railroad certification does not mean that the levy for that taxing district has been properly adopted. It is your responsibility as county clerk to determine the effective date of any change and the date that the taxing district's levy was adopted.

If you have any questions, please call Steve Santarelli, the appraisal specialist in our Property Tax Division, in our Springfield office weekdays between 8:00 a.m. and 4:00 p.m. at the telephone number listed below.

WDRTS FILING AFFIDAVIT

STATE OF ILLINOIS
COUNTY OF DUPAGE
BEFORE THE CITY OF WEST CHICAGO

In Re: THE APPLICATION OF)
LAKESHORE RECYCLING SYSTEMS, LLC,)
FOR SITING APPROVAL OF A NEW)
POLLUTION CONTROL FACILITY)

AFFIDAVIT OF COMPLIANCE WITH 415 ILCS 5/39.2(b)

JOHN E. HOCK, being first duly sworn on oath, deposes and states as follows:

1. I am a professional engineer licensed to practice in the State of Illinois and am employed by Civil & Environmental Consultants, Inc., (CEC) as part of their office located at 1230 East Diehl Road, Suite 200, Naperville, Illinois, 60563.

2. I am CEC's principal for the preparation of the local siting application for the West DuPage Recycling and Transfer Station and it was my responsibility to prepare, publish and serve pre-filing notices as required in 415 ILCS 5/39.2(b).

3. 415 ILCS 5/39.2(b) requires that no later than fourteen (14) days prior to a request for location approval of a pollution control facility, the applicant shall cause written notice of such request to be served either in person or by registered mail, return receipt requested, on the owners of all property within the subject area not wholly owned by the applicant and on the owners of all property within 250 feet in each direction of the lot line of the subject property, said owners being such persons or entities which appear from the authentic tax records of the county in which such facility is to be located, provided, that the number of all feet occupied by all public roads, streets, alleys and other public ways shall be excluded in computing the 250 feet requirement, provided further that in no event shall this requirement exceed 400 feet, including public streets, alleys and other public ways. Section 39.2(b) further provides that such notice shall be served upon members of

the general assembly from the legislative district in which the proposed facility is located and shall be published in a newspaper of general circulation published in the county in which the site is located. Section 39.2(b) further provides that such notice shall state the name and address of the applicant, the location of the proposed site, the nature and size of the development, the nature of the activity proposed, the probable life of the proposed activity, the date when the request for site approval will be submitted, and a description of the right of persons to comment on such request.

4. The Notice prepared and served in connection with the aforesaid requirement is attached hereto and made a part hereof as Exhibit A. Said Notice conforms to the requirements of Section 39.2(b).

5. I identified the names and address of all members of the General Assembly from the legislative district in which the proposed facility is located by using information publically maintained and available on the Illinois General Assembly internet website www.ilga.gov.

6. I caused a copy of the Notice to be published in the Daily Herald, a newspaper of general circulation, in the county in which the application is pending on August 26, 2022. A copy of the actual publication and proof of publication is attached hereto and made a part hereof as Exhibit B.

7. On August 19, 2022, I searched the authentic tax records in DuPage County, Illinois to ascertain the names and addresses of all owners of the subject property and all other property within 400 feet of the subject property. I learned that DuPage County maintains the official tax records database, which can be accessed via the DuPage County website, and the DuPage County Treasurer's Office website. The DuPage County website

also links to a GIS database showing all real estate parcels in the county. This is the computer equivalent of information previously available in hard copies of plat books and section maps.

8. Attached hereto and made a part hereof as Exhibit C is the full and complete list of all individuals and entities which were sent pre-filing Notice on August 23, 2022, pursuant to 415 ILCS 5/39.2(b). This includes all owners of property and members of the General Assembly who were entitled to Notice. Some entities entitled to notice were sent an additional notice at a secondary address.

9. On August 23, 2022, certified mail notice was sent to all of the individuals and entities identified in Exhibit C with United States' addresses, and personal delivery notice was sent to all of the individuals and entities identified in Exhibit C with Canadian addresses. Attached hereto and made a part hereof as Exhibit D are the certified mail receipts issued by the U.S. Postal Service (green cards) for United States' addresses and personal delivery receipts from United Parcel Service for Canadian addresses. Attached hereto and made a part hereof as Exhibit E are the signed returns from the recipients. The notice sent to the post office box for the Fox Valley Airport Authority was not claimed, but the secondary notice sent to Fox Valley Airport Authority was claimed. The notice sent to the New York address for OSCAR (IL) LLC was claimed on August 29, 2022, but the green card has not yet been returned.

10. The siting application herein was filed on September 16, 2022.

11. All of the foregoing complies fully and completely with the pre-filing notice requirements of 415 ILCS 5/39.2(b).

FURTHER AFFIANT SAYETH NOT.

JOHN E. HOCK

Sworn to and subscribed before me

EXHIBIT A

NOTICE OF INTENT TO FILE A REQUEST FOR LOCAL SITING APPROVAL OF A NEW POLLUTION CONTROL FACILITY WITH THE CITY OF WEST CHICAGO, ILLINOIS

YOU ARE HEREBY NOTIFIED THAT, pursuant to §39.2(b) of the Illinois Environmental Protection Act ("the Act") 415 ILCS 5/39.2(b), the Applicant, Lakeshore Recycling Systems, LLC ("LRS"), will file its Request for Siting Approval for a new pollution control facility with the City of West Chicago, Illinois, 475 Main St., West Chicago, Illinois, 60185, on September 16, 2022. In their request for siting approval, the Applicant will seek approval to site, permit, construct, develop and operate a transfer station as defined by Section 3.500 of the Illinois Environmental Protection Act (the "Act") (415 ILCS 5/3.500), the West DuPage Recycling and Transfer Station whose address is 1655 Powis Road, West Chicago, DuPage County, Illinois, 60185. Said location being in the City of West Chicago, Illinois.

The proposed facility encompasses approximately 27.66 acres and is legally described as follows:

THAT PART OF THE NORTH 1/2 OF SECTION 32, TOWNSHIP 40 NORTH, RANGE 9 EAST OF THE THIRD PRINCIPAL MERIDIAN, DUPAGE COUNTY, ILLINOIS, DESCRIBED AS FOLLOWS, TO WIT.

COMMENCING AT THE NORTHWEST CORNER OF SAID SECTION 32; THENCE NORTH 88 DEGREES 56 MINUTES 37 SECONDS EAST ALONG THE NORTH LINE OF SAID SECTION 32, A DISTANCE OF 1331.65 FEET TO THE NORTH AND SOUTH DIVIDING LINE OF THE NORTHWEST 1/4 OF SAID SECTION 32; THENCE SOUTH 00 DEGREES 36 MINUTES 17 SECONDS WEST ALONG SAID DIVIDING LINE, A DISTANCE OF 500.00 FEET TO THE SOUTHWEST CORNER OF A TRACT OF LAND CONVEYED TO THE DEFENSE PLANT CORPORATION BY DEED RECORDED IN BOOK 390 OF DEEDS ON PAGE 81 IN THE OFFICE OF THE DUPAGE COUNTY RECORDER; THENCE CONTINUING SOUTH 00 DEGREES 36 MINUTES 17 SECONDS WEST ALONG SAID DIVIDING LINE, A DISTANCE OF 685.0 FEET TO THE SOUTHWEST CORNER OF THE TRACT OF LAND DESCRIBED IN A SPECIAL WARRANTY DEED RECORDED

FEBRUARY 6, 2001 AS DOCUMENT NO. R2001-020758; THENCE NORTH 89 DEGREES 32 MINUTES 15 SECONDS EAST ALONG THE SOUTH LINE OF SAID TRACT, A DISTANCE OF 103.80 FEET FOR THE POINT OF BEGINNING; THENCE CONTINUING NORTH 89 DEGREES 32 MINUTES 15 SECONDS EAST, ALONG SAID SOUTH LINE (SAID LINE BEING PARALLEL WITH THE SOUTH LINE OF SAID DEFENSE PLANT CORPORATION TRACT), A DISTANCE OF 1880.12 FEET TO THE WESTERLY RIGHT OF WAY LINE FOR THE CHICAGO AND NORTHWESTERN RAILWAY; THENCE NORTH 20 DEGREES 30 MINUTES 46 SECONDS WEST, ALONG SAID WESTERLY RIGHT OF WAY LINE, A DISTANCE OF 729.01 FEET TO THE SOUTHEAST CORNER OF SAID DEFENSE PLANT CORPORATION TRACT, THENCE SOUTH 89 DEGREES 32 MINUTES 15 SECONDS WEST, ALONG SAID SOUTH LINE, A DISTANCE OF 1650.66 FEET TO A POINT ON THE EASTERLY RIGHT OF WAY LINE OF POWIS ROAD PER DOCUMENT NO. R2003-146376, SAID POINT ALSO BEING 81.96 FEET EAST OF THE SOUTHWEST CORNER OF SAID DEFENSE PLANT CORPORATION; THENCE SOUTH 2 DEGREES 29 MINUTES 05 SECONDS WEST, ALONG SAID EASTERLY RIGHT OF WAY LINE, A DISTANCE OF 536.49 FEET TO A POINT OF CURVATURE; THENCE SOUTHWESTERLY, ALONG SAID EASTERLY RIGHT OF WAY LINE BEING THE ARC OF A CURVE CONCAVE WESTERLY, HAVING A RADIUS OF 739.00 FEET AND WHOSE CHORD HAS A BEARING OF SOUTH 3 DEGREES 47 MINUTES 33 SECONDS WEST, AN ARC DISTANCE OF 149.66 FEET TO THE POINT OF BEGINNING, IN DUPAGE COUNTY, ILLINOIS.

Tax ID Numbers: 01-32-101-004 and 01-32-200-001

The proposed facility would be a non-hazardous solid waste transfer station which will accept non-hazardous waste, for temporary storage, sorting, solidification and consolidation, and further transfer to a waste disposal/treatment facility. The Applicant will develop and operate the transfer station only as approved by the Illinois Environmental Protection Agency, other applicable regulatory agencies, and as authorized by applicable statutes and regulations. The waste accepted for transfer will be general municipal solid waste, Hydro Excavation waste, recyclables and construction or demolition debris generated by residential, commercial and industrial sources. The facility proposes to handle a maximum of 1950 tons per day of material, of which no more than 650 tons per day will be municipal solid waste, no more than 300 tons per day will be hydro excavation waste, no more than 750 tons per day will be construction or demolition

debris, and no more than 250 tons per day will be single stream recyclables. The facility will not accept hazardous waste. The facility is projected to have an operating life of at least 20 years.

The Applicant is Lakeshore Recycling Systems, LLC, whose address is 5500 Pearl St., Rosemont, Il. 60018.

On September 16, 2022, the Applicant will file with the City of West Chicago, Illinois, their Request for Siting Approval. The request will include the substance of the Applicant's proposal and supporting documents.

The Request filed by the Applicant with the West Chicago City Clerk will be available for your inspection in the West Chicago City Clerk's Office located at 475 Main St., West Chicago, Illinois, 60185, during normal business hours daily, not including weekends or holidays. Copies of the request or any part thereof will be available from the West Chicago City Clerk upon payment of the actual cost of reproduction, as outlined in the Illinois Freedom of Information Act (5 ILCS 140/1 *et seq.*).

The City of West Chicago must hold at least one public hearing no sooner than 90 days but no later than 120 days from its receipt of the Request for Siting Approval. You may appear at the Hearing and may comment on the application or formally participate in the proceedings. All persons desiring to be formal participants in the hearing, including members of the public, must submit written notification of said intent to the city clerk before the first day of the public hearing or register with the hearing officer on the first day of the hearing. Any person so appearing at such public hearing shall have the right to present public comment relating to the pending application. No advance written

notification shall be required to present written comment in the manner described in Section 14-94 of the West Chicago Municipal Code. Each person desiring to present evidence in the hearing and/or to cross-examine witnesses shall register as a party to the proceeding not less than ten (10) days prior to the commencement of the hearing. Any person registered as a party shall have the right to present their own personal testimony, to be represented by an attorney and, through such attorney, to present the testimony of other persons or to cross-examine witnesses. The city shall be deemed a participant and a party to all proceedings and shall proceed last with its case and cross-examination.

Any person, including those not filing a notice of participation, may file written comments with the West Chicago City Clerk concerning the appropriateness of the proposed site for its intended purpose. The West Chicago City Council shall consider any comment received or postmarked from the date of acceptance of the Application through and until 30 days after the date of the last public hearing. Said written comment shall be mailed or delivered to the West Chicago City Clerk, 475 Main St., West Chicago, Illinois, 60185. For further information concerning the hearing procedures and your right to comment and participate, please consult the Act (415 ILCS 5/39.2) and Section 14-95 of the West Chicago Municipal Code.

The Applicant is Lakeshore Recycling Systems, LLC, whose address is 5500 Pearl St., Rosemont, IL 60018.

On September 16, 2022, the Applicant will file with the City of West Chicago, Illinois, their Request for Siting Approval. The request will include the substance of the Applicant's proposal and supporting documents.

The Request filed by the Applicant with the West Chicago City Clerk will be available for your inspection in the West Chicago City Clerk's Office located at 475 Main St., West Chicago, Illinois, 60185, during normal business hours daily, not including weekends or holidays. Copies of the request or any part thereof will be available from the West Chicago City Clerk upon payment of the actual cost of reproduction, as outlined in the Illinois Freedom of Information Act (5 ILCS 140/1 et seq.).

The City of West Chicago must hold at least one public hearing no sooner than 90 days but no later than 120 days from its receipt of the Request for Siting Approval. You may appear at the Hearing and may comment on the application or formally participate in the proceedings. All persons desiring to be formal participants in the hearing, including members of the public, must submit written notification of said intent to the City Clerk before the first day of the public hearing or register with the hearing officer on the first day of the hearing. Any person so appearing at such public hearing shall have the right to present public comment relating to the pending application. No advance written notification shall be required to present written comment in the manner described in Section 14-94 of the West Chicago Municipal Code. Each person desiring to present evidence in the hearing and/or to cross-examine witnesses shall register as a party to the proceeding not less than ten (10) days prior to the commencement of the hearing. Any person registered as a party shall have the right to present their own personal testimony, to be represented by an attorney and, through such attorney, to present the testimony of other persons or to cross-examine witnesses. The city shall be deemed a participant and a party to all proceedings and shall proceed last with its case and cross-examination.

Any person, including those not filing a notice of participation, may file written comments with the West Chicago City Clerk concerning the appropriateness of the proposed site for its intended purpose. The West Chicago City Council shall consider any comment received or postmarked from the date of acceptance of the Application through and until 30 days after the date of the last public hearing. Said written comment shall be mailed or delivered to the West Chicago City Clerk, 475 Main St., West Chicago, Illinois, 60185. For further information concerning the hearing procedures and your right to comment and participate, please consult the Act (415 ILCS 5/39.2) and Section 14-95 of the West Chicago Municipal Code.

CERTIFICATE OF PUBLICATION

Paddock Publications, Inc.

DuPage County

Daily Herald

Corporation organized and existing under and by virtue of the laws of the State of Illinois, DOES HEREBY CERTIFY that it is the publisher of the **DuPage County DAILY HERALD**. That said **DuPage County DAILY HERALD** is a secular newspaper, published in Naperville and has been circulated daily in the Village(s) of:

Addison, Aurora, Bartlett, Bensenville, Bloomingdale, Carol Stream, Darien, Downers Grove, Elmhurst, Glen Ellyn, Glendale Heights, Hanover Park, Hinsdale, Itasca, Keeneyville, Lisle, Lombard, Medinah, Naperville,Oakbrook, Oakbrook Terrace, Plainfield,Roselle, Villa Park, Warrenville, West Chicago, Westmont, Wheaton, Willowbrook, Winfield, Wood Dale, Woodridge

County(ies) of DuPage

and State of Illinois, continuously for more than one year prior to the date of the first publication of the notice hereinafter referred to and is of general circulation throughout said Village(s), County(ies) and State.

I further certify that the DuPage County DAILY HERALD is a newspaper as defined in "an Act to revise the law in relation to notices" as amended in 1992 Illinois Compiled Statutes, Chapter 715, Act 5, Section 1 and 5. That a notice of which the annexed printed slip is a true copy, was published 08/26/2022
in said DuPage County DAILY HERALD.

IN WITNESS WHEREOF, the undersigned, the said PADDOCK PUBLICATIONS, Inc., has caused this certificate to be signed by, this authorized agent, at Arlington Heights, Illinois.

DuPage County Treasurer's Office

A Message from DuPage County Treasurer/Collector: Gwen Henry

Dear Property Owners:

The 2021 Property Tax Bills were mailed on April 29th. In Illinois, our taxes are billed in arrears. Our 2021 taxes are billed and collected in 2022. Taxes are billed with two installments. Once more, these due dates are June 1, 2022, and September 1, 2022.

The COVID-19 pandemic has been a two-year experience. I hope we have seen the worst of financial hardships for our DuPage residents. In the past year, there have been payments to 120,000 homeowners and renters state-wide who suffered covid related expenses. The State of Illinois is offering a new program beginning April 11, 2022. The program is designed to help homeowners who have fallen behind on mortgage payments and related housing expenses during the COVID pandemic. The new program offers grants up to $30,000 for past due mortgage payments, property taxes, property insurance, and homeowner and/or condo association dues. More information can be obtained at www.illinoishousinghelp.org.

The 2021 tax levy is $3,086,831,783, an increase of 2.3%. The 2021 tax year assessed property value for DuPage County is $44,058,122,920 (76.2% residential and 23.8% commercial property). This information would indicate that the average tax rate will decrease by .84% and the average tax bill will increase by 1.46%. As I have said in prior years, I have never seen an "average bill".

We can't write this message without reminding you to check your exemptions shown on your bill. The most often missed is the senior exemption. If you are 65 or older, check to make sure you are utilizing this exemption. We always have instances of citizens in their 80's and have never used the exemption. The taxpayer must apply for this exemption. For 2021 there are 70,850 senior exemptions resulting in reduction of assessed property value of $353,572,521.

Our office has remained open during the entire pandemic. Our team is ready to assist you with questions and payments. Our website is available 24/7, as is our online payment program. Our website allows you to print a duplicate tax bill, pay your bill, see assessment information, view 5 years of property tax history and 5 years of sale history.

If you have questions, please feel free to contact my office at 630-407-5900 or propertytaxadvocate@dupageco.org. It is a privilege to serve you.

Gwen Henry, CPA, DuPage County Treasurer

Applicant's response to motion to dismiss – Notice

415 ILCS 5/39.2 (b) requires applicants for local siting approval to give timely pre-filing notice to nearby property owners. Such service must be "either in person or by registered mail, return receipt requested, on the owners of all property within the subject area not solely owned by the applicant, and on the owners of all property within 250 feet in each direction of the lot line of the subject property, said owners being such persons or entities which appear from the authentic tax records of the County in which such facility is to be located..."

At issue is Applicant's service on the owner of parcel 01-32-506-001. PWC (Protecting Waste Connections) claims that Applicant failed to identify the owner of the parcel and that the manner of service was improper. Those claims are wrong. PWC's motion is supported by 5 exhibits, and the important ones are not authentic tax records of DuPage County. The owner of the subject parcel is first identified in exhibit 1, which is an old annexation record of the city of West Chicago, which proportion to show that the subject parcel in 2003 was owned by EJ&E railroad. West Chicago's old annexation records are not authentic tax records of the county, and no one could reasonably expected to search for or find this record. This is also the only exhibit attached to the motion which directly links the subject parcel to EJ&E railroad.

The tax bills referenced in Exhibit 2 and 5 do not contain the parcel number so they don't establish the link. PWC argues that the Applicant should have known that the tax bills relate to the subject parcel because they indicate that some West Chicago taxing districts are involved. There are many railroads in West Chicago, so this argument fails.

The other major exhibit relied upon in the motion is a set of records from the Illinois Department of revenue (Exhibit 3), once again not authentic tax records of the County.

Instead of looking at unrelated records, Applicant did its search in the conventional way, starting with a review of the plat maps to identify nearby parcels. This review quickly led to the "DuPage county Illinois 2022 Real Estate Tax Assessment Parcels Map" for the west half of the north east quarter of section 32 in Wayne Township. This map shows the eastern portion of the proposed Transfer Station property and the parcels immediately adjoining it. This map is identified as 1-32B-W, it is maintained by Jean Kaczmarerk, the DuPage County Clerk. It is an authentic tax record of DuPage County. It has been admitted into evidence.

The subject parcel is identified on the aforesaid tax map, and the owner is also identified, that owner being Canadian National Railway, with a parenthetical reference to EJ&E. A bit of research disclosed that EJ&E was wholly acquired by Canadian National on December 31, 2012, and that it ceased to operate as an independent entity after that date. Accordingly, the multiple statements in PWC's motion that "there is no

indication in the authentic tax records of DuPage County" that Canadian National owns the subject parcel are wrong. Hopefully this false statement was made inadvertently and not for the purpose of misleading anyone.

Applicant chose to personally serve Canadian National at its corporate headquarters in Montreal. PWC argues that service should have been made on the EJ&E office located at 17601 S. Ashland, Homewood Illinois. A review of that address reveals it is actually not even owned by EJ&E, but is instead a local office of the Canadian National Railway. The photo evidence reveals that the building at that address has the CN logo on the side.

PWC next takes issue with the manner of service, use of UPS delivery. Despite the fact that a signed receipt of actual, personal service has been filed, PWC argues, without any legal authority or support, that this is not personal service. Section 39.2(b) does not contain any standard or guidance for how this personal service needs to be effected. Supreme Court rule 11 defines personal service as "Delivering the document to the attorney or party personally." It does not specify the manner of the personal Delivery, and the conduct defined in this Rule is exactly what occurred here. Caselaw interpreting the service requirement of section 39.2 has held that certified mail service is deemed complete when the envelope is delivered to the post office, regardless of whether it is claimed by the intended recipient. Actual service as occurred here has to be better than the constructive service allowed in the caselaw, especially when the purpose of the statute is to make sure the nearby landowners get actual notice.

For the foregoing reasons Applicant prays that the motion to dismiss be denied.

The 1,000 Foot Residential Zoning Setback Does Not Apply to this Project Due to Impossibility.

415 ILCS 5/22.14 states: "No person may establish any pollution control facility for use as a garbage transfer station, which is located less than 1000 feet from the nearest property zoned for primarily residential uses or within 1000 feet of any dwelling,.."

The most important rule of statutory construction is to ascertain the intent of the legislature when it adopted the operative statute. In this case the context of the Environmental Protection Act makes it clear that the Legislature intended to protect residential land uses from nearby pollution control facility development. There is no indication in the statute or anywhere else in the Pollution Control Act that the Legislature ever intended this setback requirement to be an absolute prohibition on pollution control facility development in the absence of actual or even possible nearby residential development and land uses.

This issue first came up in a recent transfer station siting case in Southern Illinois, and the Pollution Control Board was unequivocal in its finding that the ***impossibility*** of residential development negates the applicability of the 1000 setback requirement to properties that are zoned for primarily residential uses. In the Caseyville Transfer Station case the Board held:

> "Petitioners argue that the residential setback requirement of Section 22.14 of the Act has not been met. Rox. Br. at 5. This is because there are four parcels of property zoned Single Family District - Manufactured Home District, and two parcels of property zoned Manufactured Home Park District, located within 1,000 feet of the Site. Id. The Application includes a description of land uses surrounding the Site. R. at A-0016, A-0031-32. Further, Application Figure 2 shows land uses within 1,000 feet of the Site. See Area Land Use Map (App. Fig. 2). The Application also includes a list of parcels located within 1,000 feet of the Site, including owners and land use. See List of Parcels Within 1,000 Feet (App. Exh. I). Regarding the parcels zoned for residential use, CTS states in the Application that those parcels were purchased by St. Clair County under a Federal Emergency Management Agency (FEMA) buy-out program and that the parcels are encumbered by permanent deed restrictions prohibiting any future residential land use. R. at A-0016, citing Deeds of Parcels within 1,000 Feet of Site (App. Exh. J). The warranty deeds state that the Grantee "agree to conditions which are intended to restrict the use of the land to open space in perpetuity" and that the Grantee "agrees that no new structures or improvements shall be erected on the premises other than a restroom or a public facility that is open on all sides and functionally related to the open space use.' "

ROXANA LANDFILL, INC., PETITIONER v. VILLAGE BOARD OF THE VILLAGE OF CASEYVILLE, ILLINOIS; VILLAGE OF CASEYVILLE, ILLINOIS; AND CASEYVILLE TRANSFER STATION, L.L.C., RESPONDENTS VILLAGE OF FAIRMONT CITY, ILLINOIS, PETITIO, 2014 WL 12740295 (Ill.Pol.Control.Bd.), 29

This unanimous decision was affirmed by the Appellate Court, which reviewed the PCB decision and found in an unpublished opinion:

> "With regard to residential setback provisions of section 22.14 of the Act (415 ILCS 5/22.14 (West 2014)), the IPCB noted that the permanent deed restrictions in the parcels purchased by St. Clair County under the FEMA buy-out program provided that the grantee "agree[d] to conditions which [were] intended to restrict the use of the land to open space in perpetuity" and that the grantee "agree[d] that no new structures or improvements shall be erected on the premises other than a restroom or a public facility that [was] open on all sides and functionally related to the open space use.... Although not a criterion under section 39.2 of the Act (415 ILCS 5/39.2 (West 2014)), the petitioners reference Alley's affidavit to assert that CTS's proposed transfer station failed to meet the residential setback required under section 22.14 of the Act. See 415 ILCS 5/22.14(a)(West 2014) ("[n]o person may establish any pollution control facility for use as a garbage transfer station, which is located less than 1000 feet from the nearest property zoned for primarily residential uses or within 1000 feet of any dwelling"). The petitioners argue that CTS's proposed facility violates the 1000 foot setback requirements of the four parcels of property zoned Single Family District-Manufactured Home District and the two parcels zoned Manufactured Home District.As the IPCB found, however, pursuant to a FEMA program, St. Clair County purchased the parcels within 1,000 feet of the site that were zoned residential use and placed permanent deed restrictions on them barring any residential use. See *Boschelli v. Villa Park Trust & Savings Bank*, 23 Ill. App. 3d 82, 85 (1974) (if restrictive covenants are more restrictive than zoning requirements, they prevail as to purchasers). Accordingly, the evidence supported the IPCB's determination that the facility was located so as to minimize incompatibility with the character of the area and to minimize the effect on the value of surrounding property. Accordingly, we find that the IPCB's determination was not against the manifest weight of the evidence."
> *Roxana Landfill, Inc. v. Illinois Pollution Control Bd.*, 2016 WL 4005892 (Ill.App. 5 Dist.), 11 (Ill.App. 5 Dist.,2016)

So, clearly the actual, real world possibility of residential development on a particular parcel supersedes the language of the statute, language which does not mention exceptions or qualifications even though it implies the same within its implied directive that "primarily" residential uses be considered. The logical point is that the language in the statute, while not creating explicit exceptions to the setback requirement mandates a factual inquiry into the actual subject property its actual use and its possibility of residential development.

In this case the zoning at issue is Estate Residential zoning only over the active railroad tracks which run east of the site. More specifically, two railroad properties are present directly east of the site, which are zoned Estate Residence District (ER-1). The West Chicago Municipal Code indicates that the purpose of the ER-1 classification is to establish regulations for larger lot single-family residential areas, and that neighborhoods in this district shall consist of very low-density single-family homes. Permitted uses are single-family detached dwellings, home occupations, small community residences, forest preserves, and parks and recreational areas when publicly owned. Accessory buildings may include swimming pools, bathhouses, tennis courts, green houses, guesthouses, and horses/stables. Allowable "special uses" are golf courses including driving range, bar, restaurant, meeting and banquet rooms; country club; site reclamation and cleanup plan areas; and above ground service facilities.

The western railroad property is currently owned by the Union Pacific Railroad and the eastern railroad property is currently owned by Canadian National Railway. The railroads have been present for over seventy years, and remain active today. The properties are each approximately 100 feet wide, have steep banks that rise up approximately 10 feet above surrounding grade, and have no nearby vehicle access (see photographic log in Appendix 2-D1). The lot requirements for a residence in an ER-1 district include the following:

- Minimum lot area: 40,000 square feet;
- Minimum lot width: 100 feet at front, lot line and 200 feet at building line; and
- Minimum setbacks:
    - o Front yard: 50 feet;
    - o Corner side yard: 50 feet;
    - o Side yard: 30 feet;
    - o Rear yard: 50 feet; and
    - o Maximum lot coverage: 30%

The physical features of the property, the lack of access, and the above lot requirements make it physically impossible to construct a residence on the railroad property. Accordingly, this zoning classification on an active rail right of way seems to make no sense. The City of West Chicago explained this apparent contradiction and confirmed the impossibility of residential development when they stated in a recent letter:

> "The Union Pacific Railroad Line runs east of the subject property within Union Pacific Right of Way (ROW). While the ROW is zoned ER, Estate Residential, as an active rail line there can be no residential development within this corridor. Furthermore, there is insufficient room for a legally-sized series of Estate Residential lots including access to those lots. Finally, the ER zoning designation for the corridor is a remnant classification from the time it was annexed to the City of West Chicago... As such, the city believes Section

22.14(a) 1,000 foot setback requirement is not applicable." (Copy of City letter attached.)

The City's letter confirms the impossibility of estate residential development now on the property based on its active use by trains, but also in the future, because the lots would be legally too small and would lack legal access. The fact that this is a zoning remnant from a previous annexation explains the anomaly.

If you read the whole statute, the focus is on actual residences within the setback area, which is consistent with the legislature's intent to protect People. The impossibility of ever developing residences in the ER zoned area answers that question definitively.

Based on the foregoing, the 1000 foot setback does not apply to this site.

Respectfully submitted:

CITY OF
WEST CHICAGO

WHERE HISTORY & PROGRESS MEET

August 24, 2022

RE: Residential-zoned property located east of 1655 Powis Road, West Chicago, Illinois

To Whom It May Concern:

Both the Union Pacific Railroad and the Canadian National Railroad operate parallel tracks on land running northwest to southeast, east of and adjacent to the subject property. The right-of-way for these rail lines carries a remnant zoning classification of Estate Residential, which is the classification assigned upon annexation. No effort was made to reclassify the property.

As an active rail corridor, there can be no residential development. Furthermore, there is insufficient room to construct homes on one-acre minimum lots and no convenient way to access what would be a narrow string of properties. Residential development on this property is physically impossible.

As such, the City concludes that the 1,000-foot setback requirement in 415 ILCS 5/22.14(a) is not applicable.

John Hock P.E.
Civil & Environnemental Consultants
1230 East Diehl Road, Suite 200
Naperville, IL 60148

Dear Mr. Hock P.E.,

Canadian National Railway (CN) is in receipt of notice regarding the proposed project for the West DuPage Recycling and Transfer Station on August 24, 2022, at CN's corporate headquarters at 935 Rue De La Gauchetiere Rue, Montreal, H3B2M9, Canada.

The CN rail lines directly east of the West DuPage Recycling and Transfer Station are part of the Leighton Subdivision. The Leighton sub is a vital part of the CN network and on average sees about 21 trains per day. CN has no plans to decommission this rail line. The Leighton sub is part of the old Elgin Joliet & Eastern Railway (EJ&E) which was purchased by CN in 2009 and is doing business as the Wisconsin Central LTD which is a wholly owned subsidiary of Canadian National Railway.

CN has spent hundreds of millions of dollars in capital improvements since acquiring the EJ&E. The EJ&E connects the entire network together in the Chicago area. It ties together CN's southern region and its western and eastern regions. The EJ&E not only connects the CN network together, but it also connects with all the major railroads in the Chicago area. It is also home to CN's largest rail yard in the U.S. The EJ&E serves steel mills, petrochemical customers, and a diverse group of distribution centers.

This active rail line improves CN's rail operations on the entire CN system and the rest of the Chicago rail network. It has streamlined rail operations, reduced congestion, and will play an important role in CN's future. We do not have any comments regarding the proposed West DuPage Recycling and Transfer Station.

Sincerely,

K T. Donahue

Kevin T. Donahue
State & Local Affairs Manager

Re: Land Use Compatibility
and Real Estate Impact Study
Proposed West DuPage Recycling and Transfer Station
West Chicago, Illinois

Dear Mr. Mueller:

At the request of Lakeshore Recycling Systems, LLC., Associated Property Counselors, Ltd. (APC) completed a study of the proposed West DuPage Recycling and Transfer Station to determine if the development satisfies Illinois Environmental Protection Act, 415 ILCS 5/39.2 (a) (iii), commonly referred to as "Criterion 3". Criterion 3 requires that "the facility is located so as to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property".

The report by APC was presented at the public hearing and offered into evidence on January 4, 2023. On January 12, 2023 Kurt Carl Kielisch offered testimony about the conclusions presented in the consulting report prepared by APC. It is noteworthy that Mr. Kielisch is not a licensed appraiser in the State of Illinois according to the Illinois Department of Financial and Professional Regulation website.

The following is my response to the testimony of Mr. Kielisch as found on pages 919 thru 940 of the record of the January 12, 2023 hearing.

The Illinois Environmental Protection Act, at 415 ILCS 5/39.2 (a)(iii), requires that an applicant for a transfer station siting demonstrate that the proposed facility is located "so as to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property". Associated Property Counselors, Ltd. (APC) completed a study of the proposed West DuPage Recycling and Transfer Station to determine whether the proposed development satisfies this requirement.

Studies such as this require the application of several analytical tools depending on the situation, location of the property, surrounding applications and timing of the proposed development. The applicable analytical techniques to be applied are determined by these variables so there is not a "one size fits all" methodology that is to be applied to result in a credible conclusion. This is known as the Scope of Work Rule under the Uniform Standards of Professional Appraisal Practice (USPAP). These standards were applied in completion of the APC report.

Unlike situations where the first recycling and/or transfer station is being introduced into an area where none exists, the subject siting request involves the expansion of an existing recycling facility to include the development of a transfer station in a location where one currently exists in close proximity to the subject property. The LRS request does not involve the introduction of the first transfer station in the area but is the expansion of an existing recycling facility to include transfer station services similar to a nearby competitive facility (located to the north). This fact is clearly ignored in the testimony of Mr. Kielisch.

The APC analysis examined Criterion 3 on several levels. Since the proposed use is not the introduction of the first transfer station into this market, a before and after examination or paired sales analysis of this location is not possible. A nearby existing transfer station has been in existence for nearly 20 years and distinguishing between the impact of the proposed LRS facility from the existing facility after a nearly 20 year history of operation is difficult and likely impossible. Another fact ignored in the Kielisch testimony.

Because of the actual circumstances surrounding the subject property, the applicable scope of work for the subject does not involve a "paired sales" or "near and far" analysis. The most reasonable analytical technique to be applied in this matter involves the examination of value patterns, resistance to the location, examination of marketing periods, examination of sales periods, lowering of price points, rejection of the location, declining rental rates and deteriorating condition of properties in the area over an extended period of time. This was done and the APC report discusses the results of this analysis. A fact clearly ignored in the testimony of Mr. Kielisch.

In effect, there is no before and after in this matter. There is only a 15 to 20 year after period since the establishment of the first transfer station in the area.

While applying the correct analytical technique, APC found no resistance to the area, found no decrease in value, and found that there has been positive development near and away from the proposed and existing transfer stations. The report and Power Point presentation accomplishes this in the aerial photographs. A fact ignored in the testimony of Mr. Kielisch.

The testimony of Mr. Kielisch centers on his opinion that a Highest and Best Use study alone is insufficient in scope to determine if the Criterion 3 standard is met. I actually agree with this theory. For that reason, APC did not only apply the analysis of Highest and Best Use to formulate the conclusion presented. The applied HBU Study is used to support the opinion that the property meets the letter and spirit of Criterion 3 was and remains only part of the analysis applied by APC. The examination of HBU and the conclusion that the proposed use of the subject is the Highest and Best Use of the property is only one factor used by APC to formulate the conclusion that the subject is located "so as to minimize the effect on the value of the surrounding property". The fact that the proposed development is the HBU lends additional credibility to the work completed by APC.

Appraisal principles state that when an application is the Highest and Best Use of the property, the greatest value is achieved. This is clearly a positive feature for the buyer and seller. Mr. Kielisch ignores, however, that when an application is the Highest and Best Use of a property, the market is positively impacted. It is reasonable to conclude that if the development is a positive in the market, "the facility is located so as to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property". Mr. Kielisch further ignores the fact that when a property meets the tests of HBU it is not a form of locational obsolescence and is not a negative for surrounding properties. Therefore, a property that meets the tests of Highest and Best Use supports the Criterion 3 standard to "minimize the effect on the value of the surrounding property".

Lastly, the opinions presented by Mr. Kielisch misstate the conclusions presented in the APC report and are an attempt to play "hide the ball" by redirecting the attention of the testimony and report to only a part of the work completed. This is consistent with the cross examination that occurred during my testimony of January 4, 2023. The implication that not presenting a "paired sales" or "near and far" analysis causes the APC report to lack credibility is incorrect because these analytical techniques are not applicable for the subject property. It is noteworthy that Mr. Kielisch presented no opinion that the proposed development will have an adverse impact on area properties. He opines only that he does not think a Highest and Best Use analysis is solely sufficient to determine that the standards of Criterion 3 have been met. Unfortunately, Mr. Kielisch ignores all other analysis presented in the APC report.

PODER- Immigrant Solidarity DuPage
311 S. Naperville Rd. Suite C Phone: 630 518-5390
Wheaton, IL 60187 Alternate: 630 965-1694 ; 630 546-4873

In the Matter of: APPLICATION FOR LOCAL SITING APPROVAL FOR LAKESHORE RECYCLING SYSTEMS, LLC, FOR THE WEST DUPAGE RECYCLING AND TRANSFER STATION, 1655 POWIS ROAD, WEST CHICAGO.

Public Comments of PODER - Immigrant Solidarity DuPage in Opposition to the Application for Local Siting Approval submitted by Lakeshore Recycling Systems, LLC.

People Opposing DuPage Environmental Racism (PODER), a committee of Immigrant Solidarity DuPage (ISD), submits this public comment in opposition to Lakeshore Recycling System (LRS)'s application to site a waste transfer station at 1655 Powis Road, West Chicago, Illinois. PODER is dedicated to fighting for environmental justice for minority communities in DuPage County; approving the LRS application would be an unacceptable continuation of environmental racism in West Chicago. West Chicago already hosts the only waste transfer station in DuPage County, and—if a second one is approved—West Chicago, with its large low-income and Latinx communities, will bear the entire burden of the waste transfer services for the generally wealthier and whiter DuPage County at large. Concentrating polluting facilities and polluting truck traffic in the minority and immigrant community of West Chicago is an act of environmental injustice. PODER urges the City Council make a break from the City's history of environmental racism and protect its residents by denying LRS's application.

At the outset, PODER would like to register its outrage at the ways in which the LRS application process has excluded or frustrated the involvement of the Latinx community of West Chicago. As explained further below, the process was conducted in ways offensive to and with the direct effect of creating barriers to the meaningful engagement of the Latinx community and, in particular, of Spanish speakers, even though 52.7% of West Chicago residents speak a language other than English at home.[1] The hearing was not translated into Spanish and did not provide for any translation of the relevant documents or testimony. As a result, this process has been fundamentally unfair to PODER and the non-English speaking residents of West Chicago.

LRS's proposed expansion would impose significant burdens on West Chicago and LRS has failed to demonstrate that the public health, safety, and welfare of West Chicago will be protected from its negative impacts. LRS claims its proposed waste transfer station will provide benefits in the form of lower waste hauling prices from increased competition, more convenient waste disposal, and additional tax revenues.[2] However, instead of focusing on West Chicago, the actual host community, LRS touts these benefits that would be enjoyed for DuPage County and beyond.[3] LRS's proposed facility may increase the capacity for processing waste throughout DuPage County, but only by compounding the air pollution burdens already faced by the minority communities of West Chicago. DuPage County is a county with a white majority, and a median household income of $100,292 in 2021. Conversely, West Chicago is only 35.7% white, and has a much lower median household income, at $83,379.[4] While DuPage County residents are only about 15% Latino and/or Hispanic, 48.9% of West Chicago residents identify as Latino and/or

[1] PODER Exhibit 1.
[2] Transcript, Day 1, p.85.
[3] LRS Application, Criterion 1, p. 37.
[4] PODER Exhibit 1.

Hispanic, with over 50% of persons over the age of five speaking a language other than English at home.[5] LRS's proposed waste transfer facility will negatively impact the public health, safety, and welfare of these communities in West Chicago, in exchange for purported benefits that will be shared among the majority white communities around the County. Concentrating environmental and public health burdens near lower-income and more minority communities while dispersing benefits of a polluting facility across a wider, wealthier, and whiter population is the very definition of environmental racism. And that is precisely what LRS proposes and now asks the City to endorse.

Within the broader historic and social context of West Chicago, PODER asks the City Council to reject LRS's application for failure to comply with the applicable law, the nine criteria under § 39.2 of the Illinois Environmental Protection Act. On February 21, 2023, PODER will also submit to the hearing officer, at his instruction, proposed Findings of Fact and Conclusions of Law, which will provide detailed arguments demonstrating that the LRS application does not meet applicable statutory criteria and that the LRS application process and hearing failed the statute's requirement of fundamental fairness.[6] This public comment is intended to complement and not to restate that upcoming filing, to offer broader perspective on PODER's legal positions, and to provide additional information related to environmental justice principles that was erroneously excluded from the hearing.

[5] PODER Exhibit 1; Please note that these numbers are from the United States Census Bureau, which likely undercounts minority populations.

[6] Per the hearing officer's instruction, that submission will be made on February 21, 2023, though PODER asks that the City Council review it directly in addition and as incorporated into these comments.

I. West Chicago has a History of Environmental Injustice.

Given West Chicago's history, and to protect the health, safety, and welfare of its present minority community in the context of that history, the City Council should deny LRS's application. The City Council's decision should be informed by West Chicago's particular situation; LRS's proposed facility would not be sited in a vacuum, but in a diverse city facing preexisting environmental burdens. West Chicago is a predominantly minority community, and the environmental hazards within the City have historically been so great that at one time, the City had four Superfund sites polluted with radioactive contamination. PODER respectfully requests that the City Council take into account West Chicago's environmental history and current needs.

This is not the first time West Chicago residents have faced business practices that threaten both the environment and their health. The history of West Chicago, to the bitter dismay of many residents, is often defined by the long shadow of radioactive waste from now-defunct chemical companies. West Chicago has a lengthy history of productive industry that was the natural outgrowth of its prime location along the railroads. The combination of railroads and factories resulted in an influx of Latinx immigrant labor, and West Chicago became the home of these Mexican and Puerto Rican migrants and their families.[7] There were, and continue to be, other industrial companies beside chemical manufacturers that operate in West Chicago, but none have left quite a scar on West Chicago like that of Kerr-McGee and its predecessors at the Rare Earths Facility.

The Rare Earths Facility in West Chicago was built in the 1930s by the Lindsay Light and Chemical Company. Lindsay Light used the facility to produce radioactive material for use in various gas and electrical products and nuclear research. The facility started with naturally

[7] https://westchicago.org/history-of-west-chicago/

radioactive monazite ore and then extracted pure radioactive elements, primarily thorium and uranium. The byproduct of this extraction process was tons of dirt-like radioactive tailings, which the company piled up outside its factory.[8] The liquid waste from the factory was dumped into unlined pits, where it seeped into the groundwater and found its way into the nearby Kress Creek and the DuPage River.[9] Faced with a growing pile of material that looked like dirt, the facility started offering the tailings to residents to use as fill for landscaping. As a result, during the 1940s and 1950s residents unwittingly spread radioactive waste all over their town and in their own backyards. Lindsay Light was eventually sold to American Potash and Chemical Corporation, which was then absorbed by Kerr-McGee. Kerr-McGee shut the facility down in 1973 and the company itself changed forms until, eventually, a successor named Tronox went bankrupt in 2009.[10]

In the nearly one hundred years since the facility first started operating, Kerr-McGee, West Chicago, and other government actors have been locked in a long and complicated battle over understanding and addressing the harm that these companies have inflicted on West Chicago.[11] The various government actors were not always supportive of the interests of West Chicago's residents. Some residents moved away, but those who remained or who moved to West Chicago were left with no choice but to start their own activism demanding justice.[12] Eventually, in 1991, four different sites in West Chicago were formally designated by the United States EPA as

"Superfund Sites," and since then progress has been made to remediate those areas. Unfortunately, this saga has not yet ended: there is still groundwater contamination to remediate, and two locations remain on the Superfund list.[13] Even when the clean-up is officially considered complete, the legacy of Kerr-McGee will continue to haunt West Chicago residents, some of whom have long-term health issues potentially linked to the radioactive thorium they grew up in close contact with.[14]

II. Environmental Harm Disproportionately Impacts Minority Communities in West Chicago.

The harms of thorium waste in West Chicago go beyond illness and stigma, and the legacy of radioactive waste has disproportionately harmed people of color. Latinx families bought homes in West Chicago without knowing the danger that lurked in their own backyards. Information about thorium contamination was not readily shared by realtors, possibly even intentionally obscured, and even less information was available in Spanish.[15] Radiation contamination is not easily remedied, as thorium has a half-life of fourteen billion years, causing residents constant concern about their health and property values.[16] This legacy of contamination is borne by Latinx families that moved to West Chicago long after the pollution was created. Even as late as 2015 there were still homes with radioactive contamination in their yards.[17]

Of course, environmental harms being concentrated in a minority community is not unique to West Chicago. Across the state of Illinois, minority communities bear the burden of polluting industries.[18] A study by University of Illinois-Chicago School of Public Health found that facilities that release toxic pollutants in Chicago are likely to be concentrated near public schools in Latino communities.[19] Similarly, a study by the United States EPA-funded Air, Climate and Energy Solutions found that communities of color, across region and income level, suffer from significantly higher levels of air pollution.[20] The impacts of environmental injustice are significant and continue to proliferate due to ignorance of and inaction by governmental institutions.

The disproportionate impact of environmental harms on minority communities and the importance of environmental justice has recently received government acknowledgement and even spurred some government action. In 2011, Illinois enacted the Environmental Justice Act, most recently amended in 2017, which created the Commission on Environmental Justice to analyze the impact of environmental injustice and advise the state government on environmental justice issues. The Act also defined environmental justice as a principle built on three pillars:

> (i) the principle of environmental justice requires that no segment of the population, regardless of race, national origin, age, or income, should bear disproportionately high or adverse effects of environmental pollution; (ii) certain communities in the State may suffer disproportionately from environmental hazards related to facilities with permits approved by the State; and (iii) these environmental hazards can cause long-term health effects.[21]

---

[20] https://www.epa.gov/sciencematters/study-finds-exposure-air-pollution-higher-people-color-regardless-region-or-income

[21] 415 Ill. Comp. Stat. Ann. 155/5.

Additionally, the federal government has also begun to implement policies that support environmental justice. As a recent example, the Biden Administration issued an Executive Order directing agencies to implement the Inflation Reduction Act by prioritizing "environmental and climate justice through an all-of-government approach."[22]

Government decisions must be informed by considerations of environmental justice and if municipalities ignore environmental justice in making local land use decisions, they can violate the civil rights of their residents.[23] Indeed, West Chicago need look no further than its larger nearby namesake for a cautionary tale: the City of Chicago presently faces the potential loss of millions of dollars in federal funding because—through both specific land use decisions and its underlying land use decision-making processes—the City has created, perpetuated, and failed to ameliorate conditions in which minority populations bear disproportionately the public health and environmental harms of industrial facilities.[24]

III. LRS's Waste Transfer Station Should be Denied Under Environmental Justice Principles.

Approving LRS's application would not only fail to take into account the environmental justice as defined by state law but would be an act in direct contradiction of that principle. As such, PODER asks the City Council to deny LRS's application because LRS has failed to demonstrate that the public health, safety and welfare of West Chicago residents will be protected as required by Illinois law. The Illinois Environmental Protection Act (IEPA) governs the

application process for pollution control facilities.[25] Section 39.2 requires certain procedures for the application process and provides a rubric to be applied by the local governing body, in this case the City Council of West Chicago, in making decisions on approval or disapproval.[26] Under § 39.2(a), there are nine distinct criteria that LRS must satisfy to receive the City Council's approval. While, as discussed in PODER's forthcoming proposed Findings of Fact and Conclusions of Law, LRS's application fails to satisfy other criteria, the insufficiency of LRS's application on this second criteria is particularly glaring when viewed in the light of environmental justice. Criterion 2 requires that "the facility is so designed, located and proposed to be operated that the public health, safety and welfare will be protected."[27] The phrase "public health, safety, and welfare" requires that LRS consider the community wherein it is requesting to site its facility. In this case, that community is West Chicago.

LRS fails to adequately address its proposal's impacts on public health, safety, and welfare on West Chicago, choosing instead to focus on a broader geography. In its application's treatment of public health, safety, and welfare, LRS focused on the needs of DuPage County as a whole, while failing to examine the health safety and welfare of West Chicago in particular. In fact, an analysis cited by DuPage County in its 2007 update to its Solid Waste Management Plan stated "the only areas that might benefit from a waste transfer station are located in the southern portion of the County."[28] Taking into account West Chicago's demographics and history with environmental pollution, the fact that West Chicago already contains the only waste transfer station in all of DuPage County, and the fact that the waste transfer station will benefit a much broader

[27] 415 ILCS 5/39.2(a)(ii)
[28] *See DuPage County Solid Waste Management Plan Five Year Update – 2007*, DuPage County, p. 3.

geographic area, LRS's application stands in contradiction to the environmental justice principles set forth by the state and federal governments. Increased environmental impacts on a minority community—described in the following section—must be a part of the public health, safety and welfare analysis. Without considering environmental justice, LRS has turned a blind eye to the context and needs of West Chicago. The City Council should reject that ignorance and protect West Chicago residents from potential harm.

IV. LRS's Application has not Addressed Increased Air Pollution Likely to Exacerbate Environmental Injustice in West Chicago.

a. LRS's Proposed Facility will Negatively Impact Air Quality.

PODER is concerned about how the operation of the proposed waste transfer station will negatively impact on air quality in West Chicago. LRS has failed to submit any information regarding air quality impacts, and there is thus insufficient evidence that the facility will protect the health, safety and welfare of West Chicago residents from poor air quality. LRS's proposed operations would include increased traffic from diesel garbage container trucks, and these diesel trucks will emit significant quantities of particulate matter, which is a regulated air pollutant under the Clean Air Act. The type of particulate matter associated with diesel engine combustion has long and conclusively been linked to health issues like asthma, heart disease, and other respiratory problems.[29] The United States EPA sets a limit on the level in the ambient air of the type of particulate matter associated with diesel engine combustion and that limit is currently set at 12 micrograms of such particulate matter per cubic meter of ambient air.[30] However, the United

[29] https://www.epa.gov/dera/learn-about-impacts-diesel-exhaust-and-diesel-emissions-reduction-act-dera#:~:text=Human%20health%2C%20our%20environment%2C%20global,all%20affected%20by%20diesel%20emissions.&text=Human%20Health%20%2D%20Exposure%20to%20diesel,in%20children%20and%20the%20elderly.

[30] 40 CFR § 50.18.

States EPA is in the process of lowering that limit to 9 micrograms per cubic meter—or potentially even lower.[31] The United States EPA sets these limits specifically by reviewing the best science and setting a limit that is sufficient to protect public health.[32] Air pollution precisely like that from the diesel trucks that will run in and out of the proposed LRS facility has well-established negative impacts on public health and Criterion 2 requires that LRS's facility be "so designed, located and proposed to be operated that the public health, safety and welfare will be protected."[33]

LRS did not submit air quality data in either its application materials or during its public hearing testimony and therefore did not meet its burden under Criterion 2. In contrast, PODER did submit monitoring data on the current air quality in West Chicago and that data show that LRS's failure to conduct any monitoring is a fatal flaw in its application. Ms. Julieta Alcantar-Garcia of PODER used a commercially-available sensor to measure particulate matter outside both the Groot and LRS facilities on Powis Road. On all but two occasions, the levels of particulate matter outside the facilities exceeded both the current limit imposed by the EPA (12 micrograms per cubic meter) and the proposed new limit (9 micrograms per cubic meter). One of the other two readings taken landed right at the 12 microgram per cubic meter limit, and the only reading below the limit was taken inside a building. Ms. Alcantar-Garcia took these particulate matter measurements while LRS is operating its current facility. If LRS expands, there will be even more diesel truck traffic around the facility, and therefore more emissions and particulate matter pollution in West Chicago. LRS failed to address possible increased emissions in its application and did not consider wind patterns and the potential cumulative impacts on air quality.

---

[31] https://www.epa.gov/pm-pollution/proposed-decision-reconsideration-national-ambient-air-quality-standards-particulate

[32] 42 U.S.C. § 7409(b).

[33] 415 ILCS 5/39.2(a)(ii).

LRS's application cannot be approved when LRS has refused to address whatsoever this known and anticipated harm to the public health and welfare.

b. The Proposed LRS Facility's Negative Impact on Air Quality Would Perpetuate Environmental Injustice.

Negative impacts on air quality from LRS's proposed facility trigger environmental justice concerns. Alarmingly, minority communities experience higher than average exposure to particulate matter pollution and this heightened exposure occurs without regard to income levels of the community.[34] West Chicago, with a population that is approximately 64% people of color, is at risk for this type of disparate impact already and adding a second waste transfer facility will only increase that risk. Heightened exposure to pollution on the basis of race or national origin is one of the dangers that the Illinois statute's principle of environmental justice identifies as requiring remedy and LRS's proposed facility fails to demonstrate that it will not perpetuate environmental injustice by exposing a significant Latinx and immigrant communities to increased air pollution.

LRS's proposed expanded facility is not coming to a blank slate in West Chicago—there is already one waste transfer station in the community and a number of other sources of emissions beyond that. Air pollution is inherently mobile and cumulative because air does not respect the boundaries of business and property. When considering "public health, safety and welfare," LRS failed to account for the larger context of the current situation in West Chicago. It did not consider how the already poor air quality in West Chicago will be further diminished by its proposed expanded facility and therefore did not adequately consider if its facility will protect the public health, safety and welfare as required by Criterion 2.

[34] https://www.science.org/doi/10.1126/sciadv.abf4491#body-ref-R3

V. Electric Garbage Trucks Could Partially Address Air Quality Concerns.

Switching to an all-electric fleet of garbage and container trucks could alleviate some of the air pollution that would otherwise be caused by an increase in diesel truck traffic at LRS's proposed expanded facility. LRS's Training and Community Partner, Joy Rifkin, whose job at LRS is to "lead…sustainability, diversity, equity, and inclusion and social impact partnerships across the communities [LRS] serve[s]", stated at the public hearing that "[w]hen electric trucks are readily available, environmentally sound, and have a longer battery life, LRS will be at the forefront of that transition."[35] Right now, ComEd—the electric utility that serves West Chicago—is awaiting approval of its proposed Beneficial Electrification plan for vehicles by the Illinois Commerce Commission in ICC Docket Nos. 22-0432 & 0442. ComEd's Beneficial Electrification Plan is likely to provide the opportunity for LRS to make good on its public commitment to "be at the forefront of that transition" to electric trucks.[36] ComEd's proposed Beneficial Electrification Plan offers support in the form of rebates and fleet assessment services to assist with the electrification of medium- and heavy-duty trucks.[37] For commercial and industrial customers such as LRS, ComEd proposes to provide third-party fleet electrification assessments. The third-party vendor would analyze fleet operations to determine electrification opportunities, costs, and benefits and help to develop an electrification plan.

If the City Council approves LRS's application despite the anticipated increase in deleterious air pollution from diesel trucks and LRS's lack of evidence as to its likely air quality harms, the City Council should only approve the application on the condition that LRS investigate and pursue funding under the ComEd Beneficial Electrification Plan to rapidly transition its fleet

[35] Transcript, Day 6, p. 198
[36] ComEd Beneficial Electrification Plan, ICC Docket Nos. 22-0432 & 044, p. 34
[37] ComEd Beneficial Electrification Plan, ICC Docket Nos. 22-0432 & 044, p. 34

to electric trucks. LRS should be required to report its proposed course of action back to the City Council within a reasonable time not to exceed six months after the approval of ComEd's plan.

VI. The Application Process was Fundamentally Unfair and Did Not Protect the Civil Rights of West Chicago's Residents.

The City should reject LRS's application because the way this process has unfolded has been fundamentally unfair and disrespected the civil rights of West Chicago's residents.

The timing of LRS's application and the City's review process frustrated public participation and delivered unsubtle messages of disrespect to the community at almost every juncture. LRS filed its application for siting approval on September 16th, Mexican Independence Day, which some residents felt was an affront to the celebration of their Mexican identity and heritage. On a day of cultural importance to a signific portion of Latinx West Chicagoans, LRS proposed a second pollution control facility in the city which is nearly 50% Latinx.

LRS's decision to file its application on that date triggered deadlines under state law that meant the public hearings would be forced to fall during or just after the holiday season. The hearing officer originally proposed to schedule statutorily-required hearings during the Christmas holiday, which would have made it substantially more difficult for the public to participate. A hearing during the holidays is inconvenient for almost anyone. Such timing is prohibitive and insulting for those West Chicagoans whose faith calls them to dedicate time to religious observation, and for the significant groups of West Chicagoans who are immigrants or first-generation Americans and who travel internationally to be with family for those religious holidays. While the hearings were not ultimately scheduled during the Christmas holiday, they began immediately after the new year, meaning any preparation for the hearings would have to occur

during the holiday season and, therefore, mitigating those inequitable burdens to only a small degree.

Once the hearings began, PODER's testimony in opposition to the proposed facility was set for Martin Luther King Jr. Day. West Chicagoans who sought to oppose the siting of another garbage transfer station in their community were forced to put on their case on a day when schools were closed, rendering usual childcare resources unavailable.[38] On a day meant to honor the legacy of a man who was assassinated while supporting protests against the racially inequitable burdens of the municipal solid waste industry, PODER was told—both explicitly by the hearing officer and implicitly through the timing and structure of the hearing—that race and environmental justice were irrelevant to the City's decision of whether to route a white county's garbage through a majority-minority community.

Furthermore, throughout this process, Spanish speakers did not have equal access or an equally meaningful opportunity to contribute. PODER recognizes that the City maintained a Spanish translation of the website it created to post information about the LRS application process; that is important and appreciated. That step is also insufficient. First, while the website itself had an option to translate into Spanish, none of the application materials were translated into Spanish, making meaningful review for Spanish-speakers impossible. Second, in general, outreach to the Spanish-speaking community was abysmal. Although there were moments in the process where Spanish speakers could engage, there was so little outreach to that community that many of them

[38] Even when PODER was permitted to testify, its witnesses' testimony was devalued and inappropriately attacked by the hearing officer who is charged with impartially collecting evidence for the City. During PODER's testimony, the hearing officer, on his own initiative, was apparently performing google searches on his cell phone and made statements on the record that attacked and discredited information being provided by PODER's witnesses.

were not even aware they could engage. This was particularly true of the means for members of the public to provide oral comments during the hearing: the registration process for oral public comment was opaque and unnecessarily required registration weeks in advance. Setting up oral public comments this way made it easy for participation by LRS employees and difficult for participation by actual West Chicagoans, leading to oral public comment predominated by employee opinions that did not reflect views of the actual community. Moreover, there was no option to register or make comments in Spanish, the first (and often the only) language spoken by many West Chicagoans. Indeed, the public hearing was conducted entirely in English and there were no translation services available. One PODER witness was forced to testify in her second language, which is a direct and avoidable barrier to her right and ability to communicate her testimony as easily and effectively as witnesses whose first language was English or if she had been able to testify in Spanish.

Title VI of the Civil Rights Act of 1964 states that "[n]o person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance."[39] The Civil Rights Act defines "program" to include any "department, agency, special purpose district, or other instrumentality of a State or of a local government."[40] The local government of West Chicago is responsible for protecting its citizens and their civil rights. West Chicago should reject LRS's application because the process to review that application excluded West Chicagoans of color and from immigrant communities and that process was conducted in a way that discriminatorily and disproportionately inhibited their participation.

[39] 42 U.S.C. § 2000d.
[40] 42 U.S.C. § 2000d-4a.

***

The City Council must protect the people of West Chicago by denying LRS's application to site another waste transfer station in their City. The City of West Chicago has already suffered disproportionate impacts from environmental pollution, and currently is the only municipality in DuPage County to host even one waste transfer station. The siting of another waste transfer station in the City would result in increased air pollution that would impact the health of the people who live there, and which LRS's application does not adequately address. To sacrifice the health, safety, and welfare of the lower-income Latinx community of West Chicago for the benefit of wealthier, majority-white localities would perpetuate environmental injustice. Furthermore, the application process itself was fundamentally unfair and violative of the public's civil rights, and accepting this process as an accurate reflection of the West Chicago community's values represents an additional injustice. For the reasons stated above and the reasons articulated in PODER's forthcoming proposed Findings of Fact and Conclusions of Law, PODER respectfully requests that the City Council deny Lakeshore Recycling Systems' application to site a waste transfer station at 1655 Powis Road.

Conditions Proposed by City Staff

1. The maximum tonnage per day that may be received by the facility shall not exceed 1,950 tons per day, of which up to 650 tons per day may be municipal solid waste (MSW), up to 300 tons per day may be hydro excavation waste, up to 750 tons per day may be construction and demolition debris (C&D) and up to 250 tons per day may be single stream recyclables (SSR).

2. The Applicant shall keep the truck doors to the transfer facility closed, except for emergencies and to allow trucks to enter and exit the facility, during regular business hours. The doors shall be equipped with sensors such that they will open and close automatically as vehicles enter and exit the transfer building. Alternatively, an employee may open and close the doors when trucks access and exit the transfer facility.

3. The push walls in the transfer facility shall be designed to ensure to the satisfaction of the City that there will be no buildup of waste behind the walls which could result in fire, odor, or harborage for vectors. In addition, the Applicant shall provide a certification from a licensed structural engineer that the push walls will be capable of withstanding impact from waste loading equipment at 5 mph without shearing the beams or compromising the integrity of the building's walls.

4. All transfer vehicles utilizing the facility shall be equipped with auto tarping systems, and all loaded transfer trailers shall be tarped inside of the transfer building prior to exit.

5. The Applicant shall continue to operate the C&D recycling portions of the facility in accordance with the requirements of 415 ILCS 5/22.38 for so long as the current permit (2015-124-OP) remains in effect. If the current permit (2015-124-OP) is discontinued, replaced or terminated, the following conditions, as modified, shall remain in effect:

- *The facility shall be designed and constructed with roads and traffic flow patterns adequate for the volume, type and weight of traffic using the facility including, but not limited to hauling vehicles, emergency vehicles, and on-site equipment. Sufficient area shall be maintained to minimize traffic congestion, provide for safe operation, and allow for queuing of waste hauling vehicles.*
- *The operator shall provide adequate parking for all vehicles and equipment used at the facility and as necessary for queued hauling vehicles.*
- *Roadways and parking areas on the facility premises shall be designed and constructed for use in all weather, considering the volume, type and weight of traffic and equipment at the facility.*
- *The facility shall be designed and constructed so that site surface drainage will be diverted around or away from the recycling and waste transfer areas. Surface drainage shall be designed and controlled so that adjacent property owners encounter no adverse effects during development, operation and after closure of the facility.*
- *Run-off from roadways and parking areas shall be controlled using storm sewers or shall be compatible with natural drainage for the site. Best management practices (e.g., design features, operating procedures, maintenance procedures, prohibition of certain practices and treatment)*

shall be used to ensure that run-off from these areas does not carry wastes, debris or constituents thereof, fuel, oil or other residues to soil, surface water or groundwater.

- *The facility, including, but not limited to, all structures, roads, parking and recycling areas, shall be designed and constructed to prevent malodors, noise, vibrations, dust and exhaust from creating a nuisance or health hazard during development, operation and closure of the facility. Facility features (e.g., berms, buffer areas, paving, grade reduction), best available technology (e.g., mufflers, machinery enclosures, sound absorbent materials, odor neutralizing systems, air filtering systems, misting systems), and building features (e.g., enclosed structures, building orientation) shall be among the measures to be considered to achieve compliance.*
- *The facility shall be designed and constructed to prevent litter and other debris from leaving the facility property. Facility features (e.g., windbreaks, fencing, netting, etc.) shall be among the measures considered to ensure that the debris does not become wind strewn and that no other provisions of the Act are violated.*
- *No regulated air emissions shall occur from these facilities, except as authorized by a permit from the Illinois Environmental Protection Agency (IEPA)Bureau of Air (BOA). No process discharge to Waters of the State or to a sanitary sewer shall occur from these facilities, except as authorized by a permit from the IEPA Bureau of Water (BOW).*
- *The facility shall be designed and constructed with a water supply of adequate volume, pressure, and in locations sufficient for cleaning, firefighting, personal sanitary facilities, and as otherwise necessary to satisfy operating requirements (e.g., dust suppression, wheel washing) and the contingency plan.*
- *The facility shall be designed and constructed with exterior and interior lighting for roadways, and waste handling areas adequate to perform safely and effectively all necessary activities.*
- *The facility shall be designed and constructed with truck wheel curbs, guard rails, bumpers, posts or equivalents to prevent backing into fuel storage tanks, equipment, and other structures.*
- *The facility shall be designed and constructed with adequate shelter, sanitary facilities, and emergency communications for employees.*
- *The facility operator shall install fences and gates, as necessary, to limit entry. Except during operating hours, the gates shall be securely locked to prevent unauthorized entry.*
- *The facility may receive general construction and demolition debris at the site Monday through Saturday, 24 hours a day. The facility shall be closed on Sunday and the six major federal holidays (New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day). When the facility is operated before sunrise or after sunset, adequate lighting shall be provided. If it is required for the facility to be open beyond normal operating hours to respond to emergency situations, a written record of the date, time and reason the facility was open shall be maintained in facility operating records. The IEPA's Regional Office and the county authority responsible for inspection of the facility, per a delegation agreement with the IEPA, must be notified and must grant approval each day that the operating hours need to be extended. No later than 10:00 a.m. of the first operating day after the operating hours have been extended, the Applicant shall send a written report by email to the City Administrator, which describes the length of the extension of the operating hours and the reason for the extension.*
- *The facility may receive and transfer MSW, hydro excavation waste and SSR from 4:00 a.m. to 12:00 a.m. Monday through Friday and from 4:00 a.m. to 12:00 p.m. on Saturday, with no operation on Sunday or the six major federal holidays (New Years Day, Memorial Day,*

Independence Day, Labor Day, Thanksgiving Day and Christmas Day), provided that on the Saturday following a major federal holiday, regular business hours may be extended to 12:00 a.m. If it is required for the facility to be open beyond normal operating hours to respond to emergency situations, a written record of the date, time and reason the facility was open shall be maintained in facility operating records. The City of West Chicago must be notified by email to the City Administrator each day that the operating hours need to be extended. The IEPA's Regional Office and the county authority responsible for inspection of the facility, per a delegation agreement with the IEPA, must be notified and must grant approval each day that the operating hours need to be extended.

- *Fire safety equipment (fire extinguishers) shall be maintained in accordance with recommended practice.*
- *Non-recyclable waste may be kept temporarily in covered containers or transfer trailers for no more than 24 hours (except on weekends and holidays), provided that loaded or partially loaded trailers intended to be stored overnight or that will not be picked up and transported the same operating day are stored indoors and suitably covered.*
- *Piles of general construction or demolition debris shall be covered or wetted to prevent air-borne dust.*
- *The facility shall be designed and constructed to prevent unauthorized access to recycling areas, storage areas for unauthorized wastes, salvaged and recycled materials, and staging areas where loaded site equipment or vehicles may be parked. Facility features such as fences and gates shall be provided.*
- *Waste handling areas shall be designed and constructed to prevent exposure of wastes and recyclable materials to run-on and flooding.*
- *The sorting areas shall be properly graded and compacted to prevent ponding from forming leachate during storms.*
- *Records shall be maintained on-site at the facility office for each operating day. The operator shall record operating hours, load ticket information, load inspections, daily processing time, volume processed per day, transfer load out and waste disposition details.*
- *The operator shall, within 48 hours of receipt of the general construction or demolition debris at the facility, sort the general construction or demolition debris. The operator shall separate the recyclable general construction or demolition debris from nonrecyclable general construction or demolition debris and dispose of the non-recyclable general construction or demolition debris, in accordance with Section 22.38(b)(l) of the Act.*
- *The operator must place wood, tires, and other unacceptable materials in covered dumpsters or vehicles adequate to prevent the release of leachate.*
- *All non-recyclable general construction or demolition debris, and unacceptable material shall be moved to the waste transfer facility on the same day it is received, and disposal of such material shall be handled in accordance with all applicable federal, State, and local requirements and with these conditions.*
- *The operator shall transport all non-putrescible recyclable general construction or demolition debris for recycling or disposal within 6 months of its receipt at the facility, in accordance with Section 22.38(b)(4) of the Act.*
- *In accordance with Section 22.38(b)(6) of the Act, the operator shall employ tagging and record keeping procedures to identify the source and transporter of C&D material accepted by the facility.*

- *The operator shall use load tickets to control the site activities and comply with the tagging and record keeping procedures. These load tickets shall identify the source of the C&D material delivered to the site. The operator shall use these tickets to identify the location in the yard or in the covered dumpsters and the length of time stored at the site to achieve compliance.*
- *The operator is prohibited from receiving hazardous and asbestos containing materials.*
- *The operator may separate clean concrete and clean soil from the general construction or demolition debris as recyclable materials for use in construction. The operator is permitted to store recyclable concrete and clean soil for a maximum period of 3 months.*
- *The operator may store the steel separated from concrete or other construction or demolition debris for a maximum period of 6 months. After six months, the steel must be sent offsite for disposal or recycling.*
- *The operator shall ensure that site surface drainage, during development, during operation and after the site is closed, shall be such that no adverse effects are encountered by adjacent property owners.*
- *The best available technology (mufflers, berms and other sound shielding devices) shall be employed to minimize equipment noise impacts on property adjacent to the site during both development, operation and during any applicable post-closure care period.*
- *Management of Unauthorized Waste by the operator*
    - *Landscape waste found to be mixed with general construction and demolition debris shall be removed the same day and transported to a facility that is operating in accordance with the Illinois Environmental Protection Act (Act), Title V, Sections 21 and 39 (415 ILCS 5/21 and 39).*
    - *Lead-acid batteries mixed with general construction and demolition debris shall be removed the same day and transported either to a drop-off center handling such waste, or to a lead-acid battery retailer.*
    - *Special wastes including hazardous waste, non-hazardous special waste, and potentially infectious medical waste mixed with general construction and demolition debris shall be containerized separately and removed from the property no later than five hours after receipt by a licensed special waste hauler. Special wastes shall be transported to a licensed special waste management facility that has obtained authorization to accept such waste. The operator shall maintain a contract with haulers so that the immediate removal is ensured. The operator shall develop an emergency response/action plan for such occurrences.*
    - *Asbestos debris from general construction and demolition debris shall be managed in accordance with the National Emission Standards for Hazardous Air Pollutants (NESHAPS) regulations.*
    - *Tires found to be mixed with general construction and demolition debris shall be removed and managed in accordance with Section 55 of the Act [415 ILCS 5/55].*
    - *White good components mixed with general construction and demolition debris shall be removed and managed in accordance with Section 22.28 of the Act [415 LCS 5/22.28].*
    - *No person may knowingly mix liquid used oil with general construction and demolition debris.*
    - *After the unauthorized waste has been removed from the facility, a thorough cleanup of the affected area shall be made according to the type of unauthorized waste managed.*

Records shall be kept for three years and will be made available to the IEPA upon request. In addition, the Applicant shall provide an annual written report to the City of West Chicago not later than January 31 of each year, which report shall: list the types, quantities and dates of receipt of all unauthorized waste; the generators of such waste; and the sites to which the wastes were delivered for disposal, processing or handling.

- *The following wastes shall not be accepted at the facility:*
  - *Hazardous substances (as defined by Section 3.215 of the Illinois Environmental Protection Act);*
  - *Hazardous waste (as defined by Section 3.220 of the Illinois Environmental Protection Act);*
  - *Potentially infectious medical wastes (as defined by the Illinois Environmental Protection Act in Section 3.84);*
  - *Universal waste (as defined by Title 35 of the Illinois Administrative Code Part 733 including batteries, pesticides, mercury-containing equipment and lamps);*
  - *Regulated asbestos containing materials;*
  - *Polychlorinated biphenyl wastes;*
  - *Used motor oil;*
  - *Source, special or by-product nuclear materials;*
  - *Radioactive wastes (both high and low level);*
  - *Sludge;*
  - *White goods (incidental white goods received at the proposed transfer station will be segregated and stored for pickup by an off-site recycler);*
  - *Lead-acid automotive batteries (incidental automotive batteries received at the transfer station will be segregated and stored for pickup by an off-site recycler);*
  - *Used tires (incidental tires received at the transfer station will be segregated and stored for pickup by an off-site recycler); and*
  - *Landscape waste.*
- *Special wastes generated at the site for disposal, storage, incineration or further treatment elsewhere shall be transported by the operator to the receiving facility utilizing the IEPA's Special Waste Authorization system and manifest system.*

6. Upon receiving final, non-appealable siting approval pursuant to 415 ILCS 5/39.2 to construct and operate the West DuPage RTS, and upon receiving an IEPA development permit, LRS shall, prior to commencing operation of the waste transfer facility, 1) execute and grant to the DuPage Airport Authority ("DAA") a new avigation easement, which is Exhibit A to the Agreement Between the DuPage Airport Authority, Oscar (IL) LLC, and Lakeshore Recycling Systems, LLC, dated January 19, 2022 ("Airport Agreement"), 2) LRS shall reduce the roof height of its existing transfer building so as to stay below all critical elevations in the new avigation easement, and 3) LRS shall not allow any penetrations whatsoever to the new avigation easement.

7. All improvements installed on and offsite by the Applicant shall be funded by and solely at the expense of the Applicant.

8. The tipping floor of the waste transfer building shall be cleaned and free of waste at the end of each operating day. Except as set forth in Condition 5, no waste or other material shall be left on the floor inside the transfer building or outside the transfer building overnight or when the facility is not operating.

9. The Applicant shall control litter by discharging and loading all waste within the enclosed portion of the Transfer Facility. After unloading, any remaining loose waste shall be removed or contained in the vehicle prior to exiting the site. The Applicant shall use its best efforts to assure that vehicles, hauling waste to or removing waste from the Transfer Facility, shall be suitably covered to prevent waste from leaving the vehicles. A fence to aid in the interception of any blowing litter shall surround the Transfer Facility. The Applicant shall diligently patrol the Subject Property during hours of operation to collect any litter. At a minimum the Applicant shall diligently patrol and remove litter from: the Subject Property; all property owned or controlled by the Applicant; and, before 10:00 a.m. each operating day, Powis Road between Hawthorne Lane and Route 64 (North Avenue) as well as Powis Court . In addition, the Applicant shall, at a minimum, patrol and remove litter from private property within 500 feet of the aforesaid public streets and corresponding rights-of-way with the written permission of the owner of said properties, which permission the Applicant shall diligently attempt to obtain. The Applicant shall provide the City of West Chicago the names, addresses, telephone numbers and email addresses of such owners granting permission. The Applicant shall also post on the company's website the name and email address of an employee of the company to whom any owner of property along Powis Court or Powis Road between Route 64 (North Avenue) and Hawthorne Lane may report litter from the facility or trucks using the facility, in which case the Applicant shall remove the litter with the written permission of the owner within two hours of receiving notification of the litter concern. Upon written request, logs showing the private owner, the property address for the request for litter removal, the time such was received and the time the concern was abated shall be available to the City and provided within one business day. Also, the Applicant shall diligently seek the written approval of the DuPage County Forest Preserve District to remove litter, which is visible from Route 64 (North Avenue), from the portion of the Pratts Wayne Woods Forest Preserve that is located within the City of West Chicago. If permission is granted, litter removal from the Forest Preserve shall occur not less than monthly; the City shall be provided written notice of each occurrence within one business day of such being completed.

10. The Applicant shall provide a street sweeper to remove mud and dust tracked onto hard surfaces inside and outside the Transfer Facility, on property owned or controlled by the Applicant as well as well Powis Court and Powis Road between Hawthorne Lane and Route 64 (North Avenue)on an as needed basis, but not less frequently than daily.

11. The Applicant shall retain a pest control service on an on-going basis to address the potential for infestation by rodents and other vectors. Such service shall inspect the Transfer Facility on an as needed, but no less than monthly, basis.

12. Transfer trailers entering and exiting the Subject Property shall use only the following roads: Powis Road (between the facility entrance and Route 64 (North Avenue), Route 64 (North Avenue), Kirk Road and Interstate 88. Except for waste collection trucks servicing property within the City of West Chicago, waste collection trucks entering and exiting the Subject Property shall use only the following streets within the City and no others: Powis Road south of Route 64, Route 64 (North Avenue), Route 38, and Kress Road. The Applicant shall have installed within City right-of-way to the satisfaction of the City, license plate readers in each of the following locations: Hawthorne Lane between Route 59 and Powis Road; Smith Road between Powis Road and Route 64; and Powis Road between Smith Road and Route 64. The license plate readers shall provide remote access to the City of West Chicago to be used for any lawful purpose. The specific make and model of license plate readers and the specific locations for installation of the license plate readers shall be subject to the written approval/direction of the West Chicago Police Chief,

and may be relocated for operational need at the expense of the City; the initial and any annual costs associated with the license plate readers shall be at the Applicant's sole cost and expense. The Applicant shall be responsible for maintaining and, if necessary, replacing the license plate readers when in disrepair or at the end of their useful lives as determined by the City through documentation from the vendor. The Applicant shall also provide a set of certified portable scales to the City at its sole cost and expense, which thereafter shall be maintained and replaced by the City.

13. Trucks transporting hydro excavation waste shall be water-tight. Dump style trucks transporting solidified hydro excavation waste shall include liners that are sufficient to prevent leakage onto roads and other surfaces.

14. All incoming hydro-excavation waste loads shall be accompanied by a completed/signed manifest and shall be pre-approved using a waste profile sheet and other supporting documentation as necessary. These materials shall be reviewed to verify that the waste is non-hazardous as defined in Title 35 Illinois Administrative Code Part 722.111. Pre-approved waste streams and such profile packets shall be kept on file at the facility, shall accurately characterize the accepted material, and may not be more than one year old.

15. The facility shall be maintained with a negative pressure condition such that the ventilation system provides a minimum of 6 air changes per hour. The facility design shall include an ozone system to treat the ventilation air prior to exhaust. The facility shall also be equipped with a misting system that will assist in mitigation of dust and odors above the tipping floor.

16. The facility shall be constructed and operated in substantial conformance with the plans and operating procedures specified in the siting application.

17. The Applicant shall comply with all terms of the Host Community Benefit Agreement between the City of West Chicago and Lakeshore Recycling Systems, LLC, dated April 1, 2019, the Secondary Host Community Benefit Agreement between DuPage County and Lakeshore Recycling Systems, LLC, dated March 10, 2020, and the Airport Agreement.

City of West Chicago, Illinois

Before the City Council

Proposed Findings of Fact and Law

Applicant, Lakeshore Recycling Services, LLC, (LRS) filed its application for siting approval of a new solid waste transfer station on Sept. 16, 2022. The proposed site occupies 27.66 acres in an industrial area on the northwest side of the City and is located at 1655 Powis Road, West Chicago, DuPage County, Illinois, 60185. Pursuant to 415 ILCS 5/39.2(b) proper notice was given to all property owners within 400 feet of the subject property.

An issue was raised regarding service on the Canadian National Railway. Protect West Chicago (PWC) argued that the Canadian National Railway did not own the railroad track property adjacent on the east side to the subject site, that the owner of those tracks was the EJ&E railroad (EJ&E), and that we had failed to comply with the service requirements of the statute. In response, LRS provided explanatory testimony from John Hock, and offered applicant's Exhibit 5 and 6. Exhibit 5 is an official tax record of DuPage County, being Map page 1-32B-W of the County Clerk's official tax/plat maps. As indicated on the face of the map, these maps show the "DuPage County, Illinois, 2022 Real Estate Tax Assessment Parcels." This map affirmatively identifies the owners of two railroad track properties directly east of the subject site, one owned by Union Pacific Railroad, and the second owned by Canadian National Railway.

Applicant's research further determined that the EJ&E railroad had been purchased in its entirety about 10 years ago by Canadian National Railway.

Applicant's Exhibit 6 is a photograph of the building where PWC claims EJ&E should have been served. What that photograph reveals is that this building is actually owned by Canadian National Railway. PWC then argues that this property owner was not served by either registered mail or in person. In fact, the railroad company was personally served by parcel delivery service at its home office in Canada, and a signed receipt of service was attached to the siting application. Section 39.2(b) specifies, who must be served, but not where they must be served, or the manner of personal service. The evidence is indisputable that the property owner was correctly identified and was actually served at its home office. This satisfies both the spirit and letter of the law.

Applicant filed a written response to PWC's motion to dismiss, and the same is incorporated in its entirety by reference herein.

Finding 1 – the applicant complied with the service requirements of section 39.2(b).

Public hearing on the application, commenced on January 3, 2023, and continued for five evening and two afternoon sessions, concluding on January 19. For all sessions, there was adequate space for the participants and the public. Public comment was allowed without restriction. The parties that registered as objectors were allowed to cross-examine witnesses, and present their own evidence. The only objection about the manner in which the public hearing was conducted was that the Spanish translation was not available. The law does not require Spanish translation of these public hearings.

Finding 2 - the public hearing was conducted in a fundamentally fair manner.

John Hock, a professional engineer in Illinois, and five other states with 35 years experience in the solid waste industry, testified that the proposed facility is necessary to accommodate the waste needs of the area it is intended to serve. Initially Mr. Hock provided background on the applicant, LRS, and described the existing operations at the site. LRS is a local, privately owned company with over 2000 employees and 60 locations in the Midwest. It employs approximately 125 personnel at its West Chicago facility. Much of what the applicant proposes already occurs at the 27.66 Acre West Chicago facility. In addition to structures and services already at the site, LRS proposes to build a transfer building for solid waste and single stream stream recyclables, a building for the solidification and transfer of Hydro excavation waste, and a second scale for weighing vehicles. The facility will also continue to receive construction and demolition debris consistent with its currently permitted operations.

Mr. Hock described the transfer process where loads of incoming waste are transferred to larger vehicles for delivery to remote landfills, in this case, the Eco Hill landfill in Atkinson, Illinois. Outbound traffic would be routed north to Route 64, west to Kirk Road and south to interstate 88. This route avoids residential areas in West Chicago and Saint Charles.

Additionally, the facility would receive electronic waste at no cost from local residents.

Mr. Hock identified the service area for the proposed Transfer Station, the West DuPage RTS, which consists of the western two/thirds of DuPage County (west of I-

355), two townships in northern Will County and the eastern portion of Kane County. There are two transfer stations currently in the service area, the Dukane, Transfer Station, and the Batavia Transfer Station.

From a purely mathematical perspective, those transfer stations are sufficient to accommodate the waste generated within the service area. However, the need analysis in this case is not based on a simplistic formula of waste generation, compared to disposal or transfer capacity. In this case need is based on competitive, economic, and environmental factors. Mr. Hock explained that the two existing transfer stations in the service area are owned by vertically, integrated national companies, which use their duopoly to drive up prices and choke off competition. He explained that as an example, Waste Connections and Republic services previously had an asset swap, the result of which is that Waste Connections does not compete with Republic east of I-355 and Republic does not compete with Waste Connections west of I-355. These companies can do this because they are vertically integrated, meaning they own hauling routes in the community, the transfer station to which that community's waste is taken, and the landfill to which the material is taken from the transfer station. Mr. Hock demonstrated by citing the decline in the number of competitors, how vertical integration has allowed the national publicly owned companies to control pricing and decrease competition.

Hauling contracts have to include the cost of ultimate disposal as a price component, so that the smaller companies, like LRS, which do not have complete vertical integration, are unable to set their own prices and are at a competitive disadvantage. These competitive disadvantages are of course, passed on to the communities and ultimately the retail customers. The merger between Waste

Management and Advanced Disposal has driven another major player out of the market and resulted in price increases to LRS. LRS has provided letters of support from 11 other waste haulers, and four municipalities decrying the reduction in competition, and the resulting increase in prices for everyone.

The first benefit of the West DuPage RTS identified by Mr. Hock is an increase in competition and transfer capacity. Mr. Hock pointed out that just the threat of increased competition has significantly lowered disposal costs for the public in West Chicago. Increased operational flexibility, including longer operating hours, are an additional benefit.

With regard to Hydro excavation waste, Mr. Hock indicated there is an actual need for additional transfer capacity closer to where the Hydro excavation waste is generated, and the West DuPage RTS would meet that need. There is an increasing need for this disposal capacity.

Mr. Hock pointed out how the proposed Transfer Station would facilitate increased recycling in the service area because of, among other things, more single stream recycling, more efficient C&D recycling, and the courtesy drop off for recyclables and electronic waste. Mr. Hock also identified multiple direct benefits to the city of West Chicago and two DuPage County. Lastly, Mr. Hock pointed out that the new Transfer Station would reduce environmental impact to the city of West Chicago and the area by decreasing the travel distance of municipal solid waste and Hydro excavation collection vehicles.

Cross examination consisted, primarily of challenging, computations, and pointing out minor inconsistencies. However, the cross examination did not even come

close to establishing the lack of necessity for the facility. Instead, objectors emphasized the fact that there appeared to be adequate physical capacity to deal with the amount of waste generated in the service area. That's a point which LRS does not dispute, but the approach of objectors misses the main argument, namely, that increased competition, and its benefits and improved environmental impacts, are sufficient to prove need. The truth is that the Transfer Station need analysis has undergone a quantum shift in the last 10 years and is no longer based on the traditional capacity versus generation analysis.

Applicant's approach here is very similar to the evidence in the Moen Transfer Station case in Rockdale.

Both the Pollution Control Board, and the appellate court affirmed the new approach, and the village's finding that need had been established. The Third District held: "The proposed facility will increase competition to the service area and increase transfer capacity. It will also provide benefits to the Village of Rockdale pursuant to the host agreement, provide benefits to Will County as more waste will be disposed at Prairie View RDF, have longer operational hours than the Joliet Transfer Station, and reduce environmental impacts." Rejecting arguments, similar to those made by the opponents here, the court further held: "Petitioners' argument that ERDS failed to meet criterion (i) because it did not conduct a transfer capacity analysis of the transfer stations is unpersuasive. Respondents do not need to show "absolute necessity" for a new facility. Rather, respondents must show an "urgent need" for the facility and a "reasonable convenience of establishing it." *Id.* Respondents have demonstrated this in

the evidence presented in the record." Will Cnty. v. Vill. of Rockdale, 2018 IL App (3d) 160463, ¶ 59, 121 N.E.3d 468, 484

This new approach to analyzing need for transfer stations is totally consistent with the DuPage County solid waste management plan, which consistently mentions the potential benefits of more competition

Objectors' evidence regarding the overlap of competing Transfer Station service areas was interesting, but did not make a point. It did not consider relative distances from those Transfer Stations, and it was based on very dated information. It certainly did not address the benefits of increased competition or reduced highway mileage for garbage trucks. John Lardner, who advocated this concept, admitted he did not even consider competitive factors or environmental impacts in reaching his conclusions. As such, he completely missed the point of Applicant's presentation, and his conclusions about the proof of need |have no validity.

Finding 3 - the west DuPage RTS is necessary to accommodate the waste needs of the area. It is intended to serve.

John Hock testified that the West DuPage RTS is so designed, located and proposed to be operated that the public health, safety and welfare will be protected. Some of the proposed operations are already taking place, so this is not a revolutionary plan. This is a state of the art facility with the best available current technology to avoid or minimize potential problems. For example, odors will not be masked; instead they will be eliminated by active filtration in the ventilation system which will have multiple complete air exchanges every hour.

The facility proposes to handle a maximum of 1950 tons per day of material, of which no more than 650 tons per day will be municipal solid waste, no more than 300 tons per day will be hydro excavation waste, no more than 750 tons per day will be construction or demolition debris (C&D), and no more than 250 tons per day will be single stream recyclables. The facility will not accept hazardous waste. Much of that material is already being hauled by LRS. The C&D is being handled at the existing site which is permitted as a C&D recycling and transfer facility. Much of the municipal solid waste is being hauled outside the service area.

The comparatively large size of the site and the large size of the transfer building allows comfortable and safe handling of the anticipated material volumes. Objectors used video evidence from other transfer stations to dispute the speed at which garbage trucks could be unloaded, but LRS's own video evidence, submitted in rebuttal, demonstrated that unloading could occur even faster than the conservative numbers offered by the applicant.

Much of the cross examination on this criterion involved objectors' use of early pre-filing review comments from a third-party engineering firm that had been retained by the City of West Chicago (city). The only thing objectors demonstrated with this cross examination was their fundamental lack of understanding of the pre-filing review process. Mr. Hock explained that pre-filing review is intended to be a dialogue where different opinions are frequently exchanged, good ideas are accepted and bad ideas are discarded. The point of the pre-filing review is to improve the final product, which is filed with the city. Early comments by pre-filing reviewers should be given no weight in evaluating the final product.

Mr. Hock testified that the proposed site met all relevant location standards, including the statutory thousand foot setback requirement from residential land uses. At issue are the railroad tracks immediately east of the site. 415 ILCS 5/22.14 states: "No person may establish any pollution control facility for use as a garbage transfer station, which is located less than 1000 feet from the nearest property zoned for primarily residential uses or within 1000 feet of any dwelling,.."

The western railroad property is currently owned by the Union Pacific Railroad and the eastern railroad property is currently owned by Canadian National Railway. The railroads have been present for over seventy years, and remain active today. The properties are each approximately 100 feet wide, have steep banks that rise up approximately 10 feet above surrounding grade, and have no nearby vehicle access. The lot requirements for a residence in an ER-1 district include the following:

- Minimum lot area: 40,000 square feet;
- Minimum lot width: 100 feet at front, lot line and 200 feet at building line; and
- Minimum setbacks:
    - o Front yard: 50 feet;
    - o Corner side yard: 50 feet;
    - o Side yard: 30 feet;
    - o Rear yard: 50 feet; and
    - o Maximum lot coverage: 30%

The physical features of the property, the lack of access, and the above lot requirements make it physically impossible to construct a residence on the railroad property. Accordingly, this zoning classification on an active rail right of way seems to

make no sense. The City of West Chicago previously explained this apparent contradiction and confirmed the impossibility of residential development when they stated in a recent letter:

> "Both the Union Pacific Railroad and the Canadian National Railroad operate parallel tracks on land running northwest to southeast, east of and adjacent to the subject property. The right-of-way for these rail lines carries a remnant zoning classification of Estate Residential, which is the classification assigned upon annexation. No effort was made to reclassify the property. As an active rail corridor, there can be no residential development. Furthermore, there is insufficient room to construct homes on one-acre minimum lots and no convenient way to access what would be a narrow string of properties. Residential development on this property is physically impossible. As such, the City concludes that the 1,000-foot setback requirement in 415 ILCS 5/22.14(a) is not applicable."

Applicants have filed a detailed legal memorandum on this issue, demonstrating that legal and physical impossibility of residential development render the residential zoning setback requirement inapplicable in this case. The Pollution Control Board and Appellate Courts have agreed.

Joe Abel, a longtime planner in DuPage County, testified on behalf of PWC the siting Application does not meet the residential setback requirement. However, the substance of his testimony actually supported Mr. Hock's conclusion. Abel admitted that with current conditions the railroad property at issue can never be developed into residential use. In order for residential development to occur, the railroad would have to

abandon the tracks, AND adjacent real estate would also need to be rezoned for residential purposes. The City Council's decision must be based on current zoning and current conditions, and not on speculation on what might occur in the distant future.

Regardless, LRS has submitted, as part of post hearing public comment, a letter from Canadian National Railway confirming the railroad's commitment to continue to use this very busy rail line. Parenthetically, this letter also confirms the Canadian National's previous acquisition of EJ&E and the fact that Canadian National received notice of the pending siting proceeding and they have not commented regarding the proposed West DuPage RTS.

Finding 4 – The siting application is consistent with the setback requirements of 415 ILCS 5/22.14.

The proposed site is across Powis Rd from the DuPage Airport. This proximity got the objectors' attention, and there was extensive cross examination on the subject, with the innuendo that this is a safety issue. Mr. Hock testified that LRS and the DuPage Airport Authority (airport authority) had previously entered into an agreement wherein the airport authority requires LRS to take a number of actions to mitigate potential wildlife hazards to air operations, and the airport authority found that the Transfer Station would not pose a threat and could operate safely despite the proximity. These conclusions were reviewed and approved for the airport authority by an outside engineering firm.

Both parties focused on FAA Advisory Circular 150/5200-33C. This circular finds that fully enclosed waste transfer stations can operate safely in close proximity to airports. The far western portion of the proposed site, where there will be no buildings

or active transfer operations, is within the airport runway protection zone. Despite this, the airport authority still found that it could safely coexist with the Transfer Station. It should also be noted that the FAA circular states at the beginning that it is not mandatory and not a regulation.

Objectors then challenged whether the proposed transfer station would be fully enclosed. The facility will be equipped with fast opening doors, which will only open when vehicles are entering or leaving. Incoming trucks will discharge indoors and transfer trailers will tarp indoors, using an automatic system. In a vain attempt to make their point objectors presented video of operations at older LRS transfer stations which have completely different designs, including an LRS facility on California Avenue in Chicago. This Chicago facility admittedly, is a three sided facility, so therefore always open. Objectors were not able to successfully challenge Mr. Hock's conclusions.

The remainder of LRS's design and operations plan was not seriously challenged. The stormwater management plan and features have been previously approved by DuPage County and West Chicago as part of the recent PUD amendment process. In summary, Mr. Hock concluded that the proposed operations will allow for improved recycling of C&D, more efficient management and transportation of recyclables to a MRF, additional capacity and more efficient transportation of hydro excavation waste, and additional capacity and more efficient transportation of municipal solid waste to a final disposal facility.

Finding 5 – The West DuPage RTS Is so located, designed and proposed to be operated that the public health safety and welfare will be protected.

Dale Kleszynski, a certified real estate appraiser and longtime member of the appraisal institute testified that the facility is located, so as to minimize incompatibility with the character of the surrounding area, and to minimize the effect on the value of the surrounding property. He used historic analysis and photographs to confirm that the property is located in an industrial area on the northwest side of West Chicago. Zoning in the area is primarily industrial and open space. The property is naturally buffered by the DuPage airport on the west, a large multilane roadway (Rte. 64) on the north, and the railroad right of way on the east. This is consistent with Mr. Hock's testimony that the transfer building will not even be visible from Powis Road. This project constitutes an industrial use in a historically industrial area, and nobody seriously disputed that conclusion.

Mr. Kleszynski also testified that developing the property as a solid wasteTransfer station is the highest and best use of the property. The property meets the four pronged test of highest and best use: legal permissibility, physical possibility, financial feasibility, and maximum productivity. He opined that developing property to its highest and best use generally does not negatively impact the value of surrounding properties.

This conclusion was challenged by Kurt Kielisch, who testified on behalf of PWC, that he does not agree with the idea that the value of surrounding properties will not be negatively impacted by highest and best use development. His suggestion that sales history would help support a conclusion about property value impact is impossible in this case because a competing Transfer Station located nearby has been present for over 20 years. Kielisch had no opinion about compatibility with the surrounding area, and he

frankly undermined his credibility by stating he is not an expert in compatibility with surrounding areas, and its affect on the value of other properties. He similarly did not opine that the proposed transfer station would negatively impact the value of surrounding properties.

Mr. Kleszynski has submitted a letter in post hearing public comment which refutes the conclusions and methodology of Kielisch.

Finding 6 - the West DuPage RTS is located so as to minimize incompatibility with the character of the surrounding area, and to minimize the effect on the value of surrounding property.

John Hock testified that 0.05 acres of the subject property in the north east portion is in the floodplain. However, the site will be adequately flood proofed by constructing buildings with floor elevations that are approximately 4 feet higher than the base flood elevation. DuPage County has already issued a stormwater certification for the site. No one took issue with this conclusion.

Finding 7 - the West DuPage RTS is located outside the boundary of the 100 year flood plain, or is flood proofed.

Mr. Hock described how the plan of operations for the facility is designed to minimize the danger to the surrounding area from fire, spills or other operational accidents. This plan includes both prevention of accidents and response. In the event they occur, there will be a safety officer on site at all times. All employees will be trained in accident prevention and response. All buildings will be equipped with wet or dry pipe fire suppression systems. A water source is located on site, and site access has been designed so as to accommodate emergency services, including fire trucks.

These conclusions were not challenged.

Finding 8 - the plan of operations for the West DuPage RTS is designed to minimize the danger to the surrounding area from fire, spills or other operational accidents.

Michael Werthmann, a traffic engineer with over 33 years experience in traffic engineering for both the public and private sector, who has testified on over 25 solid waste related projects, reviewed traffic patterns to, and from the facility. First he looked at existing conditions, including physical and operating characteristics of the roadway system. Secondly, he looked at facility traffic characteristics, and determined the type and volume of traffic generation by the facility. Then he analyzed the impact of the facility generated traffic on the roadway system.

Next, Mr. Werthmann conducted traffic counts at the relevant intersections near the proposed facility, including counts for the turning movements. Traffic counts were conducted in 2019, and post pandemic counts were conducted in 2022. To get a worst case analysis, he used the 2019 counts which showed more traffic. He also factored in future growth in background traffic.

Mr. Werthmann observed that a large percentage of the traffic generated by the west DuPage RTS will consist of LRS trucks and containers that are already traversing the area roadway system. When reviewing the impact of site generated traffic on the local roadway system, he used the morning and afternoon peak hours. He concluded that the key intersections, which currently operate at a good level of service will continue to do so after development of the Transfer Station. The only road improvements needed for this project are planned improvements at the access drives to

the facility. He concluded that the traffic patterns to and from the facility are so designed as to minimize the impact on existing traffic flows.

Cross examination minimally challenged the witness's observations regarding the growth in projected background traffic on North Avenue. Mr. Werthmann responded that his conclusions are so conservative, all the projected growth on North Avenue is effectively factored in.

The only other evidence presented by objectors on this criterion related to diesel fumes being generally unhealthy, especially if you are standing in the roadway, where they are being generated. This testimony obviously didn't have any numbers or other specifics. It may or may not be true, but it is certainly not relevant in this case, particularly since most of these vehicles are already on the roadway system.

Finding 9 – The traffic patterns to, and from the West DuPage RTS are so designed as to minimize the impact on existing traffic flows.

Mr. Hock testified that the facility will not be receiving, storing or transferring, hazardous waste. In fact, he went into significant detail about how hazardous and other unacceptable wastes will be screened out, identified and removed. His conclusions were not challenged.

Finding 10 – the facility will not be treating storing or disposing of hazardous waste.

John Hock testified that the proposed facility is consistent with the DuPage County solid waste management plan. He first reviewed the history of solid waste management planning in DuPage County, including the various five year updates, especially as they related to the possibility of developing Transfer Stations in the county.

The solid waste management plan aggressively encourages recycling, and for all the reasons previously identified, the proposed west DuPage RTS will promote more recycling, both of construction and demolition debris, but also other materials, including electronics and single stream recyclables.

There is only one active Transfer Station in DuPage County, and the solid waste management plan consistently has recognized the need for more transfer stations. While the 2007 Plan update suggested the southern portion of the County as a location for an additional Transfer Station, more recent updates, have dropped that location recommendation, even though they continue to suggest the need for additional transfer stations in the county.

Most notably, DuPage County has executed a secondary host agreement with LRS, and they have found that the proposed West DuPage RTS appears to be consistent with the county solid waste management plan.

In response, John Lardner offered the ridiculous testimony for PWC that the phrase 'appears to be consistent" is not equivalent to a finding of consistency and therefore he concludes that the proposed site is not consistent with the solid waste management plan. Lardner, who also testified for PWC on need acknowledged that the Plan repeatedly mentions the NEED for and benefits of more competition in the waste disposal sector, and he also admitted that the 2007 plan update, on which he relied so heavily, also recommends as many as 3 to 5 additional transfer stations in DuPage County.

Finding 11 - the proposed West DuPage RTS is consistent with the DuPage County solid waste management plan as amended.

John Hock testified that there are no regulated recharge areas in the vicinity of the proposed site and, therefore, this criterion is not applicable. His conclusions were not challenged.

Finding 12 - the facility will not be located within a regulated recharge area.

Post hearing public comments did not present new matters that require a response. The comments were opposed to the project, but the comments generally suggested that their authors had not attended the hearing or carefully reviewed the application. Many of the comments used the same form letter. It is no secret that pollution control facilities, no matter how well designed, are often locally unpopular land uses, which is why the PCB and the Courts have emphasized that decisions must be based solely on the evidence.

LRS has seen proposed special conditions of approval prepared by the City Staff. While LRS believes that the evidence justifies am unconditional approval, LRS does not feel any of the proposed special conditions are patently unreasonable or excessively burdensome. Accordingly, LRS represents that it will not appeal from the imposition of any of the contemplated special conditions which it has reviewed.

For the foregoing reasons, LRS respectfully prays that the West Chicago City Council approve the siting application as submitted.

Respectfully submitted:

BEFORE THE CITY OF WEST CHICAGO CITY COUNCIL

In Re: THE APPLICATION OF	)
LAKESHORE RECYCLING SYSTEMS,	)
LLC, FOR SITING APPROVAL OF A	)
TRANSFER STATION AT	)
1655 POWIS ROAD,	)
WEST CHICAGO, ILLINOIS 62418	)

PROTECT WEST CHICAGO'S PROPOSED COMBINED FINDINGS OF FACT AND CONCLUSIONS OF LAW

NOW COMES, Objector, Protect West Chicago, ("PWC") in the above-mentioned matter, by and through its attorney, Meza Law, and submits its Combined Proposed Findings of Fact and Conclusions of Law related to the Application of Lakeshore Recycling Systems, LLC (the "Applicant") for Siting Approval of a new proposed Pollution Control Facility.

I. EXECUTIVE SUMMARY

On September 16, 2022,[1] Lakeshore Recycling Systems ("LRS") submitted their Pre-Filing Notice informing West Chicago and its residents that it intended to submit a proposal to site a pollution control facility in West Chicago, namely a waste transfer station. After multiple so-called "public hearings," it is now clear that West Chicago's City Council has multiple grounds and basis to reject LRS's proposed waste transfer station.

First, LRS's Pre-Filing Notice did not comply with 415 ILCS §5/39.2(b). Specifically, LRS's expert, John Hock failed to provide the required statutory notice to owners of all property within 250 feet. Mr. Hock's failure to provide proper notice, and the manner in which he provided

[1] Coincidentally, or perhaps not, September 16 is Mexican Independence Day and is often referred to as "El Grito" or "El Grito de Independencia," a tribute to the battle cry that launched a rebellion in 1810 and is celebrated in Mexico and in many majority-minority Latino communities including West Chicago, in the same manner as the 4th of July.

notice, dooms LRS's Application and strips the City Council of any jurisdiction to even consider the Application.

Second, because LRS's proposed facility would, by their own admission, be located within 1,000-feet of property zoned residential, it does not comply with 415 ILCS §5/22.14(a). Despite LRS's multiple attempts to salvage its Application and argue that it is "exempt" from this requirement, none of their efforts can or do circumvent the 1,000-foot setback requirement.

Third, the Siting Hearing did not comport with the dictates of Fundamental Fairness in a multitude of ways. For example, despite West Chicago 21% limited English Proficiency resident population, neither the City of West Chicago nor its Hearing Officer took any steps to ensure the hearing was available in Spanish. This, even though both West Chicago and the Hearing Officer were informed that certain residents' primary language was Spanish. In addition, the Hearing Officer failed to render impartial rulings on the evidence and specifically prevented PWC from cross-examining Applicant's expert on environmental justice related issues and even went so far as to prevent PWC from asking its own expert about environmental justice related issues, all under the guise that issues relating to minority or disadvantaged communities were not "relevant."

Fourth, LRS failed to meet 39.2 Criterion 1, 2, 3 and 8. Specifically, LRS failed to establish that there was a "need" for an additional waste transfer station and instead focused on its "need for vertical integration," which, of course, is not a part of Criterion 1. The testimony was clear—there is more than enough waste transfer station capacity to properly handle the current and future waste needs of the proposed LRS Service Area. LRS also failed to establish that its proposed facility would be operated in a safe manner, especially considering its proximity to the DuPage Airport Authority and its admission that its operations were within the runway protection zone; thus, it did not satisfy Criterion 2. In regard to Criterion 3, LRS's decision to hinge it expert's opinion on the

"highest and best use" analysis failed to sufficiently establish that the proposed facility was to be located so as to minimize incompatibility with the character of the surrounding areas and to minimize the effect on the value of the surrounding property. Finally, in regard to Criterion 8, LRS failed to overcome the DuPage County's Solid Waste Management Plan's clear language that the siting for any additional waste transfer stations should be located "throughout the County" and in the southern portion of DuPage County, not next door to the other waste transfer station in the northwest corner of DuPage County. In fact, any ambiguity in that regard was decide when DuPage County confirmed in its prior denial of on an earlier waste transfer station siting proposal that "throughout the County" in its Solid Waste Management Plan did not mean allowing a second transfer station to be located in close proximity to an existing one.

Finally, LRS's last ditch effort to salvage its application by submitting, on the eve of the deadline for the filing of Proposed Findings of Fact and Conclusions of Law, two documents as "public comment" actually represent the final dagger in the heart of LRS's Application; that is because one of the submitted letters, from Canadian National, actually confirms that the owner on the authentic tax records is still in existence and that the pre-Filing Notice was deficient. The other letter was simply improper rebuttal testimony submitted after the close of evidence and must not be considered.

For all of the above reasons, PWC respectfully requests that the Hearing Officer recommend to the City of West Chicago's City Council that the proposed Application be denied. In the alternative, PWC further requests that even if the Hearing Officer does recommend that the City of West Chicago City Council approve LRS's Application to site a second waste transfer station in the City of West Chicago, that the City Council nonetheless deny LRS's Application.

II. APPLICANT HAS FAILED TO MEET THE JURISDICTIONAL NOTICE REQUIREMENTS

In order to proceed with a siting hearing and prior to even determining whether the criterion in 415 ILCS §5/39.2(b) (the "Siting Statute") have been met, an Application must comply with all statutory provisions, including the notice requirement. However, as set forth below, Applicant failed to meet the jurisdictional notice requirements.

The Siting Statute required the Applicant to serve written notice of intent (the "Pre-Filing Notice") on all owners of property within 250 feet in each direction of the lot line of the Subject Property (the "Subject Area Radius"). This notice is required to be made no later than 14 days before the date on which the City of West Chicago (the "City") receives the request for siting approval. 415 ILCS §5/39.2(b). Moreover, under the statute, notice can only be satisfied in one of two ways: (1) Personal Service; or (2) Registered Mail, Return Receipt Requested.

The Siting Statute explicitly and specifically provides that the Applicant shall:

> … cause written notice of such request to be served either ***in person*** or ***by registered mail, return receipt requested***, on the owners of all property within the subject area not solely owned by the applicant, and on the ***owners of all property within 250 feet in each direction of the lot line of the subject property***, said owners being such persons or entities ***which appear from the authentic tax records of the County*** in which such facility is to be located; …

415 ILCS §5/39.2(b) (emphasis added). This requirement is jurisdictional, and the burden of proof rests with the Applicant to show that all procedural requirements relating to issuance and service of the Pre-Filing Notice have been met. *Id*; *see also* 415 ILCS 39.2(b); *Cnty. of Kankakee v. Illinois Pollution Control Bd.,* 396 Ill. App. 3d 1000, 1008, 955 N.E.2d 1, 9 (3rd Dist. 2009) (citing *Waste Mgmt. of Illinois v. Illinois Pollution Control Bd.,* 356 Ill. App. 3d 229, 234, 826 N.E.2d 586 (3d Dist. 2005). Applicant failed to meet the notice requirement.

The Pre-Filing Notice is jurisdictional because it is not just a perfunctory act or perfunctory exercise. The Pre-Filing Notice is the critical document that provides all statutory stakeholders

with adequate notice of what is being proposed in their community. *Kane Cnty. Defs., Inc. v. Pollution Control Bd.*, 139 Ill. App. 3d 588, 593, 487 N.E.2d 743, 746 (2d Dist. 1985). In this matter, the City also failed to post the actual Pre-Filing Notice on its website in Spanish and thus failed to take necessary steps to ensure that this critical document was also available to West Chicago residents whose primary language was Spanish.[2] The City's failure to make the Pre-Filing Notice available in Spanish denied Spanish-speaking residents their rights to meaningful access, as more fully described in the "Fundamental Fairness" section of this filing.

In any event, railroads own two parcels of land within the Subject Area Radius (the "Railroad Parcels"), and those parcels are located directly east of (and directly adjacent to) the Subject Property. Tr. 454. Thus, Applicant was required to serve the two railroads with the perquisite Pre-Filing Notice. The two Railroad Parcels are identified by Parcel Identification Numbers (PINs) 01-32-505-011 and 01-32-506-001. *See* Application at Appendix 2-J (Exhibit C).

On May 5, 2003, the City via Ordinance 03-O-0033 annexed the rights-of-ways of property belonging to Elgin, Joliet and Eastern Railway Company (the "EJ&E") within the City. *See* Exhibit 1 to PWC's Motion to Dismiss. The EJ&E parcels that were annexed into the City included the parcel with PIN 01-32-506-001, which, as noted above, is within the Subject Area Radius. *Id.*

---

[2] Although the Pre-Filing Notice was attached as an exhibit to Applicant's Application, it was not easily accessible to Spanish-speaking residents of West Chicago. The only reference to the Pre-Filing Notice of the City of West Chicago's website states as follows:

Notice of Intent (NOI) Sent to Neighboring Properties
Property owners near the area of 1655 Powis Road received an official mailed Notice of Intent (NOI) stating that Lakeshore Recycling Systems, LLC (LRS) would be filing a formal application and proposal on Friday, September 16, 2022 with the City that would request approval to construct and operate a solid waste transfer station facility at the site of 1655 Powis Road. See https://westchicago.org/transfer-station/#process (last visited Feb. 16, 2023).

The Act requires that applications for siting approval of pollution control facilities use "authentic tax records" to determine to whom and where the Pre-Filing Notice must be sent. 415 ILCS §39.2(b). In Illinois, the County Treasurer, the County Clerk and the Assessor each have a role in the keeping of the authentic tax records. *Bishop v. Pollution Control Bd.*, 235 Ill. App. 3d 925, 932, 601 N.E.2d 310, 315 (5th Dist. 1992); *Scott v. City of Chicago*, 2015 IL App (1st) 140570, ¶ 6, 29 N.E.3d 592, 594-595. In *Scott,* the court held that *Bishop* requires that one look to all three of these offices when determining the proper entities and locations to send notice based on the authentic tax records. *Scott v. City of Chicago*, ¶ 12, 29 N.E.3d at 596.

In Illinois, the Department of Revenue sets the tax assessments for all properties owned by the railroad companies that are used in the operation of the railroad [35 ILCS §200/8-5; 35 ILCS §200/11-70(b) and (d); 35 ILCS §20/11-80]; accordingly, local assessors have no role in determining real estate taxes or property values for the Railroad Parcels. Thus, an Applicant must look specifically at the authentic tax records contained in the offices of the DuPage County Treasurer and the DuPage County Clerk to determine to whom and where Pre-Filing Notices must be served for the Railroad Parcels. The Applicant in this case did not do that.

As set forth in the sworn declarations from DuPage County Treasurer Gwen Henry, the authentic DuPage County tax records clearly show that there are only six railroads, identified by name, address, city, state, and zip code included in the authentic DuPage County tax records, and that these are the *only railroads* that are assessed and pay real estate taxes within DuPage County. *See* Exhibit 2 of PWC's Motion to Dismiss.

Below are the six railroads:

	Railroad	Address	City	State and Zip Code
1	Chicago Central & Pacific Railroad	Bus Dev N Real Estate 1 Administration Road	Concord	Ontario L4K1B9
2	Burlington Northern & Santa Fe Railway Company	Property Tax Department PO Box 961089	Fort Worth	Texas 76161
3	CSX Transportation Railroad	Tax Department J-910 500 Water Street	Jacksonville	Florida 32202
4	Soo Line Railroad Company	7th Floor Tax Department 120 S. 6th Street	Minneapolis	Minnesota 55402
5	Elgin, Joliet & Eastern Railway Company	17641 S. Ashland Avenue	Homewood	Illinois 60430
6	Union Pacific Railroad Company	Property Tax Department Stop 1640 1400 Douglas Street	Omaha	Nebraska 68179

Id.

In addition, as set forth in the sworn declaration from DuPage County Clerk Jean Kaczmarek, Railroad Assessment Certifications for DuPage County also confirmed that these same six railroads are the *only railroads* assessed real estate taxes within DuPage County. *See* Exhibit 3 of PWC's Motion to Dismiss.

The six railroads and the locations (addresses) for the sending of real estate tax notices identified by Ms. Kaczmarek are identical to those in the County Treasurer's authentic tax records and are as follows:

	Railroad	Address	City	State and Zip Code
1	Chicago Central & Pacific Railroad	Bus Dev N Real Estate 1 Administration Road	Concord	Ontario L4K1B9
2	Burlington Northern & Santa Fe Railway Company	Property Tax Department PO Box 961089	Fort Worth	Texas 76161
3	CSX Transportation Railroad	Tax Department J-910 500 Water Street	Jacksonville	Florida 32202
4	Soo Line Railroad Company	7th Floor Tax department 120 S. 6th Street	Minneapolis	Minnesota 55402
5	Wisconsin Central, Ltd. (EJ&E Line) Company	17641 S. Ashland Avenue	Homewood	Illinois 60430
6	Union Pacific Railroad Company	Property Tax Department Stop 1640 1400 Douglas Street	Omaha	Nebraska 68179

Id.

In its Siting Application, the Applicant included Appendix 2-J which contains a document titled "Applicant's Affidavit of Compliance With 415 ILCS §5/39.2(b)," ("Applicant's Affidavit of Compliance") as well as the related exhibits which depict copies of notices and receipts of such service, in which Applicant purports to have complied with the requirement of 45 ILCS §39.2(b). *See* Exhibit 4 of PWC's Motion to Dismiss. In fact, the Applicant also included a chart reflecting the identity of the entities Applicant served, including their respective addresses. The following is the relevant portion of Applicant's chart reflecting purported service on three railroads:

Property Owner	Address	City	State	Zip Code	PIN or General Assembly
Union Pacific Railroad Company	Property Tax Department Stop 1640 1400 Douglas Street MS910	Omaha	Nebraska	68179-0910	01-32-505-011
Canadian National Railway	935 de La Gauchetiere Street Ouest	Montreal	Quebec, Canada	H3B 2M9	01-32-506-001
Chicago Central & Pacific Railroad	Bus Dev Real Estate 1 Administration Road	Concord	Ontario Canada	L4K 1B9	01-32-506-001

See Exhibit 4 of PWC's Motion to Dismiss.

Moreover, in its Application, the Applicant declared under oath and via the affidavit of its engineer John Hock, that it attempted service of its Pre-Filing Notice upon Canadian National Railway for PIN 01-32-506-001; however, there is no indication in the authentic tax records of DuPage County that Canadian National Railway is the property owner identified by PIN 01-32-506-001 or, for that matter, owns any property within the Subject Area Radius. *See* Exhibits 3 and 4 of PWC's Motion to Dismiss. In fact, there is no evidence in the authentic tax records that Canadian National Railway is assessed real estate taxes or receives real estate tax bills for any property in DuPage County, let alone in West Chicago. *Id.*

At the Siting Hearing and only after being informed of the notice deficiencies in its Application, Applicant attempted to salvage it fatal error by solely relying on a label included in a

DuPage County map that stated, "Canadian National (EJ&E RR)." Tr. 218. And, although Mr. Hock testified that the map was an "authentic tax record map" or "authentic tax records" of DuPage County; other than his bald assertion, he provided no support for that statement. Tr. 215-46. In fact, Mr. Hock admitted that he never even took the simple step, either before or after PWC filed its Motion to Dismiss, of calling or contacting anyone at DuPage County to ask them whether this map which he had alleged was an "authentic tax record map," was in fact an "authentic tax record" of DuPage County or even whether it had any relevance to the real estate taxes DuPage County issued. Tr. 231-34. Even after PWC specifically pointed out to Mr. Hock that he had served the wrong entity and even after providing Mr. Hock with documentary proof of his error, he still refused to call the DuPage County Clerk's Office or the DuPage County Treasurer's Office to determine, or even try to determine, what their records did show. *Id.*

In summary, other than looking at this one map and conducting a so-called "Google search," (Tr. 245) Mr. Hock took no steps to:

- confirm with the DuPage County Treasurer;
- confirm with the DuPage County Clerk; or
- confirm with any assessor's office at the township or county level;

that the map he claimed was an authentic tax record was an actual authentic tax record of DuPage County. Tr. 108-10. Moreover, and of dispositive significance here, nor did Mr. Hock take any steps whatsoever to determine where or to whom the tax bills were sent or whom the authentic tax records listed as the owner of PIN 01-32-506-001. Tr. 105-06, 108-10 and 231-34.

On the other hand, PWC entered into the hearing record certified copies of actual DuPage County real estate tax records and bills for the Railroad Parcel at issue. *See* Exhibits 2 and 3 of PWC's Motion to Dismiss. In regard to the PWC records, and of further dispositive significance,

Mr. Hock admitted on cross-examination that the certified authentic tax records provided by PWC did not show any DuPage County real estate tax bills ever being sent to Canadian National Railway. Tr. 244-45.

Here, rather than determine who received the authentic tax bills and at what address, Applicant did nothing more than look online for an address for the Canadian National Railway and happened to find an address in Canada. Tr. 245. Applicant then simply attempted to serve the Pre-Filing Notice on Canadian National Railway via overnight express mail at the Canada address (Tr. 102-04), which as noted below was also improper under the Siting Statute.

In its Siting Application, the Applicant also attempted service on Chicago Central & Pacific Railroad (the "Chicago Central") for PIN 01-32-506-001; however, there is no indication in *any* authentic tax record of DuPage County that the Chicago Central owns *any* property identified by PIN 01-32-506-001 or owns *any* property within the Subject Area Radius.[3] This, again, reinforces the fact that Applicant paid no heed whatsoever as to what the authentic tax records of DuPage County actually provided or revealed.

In its Application, despite the Siting Statute's requirement that an Applicant provide all property owners within the 250-foot Subject Area Radius with the required notice as set forth at Section 39.2 (b), the Applicant failed to effectuate any service on EJ&E for PIN 01-32-506-001 even though:

1) West Chicago Ordinance 03-O-0033, which annexed the rights-of-ways of property belonging to EJ&E, clearly revealed that PIN 01-32-506-001 belonged to EJ&E. *See* Exhibit 1 of PWC's Motion to Dismiss.

---

[3] A review of the authentic tax bill sent to Chicago Central & Pacific Railroad by the DuPage County Treasurer (Exhibit 2 to PWC's Motion to Dismiss) and a review of the Illinois Department of Revenue PTAX-105-A form provided by the DuPage County Clerk (Exhibit 3 to PWC's Motion to Dismiss), shows that there is no indication that the Chicago Central & Pacific Railroad receives tax bills for any property located in the City of West Chicago.

2) The DuPage County Treasurer certified records unambiguously confirm that EJ&E, *not* Canadian National Railway, is the entity appearing as the "owner" on the ***authentic tax records of the County*** for PIN 01-32-506-001. *See* Exhibit 2 of PWC's Motion to Dismiss.

3) The DuPage County Clerk certified records also confirm that EJ&E, and *not* Canadian National Railway, is the entity assessed real estate taxes in DuPage County generally and in particular for PIN 01-32-506-001. *See* Exhibit 3 of PWC's Motion to Dismiss.

In fact, none of the tax records, let alone the ***authentic tax records of the County***, reveal that Canadian National Railway received any tax bills or paid any taxes thus entitling or requiring that they receive notice for PIN 01-32-506-001 or any other PIN in DuPage County. Further, Mr. Hock's failure to even call the DuPage County Clerk or Treasurer is also telling because it reveals *sub silentio,* that he was likely fully aware of his fatal error. PWC's Motion to Dismiss Exhibits conclusively showed that a review of the records at the DuPage County Treasurer's or Clerk's Offices would only serve to prove PWC's point: the only proper party and location to serve for PIN 01-32-506-001 was EJ&E at 17641 S. Ashland Avenue, Homewood, Illinois, 60430, as that is the address where the authentic tax bills are sent. *See* Exhibit 2 to PWC's Motion to Dismiss. Hence, one can easily assume that Mr. Hock knew that the response from the DuPage County Clerk's Office or the DuPage County Treasurer's Office was going to be unfavorable and decided ignorance was (somehow) bliss.

At the Siting Hearing, Mr. Hock nevertheless attempted to justify Applicant's failure to serve EJ&E by stating that he read internet articles stating that EJ&E was dissolved but offered no competent documentation in this regard. Tr. 245. Going further, Mr. Hock conceded he did not research this issue on the Illinois Secretary of State's website that lists all corporate entities registered to do business in Illinois. Tr. 245-46. In fact, a review of the Illinois Secretary of State's website would have shown that the EJ&E merged with another railway and was not dissolved as

Mr. Hock would like everyone to believe, and that the EJ&E simply merged with the Wisconsin Central Ltd. in 2012. *See* certified copy of Illinois Secretary of State records of the Department of Business Services dated January 17, 2023 attached hereto as Exhibit A. Although not relevant, interestingly enough, Applicant did not serve the Wisconsin Central Ltd either. *See* Application at Appendix 2-J (Exhibits C and D).

Even if Canadian National Railway does own the EJ&E and/or Wisconsin Central Ltd., it would still not save the Applicant's failure to notify the proper entity listed on the authentic tax records. Illinois courts have taken a very strict view on the entities that must be served the Pre-Filing Notice; those being the "Owners" set out in the authentic tax records of a county. *Waste Mgmt. of Illinois, Inc. v. Illinois Pollutions Control Bd.,* 356 Ill. App. 3d 229, 234, 826 N.E.2d 586, 591-92 (3rd Dist. 2005). Actual notice is insufficient to cure notices not served by the statutory method or to the correct person or entity. *Id.* at 592. Moreover, each corporation is its own legal entity under Illinois law, and one cannot consider service on a parent company as service on its subsidiary. *See Wissmiller v. Lincoln Trail Motorsports, Inc.*, 195 Ill. App. 3d 399, 403, 552 N.E.2d 295, 298 (4th Dist. 1990) ("mere existence of a parent-subsidiary relationship is insufficient to establish close ties necessary" for proper service of process). As such, what Mr. Hock thought or what Mr. Hock says he relied upon and the reason(s) he did so is totally irrelevant; what controls is what the Siting Statute requires, not Mr. Hock's "whole cloth" arguments and posits as to what might possibly suffice.

In addition, there was no evidence that the authentic railroad tax records or railroad tax bills were being returned to sender or, for that matter, were not being paid. In other words, the authentic railroad tax records reviewed showed that the railroad addresses, the railroad owner designations, and the railroad bills were all current and were all still functioning addresses.

In this case, even if the Canadian National Railway would somehow be deemed an entity entitled to Pre-Filing Notice, overnight express service through a private company as utilized by the Applicant does not meet the Pre-Filing Notice requirements of the Siting Statute. There are only two methods prescribed by statute (personal service or registered mail, return receipt requested) which satisfy the Pre-Filing Notice service requirement set forth in Section 39.2(b). Overnight express is not one of the two methods, and no decisions have been found or cited by anyone in these proceedings that have ever allowed this type of service for Pre-Filing Notice. Accordingly, service of the Pre-Filing Notice via overnight express service through a private company was void. In other words, in addition to serving the wrong entity, at the wrong location, Applicant's form of service was also improper under the Siting Statute.

With respect to the Siting Statute, the Illinois Appellate Court has adopted the "Plain Language Doctrine" and, in doing so, has adopted a very strict interpretation as to how and whom must be served the Pre-filing Notice, as set forth in Section 39.2(b). *Waste Mgmt. of Illinois v. Illinois Pollution Control Board*, 356 Ill. App. 3d 229, 234, 826 N.E. 2d 586, 591-92 (3d Dist. 2005). The Court in *Waste Management* determined that the General Assembly had provided only two methods by which an applicant could satisfy the Pre-Filing Notice service requirements set forth within the Siting Statute, personal service or registered mail, return receipt requested, to the address appearing on the authentic tax records of the county. *Id.* at 591.

Here, for the reasons set forth above, service of the Pre-Filing Notice is fatally flawed and insufficient as a matter of law because the Applicant has failed to establish that notice was properly served upon all owners within the Subject Area Radius entitled to notice as required by the Siting Statute, namely the Elgin, Joliet and Eastern Railway Company. Further, the method of service

of Applicant's Pre-Filing Notice to Canadian National fails to comply with the notice requirements of the Siting Statute and is, thus, insufficient as a matter of law.

Accordingly, the City of West Chicago has no jurisdiction to approve or deny Applicant's proposed waste transfer station, and this matter must be dismissed for lack of jurisdiction.

III. THE APPLICANT HAS FAILED TO COMPLY WITH 415 ILCS §5/22.14(a)

To obtain local siting approval of a new pollution control facility in Illinois, the Application (the "Application") submitted to the City of West Chicago (the "City") by the Applicant must also comply with 415 ILCS §5/22.14(a) (the "Set-Back Provision"):

> *No person may establish any pollution control facility for use as a garbage transfer station, which is located less than 1000 feet from the nearest property zoned for primarily residential uses or within 1000 feet of any dwelling, except in counties of at least 3,000,000 inhabitants.*

In its Application, the Applicant confirmed its obligation to comply with the 1,000-foot Set-Back Provision by stating that:

> "DuPage County has less than 3,000,000 inhabitants, so West DuPage RTS may not be established within 1,000 feet of the nearest property zoned for primarily residential uses or within 1,000 feet of any dwelling." *See* Applicant's Exhibit 1, p. 2-10.

The Applicant also confirmed and conceded that two residentially zoned properties (ER-1) are located within 1,000 feet of the proposed waste transfer station. Tr. 454. Specifically, Section 2.1.4.1 of the Application states:

> That "Figure 2-2 indicates that all of the surrounding properties within 1,000 feet of the West DuPage RTS are zoned [non-residential], *except for railroad properties directly to the east of the site*." (emphasis added). Applicant's Exhibit 1.

However, despite conceding that the proposed facility is located within 1,000 feet of West Chicago properties zoned residential, Applicant seeks to circumvent the statutory requirement by advancing two arguments:

> *First*, Applicant argues that "the physical features of the property, the lack of access, and the above lot requirements make it physically impossible to construct a residence on the railroad property." *Id.*
>
> *Second*, Applicant states that the setback criteria is not applicable as evidenced by a letter from a West Chicago city official in which the official states that the "ER-1 zoning classification is a remnant from when it was annexed into West Chicago, residential development on this property is physically impossible, and West Chicago concludes the setback criteria is not applicable to this property." *See* Applicant's Exhibit 2 (Appendix 2-D2).

Applicant's arguments that it complies with the Set-Back Provision are faulty because they are based on an inapplicable exception articulated in an *unpublished* Rule 23 decision which does not apply to this Application. *See Roxana Landfill, Inc. v. Illinois Pollution Control Bd., 2016 IL App (5th) 150096-U.* Moreover, even if the *Roxana* decision did apply, the facts in that case are distinguishable from the facts in the Application and, thus, Applicant's arguments fails for a number of reasons.

A. The Rules of Statutory Construction Do Not Support Applicant's Position

First, pursuant to the rules of statutory construction, the statute must be read to comply with its plain language. The plain language of the statute at issue shows that no waste transfer station can legally be sited at the proposed location because there are two properties zoned primarily for residential use within 1,000 feet of the proposed facility. "No" means exactly that, and the Applicant is not authorized to declare that the legislature did not mean what it clearly wrote in order to obtain the outcome it seeks. *See Zahn v. N. Am. Power & Gas, LLC*, 2016 IL 120526, ¶ 15, 410 Ill. Dec. 947, 72 N.E.3d 333, 337 ("No rule of construction authorizes us to declare that the legislature did not mean what the plain language of the statute imports, nor may we rewrite a statute to add provisions *** the legislature did not include.").

When presented with an issue of statutory construction, a court's primary objective is to ascertain and give effect to the intent of the legislature. *Murphy-Hylton v. Lieberman Mgmt.*

Services, Inc., 2016 IL 120394, ¶ 25, 72 N.E.3d 323, 329. Hence, the most reliable indicator of legislative intent is the language of Section 22.14(a), which must be given its plain and ordinary meaning. *Illinois Graphics Co. v. Nickum*, 159 Ill. 2d 469, 479, 639 N.E.2d 1282, 1287 (1994). Courts should not depart from the plain language of the Act by reading into the Act exceptions, limitations, or conditions that conflict with the express legislative intent. *Alternate Fuels, Inc. v. Dir. of Illinois E.P.A.*, 215 Ill. 2d 219, 238, 830 N.E.2d 444, 455 (2004). In performing this task, courts will consider the statute's language as well as the reason for the law, the evils to be remedied, and the purposes to be obtained. *M.I.G. Investments, Inc. v. E.P.A.*, 122 Ill. 2d 392, 397-398, 523 N.E.2d 1, 3 (1988); *Murphy-Hylton*, 2016 IL 120394, ¶ 25; *J&J Ventures Gaming LLC, v. Wild, Inc.*, 2016 IL 119870, ¶ 25, 67 N.E3d 243, 251.

Here, the statute is clear and states that no facility may be constructed within 1,000 feet of residentially zoned property. The current zoning classification of the two parcels is, then, dispositive. In turn, there is no factual dispute that within 1,000 feet of the LRS transfer station there are two properties that are zoned residential. Applicant's Exhibit 1, Section 2.1.4.1; Tr. 454 and 1104. Since LRS concedes that the proposed facility is within 1,000 feet of property zoned residential, the inquiry should stop there.[4]

By including residentially zoned properties in the 1,000-foot Set-Back Provision and not just prohibiting residential dwellings, the legislature made a clear choice to include parcels that had the ability to be utilized in the future as residential, even if currently vacant or used in a different manner. To read exceptions into the plain language, as Applicant suggests, would be to change the clear intent of the General Assembly, which in this case was designed to protect the

[4] Although there are statutory exceptions to the 1,000-foot Set-Back Provision, those exceptions are inapplicable to this Application.

quality of areas that are zoned or used for residential purposes. Accordingly, the plain language of Section 22.14(a) that prohibits this type of facility within 1,000 feet of residentially zoned property requires that siting for the project be denied.

B. The Adjacent Rail Lines Could Be Used in A Residential Manner

In an attempt to avoid the plain language of the statute, Applicant argues that the rail lines could never be developed in a residential manner. This argument is legally and factually false.

PWC's expert Joe Abel, a certified land planner who has been involved in the development of hundreds of projects in Illinois, primarily in DuPage County, including residential developments throughout his fifty plus year career on both the developer and regulatory sides of projects (Tr. 1073-77) testified unequivocally that:

(1) the Railroad Parcels are within 1,000 feet of the proposed Pollution Control Facility (Tr. 1105);

(2) the Railroad Parcels are zoned residential (Tr. 1073 and 1097);

(3) adjacent to the Railroad Parcels is vacant property currently used for farming purposes (Tr. 1077);

(4) properties are consolidated and re-zoned on a regular basis (Tr. 1078-79);

(5) numerous rail lines in DuPage County have been vacated during his career and utilized in other ways, including as parts of other developments (Tr. 1071-72, 1087 and 1101-02; and

(6) the adjacent vacant property currently being farmed could be legally re-zoned and consolidated with the Railroad Parcels and the adjacent farmland to develop and use in a residential manner. Tr. 1080-1082 and 1089-91.

None of Mr. Abel's testimony in this regard was ever contradicted or disputed.

C. The Roxana Decision Does Not Help Applicant

Applicant relies upon an unpublished Rule 23 Opinion entitled *Roxana Landfill, Inc. v. Illinois Pollution Control Bd.,* 2016 IL App (5th) 150096-U, to attempt to establish an exception to the 1,000-foot Set-Back Provision set forth in Section 22.14(a). However, *Roxana* is inapplicable and is entirely distinguishable from this case because the property in question in *Roxana* was foreclosed in perpetuity by a deed restriction from ever being utilized for residential purposes.

The same is not true for the Railroad Parcels in this matter. As evidenced via Mr. Abel's testimony, nothing legally or factually prohibits the residentially zoned Railroad Parcels from ever being combined with the farm parcels to the east and being redeveloped as part of a larger residential development.

In *Roxana,* the Fifth District Appellate Court issued a Rule 23 Opinion that examined whether the applicant's non-conformity with Section 22.14(a) was fatal to the application. *Id.* First, and perhaps most importantly, while a Supreme Court Rule 23 ruling may be cited as persuasive, it ***may not*** be cited as binding precedent by any party except in the limited circumstances allowed under Rule 23(e)(1). This case is not one of those limited circumstances; therefore, neither the Hearing Officer nor the City Council can or should rely on this decision. Assuming, *arguendo*, that the case was not a Rule 23 Opinion, it would still hold no weight in this circumstance.

The *Roxana* applicant asserted in its waste transfer station application that there were no residential land uses within 1,000 feet of the site. The applicant therein noted, however, that property approximately 1,000 feet to the southeast of the site previously contained residential dwellings but that St. Clair County had acquired these properties under a Federal Emergency

Management Agency (FEMA) buy-out program, which included permanent deed restrictions prohibiting any future residential use of the parcels. The deed provided that the grantee (the City):

> "agree[d] to conditions which [were] intended to restrict the use of the land to open space in perpetuity" and that the grantee "agree[d] that no new structures or improvements shall be erected on the premises other than a restroom or a public facility that [was] open on all sides and functionally related to the open space use."

In other words, residential buildings were forever banned from being located on the land. The *Roxana* court relying on the perpetual requirement of the deed restriction reasoned that notwithstanding the lack of compliance with Section 22.14(a), the property would not be considered residential under this very limited circumstance.

In this case, however, the Railroad Parcels contain no such prohibition related to use of the properties as residential uses, nor have the owners of the Railroad Parcels agreed that they would never utilize the Railroad Parcels in a residential manner. Further, as shown by Mr. Abel's testimony, there is nothing legally or factually that would prohibit the Railroad Parcels from being utilized as residential in the future. Tr. 1080-1082 and 1089-91. In short, the *Roxana* decision does not allow Applicant to circumvent the clear language set forth in Section 22.14(a).

Further, the Illinois Pollution Control Board has previously held in favor of strict compliance with Section 22.14(a). *C&S Recycling, Inc. v. Illinois Environmental Protection Agency*, 1996 WL 419477, at *3 (PCB 95-100, July 18, 1996). C&S Recycling filed an application for a permit to develop and operate a municipal waste transfer station. *Id.* at *1. The Agency denied the application because it failed to demonstrate that the proposed facility was located at least 800 feet from the nearest residence or property zoned for primarily residential uses as required by Section 22.14 of the Act, and Section 39(1) of the Act prohibits the issuance of a permit for a facility located within the boundaries of any setback zone established by the Act. *Id.* at *2. The Board agreed and concluded its decision with the following language "Further, even if the Board

found in favor of C&S Recycling on these arguments, without a legislative change in the Act, issuance of the permit would still result in a violation of the Act." *Id.* at *3. (Emphasis Added).

Like in *C&S Recycling*, the Applicant has conceded that the facility is within 1,000 feet of a property zoned for residential use. Thus, without a legislative change in the Act, West Chicago cannot read exceptions into the statute in favor of the Applicant, because the issuance of the permit would still result in a violation of the Act.

D. The Dabareiner Letter Does Not Modify the Requirements of Section 22.14(a)

Applicant also attempts to circumvent the clear language of the Act by relying on an August 24, 2022 letter issued by a City of West Chicago staff member named Tom Dabareiner (the "Dabareiner Letter"). *See* Exhibit 1 Application at Appendix 2-D2. According to the Applicant's engineer, Mr. Hock, West Chicago provided a letter "with their determination that the 1,000-foot set-back does not apply to those railroad properties." Tr. 455. Specifically, in the Dabareiner Letter, Mr. Dabareiner wrote, among other things, that "[r]esidential development on this property is physically impossible," and that "[a]s such, the City concludes that the 1,000-foot setback requirement in 415 ILCS 5/22.14(a) is not applicable." *Id.* As shown above, Mr. Abel's testimony destroys the argument that "residential development on this property is physically impossible." Tr. 1073-1105.

Further, at the siting hearing, it became clear that although Mr. Dabareiner eventually signed the version of the Dabareiner Letter included in the Application, the language in the August 24, 2022 letter (Exhibit 1, Application at Appendix 2-D2) was not the same language that had been included in the initial version of the letter Mr. Dabareiner authored and executed on October 15, 2019. *See* Exhibit PWC-200. Rather, at the siting hearing, it was discovered that significant revisions to the initial letter were made at the request of the Applicant's engineer, Mr. Hock. Tr.

539-43. As noted, the revisions made to the initial letter by Mr. Hock were not insignificant or minor. Tr. 542-44. For example, in the initial October 15, 2019 letter, Mr. Dabareiner never included language stating that "residential development on this property is physically impossible." *Compare* Exhibit 1 Application at Appendix 2-D2 *with* Exhibit PWC-200; Tr. 540. In addition, in the initial letter, Mr. Dabareiner did not state that the City "concluded" that the 1,000-foot setback did not apply; rather, in the initial letter, Dabareiner stated, "as such, the City believes Section 22.14(a) 1,000 foot setback requirement is not applicable." *Compare* Exhibit 1 Application at Appendix 2-D2 *with* Exhibit PWC-200; Tr. 540. The ultimate production, then, was much more a work of Mr. Hock's penmanship than that of Mr. Dabareiner. Regardless, Applicant's reliance on a West Chicago staff member's letter to support its position that it has met all location criteria is inapposite.

First, in West Chicago, pursuant to Article VVII - Pollution Control Facility Site Approval Procedures, and in particular Section 14-93, it is clear that: "The applicant remains ***solely responsible*** to demonstrate that the location approval criteria are ***all*** met." (Emphasis Added). Thus, the Applicant's efforts to use the revised/reconstituted version of the Dabareiner Letter to argue that it has met the Set-Back Provision should be rejected because neither Mr. Dabareiner nor the City are the Applicants.

Second, a West Chicago staff member's conjecture or speculation regarding the availability of property for a particular future use is not the standard created by 415 ILCS §5/22.4(a); the current zoning of the property is the issue under the statute. This standard is confirmed and reinforced by the last paragraph of Section 39.2(a), which provides: "If the facility is subject to the location restrictions in Section 22.14 of this Act, ***compliance with that section shall be determined as of the date of filing of the application for siting approval***". (Emphasis added). In this case, as of the date that the siting application was filed, (as well as to the present date), the parcel in question is zoned

"Residential." Accordingly, the parcel in question was zoned Residential as of the time the siting application was filed, and this is dispositive of the issue.

Moreover, as a City of West Chicago staff member, Mr. Dabareiner has no authority to determine whether the Application complies with the Set-Back Provisions of an Illinois statute and the Applicant cannot rely upon representations made by a municipal official to argue that it has satisfied the provisions of the Act, because the controlling law is the Act, ***not*** what a local municipal official may state in a letter provided to the Applicant. Accordingly, neither a West Chicago staff member nor its corporate authorities have the authority to create "whole cloth" exceptions in or to the clear and unequivocal mandate included in both Section 22.14(a) and the last paragraph of Section 39.52(a). That is not within the purview of the City or any city official.

Thus, since the Application fails to comply with the 1,000-foot set-back requirement of 415 ILCS §5/22.14(a), siting approval for this proposed pollution control facility must be denied.

IV. FUNDAMENTAL FAIRNESS RELATED ISSUES

In a local siting proceeding under the Illinois Environmental Protection Act, a nonapplicant who participates in the siting process [] has a statutory right to fundamental fairness in proceedings before the local siting authority. *Land & Lakes Co. v. Illinois Pollution Control Bd.,* 319 Ill. App. 3d 41, 47, 252 Ill. Dec. 614, 743 N.E.2d 188, 193 (3d Dist. 2000), rev'd on other grounds, *Peoria Disposal Co. v. Illinois Pollution Control Bd.,* 385 Ill. App. 3d 781, 796–97, 324 Ill. Dec. 674, 896 N.E.2d 460 (3d Dist. 2008). However, fundamental fairness in this context incorporates only the minimal standards of procedural due process, such as the right to be heard, the right to cross-examine adverse witnesses, and the right to have impartial rulings on the evidence. *Peoria Disposal Co.,* 385 Ill. App. 3d at 797. *See Cnty. of Kankakee v. Illinois Pollution Control Bd.*, 396 Ill. App. 3d 1000, 1014, 955 N.E.2d 1, 14 (3d Dist. 2009), *as corrected* (Jan. 26, 2010).

To show bias or prejudice in a siting proceeding under the Environmental Protection Act, the participant must show that a disinterested observer might conclude that the siting authority, or its members, had prejudged the facts or law of the case. *Fox Moraine, LLC v. United City of Yorkville*, 2011 IL (2d) 100017, ¶ 60, 960 N.E.2d 1144, 1163, appeal denied 360 Ill. Dec. 2, 968 N.E.2d 81 (2012). Although citizens before a municipal board in proceedings regarding site approval for pollution control facilities are not entitled to a fair hearing by reason of constitutional guarantees of due process, they may nevertheless insist that procedures comport with standards of fundamental fairness. *Fairview Area Citizens Taskforce v. Illinois Pollution Control Bd.*, 198 Ill. App.3d 541, 555 N.E.2d 1178, 1180, (3d Dist. 1990) appeal denied 149 Ill. Dec. 319, 133 Ill.2d 554, 561 N.E.2d 689 (1990).

Moreover, the Siting Statute requires that a "public" hearing be held (415 ILCS 5/39.2(d)). In turn, Black's Law Dictionary defines the terms "public" as "Pertaining to a … ***whole community***; proceeding from, relating to ***or affecting the whole body of people or an entire community***." (Emphasis added). For the reasons set forth below, the hearing held by the City of West Chicago did not meet the legal definition of a "public" hearing and thus the hearings were fatally infirmed (from a fundamental fairness/procedural point of view). As James Madison wrote: "A popular Government, without popular information, or the means of acquiring it, is but a Prologue to a Farce or a Tragedy; or perhaps both." 9 Writings of James Madison 103 (G. Hunt ed. 1910). *Branzburg v. Hayes*, 408 U.S. 665, 728 (1972).

In this case, the proceedings regarding site approval, starting with the Pre-Filing Notice and the right to have impartial rulings on evidence did not comport with either standards of fundamental fairness or the procedural requirement that a "public" hearing be held in one or more of the following ways:

First, the statutory Pre-Filing Notice was not made available on the City's website in Spanish, in a community where more than 52% of residents over the age of five speak a language other than English, and nearly 21% have limited English Proficiency ("LEP").[5] In fact, West Chicago's 21% LEP population is four times the 5% threshold set by the Federal Government for requiring language access measures for LEP residents.

Second, no City official or even the Hearing Officer took any steps to determine whether there was a need for a Spanish language interpreter for any citizen or participant. And, even after being informed that certain participants' primary language was Spanish, no City official or the Hearing Officer took any steps to locate a Spanish language interpreter.

Third, despite the fact that the United States Environmental Protection Agency has recommended that environmental justice considerations be taken into account in waste transfer station sitings, the Hearing Officer did not make impartial rulings on the evidence and specifically prevented PWC from cross-examining Applicant's expert on environmental justice related issues and further prevented PWC from asking its environmental expert questions regarding emissions and environmental justice related issues relating to West Chicago's minority community or for that matter the surrounding minority communities.

Individually, any of the above three deficiencies confirm that the Siting Hearing, including the Pre-Filing Notice, did not comport with standards of fundamental fairness; however, combined, the three deficiencies reveal a clear bias that none of those in control of how the Siting Hearing was to be conducted were concerned with the rights of the Latino community, which comprise the majority of West Chicago residents. This, despite the fact that West Chicago is considered a "majority-minority" community because Latinos as an ethnic group represent the largest population, namely 52% of city residents. Each deficiency is described in greater detail below.

A. The Pre-Filing Notice Related Issues and Language Access

As noted above, the Pre-Filing Notice was not available in Spanish. In that regard, the last paragraph of 39.2(b), states, in pertinent part that: "Such notice shall ***state*** the name and address of the applicant, the location of the proposed site, the nature and size of the development, the nature of the

---

[5] *See* American Community Survey 2021 5-Year Estimates: Language Spoken at Home Tables at https://data.census.gov/table?q=West+Chicago+&t=Language+Spoken+at+Home&tid=ACSST5Y2021.S1601.

activity proposed, the probable life of the proposed activity, the date when the request for site approval will be submitted, and a description of the right of persons to comment and a description of the right of persons to comment on such request as herein provided." (Emphasis added). Black's Law Dictionary defines the verb "state" as: "***To express*** the ***particulars*** of a thing in writing or in word; to set down or set forth ***in detail***." (Emphasis added). The requirement set forth in the Siting Statute to state certain matters in the Pre-Filing Notice requires that they be done with particularity and in detail. The requirement that these matters be stated in the Pre-Filing Notice with particularity and in detail are not afforded to the majority-minority Latino community in West Chicago when the Prefiling Notice was only available in English and only within an exhibit of the Applicant's Criterion 2. *See* Applicant's Criterion-2, Appendix-2-J at Exhibit A. The touchtone purpose of a "notice" is to "notify"—in turn, a notice that does not notify serves no purpose, and is a nullity.

This critical omission of statutory notice in Spanish denied LEP West Chicago residents with their fundamental right to receive notice and meaningful access to critical information. The standard of meaningful participation was established by the landmark *Lau v. Nichols*, where the U.S. Supreme Court found that by receiving no instruction or English only language instruction, "Chinese speaking children" were denied the opportunity for meaningful participation in the same education available to English speaking children. Lau v. Nichols, 414 U.S. 563, 568, 94, S. Ct. 786, 789, 39 L. Ed. 2d 1 (1974). Thus, the Supreme Court ruled that the school district had discriminated against these Chinese students, as a result of their national origin, a protected category under Title VI of the Civil Rights Act of 1964. *Id.* The exact same thing occurred in West Chicago; however, in the context of the Siting Hearing "public" hearings.

Any local government entity receiving federal funds is required to provide meaningful access to information and services to residents with LEP[6] under Title VI of the Civil Rights Act of 1964, Executive Order 13166 (2000). *See* https://www.lep.gov/executive-order-13166; Executive Order 13985 (2021; 2023); and Strengthen Racial Equity and Support for Underserved Communities Through the Federal Government at https://www.whitehouse.gov/briefing-room/presidential-actions/2023/02/16/ executive-order-on-further-advancing-racial-equity-and-support-for-underserved-communities-through-the-federal-government/.

Moreover, the U.S. Department of Justice's (DOJ) safe harbor provision recommends oral language assistance from a qualified interpreter and written translations of any vital documents for LEP groups. In this case, the Pre-Filing Notice is clearly a vital document. An LEP group is defined as one that constitutes 5% of the population, or 1,000 people, whichever is less. In the City of West Chicago, the overall LEP population is 21% and the vast majority of LEP, or 88%, are Spanish speakers. *See* American Community Survey 2021 5-Year Estimates "Language Spoken at Home Tables at https://data.census.gov/table?q=West+Chicago+&t=Language+Spoken+at+Home&tid=ACSST5Y2021.S1601.

In other words, despite having a Latino population that is 52% Latino of which about 38% of Spanish-speakers 18 years and over are LEP, the City of West Chicago failed to take appropriate steps to provide meaningful access to LEP West Chicago residents vis-à-vis the proposed waste

[6] The City of West Chicago is the recipient of federal funding and in fact recently received funding through the assistance of United States Congressman Sean Casten relating to the environmental damage done to the community. As noted in the appropriation request of Congressmen Casten, he sought federal funding to be "used for remediation of the Kerr-McGee Superfund. The Kerr-McGee site is one of four Superfund National Priorities List sites in the West Chicago area that had been contaminated with radioactive thorium wastes." *See* https://casten.house.gov/services/appropriations-and-community-funding.

transfer station Pre-Filing Notice or Hearings. Moreover, although the City of West Chicago relied on the Google translation feature on their website to provide access to Spanish language information on the siting process, this free Google feature is deemed unreliable and has been rejected by the courts "as simply not reliable enough where rights are on the line." *See*, *United States v. Ramirez-Mendoza*, 2021 WL 4502266, at *6 (M.D. Pa. Oct. 1, 2021) (court not convinced that Google Translate accurately translated [the] request for consent into Spanish. . . .. Precision is important, particularly in this context, and the Court believes that more was needed to establish the accuracy of Google Translate).

In any event, even if the general West Chicago website was translated by Google, no effort was made to provide translation of the application components. In other words, none of the actual application materials LRS submitted were available in Spanish for review by residents. Similarly, the transcripts posted at the end of the hearings were available only in English and, therefore, not accessible to LEP residents of West Chicago. And, as noted above, the entirety of the Siting Hearings were conducted solely in English, with two notable exceptions during the public comment section.

First, one LRS employees whose primary language was Spanish was provided with a Spanish language interpreter, but of both ironic and profoundly revealing and significant note was that the interpreter was provided by LRS itself, not any West Chicago official or the Hearing Officer. In the second case, an LRS employee summarized some of her English language comments in Spanish. So, then even the Applicant itself understood the crucial importance of providing a Spanish language interpreter. Without qualified interpretation during the hearings, many if not all LEP residents were denied meaningful participation in the hearing process. The Siting Hearing is the most critical stage of the site approval process, as it presents the ***only***

opportunity for public comment and participation. *Kane Cnty. Defs., Inc. v. Pollution Control Bd.*, 139 Ill. App. 3d 588, 593, 487 N.E.2d 743, 746 (2d Dist. 1985). (Emphasis Added). Thus, without qualified interpretation during the hearings, West Chicago LEP residents were denied meaningful participation in the hearing process.

B. Siting Hearing Language Access Related Issues

First, although West Chicago is a majority-minority community, no West Chicago official nor the Hearing Officer took any steps to determine whether there was a need for a Spanish language interpreter for any citizen or participant prior to or during the Siting Hearing. In fact, PODER, which is coincidentally an acronym for "People Opposing DuPage Environmental Racism"), a local Latino-based organization that was also a Siting Hearing participant, specifically informed the Hearing Officer that there was no Spanish language interpretation at the Hearing "for people from the community in a minority-majority community that have an interest in this along with the rest of the people of West Chicago." Tr. 939. This information, however, fell completely on deaf ears.

Second, even after being informed that certain participants' primary language was Spanish, no West Chicago official (nor did the Hearing Officer) take any steps to locate a Spanish language interpreter in order to provide meaningful access to the Spanish-speaking members of the West Chicago community. Specifically, the Hearing Officer was informed that participant Julieta Garcia's primary language was not English and had been forced to participate in this hearing without the aid of Spanish interpretation at any point in the process. Tr. 1231. In fact, Applicant

Itself recognized the need for a Spanish language interpreter for a public participant and provided one itself, yet no City official or the Hearing Officer took any similar steps.[7]

The right to understand what is being said is essential to ensuring meaningful participation in a truly "public" hearing. Otherwise, the hearing fails its essential "public" purpose as set forth in Section 39.2(d). In this Siting Hearing, the rights of numerous members of the community were denied and thus they were clearly denied the right to meaningful participation under state and federal law.

C. The Hearing Officer Improperly Denied Evidence Relating to Environmental Justice Issues

At the Siting Hearing, the Hearing Officer did not make impartial rulings on the evidence and specifically prevented PWC from cross-examining Applicant's expert on environmental justice-related issues. The Hearing Officer also prevented PWC from asking its own environmental expert questions regarding emissions and environmental justice issues relating to West Chicago's minority community or for that matter the surrounding minority communities. Specifically, the Hearing Officer prevented PWC from asking Applicant's expert Mr. Hock whether the Applicant took any steps to ensure that the siting decision did not impose a disproportionate impact or burden upon the largely low-income or minority community in West Chicago. Tr. 705. This, despite the fact that the United States Environmental Protection Agency's 2002 Manual titled "Waste Transfer Stations: A Manual for Decision-Making (Tr. 703-04) states that "Environmental Justice Considerations" should be taken into consideration during "the site selection process, [and] steps should be taken to ensure that siting decisions are not imposing a disproportionate burden upon low-income or minority communities." *See* Exhibit PWC-49. In rejecting PWC's ability to use this document to question Applicant's expert on whether they took any steps to ensure that the

[7] During the hearing Jonathan Luna, a manager at West Chicago's LRS facility attended the hearing in order to translate for a witness named Jose, who provided public comments. Tr. 1387.

siting decision did not impose a disproportionate burden on West Chicago's minority community, the Hearing Officer not only failed to make impartial rulings on the evidence, he inexplicably even questioned whether a 20-year-old document was still relevant—which of course is still relevant. In denying the questioning of Applicant's expert in relations to environmental impacts on minority communities, the Hearing Officer specifically stated, "The manual is not the criteria. The criteria are set forth in the statute. We're not here to see if we comply with a 20-year-old U.S. EPA document. It's 39.2. Let's stay focused." Tr. 706. In fact, however, environmental justice-related issues go to protection of public health, safety, welfare and the environment, and are then directly relevant in siting proceedings and continue to be relevant today and may be even more relevant than they were 20 years ago, in both the West Chicago context and the overall federal EPA enforcement framework. As noted below, West Chicago's minority community is no stranger to environmental justice issues.

Specifically, there are four Superfund sites in the West Chicago area that were contaminated by radioactive thorium waste and, despite decades of cumulative damage and negative health impact for residents, clean-up has yet to be completed. *See* https://www2.illinois.gov/dnr/programs/NRDA/Pages/KressCreek.aspx. West Chicago Spanish speaking LEP residents in particular, claim they were not provided with accurate and comprehensive information about the environmental risks of moving into West Chicago, which came to be known as the "radioactive capital of the Midwest." *See* https://borderlessmag.org/2022/07/12/west-chicago-is-cleaning-up-the-last-of-its-nuclear-contamination-residents-exposed-to-radiation-say-its-not-over/.

In addition, on the federal level, as recently as January 13, 2023, the United States EPA Cumulative Impacts Addendum to EJ Legal Tools, noted that:

> Addressing cumulative impacts is also an inextricable component of federal environmental justice and equity policy, and integral to protecting civil rights. Executive Order 12898, which lays the foundation for federal environmental justice policy, directs federal agencies to identify "multiple and cumulative exposures" in environmental human health analyses, whenever practicable and appropriate.13 Executive Order 14008 further directs agencies to "make achieving environmental justice part of their missions by . . . address[ing] the disproportionately high and adverse . . . climate-related and ***other cumulative impacts on disadvantaged communities***." *See* https://www.epa.gov/system/files/documents/2022-12/bh508-Cumulative%20Impacts%20Addendum%20Final%202022-11-28.pdf. (Emphasis Added).

In the same January 13, 2023, United States EPA document, it further notes the following with regarding to environmental justice:

> As discussed in the RCRA section of EJ Legal Tools, the landmark decision that set out EPA's and the Environmental Appeals Board's (EAB's) position on the consideration of cumulative impacts in RCRA permitting is *In re Chemical Waste Management of Indiana*. []. As stated by the EAB, RCRA's omnibus clause authorizes EPA to impose permit conditions as follows: Under the omnibus clause, if the operation of a facility would have an adverse impact on the health or environment of the surrounding community, the Agency would be required to include permit terms or conditions that would ensure that such impacts do not occur. . . . Thus, under the omnibus clause, if the operation of a facility truly poses a threat to the health or environment of a low-income community or community of color, the omnibus clause would require the Region to include in the permit whatever terms and conditions are necessary to prevent such impacts. []. As such, in carrying out EPA's hazardous waste permitting program [] and in EPA's oversight of authorized state hazardous waste permitting programs, [] EPA can take into account cumulative impacts to "justify permit conditions or denials based on disproportionately high and adverse human health or environmental effects."[]. Specifically, EPA can "tak[e] a more refined look at its health and environmental impacts assessment, in light of allegations that operation of the facility would have a ***disproportionately adverse effect on the health or environment of low income or minority populations***." []. *Id.* (Emphasis Added).

Thus, the Hearing Officer did not make impartial rulings on the evidence as reflected by his decision to deny PWC the ability to cross-examine Applicant's expert and clearly violated the right to fundamental fairness. In the process of doing so, the Hearing Officer's rulings created a profoundly damaging disregard for the rights of West Chicago's minority (Latino) community.

At the Siting Hearing, the Hearing Officer also failed to make impartial rulings by preventing PWC from asking its own environmental expert questions regarding emissions and environmental justice related issues. This required PWC to submit an offer of proof which denied

members of the community from hearing relevant testimony, which among other things, revealed that if called to testify, PWC's environmental expert, Mr. James Powell, would have testified that:

- according to the Environmental Justice Act and as set forth in **Exhibit PWC-405**, the Illinois General Assembly found that environmental justice requires that no segment of the population, regardless of race, national origin, age or income, should bear disproportionately high or adverse effects of environmental pollution and that certain communities in the state may suffer disproportionately from environmental hazards related to facilities with permits approved by the state.

- as set forth in **Exhibit PWC-406**, the Illinois EPA Environmental Justice Public Participation Policy explains the methods by which the Illinois Environmental Protection Agency will engage with the public in communities located in identified areas of Environmental Justice (EJ) concern.

- the Illinois EPA defines "area of EJ concern" as a census block group or areas within one mile of a census block group with income below poverty and/or minority population greater than twice the statewide average.

- the Illinois EPA has developed a Geographic Information System (GIS) mapping tool call EJ START to identify census block groups and areas within one mile of census block groups meeting the EJ demographic screening criteria.

- EJ START is publicly available and can be found on the Illinois EPA's EJ webpage at the following location: http://epagisportal.illinois.gov/portal/apps/webappviewer/index.html?id=414d804241e94c51809f08f3644c37d9.

- he (PWC's expert) used EJ START to determine whether the proposed LRS waste transfer station facility is in or impacting an "area of EJ concern," and that based on his review of the EJ START, the proposed facility is approximately 1,300 feet from an area determined by the IEPA to have minority population greater than twice the statewide average, and therefore within an "area of EJ Concern."

- he (PWC's expert) also used EJ START to determine whether the proposed LRS waste transfer station's proposed trash transfer-trailer route travels through an "area of EJ concern," and that based on his review of the EJ START, he found that if LRS transfer-trailers leaving the LRS facility on Powis Road travel North on Powis Road and then proceed West on North Avenue and then South on Kirk Road (as depicted by the yellow line on slide 31), all LRS transfer-trailers leaving the LRS facility would travel through numerous "areas of EJ concern," that are located along Kirk Road South from Batavia to I-88 and would include the area of West I-88 at Aurora and North Aurora communities, as depicted by the blue and red portions along the proposed route.

- environmental hazards can result in adverse health effects for the general population in West Chicago, a majority of which (namely 51.85%) is Latino based on United States census information and as set forth below:

LRS Service Area
Burden on Latino Community
2.3 x's Greater on Latinos vs. Non-Latinos

	A	B	C	D	E	F	G	H
1	DuPage County Townships	#	%	#	%	#	%	#

22								

- as set forth in **Exhibit PWC-48**, the National Environmental Justice Advisory Council – Waste and Facility Siting Subcommittee Waste Transfer Station Working Group found that the clustering and disproportionate siting of noxious facilities in low-income communities and communities of color led to the creation of the environmental justice movement and that the "siting and operation of waste transfer stations is such an example."

- the National Environmental Justice Advisory Council – Waste and Facility Siting Subcommittee Waste Transfer Station Working Group also found that waste transfer stations "can cause environmental concerns associated with poor air quality (from idling diesel-fueled trucks and from particulate matter such as dust and glass) and disease-carrying vectors such as rodents and roaches."

- based on his review of the EJ START map, as well as the information from the EPA and Illinois Environmental Protect Act, the proposed facility route for departing trash

> transfer-trailers does impose an adverse impact on various areas of EJ concern as depicted in slide 31 and the image above.

See Exhibit PWC-702 (James Powell Offer of Proof).

All of the above-factors strike at the heart of the concerns the General Assembly has determined need to be addressed via the public health, safety and environment criteria as set out in Criterion 2 of the Siting Statute. They further reveal that West Chicago's Siting Hearing did not comport with the dictates of fundamental fairness.

V. STATUTORY CRITERIA – THE APPLICANT HAS FAILED TO COMPLY WITH STATUTORY CRITERION 1, 2, 3 AND 8

A. Criterion 1: The facility is necessary to accommodate the waste needs of the area it is intended to serve

Applicant has failed to meet Criterion 1 because the proposed facility is not necessary to accommodate the waste needs of the area it is intended to serve. The Application, as well as the the Siting Hearing testimony is undisputed—there is more than enough waste transfer station capacity to handle the current and future waste needs of the proposed LRS Service Area. Tr. 112 and 816-17. In fact, the waste transfer stations currently serving the proposed LRS Service Area have capacity that is almost double the amount of waste being generated by the Service Area. Tr. 816-17. In addition, the existing transfer station in the Service Area (the "Groot Facility") is operating at less than fifty percent (50%) of capacity. Tr. 114.

In light of the fact that LRS's proposed facility is *not* necessary to accommodate the waste needs of the area it is intended to serve, Applicant pivots and argues that the proposed facility is necessary from a competition standpoint because according to Applicant, "if you're going to be able to effectively compete in the market, you need to be fully integrated in that market." Tr. 69. Applicant continues and argues that it needs vertical integration in both trucking and transfer

stations (Tr. 60-64) in order to have the "ability to compete on a level playing field." Tr. 85. However, while making this assertion, Applicant concedes:

- that it is currently the third largest waste provider in Illinois (Tr. 54);
- that it has admittedly been able to obtain over 100 franchise agreements with municipalities (Tr. 32); and
- that it is currently operating a landfill in Atkinson, Illinois (Tr. 58).

In other words, Applicant does have vertical integration and in fact did have vertical integration in portions of its initially proposed service area (Tr. 133 and Exhibit PWC-151-A) before Applicant altered its service area.

In any event, when one looks at the actual facts, it is clear that while Applicant may not have a waste transfer station within the proposed Service Area, there are clearly numerous waste transfer stations surrounding the proposed Service Area and of those, Applicant owns five waste transfer stations in the Chicagoland area. Tr. 137-38. In his testimony, Applicant's engineer confirmed that fifteen miles around the proposed Service Area was a reasonable distance to the Service Area for analysis purpose. Tr. 126-27. And, within the fifteen miles of the Service Area, Applicant has three waste transfer stations, at least two of which receive waste from the Service Area. Tr. 126-27, 133-34 and 140. In other words, Applicant is already vertically integrated in the Chicagoland area and parts of the Service Area despite its assertions to the contrary. Further, the Applicant is not the only large waste hauler that does not have vertical integration in the Service Area. Tr. 134.

Perhaps most importantly is the fact that Criterion 1's analysis hinges on accommodating the waste needs of the area it is intended to serve – not accommodating the needs of a specific waste company such as Applicant. Applicant's alleged need for vertical integration are irrelevant to the plain language in Criterion 1, and no case has been cited or found that holds otherwise. In

fact, if "competition" (rather than actual "need") is to take precedence, then what if two, three, four, five (or more) waste companies decide they too need a facility in West Chicago to achieve their "vertical integration"—where does it end, if ever?

In further arguing that Criterion 1 has been satisfied, Applicant states that this criterion is satisfied because there is a general need for more competition in the Service Area. This statement should be disregarded as Applicant provided no documentation, no data, no reports and no studies to support its otherwise wholly self-serving conclusion that another waste transfer station would benefit anyone, other than itself. Tr. 142-45. On the other hand, the evidence revealed that nowhere in the proposed Service Area is there an actual lack of competition. In fact, the uncontradicted evidence provided by John Lardner, a professional engineer with over 35 years of experience in the waste industry, was that every portion of the Service Area was currently served by at least two, and sometimes up to six different waste transfer stations and companies. Tr. 814 and 819-20. These facts, in and of themselves, belie Applicant's conclusion of a lack of competition, unless of course there was evidence of collusion between waste haulers in the Service Area. However, as Applicant's engineer confirmed, there is no evidence or knowledge of collusion in the waste industry, and both he and Mr. Lardner stated that they were not aware of any collusion to keep Applicant out of the industry. Tr. 129-30 and 903-04.

In reality, Applicant is already successfully competing on a daily basis with the remainder of the hauling industry in the Chicagoland area, including the Counties in the Service Area where it currently holds eight municipal waste contracts. *See* Application at pp. 1-17 and 1-18; Tr. 135-36. To say otherwise is disingenuous, as Applicant is clearly competitive in obtaining municipal waste contracts within DuPage and Kane Counties. *See* Application at pp. 1-17 and 1-18.

In making its competition argument, Applicant appears to be relying almost entirely upon the *Will Cty. v. Vill. of Rockdale,* 2018 Il App (3d) 160463, 121 N.E.2d 468. Applicant's argument appears to hinge on their belief that all they have to do to satisfy Criterion 1 is argue that an additional pollution control facility will add competition to the market.

However, Applicant's reliance on the *Rockdale* decision is misplaced, and a review of that decision does not support their argument. The *Rockdale* ruling does not hold that anytime you add competition you satisfy Criterion 1. If that were the case, then every additional pollution control facility would automatically satisfy Criterion 1 because it would add competition. In other words, Applicant's proposed standard would effectively void and make Criterion 1 superfluous from the Section 39.2 criteria analysis as there would never be a scenario where Criterion 1 was not met because, as noted above, every new facility would necessarily add competition. Statutes should not and cannot be read to make all or parts of a statute superfluous and finding for the Applicant on these grounds would, in essence, remove Criterion 1 from the language of the statute and from any future siting hearing. *Sylvester v. Indus. Comm'n,* 197 Ill.2d 225, 232, 756 N.E.2d 822, 827 (2001) (statutes must be read such that each portion not be rendered superfluous, meaningless or void).

In any event, despite Applicant's attempt to remove Criterion 1 from the Section 39.2 analysis, a review of the *Rockdale* decision reveals that it was decided on a very specific set of factual circumstances that do not exist in this Application. Of note, in *Rockdale*, the court found that the only waste station in the service area that accepted solid waste was beyond capacity. *Rockdale,* ¶ 63, 121 N.E.3d at 485. Here, the evidence is very clear that the other transfer stations receiving waste from the Service Area, including the Groot Facility down the street, have more

than enough capacity to service the proposed Service Area. In fact, Mr. Hock admitted the Groot Facility is only utilizing approximately 1,000 tons of its 3,000 tons per day capacity. Tr. 114-15.

In *Rockdale,* because the only other waste transfer station in the service area was beyond capacity, the court found the need for more competition to accommodate the needs of the Service Area in that specific instance; as noted in the decision, the other waste transfer stations in the Service Area were:

- "cutting off trucks waiting in line" at the end of the service day and not allowing those trucks to dump their waste;
- allowing up to "30 loads of waste" to remain overnight and on the tipping floor until the beginning of the facility's operational day;
- allowing "discharged loads of waste [to remain][] partially outside the building;" and;
- one of the waste transfer stations in the Service Area was receiving double the amount of its average volume of waste and "had been observed operating beyond its capacity."

Id. ¶ 58-63. In the current Application, there is no evidence that any of the above *Rockdale* conditions or factors, or anything similar, exist or are occurring at the waste transfer stations currently in the Service Area or receiving waste from the Service Area. Moreover, and also of significant note, Applicant's own engineer admitted that he was not aware of any of those conditions occurring at any transfer station serving the proposed Service Area. Tr. 114-16.

The *Rockdale* court, relying on *Fox Moraine, LLC v. United City of Yorkville,* 2011 IL App (2d) 100017, 960 N.E.2d 1144, also specifically stated that to meet Criterion 1, an applicant needs to show an "urgent need" for the facility. Thus, in *Rockdale*, only because the four conditions shown above existed, did the court find an urgent need for further competition in that particular service area. The *Rockdale* court never went as far as Applicant would have one believe—that by

simply adding more facilities "...whenever, wherever . . ." despite not needing more capacity is sufficient to satisfy Criterion 1's "urgent need" for the facility.

In sum, no case has ever found that adding competition to a service area without anything more, is sufficient to satisfy Criterion 1. In fact, as noted above, the only decision that relied on a the theory of competition to satisfy need, actually relied on the fact that the current facilities were not able to properly handle the waste in the service area (which went directly to public health and safety issues) – not that evidence of additional competition in an already properly served area was sufficient to meet the urgent need finding required. Here, the Applicant has failed to introduce evidence of lack of waste transfer service capacity because, as Applicant has confirmed, the other facility located within the Service Area, and down the street, is operating well under capacity. Moreover, the facilities receiving waste from the Service Area are properly handling the waste needs for the area, including Applicant's proposed service area.

Therefore, *Rockdale* actually supports PWC's position that Applicant has woefully failed to meet Criterion 1. *Rockdale* requires a showing of urgent need – not just the fact that another transfer station would add competition. Here, no urgent need, or need of any kind, has been shown. As admitted by John Hock, there is more than enough capacity in the Service Area to meet the waste needs of the Service Area. As Mr. Hock also admitted there is no evidence that the current transfer stations receiving waste from the Service Area are not properly handling the waste. Tr. 114-16. Accordingly, the urgent need required by the court in *Rockdale* has not been shown, and Applicant has failed to meet its burden of proof as to Criterion 1. To hold otherwise, would effectively and improperly remove Criterion 1 from future Section 39.2 analysis.

B. Criterion 2: The facility is so designed, located, and proposed to be operated that the public health, safety, and welfare will be protected"

Applicant has failed to meet Criterion 2 because the proposed facility is not so designed to be operated that the public health, safety, and welfare will be protected. The determination of whether Criterion 2 is met "is purely a matter of assessing the credibility of expert witnesses." *File v. D & L Landfill, Inc.*, 219 Ill. App. 3d 879, 907 579 N.E.2d, 1228, 1236 (5th Dist. 1991), *citing Fairview*, 198 Ill. App. 3d at 552. In this case, Applicant's expert has not shown that the operations of the proposed facility can be operated in a safe manner because Applicant does not rely on proper data and because the City of West Chicago's expert questioned whether the proposed facility's proximity to the DuPage Airport Authority was properly addressed.

First, there is no dispute that it is important to know whether or not this facility can accept all of the waste that it's going to be sited for in order to make sure there's going to be enough room in the facility to unload, leave and then load the transfer trailer. Tr. 556. In its Application, Applicant relied on data to arrive at peak hours (Tr. 557), yet Applicant's peak hours changed and its expert Mr. Hock was unable to remember or provide a reason for the change in peak hours. Tr. 559-60. In fact, when asked who changed the peak hour truck data in the various draft excels obtained via a Freedom of Information Act request (Tr. 562-64), Mr. Hock was unable to explain why peak hour truck numbers were changed.

In addition, to operational issues relating to peak truck traffic hours, Applicant's proposed waste transfer station "Tipping Floor Stockpiling Capacity" inexplicably changed from one draft to another and was ultimately deleted from the body of the final Application. Tr. 566-78.

West Chicago's expert, Aptim, also raised a number of questions regarding the facility and its proximity to the DuPage Airport Authority. Tr. 668. Hazards relating to the DuPage Airport Authority are predominately related to birds. Tr. 670. In its Application, Applicant confirmed that

the FAA Advisory Circular indicates that waste handling facilities should not be located within the Runway Protection Zone commonly referred to as an RPZ. Exhibit 1 Application at 1-13 and 2-14. In fact, Applicant recognized this and specifically cited to FAA Advisory Circular 150/5300-13A, Section 310, which indicates the following regarding the RPZ: "The RPZ's function is to enhance the protection of people and property on the ground through the airport ownership over RPZs." *Id.* Nevertheless, at the Siting Hearing, Exhibit PWC-43 was shown which depicted the Runway Protection Zone. After being shown the depiction of the Runway Protection Zone, Mr. Hock was shown PWC-38, namely a diagram depicting a portion of the proposed facility's operation which clearly revealed that those operations were occurring and were located within the Runway Protection zone. Tr. 686-87. After reviewing PWC-38, Mr. Hock did confirm that a portion of their operations would be located within the Runway Protection Zone and specifically identified spotters as being in that zone. Tr. 689. Specifically, after being shown PWC-38, Mr. Hock went further and stated, "[y]eah, that portion of our facility is within the runway protection sone. Absolutely." Tr. 689.

In addition to the above, and despite recognizing that DOT/FAA/AR-09/62 titled "Evaluation of Trash Transfer Facilities as Bird Attractants," was the "best reference" when experts from Aptim raised questions about the proximity of the airport to the proposed waste transfer facility, Applicant opted to remove any referenced of this FAA document from its Application in its entirety. Exhibit 1 Application; Tr. 703. In other words, the Applicant has failed to meet Criterion 2 because the proposed facility has not been shown to be so designed to be operated that the public health, safety, and welfare will be protected, especially as it relates to the RPZ operations.

C. Criterion 3: The facility is located so as to minimize incompatibility with the character of the surrounding areas and to minimize the effect on the value of the surrounding property.

1. Minimizing incompatibility with character of the surrounding area.

The Applicant has the burden of showing that it meets both prongs of Criterion 3. *Peoria Disposal Company v Peoria Cnty. Bd.,* 2007 WL 1816891, at *24. The first prong requires the Applicant show that the "facility is located so as to minimize incompatibility with the character of the surrounding area." Sec. 39.2. Here, Applicant relies on the testimony and report of an appraiser, Dale Kleszynski, to attempt to show its proposed facility meets the first prong of Criterion 3.

However, Mr. Kleszynski has not provided any of the information necessary to meet this prong nor is he qualified to do so. Demonstrating that the incompatibility of the proposed facility with the surrounding area is not what Mr. Kleszynski did in his testimony related to the first prong of Criterion 3. Rather, Mr. Kleszynski chose instead to testify only to the highest and best use of the subject property, which is in an appraisal practice that allows one to determine what use of the property brings the highest sale price. TR. 342-43. Underlying that analysis was simply Mr. Kleszynski's review of the zoning statute of the subject property and the surrounding area, nothing more. However, nothing Mr. Kleszynski did established that the facility is located so as to minimize incompatibility with the surrounding area, which is the required standard. There was little or no testimony in Mr. Kleszynski's presentation related to how this use was located as to minimize the effect on surrounding properties, other than that the zoning in the area was generally consistent with the proposed use in that both were industrial type uses.

The problem with this analysis, however, is that Mr. Kleszynski is not qualified to discuss proper zoning and compatible uses. As he admitted, he has no experience in zoning or land

planning. Tr. 278-82. He is not, nor has he ever been, a land planner, and he is not a member of the AICP, which is the national organization responsible for certifying land planners' credentials. Tr. 278-79. He has never drafted a zoning ordinance nor land use plan and admitted he has not previously testified in any land planning capacity. Tr. 279-81.[8]

Probably because of this lack of experience, Mr. Kleszynski failed to take into account that the City had already legislatively determined that all land owned by the DuPage Airport in this area, which owns land contiguous to this proposed facility on two sides, was not an appropriate use for any pollution control facility. Tr. 326-30. PWC Ex. 1. This determination is a strong indication of what the City has historically believed is an appropriate use for this portion of its City. That legislative finding was totally ignored by Mr. Kleszynski.

While Mr. Kleszynski is apparently of the opinion that zoning determines incompatibility in and of itself, he also admitted on cross-examination that he had not done any analysis on mitigation or minimizing the effect of the proposed waste transfer station on any of the surrounding properties because that was not "within his area of expertise." Tr. 353. One can assume that this lack of expertise also led him to testify that he never looked at ways to minimize the effect the proposed facility would have on surrounding property or whether proper screening could be used to protect nearby properties, even though he did acknowledge that zoning ordinances often use screening techniques to minimize effect of uses on surrounding properties. Tr. 291-94 and 298-99. His total failure to consider any mitigation measures further shows analyzing the first prong of

[8] It is interesting to note that PWC's appraiser, Kurt Kielisch, admitted that he did not perform an analysis of the first prong of Criterion 3 because as a licensed appraiser practicing in over 21 states, even with 39 years of experience, he was not qualified to give an opinion on compatibility. Tr. 920-21 and 931-32.

Criterion 3 was clearly not within his expertise. This first prong is a land use issue – not an issue for an appraiser of land values.

Accordingly, the Applicant has wholly failed to meet its burden of proof as to the first prong of Criterion 3.

2. *Minimizing effect on the value of surrounding property.*

The Applicant also relied on Mr. Kleszynski's testimony as its evidence that the proposed waste transfer station meets the second prong of Criterion 3. Unlike the first prong, Mr. Kleszynski as an appraiser is qualified to testify on this portion of Criterion 3. However, Mr. Kleszynski failed to do any substantive analysis to support his conclusion and, accordingly, provides no actual analysis or evidence that can be relied upon.

Mr. Kleszynski's opinion basically was that the highest and best use of the subject property was as a waste transfer station; hence, by definition, that use standing alone minimized effect on surrounding property values. Tr. 337 and 350. While no one disputes Mr. Kleszynski's ability to opine about highest and best use, his very novel theory went something like this:

- If the property is used at its highest and best use, then it avoids obsolescence. Tr. 337.
- If the property does not become obsolete, then it will not negatively affect surrounding property values. Tr. 337.

Importantly, while Mr. Kleszynski consistently discussed obsolescence is his sworn testimony, his report, which was filed as part of the Application never, even mentions the word "obsolescence." Applicant Ex. 1, pp. 3-1 to 3-63; Tr. 347. Going further, neither in his report nor in his testimony does Mr. Kleszynski ever cite to any particular source for his theory that lack of obsolescence somehow equals minimization of the effect on surrounding property values.

However, as PWC's appraisal expert, Kurt Kielisch, pointed out, highest and best use and minimizing effect on property values are not at all related. Tr. 926-27. In fact, it is nonsensical to say that a property utilized to its highest and best use automatically minimizes the effect on surrounding property values. The driving reason to determine the highest and best of a property is to in turn determine the highest value one can obtain for the property. Tr. 342-43. Every definition of highest and best use posed to Mr. Kleszynski on cross-examination was based on obtaining the highest value for the property. Tr. 341-49. None of the definitions mention or even relate to the effect of the use on surrounding property values. *Id.* In fact, when asked to provide authority for his statement that there was a correlation between minimizing effect on property values and the highest and best use, Mr. Kleszynski was unable to cite any authority. Tr. 350-351. Although Applicant's attorney claimed during his cross-examination of Mr. Kielisch that authority existed where the IPCB approved highest and best use as a factor in Criterion 3 (Tr. 959-960), and while the IPCB has been asked to consider highest and best use analyses in relation to Criterion 3, an exhaustive search of IPCB decisions by PWC counsel found no IPCB decisions where an expert based his entire Criterion 3 opinion on the mere fact that a pollution control facility was the highest and best use – however, that is exactly (and only) what Mr. Kleszynski did in this matter.

Despite Mr. Kleszynski's conclusory opinion, a property being utilized at its highest and best use and not becoming obsolete does not in any way assure that it will not negatively affect surrounding property values. Tr. 926-29. As Mr. Kielisch testified, a hog farm may be the highest and best use in rural areas and may not face obsolescence because it brings in the highest return on value, but it is an enormous leap to say that the hog farm will not affect property values of neighboring farms or other uses. Tr. 929.

Mr. Kielisch went even further and noted that without further studies and sales analysis, Mr. Kleszynski's opinion could not be used to determine whether the subject property was located so as to minimize the effect on surrounding property values. Tr. 932. In order to properly determine whether a facility or use would negatively affect surrounding property values, an appraiser would have to go much deeper, and do a very different analysis than what Mr. Kleszynski performed. Tr. 933-38. One of those possible analyses would have been to perform a "Matched Pair" analysis. Tr. 934-35. Another one would have been to do a "Before and After" study. Tr. 935. Mr. Kleszynski admitted he did neither. Tr. 335 and 352.

Further, Mr. Kleszynski admitted that his report does not look at possible impacts on any specific property in the area – he just looked "globally." Tr. 317. This admission alone shows that his opinion did not look at any of the factors necessary issues to determine effect on property values or minimization thereof. The question is not whether property values are "globally" affected. The issue that must be looked at is the effect of this waste transfer station on the "surrounding" property. That analysis was not done in any way, shape or form here. Therefore, Applicant has failed to meet the second prong of Criterion 3 as well.

D. Criterion 8: The Facility is Inconsistent with the Solid Waste Management Plan Enacted by the County of DuPage

The DuPage County Board is the legislative body that enacted and approved the Solid Waste Management Plan (the "SWMP") at issue in this matter. Tr. 788. In 1996, the SWMP was updated (the "1996 Update") to state that there should be three to five waste transfer stations "***throughout*** the County." Tr. 996. (Emphasis Added). As the court in *Cnty. of Kankakee v. Illinois Pollution Control Bd*, 396 Ill. App. 3d 1000, 1020-23, 955 N.E.2d 1, 19-21 (3d Dist. 2009) held, the cardinal rule of statutory construction when looking at a SWMP is to give effect to the

intent of the County that drafted it. Here the County gave a clear indication of what the intent of the words "throughout the County" was in the early 2000's.

In 2003, a second DuPage County transfer station was proposed (the "2003 Facility") just blocks from the existing Groot Facility. Tr. 998. After a siting hearing, the County of DuPage specifically relied upon its own 1996 Update language finding that transfer stations should be located "throughout the County" to deny siting the 2003 Facility within blocks of the Groot Facility because it failed to comply with the SWMP. Exhibit PWC 3; Tr. 998. The County Board of DuPage made it crystal clear that "throughout the County' did not mean two transfer stations within blocks of each other when it specifically found that the 2003 Facility did not meet Criterion 8 "in that the proposed facility was inconsistent with the solid waste disposal plan of DuPage County because the proposed location is within ¼ mile of another transfer station; and fails to reduce wear on roads, reduces overall truck miles traveled and decrease truck air emissions." PWC Ex. 3.[9] This requirement that two transfer stations not be in close proximity still exists today in the SWMP.

This "throughout the County" language in the 1996 Update has never been repealed by any of the later updates that occurred in 2007, 2012 or 2017. If the County later disagreed with its construction of this SWMP related to the 2003 Facility, its failure to amend or supersede that language denotes its express embracing of that prior interpretation. *See Village of Vernon Hills v. Heelan,* 2015 IL 118170, ¶ 19, 39 N.E.3d, 937, 941 (statutes that have been interpreted but not amended create a presumption that the legislature has acquiesced in the interpretation).

[9] Interestingly, the City of West Chicago agreed with this interpretation in 2003 as it adopted its own Resolution opposing the siting of the 2003 Facility. PWC Ex. 2.

Accordingly, this language requires that the proposed facility be denied for the exact same reason that 2003 facility was denied – its close proximity to the still existing Groot Facility.

The later SWMP updates only serve to further solidify the requirement that new waste transfer stations should not be sited near existing ones.[10] The 2012 update to the SWMP followed that reasoning when it articulated that "future conditions may necessitate a new facility ***in the southern portion*** of the County." Tr. 1002; Applicant's Ex. 1, Appendix 8-G, p. 5. (Emphasis Added). Of significant note, that same 2012 update did not mention or seek the establishment of a new facility in the northwest portion of DuPage County. Applicant's Ex. 1, Appendix 8-G. Going further, and bringing us to the present, nothing in the 2017 SWMP update superseded or repealed this language. Tr. 793; Applicant's Ex. 1, Appendix 8-H.

In fact, Applicant's own Criterion 8 expert, Mr. Hock, never disputed that any of this language was in the SWMP or its updates, nor did Mr. Hock cite any language in the SWMP (before or after the County's denial of the 2003 Facility), that stated or even implied two waste transfer stations within blocks of each other would comply with the SWMP. Given the fact that the language in the SWMP and its updates never changed the requirements that future waste transfer stations be spread "throughout the County" and only added language seeking a transfer station in the southern portion of the County; the 2003 County Board's reliance on this language in the 1996 Update in denying a second a second waste transfer station within blocks of an existing transfer station clearly shows that the County never intended for there to be two waste transfer stations in close proximity. *Cnty. of Kankakee v. Illinois Pollution Control Bd*, 396 Ill. App. 3d at 1020-23, 955 N.E.2d at 19-21. The fact that the language has never been modified or been

[10] Both the proposed facility and the Groot Facility are in the northwest corner of DuPage County. Tr. 785.

removed points to the still-existing requirement that waste transfer stations be built throughout the County, not next to each other, to satisfy the needs of DuPage County residents and comply with the SWMP. If the County Board had the desire to remove or modify the requirement that waste transfer stations be "throughout the County," there have been numerous opportunities to change that language. PWC Ex. 801, p. 3. However, the County's consistent refusal to modify this language or its position in this regard shows a form of acquiescence in that prior interpretation. *Village of Vernon Hills,* 2015 IL 118170, ¶ 19. Accordingly, the intent of the SWMP is clear – two transfer stations in such a small area violate the SWMP (put a different way, the County does not believe the words "throughout" means "next to" or "next door").

Applicant's engineer, John Hock, relied heavily in his testimony regarding Criterion 8 upon a letter provided by Joy Hinz, an Environmental Specialist with the County of DuPage, stating that the "facility ***appears*** to be consistent with the … DuPage Solid Waste Management Plan Five Year Update (2017)." Applicant Ex. 1, Appendix 8-1 (the "Hinz Letter") (Emphasis Added). However, the Hinz Letter opinion is of little value to the Applicant. First of all, the Hinz letter is not under oath and was not subject to further examination by the participants in the proceeding. Further, the letter is ambiguous in that it only states that the facility proposed here "appears" to be consistent with SWMP. *Id.* Tr. 788. Ms. Hinz never saw the application for the proposed facility before issuing her letter, and her letter was issued over two years before the Application was completed. Applicant Ex. 1, Appendix 8-1; Tr. 785. More importantly, it is the intent of the legislative body that enacted the SWMP (not a staff member with unknown authority) that is most important in determining the actual meaning of the SWMP. *Cnty. of Kankakee v. Illinois Pollution Control Bd,* 396 Ill. App. 3d at 1020-23, 955 N.E.2d at 19-21; *Murphy-Hylton v. Lieberman Mgmt. Services, Inc.*, 2016 IL 120394, ¶ 25, 72 N.E.3d 323, 329 (primary objective is to ascertain and give effect

to the intent of the enacting body). In this case, the County Board made its intent crystal clear in when it previously found that the proposed 2003 Facility violated the SWMP because of its proximity to the Groot Facility.

Hence, the proposed facility is not consistent with the requirements of the Solid Waste Management Plan Enacted by the County of DuPage and thus fails to meet Criterion 8.

E. PWC Does not Challenge Applicant's Remaining Criterion

PWC does not challenge Applicant's ability to satisfy the remaining criterion. Thus, PWC does not dispute that Applicant is able to and has satisfied Criterion 4, 5, 6 or 9.

VI. APPLICANT'S POST HEARING SUBMISSIONS

On February 18, 2023, at 9:48 a.m., and in a desperate last-ditch, Reargued Action to salvage its clearly deficient Application, counsel for Applicant, Mr. George Mueller, sent the Hearing Officer an email in which he wrote: "Attached hereto are a letter from Canadian National and a supplemental report from Dale Kleszynski. These are filed by LRS as post hearing public comment." Attached to the email were in fact the following two documents:

1) A letter dated February 2, 2023 from K.T. Donahue, State and Local Affairs Manager of the Canadian National Rail directed to John Hock; and,

2) A letter dated February 16, 2023 from Dale J. Kleszynski, President of Associated Property Counselors, Ltd. Directed to John Hock.

Neither of the two Hail Mary letters help Applicant because as set forth above, Applicant has already failed to meet the statutory notice requirements, has failed to meet the 1,000-foot set back requirement, the Siting Hearings were riddled with Fundamental Fairness related issues and numerous statutory criterion under 39.2 were not met. And, if this was not enough, the two letters themselves do not help Applicant, and, in fact, one of the letters, the Canadian National Letter, actually supports PWC arguments that the Pre-Filing Notice was statutorily deficient.

A. The February 2, 2023 Canadian National Letter

First, counsel for Applicant is fully aware that the manner to submit post hearing comments is clearly set forth on the City of West Chicago's website and can be submitted in only one of two ways, either via email or by writing to the City of West Chicago at 475 Main Street. The website specifically states the following regarding the submission of Public Comments:

> ***Public Comment***
>
> *Members of the public seeking to submit a public comment for the City Council to consider in making its decision must have already done so as part of the public hearing, or must have submitted a written comment received by the City, or postmarked on or before, Saturday, February 18, 2023.*
>
> *Any comments made at the Special City Council meeting would be outside of the siting record and thus not lawfully considered by the City Council in making its decision.*
>
> *Public comments may be submitted in writing by delivering to the West Chicago City Hall at 475 Main Street, or by email at aadm@westchicago.org.*

Thus, the manner in which counsel for Applicant submitted a proposed "public comment," is inconsistent and inappropriate and, thus, this so-called "public comment" should be rejected.

Second, the February 2, 2023 letter from Canadian National to John Hock is not a public comment and it specifically states so in the body of the letter. In his letter to Mr. Hock, Mr. Donahue wrote that Canadian National does "***not have any comments*** regarding the proposed West DuPage Recycling and Transfer Station." (Emphasis Added). The Canadian National letter, thus, speaks for itself and any effort by counsel to convert a letter written to Mr. Hock specifically stating that Canadian National does not have any comment into a "post hearing comment" is disingenuous and should be summarily rejected.

Third, although the February 2, 2023 letter that has been in the possession of Applicant for weeks now is Applicant's not so veiled attempt to support their argument that their non-compliance with the 1,000-foot set back requirement set forth in 415 ILCS §5/22.14(a) fits within the so-called

Roxana decision exception, the letter actually confirms that PWC is correct—namely, that the Pre-Filing Notice is statutorily deficient. This is because the Canadian National letter makes clear that the EJ&E Railroad Line is a viable railroad line and that the "Leighton sub is part of the old Elgin Joliet & Eastern Railway (EJ&E) which was purchased by CN in 2009 ***and it is doing business as the Wisconsin Central LTD which is a wholly owned subsidiary*** of Canadian National Railway." (Emphasis Added). The reference in the February 2, 2023 letter to the EJ&E "… doing business as the Wisconsin Central LTD …" is consistent with the Secretary of State records showing that these two companies merged in 2012, and that the EJ&E is still alive and well, and a fully-functioning business entity. In addition, as Canadian National wrote regarding the EJ&E:

- CN has spent hundreds of millions of dollars in capital improvements since a***cquiring the EJ&E***.
- The ***EJ&E connects*** the entire network together in the Chicago area. It ties together CN's southern region and its western and eastern regions.
- The ***EJ&E not only connects*** the CN network together, but it also connects with all the major railroads in the Chicago area. It is also home to CN's largest rail yard in the U.S.
- The ***EJ&E serves*** steel mills, petrochemical customers, and a diverse group of distribution centers. (Emphasis Added).

In other words, the February 2, 2023 CN letter confirms in definitive fashion that PWC is and was correct in its Motion to Dismiss—the EJ&E is an active fully-functioning entity that should have received Pre-Filing Notice pursuant to 415 ILCS §5/39.2(b). A simple search of the Secretary of State website would have confirmed that the EJ&E is an active Illinois business in good standing. And, since the evidence showed that the EJ&E was not served with the Pre-Filing Notice, the City lacks jurisdiction to even consider Applicant's proposed siting of a second waste transfer station in West Chicago.

Therefore, despite Applicant's representation to the Hearing Officer that its "research disclosed that EJ&E was wholly acquired by Canadian National on December 31, 2012, and that ***it ceased to operate as an independent entity after that date***"[11] (*see* Applicant's Response to Motion to Dismiss – Notice) no such ceasing of operations of the EJ&E existed according to Canadian National's own correspondence. Interestingly, the Canadian National correspondence submitted by the Applicant as public comment shows the letter came from 17641 S. Ashland Avenue, Homewood, IL 60430, which is the same address in Homewood, Illinois where the authentic tax records are sent for the Subject Property and where PWC's Motion to Dismiss stated was the proper location for the Pre-Filing Notice to be sent.

In any event, the Canadian National letter conclusively dooms Applicant's Pre-Fling Notice violation and thus denies the City of West Chicago with jurisdiction to even consider the proposed Application. This dagger ends the inquiry once and for all.

B. <u>The Dale Kleszynski Letter</u>

In addition, Applicant also included a letter from Mr. Kleszynski to John Hock in which Mr. Kleszynski wrote that the letter was his "response to the testimony of Mr. Kielisch as found on pages 919 thru 940 of the record of the January 12, 2023 hearing." As with the Canadian National letter, this letter was also being submitted "by LRS as post hearing public comment." For the reasons set forth below, this letter should also be rejected.

First, the letter titled "Rebuttal 2-16-23 - Powis Rd," is not a public comment. Rather, it is, as it is called, a Rebuttal to the testimony of Mr. Kielisch. Perhaps recognizing that all evidence is closed and realizing that it was too late to rebut Siting Hearing testimony, counsel for Applicant

---

[11] PWC assumes that Applicant's representation that EJ&E "ceased to operate as an independent entity" was inadvertent and not meant to intentionally mislead.

seeks to introduce through the back-door what he knows he should have introduced during rebuttal at the hearing. Counsel's efforts should be rejected.

Second, as with the Canadian National letter, this so-called public comment, which it is not, should have been submitted to the City of West Chicago in one of the two manners mentioned above, either via email or in letter form to the address on Main Street. That was not done and thus this letter should be rejected by the Hearing Officer as public comment.

Third, after noting that the letter was in response to the testimony of Mr. Kielisch and in particular testimony found at pages 919 thru 940 of the record, Mr. Kleszynski goes on *ad nausea* about a series of matters that are clearly rebuttal as he continually refers to Mr. Kielisch's testimony throughout. In any event, while Applicant and Mr. Kleszynski may believe they raise good rebuttal points, which they do not, the time to have raised these would have been at the Siting Hearing, not weeks after the close of the evidence.

Unlike the numerous LRS employees who provided public comment in support of their employer (LRS), at the Siting Hearing, Mr. Kleszynski, on the other hand, was identified as an expert who provided specific expert testimony regarding Criterion 3. He was then subject to cross-examination and if he really did have issues with the testimony of PWC's expert (Mr. Kurt Kielisch), the time to have challenged that testimony would have been at the Siting Hearing when the Hearing Officer offered the Applicant an opportunity to present rebuttal testimony (Tr. 1315), not weeks later after he has had time to review and digest the Hearing transcript. Providing what is clearly rebuttal evidence and testimony days before Findings of Fact and Conclusions of Law are due smack of nothing other than additional Fundamental Fairness irregularities. These sort of tactics by counsel for Applicant are unbecoming, inappropriate and should be rejected.

VII. CONCLUSION

In conclusion, PWC respectfully avers that Applicant's proposal to site a second waste transfer station in a majority-minority community be denied for the following reasons:

1) The Pre-Filing Notice was deficient and thus does not comply with 415 ILCS §5/39.2(b);

2) The proposed facility would be located within 1,000-feet of property zoned residential and thus does not comply with 415 ILCS §5/22.14(a);

3) The Siting hearing violated the principals of Fundamental Fairness because:

    a. the Pre-Filing Notice was not in Spanish even though West Chicago receives federal funds and more than 5% of its residents are LEP;
    b. West Chicago failed to provide Spanish-language interpreters for the public even though West Chicago receives federal funds and more than 5% of its residents are LEP;
    c. The Hearing Officer denied PWC the ability to question Applicant's expert on whether he considered the impact of the proposed facility on West Chicago's minority community;

4) The Applicant failed to establish that the proposed "facility is necessary to accommodate the waste needs of the area it is intended to serve;" thus, Criterion 1 was not satisfied;

5) The Applicant failed to establish that the proposed "facility is so designed, located, and proposed to be operated that the public health, safety, and welfare will be protected;" thus, Criterion 2 was not satisfied;

6) The Applicant failed to establish that the proposed "facility is located so as to minimize incompatibility with the character of the surrounding areas and to minimize the effect on the value of the surrounding property;" thus, Criterion 3 was not satisfied;

7) The Applicant failed to establish that "if the facility is to be located in a county where a county board has adopted a solid waste management plan consistent with the planning requirements of the Local Solid Waste Disposal Act or the Solid Waste Planning and Recycling Act, the facility is consistent with that plan;" thus, Criterion 8 was not satisfied.

For all of the above reasons, PWC respectfully requests that the Hearing Officer recommend to the City of West Chicago's City Council that the proposed Application be denied.

In the alternative, PWC further requests that even if the Hearing Officer recommends that the City of West Chicago City Council approve Lake Shore Recycling's Application to site a second waste transfer station in the City of West Chicago, that the City Council nonetheless deny the Application for the reasons set forth herein.

Date: February 21, 2023

6. **Not applicable if surviving, new or acquiring Corporation is an Illinois Corporation.**

It is agreed that, upon and after the filing of the Articles of Merger, Consolidation or Exchange by the Secretary of State of the State of Illinois:

a. The surviving, new or acquiring Corporation may be served with process in the State of Illinois in any proceeding for the enforcement of any obligation of any Corporation organized under the laws of the State of Illinois which is a party to the merger, consolidation or exchange and in any proceeding for the enforcement of the rights of a dissenting shareholder of any such Corporation organized under the laws of the State of Illinois against the surviving, new or acquiring Corporation.

b. The Secretary of State of the State of Illinois shall be and hereby is irrevocably appointed as the agent of the surviving, new or acquiring Corporation to accept service of process in any such proceedings, and

c. The surviving, new or acquiring Corporation will promptly pay to the dissenting shareholders of any Corporation organized under the laws of the State of Illinois which is a party to the merger, consolidation or exchange the amount, if any, to which they shall be entitled under the provisions of The Business Corporation Act of 1983 of the State of Illinois with respect to the rights of dissenting shareholders.

Printed by authority of the State of Illinois. March 2007 — 500 — C 195.12

7. **Complete if reporting a merger under §11.30 – 90 percent-owned subsidiary provisions.**

a. The number of outstanding shares of each class of each merging subsidiary Corporation and the number of such shares of each class owned immediately prior to the adoption of the plan of merger by the parent Corporation:

Name of Corporation	Total Number of Shares Outstanding of Each Class	Number of Shares of Each Class Owned Immediately Prior to Merger by the Parent Corporation

b. **Not applicable to 100 percent-owned subsidiaries.**

The date of mailing a copy of the plan of merger and notice of the right to dissent to the shareholders of each merging subsidiary Corporation was _____ (Month & Day) _____ (Year)

Was written consent for the merger or written waiver of the 30-day period by the holders of all the outstanding shares of all subsidiary Corporations received? ☐ Yes ☐ No

(If "No," duplicate copies of the Articles of Merger may not be delivered to the Secretary of State until after 30 days following the mailing of a copy of the plan of merger and the notice of the right to dissent to the shareholders of each merging subsidiary Corporation.)

8. The undersigned Corporation has caused this statement to be signed by a duly authorized officer who affirms, under penalties of perjury, that the facts stated herein are true and correct. **All signatures must be in BLACK INK.**

AGREEMENT AND PLAN OF MERGER

This AGREEMENT AND PLAN OF MERGER (this "Agreement") is made as of December 20, 2012, by and between Elgin, Joliet and Eastern Railway Company, an Illinois corporation (the "Merging Entity"), and Wisconsin Central Ltd., an Illinois corporation (the "Surviving Entity"). This Agreement has been approved, adopted, certified, executed and acknowledged by each of the undersigned in accordance with the requirements of the Illinois Business Corporation Act of 1983.

WHEREAS, the Merging Entity is a wholly owned subsidiary of Grand Trunk Corporation, a Delaware corporation ("Merger Parent");

WHEREAS, the Surviving Entity is a wholly owned subsidiary of Wisconsin Central Transportation Corporation, a Delaware Corporation ("Survivor Parent"); and

WHEREAS, Merger Parent and Survivor Parent desire that the Merging Entity be merged with and into the Surviving Entity pursuant to the terms of this Agreement.

NOW THEREFORE, in consideration of the promises and mutual covenants and agreements contained herein, and other good and valuable consideration, and further in accordance with the Illinois Business Corporation Act of 1983, it is agreed by and between the parties hereto that the Merging Entity shall be merged into the Surviving Entity upon the terms and conditions set forth herein.

1. Merger. On the Effective Date (as hereinafter defined), the Merging Entity shall be merged with and into the Surviving Entity pursuant to the Illinois Business Corporation Act of 1983, with the Surviving Entity continuing as the surviving entity (the "Merger"). At the time of the Merger, Survivor Parent shall issue 8 shares of its common stock with $0.01 par value to Merger Parent in exchange for the cancellation of the Merging Entity's stock.

2. Effective Date. Upon the execution of this Agreement, the Merging Entity and the Surviving Entity shall be and hereby are directed to file Articles of Merger in the office of the Secretary of State of the State of Illinois. The Merger shall become effective on January 1, 2013 (the "Effective Date").

3. Surviving Entity. On the Effective Date, the Merging Entity shall be merged with and into the Surviving Entity, and the separate corporate existence of the Merging Entity shall thereupon cease. The Surviving Entity shall (a) be the surviving corporation in the Merger and shall possess all the rights, privileges, claims, demands, property, powers, franchises and authority, both public and private, and all debts due to the Merging Entity and the Surviving Entity, (b) be subject to all the restrictions, disabilities and duties of both the Merging Entity and the Surviving Entity, (c) be vested with all assets and property, real, personal and mixed, and every interest therein, wherever located, belonging to the Merging Entity and the Surviving Entity, and (d) be liable for all of the obligations and liabilities of the Merging Entity and the Surviving Entity. On and after the Effective Date, the title to any real estate vested by deed or otherwise in the Merging Entity shall be vested in the Surviving Entity, all rights of creditors and all liens upon property of the Merging Entity shall be preserved unimpaired, and all debts, liabilities and duties of the Merging Entity shall thenceforth attach to the Surviving Entity and

may be enforced against it to the same extent as if such debts, liabilities and duties had been incurred or contracted by it. The title to any such real estate, or any interest therein, vested in the Merging Entity or Surviving Entity shall not revert or be in any way impaired by reason of the Merger. This Agreement is on file at the principal place of business of the Surviving Entity, the address of which is 17641 South Ashland Avenue, Homewood, Illinois 60430. A copy of this Agreement will be furnished to any shareholder of the Merging Entity or Surviving Entity upon request and without cost.

4. Additional Actions. If, at any time after the Effective Date, the Surviving Entity shall consider or be advised that any deeds, bills of sale, assignment, assurance or any other actions or things are necessary or desirable (a) to vest, perfect or confirm, of record or otherwise, in the Surviving Entity its right, title or interest in, to or under any of the rights, properties or assets of the Merging Entity or the Surviving Entity acquired or to be acquired by the Surviving Entity as a result of, or in connection with, the Merger, or (b) or otherwise carry out the purposes of this Agreement, the Merging Entity and its officers and directors shall be deemed to have granted to the Surviving Entity an irrevocable power of attorney to execute and deliver all such deeds, bills of sale, assignments and assurances and to take and do all such other actions and things as may be necessary or desirable to vest, perfect or confirm any and all right, title and interest in, to and under such rights, properties or assets in the Surviving Entity and otherwise to carry out the purposes of this Agreement; and the officers and directors of the Surviving Entity are fully authorized in the name of the Merging Entity or the Surviving Entity, or otherwise to take any and all such actions.

5. Cancellation of Stock of Merging Entity. On the Effective Date, and without any further action on the part of the Merging Entity or the Surviving Entity, (a) each of the shares of common stock of the Surviving Entity issued and outstanding immediately prior to the Effective Date shall remain issued and outstanding immediately subsequent to the Effective Date as shares of common stock of the Surviving Entity, (b) each of the shares of the common stock of the Merging Entity issued and outstanding immediately prior to the Effective Date shall be cancelled and cease to exist and be outstanding.

6. Service of Process. The Surviving Entity hereby agrees that it may be served with process in the State of Illinois in any proceeding for the enforcement of any obligation of the Merging Entity and in any proceeding for the enforcement of the rights of a dissenting shareholder of the Merging Entity against the Surviving Entity.

7. Name. The name of the Surviving Entity immediately prior to the Effective Date shall be the name of the Surviving Entity following the Effective Date.

8. Articles of Incorporation. The Articles of Incorporation of the Surviving Entity immediately prior to the Effective Date shall be the Articles of Incorporation of the Surviving Entity following the Effective Date, unless and until the same shall be amended or repealed in accordance with the provisions thereof.

9. By-laws. The by-laws of Surviving Entity immediately prior to the Effective Date shall be the by-laws of Surviving Entity following the Effective Date, unless and until the same shall be amended or repealed in accordance with the provisions thereof.

10. Board of Directors and Officers. The members of the board of directors and the officers of Surviving Entity immediately prior to the Effective Date shall be the members of the board of directors and the officers of Surviving Entity following the Effective Date, unless and until the same shall be terminated or replaced in such positions as provided in the by-laws.

11. Plan of Reorganization. This Agreement constitutes a plan of reorganization pursuant to Internal Revenue Code §368(a) to be carried out in the manner, on the terms, and subject to the conditions set forth herein, it being the intent of the parties that the merger of the Merging Entity, which is a wholly owned subsidiary of Merger Parent, into Surviving Entity, which is a wholly owned subsidiary of Survivor Parent, qualify as a forward tri-angular "A Reorganization" described in Internal Revenue Code §368(a)(2)(D).

12. Termination/Abandonment. This Agreement may be abandoned by the mutual consent of the Merging Entity and the Surviving Entity, each acting by its board of directors at any time prior to the filing of the Articles of Merger in the State of Illinois. In the event of any termination of this Agreement, this Agreement shall become wholly void and of no effect and there shall be no further liability or obligation hereunder on the part of (a) the Merging Entity, its board of directors or shareholder or (b) the Surviving Entity, its board of directors or shareholder.

13. Counterparts. This Agreement may be executed in multiple counterparts.

[Signature page follows]

IN WITNESS WHEREOF, each of the Surviving Entity and the Merging Entity, pursuant to authority duly granted by its shareholder and its board of directors, has caused this Agreement to be executed by its duly authorized officers.

In Re: THE APPLICATION OF	)
LAKESHORE RECYCLING SYSTEMS,	)
LLC, FOR SITING APPROVAL OF A	)
TRANSFER STATION AT	)
1655 POWIS ROAD,	)
WEST CHICAGO, ILLINOIS 62418	)

PEOPLE OPPOSING DUPAGE ENVIRONMENTAL RACISM'S PROPOSED COMBINED FINDINGS OF FACT AND CONCLUSIONS OF LAW

I. INTRODUCTION

People Opposing DuPage Environmental Racism (PODER), a committee of Immigrant Solidarity DuPage (ISD), opposes Lakeshore Recycling System (LRS)'s application to site a waste transfer station at 1655 Powis Road, West Chicago, Illinois (LRS's application), and proposes that the Hearing Officer recommend that the City Council deny LRS's application.

LRS applied for siting approval from the City Council of West Chicago on September 16, 2022, under 415 ILCS 5/39.2 and public hearings on LRS's application were held in January 2023. After reviewing LRS's application and the record from the public hearings, PODER concludes that LRS has not met its burden under the statute. Among other requirements, section 39.2 of the Illinois Environmental Protection Act (the Act) requires that LRS's application establish that its proposal satisfies nine statutory criteria. 415 ILCS §5/39.2(a). Most problematically from PODER's perspective, LRS has failed to carry its burden and establish that it's proposed expansion will be designed and operated so as to protect public health and public welfare. Inequitably and inconsistent with a proper reading of the statute, LRS's application touts benefits to the broader region while failing to even address significant pollution harms on public health and welfare that will be borne by the relatively less wealthy and less white community of West Chicago that would host LRS's proposed, expanded facility.

Accordingly, PODER respectfully requests that the Hearing Officer recommend that the City Council deny LRS's application for four reasons: (1) because LRS failed to provide sufficient information relating to protecting public health, safety and welfare of West Chicago from the diesel truck air pollution its proposed facility will create, *infra* Section III.A; (2) because of the compounding health and welfare impacts the proposed facility would have in concert with existing pollution burdens borne by the community of West Chicago comprised of many people who are Latinx, Spanish-speaking, or immigrants, *infra* Section III.B; (3) because LRS's application is inconsistent with DuPage County's Solid Waste Management Plan, *infra* Section III.C; and (4) because the proceeding to review LRS's application was fatally flawed by fundamental unfairness, *infra* Section IV.

In the event the Hearing Officer nonetheless concludes that LRS's application should be approved by the City Council, PODER respectfully submits that such approval must be conditional, as contemplated by section 39.2(e). 415 ILCS §5/39.2(e). As explained in context below, those conditions should require that LRS: (1) ensure that all trucks driving to or from the proposed facility drive exclusively along the routes specified in the application, (2) ensure all trucks using the proposed facility are electric vehicles as soon as possible by reviewing and utilizing technical and financial support from ComEd's forthcoming Beneficial Electrification plan, and (3) submit and implement updated plans for employee safety. To be clear, PODER submits that LRS's application should be denied, full-stop. However, conditions related to truck routes in West Chicago, truck fleet electrification, and employee safety conditions, should, at least, be mandated to reduce the inequitable failures to protect public health and welfare that will follow from City Council approval of LRS's proposed expansion.

II. STANDARD OF REVIEW

LRS bears the burden of demonstrating compliance with each of the nine criteria in section 39.2. Under section 39.2 of the Act, the City Council of West Chicago, as the governing body of the municipality, has the power to grant or deny approval of applications for the siting of pollution control facilities. 415 ILCS §5/39.2(a). Section 39.2 both describes the procedures for evaluating such an application and lists the nine criteria that the City Council must use to assess substantively whether to approve or deny the application. *Id.*

To merit City Council approval, LRS must "submit sufficient details describing the proposed facility and evidence to demonstrate compliance" with each of the nine criteria. *Id.* If LRS has not demonstrated with "sufficient details" that its proposed facility meets each and every one of the nine criteria, then the City of West Chicago must deny the application because a "negative decision as to one of the criteria is sufficient to defeat an application for site approval." § 39.2(a); *Town & Country Utilities, Inc. v. Illinois Pollution Control Bd.*, 225 Ill. 2d 103, 109 (2007); see also *Will Cnty. v. Vill. of Rockdale*, 2018 Ill. App. 3d 160463, ¶ 55 ("Although the board is required to review all criteria, the application is insufficient when one criterion has not been met.") The City Council weighs the evidence in the record to resolve conflicts in the evidence and evaluate witness credibility. *Concerned Adjoining Owners*, 288 Ill. App. 3d 565, 576 (1970); *see also Land & Lakes Co. v. Illinois Pollution Control Bd.*, 319 Ill. App. 3d 41, 53 (2000); *Fairview Area Citizens Taskforce v. Illinois Pollution Control Bd.*, 198 Ill. App. 3d 541, 550 (1990); *Tate v. Illinois Pollution Control Bd.*, 188 Ill. App. 3d 994, 1022 (1989).

Additionally, where the City Council identifies ways in which the application fails to meet statutory criteria as it is proposed, the City Council may impose conditions as part of an approval to bring the proposal into compliance with the section 39.2 criteria. 415 ILCS

§5/39.2(e). "In granting approval for a site[,] the county board or governing body of the municipality may impose such conditions as may be reasonable and necessary to accomplish the purposes of this Section and as are not inconsistent with regulations promulgated by the Board." 415 ILCS §5/39.2. Conditions can be requirements the applicant must implement immediately or can create ongoing operational, reporting, or other going-forward obligations. For example, in *Will County, Illinois v. Village of Rockdale, Board of Trustees of Village of Rockdale and Environmental Recycling and Disposal Services, Inc.*, the hearing officer recommended, and the village adopted, conditions for a waste transfer station that included a subsequent final review of the stormwater management system and ongoing requirements for load checking, daily throughput, and continued compliance with operational descriptions in the application. 2018 IL App (3d) 160463, ¶¶ 28; 29.

Finally, the City Council can only approve an application under section 39.2 if the proceeding to review that application was fundamentally fair. The Pollution Control Board reviews local siting decisions on appeal and will reverse a municipality's approval if the proceeding was not fundamentally fair. 415 ILCS §5/40.1. Fundamental fairness "incorporate[es] minimal standards of procedural due process, including the opportunity to be heard, the right to cross-examine adverse witnesses, and impartial rulings on the evidence." *Fox Moraine, LLC*, 2011 Ill. App. 2d 100017, ¶ 60. No matter the outcome of the substantive evaluation of the nine criteria under section 39.2, fundamental fairness of the proceedings must still be evaluated and an approval will not survive appeal if the municipal proceeding was fundamental unfair.

III. LRS HAS FAILED TO CARRY ITS BURDEN TO ESTABLISH THAT ITS PROPOSAL MEETS EACH SECTION 39.2 CRITERIA.

LRS's application must be denied because LRS has failed to establish that its proposal meets each of the nine criteria under section 39.2. While LRS's application appears deficient as to a number of the section 39.2 criteria,[1] PODER will focus upon the most important of those deficiencies from the perspective of the community in West Chicago: LRS's failure to establish that its proposal is "designed, located and proposed to be operated" such that "public health, safety and welfare will be protected," as required by Criterion 2. 415 ICLS § 5/39.2(a)(ii). PODER will also address LRS's failure to meet its burden to show consistency with the county solid waste management plan, per Criterion 8, as it relates to the inequitable proposed location of the county's second environmentally burdensome waste transfer station in West Chicago, already the host of the County's only existing such facility.. 415 ICLS § 5/39.2(a)(viii).

A. LRS Failed to Provide Sufficient Evidence that "Public Health, Safety and Welfare" Will be Protected and Therefore Fails Criterion 2.

Section 39.2(a)(ii): the facility is so designed, located and proposed to be operated that the public health, safety and welfare will be protected.

LRS has not submitted sufficient evidence to demonstrate that its proposed facility is "is so designed, located and proposed to be operated that the public health, safety and welfare will be protected," and, therefore, the Hearing Officer should conclude that LRS has not met its burden as required under § 39.2(a)(ii). 415 ICLS § 5/39.2(a)(ii). As explained in the following subsections, there are four central flaws with LRS's application with respect to Criterion 2. First, the phrase "public health, safety, and welfare" requires that the Criterion 2 analysis focus on the

[1] PODER's silence as to any particular section 39.2 criterion does not indicate that PODER's position is that LRS has met its burden as to that criterion. To the contrary, PODER's position is that LRS has failed to carry its burden under the statute, full-stop, and PODER notes, in particular, that LRS appears to have failed to carry its burden to establish that its proposal satisfies criteria 1, 2, 3 and 8. PODER, however, is a grassroots community organization with limited resources and, therefore, will focus those limited resources on the criteria on which LRS's application fails in ways that most directly harm PODER's constituents' interests.

specific municipality wherein LRS proposes to expand its facility. In this case, that community is West Chicago. Second, LRS failed to address in any way the local air quality harms that will be experienced in West Chicago as a result of its proposed operations that would increase diesel truck traffic into and out of its expanded facility. Third, LRS failed to assess the viability of potential means to mitigate those local air quality impacts, namely by requiring that trucks using its proposed facility be powered by electric, rather than diesel, engines. Fourth, LRS's application fails to include sufficient detail or reflect sufficient plans to assure employee safety with respect to indoor air quality in its proposed operations. For these reasons, LRS has not shown that its facility is designed, located and proposed to be operated to protect public health, safety, and welfare and LRS fails to meet its burden under Criterion 2.

1. LRS Failed to Consider the "Public," as that Term is Used in Criterion 2, by Failing to Assess Its Proposed Impacts with a Focus on the Municipality of West Chicago.

The LRS application is fatally flawed because it relies on a construction of "public" that sacrifices the interests of West Chicagoans to benefit the broader region. LRS focused on purported public benefits it asserts will be enjoyed throughout the county and beyond, and LRS failed to consider the specific health and welfare of the public of West Chicago. Therefore, LRS did not meet its burden of showing that the "*public* health safety, and welfare" will be protected.

The term "public" in section 39.2(a)(ii) refers to the specific community represented by the local decisionmaker reviewing an application for compliance with Criterion 2. The purpose of section 39.2, as a whole, as illustrated in subsection (c), is to ensure that the siting of a pollution control facility in a particular community is overseen by the elected governing body of either the county or municipality in which the facility is proposed to be located. 415 ICLS § 5/39.2(a),(c). This ensures that local elected leaders, presumably accountable to the electorate in

their unit of government, will make the decision on the application in the first instance. *See, e.g., Fox Moraine, LLC v. United City of Yorkville*, 2011 IL App (2d) 100017, ¶¶ 4, 54, 60 (finding "quasi-legislative and quasi-adjudicative" role of local siting authority supported finding of fundamental fairness even where council members who voted to deny siting application were elected on anti-facility platform in election held between section 39.2 hearing and council vote); *Sw. Energy Corp. v. Illinois Pollution Control Bd.*, 275 Ill. App. 3d 84, 92 (1995) ("We construe [the language of the Act] as demonstrating the General Assembly's understanding that it has called upon locally elected officeholders on municipal or county boards—not judges—to adjudicate whether the siting criteria set forth in section 39.2(a) of the Act are present in a given case.") (citations omitted). Section 39(c) also expressly grants *local* control over the application process: "the appropriate…governing body of the municipality shall be…the governing body of the municipality *in which the facility is to be located.*" (Emphasis supplied) 415 ICLS § 5/39.2(c). "Public" means the citizens who elect the governing body reviewing the application, not some broader geographic abstraction.

Others of the nine criteria under section 39.2(a) use different statutory terms to instruct siting authorities to consider broader, more malleable geographic scopes tailored to those different standards. Other criteria are concerned distinctly with the particular commercial needs, 415 ICLS § 5/39.2(a) (i); character, 415 ICLS § 5/39.2(a)(iii); geography, 415 ICLS § 5/39.2(a)(iv), (a)(x); and sensitivity, 415 ICLS § 5/39.2(a)(v), (a)(vi), (a)(vii), of the location of the proposed facility. Because each criterion addresses a different substantive concern, each uses different specific terms to delineate the geographic scope of the analysis required in order to best serve the specific purpose of the individual □riterion. Criterion 1 uses the phrase "area intended to be served" because it is concerned with the commercial market the facility will serve, and, in

some situations like the instant case, the service area proposed is larger than the municipality where the facility is located. Criteria 3 and 5 use the phrase "surrounding area," which is a flexible, but narrower, spatial term because the facility impacts at issue in those criteria may affect a smaller or larger area depending on circumstances. Other criteria in section 39.2(a) use specific, well-defined terms to reference particular physical areas for consideration, i.e. the "100 year floodplain" in Criterion 4; the "county" in Criterion 8; and the "regulated recharge area" in Criterion 9. Each of these criteria describes a geographic scope that is precisely relevant to the specific substantive inquiry: if one is to analyze flood risk, look at the established floodplain.

The word "public" in Criterion 2 must be interpreted in the context of the purpose of that specific criterion and, therefore, as referencing the municipal subdivision where the facility is proposed to be sited, which generally has control over decisions affecting the "public welfare" of the citizens who live there. In this context, "public health, safety and welfare" does not encompass the whole proposed service territory, county, state, or nation, but rather West Chicago. Even if Criterion 2 is not read as requiring an *exclusive* geographic focus on the host municipality, at a minimum, the term "public" must be read to require *some* specific consideration of the host municipality. The regulatory scheme here—placing authority in the elected leaders of the municipality— and the use of specific geographic terms tailored to the substance of each criteria, supports reading "public" in Criterion 2 to require a specific focus on public welfare within the host municipality, as distinct from the welfare of broader areas.

LRS did not consider in either its application or its testimony how the health, safety, and welfare of people in West Chicago specifically would—or would not—be protected under its proposal. LRS focused on how its facility would provide benefits to residents of its proposed service area in the form of cheaper prices and more readily available waste disposal and

recycling. Criterion 1: Narrative, Figures, & Tables at 1-1. LRS also claimed that truck traffic will be reduced by building a new waste transfer station, but LRS also admits that it does not know *where* that traffic will be reduced. Tr. At 166 (Day 1). LRS's witness Hock's testimony suggests that reductions in truck traffic would result from reducing traffic in other regions of the service area as trucks are routed instead to and through West Chicago. *See* Tr. at 75-76 (Day 1) (stating that the current situation requires LRS to drive waste to the Batavia Transfer Station that would come to the proposed expansion in West Chicago, and that the logistical burdens of that transfer include increased road mileage). While the "public" of the larger service area more generally might benefit from reduced traffic in their communities, the "public" of West Chicago will suffer additional traffic for those region-wide improvements. West Chicago is the relevant scope for the "public" under section 39.2(a)(ii), and LRS has not offered sufficient evidence that the City and residents will be protected from increased truck traffic.

Considering the facts in the record, LRS's position as to Criterion 2 boils down to the proposition that "public health, safety and welfare" are protected because purported benefits to the broader area outweigh any harms to West Chicago. That callous calculus is impermissible under a proper reading of the statutory term "public," but is unconscionable when viewed in context of the demographic reality. As described further below, *infra* Section III.C., the demographics of West Chicago are different from the county at large. In its testimony at the public hearings, PODER submitted data from the 2021 U.S. Census that summarizes the demographics of West Chicago. PODER Exhibit 1. West Chicago is a majority non-white community. Specifically, Hispanic or Latino people make up 48.9% of the population of West Chicago, and 32.1% of West Chicago residents were born in a different country. More than half of West Chicago residents speak a different language at home. *Id.* DuPage County is majority

white and only 15% of the county is Hispanic or Latino. *Id.* West Chicago has lower median household incomes and per capita incomes than DuPage County as a whole and West Chicago has a higher percentage of residents living in poverty. *Id.* West Chicago has a higher percentage of immigrants, people of color, and non-English speakers than DuPage County. *Id.* West Chicago has a higher percentage of immigrants, people of color, and non-English speakers than DuPage County. *Id.*

PODER asks the Hearing Officer to conclude as a matter of law that "public" in Criterion 2 refers to the municipality in which the proposed facility will be located, West Chicago, and not some ambiguous reference to a larger area or to the proposed service area. LRS's application did not analyze Criterion 2 from the perspective of West Chicago at all, and, as explained further in the following sections, did not address specific public health and welfare problems that will harm West Chicago for the purported benefit of the broader region. Evaluated with a proper reading of "public" in the statute, LRS has failed to provide sufficient evidence to meet its burden that the facility will protect "public health, safety and welfare" of West Chicago.

2. LRS Failed to Submit any Data or Testimony Regarding Increases in Air Pollution in West Chicago, and Therefore Failed to Meet its Burden under Criterion 2.

LRS has the burden of demonstrating that the design and operation of its proposed facility will protect public health, safety and welfare. "Public health, safety and welfare" is a broad term that must be read to include air quality concerns. Indeed, as explained below, there are readily-applicable federal standards promulgated by the United States Environmental Protection Agency (USEPA) that establish levels of particular air pollutants in the ambient air above which the "public health and welfare" is insufficiently protected. LRS made no effort to assess whether its proposed operations would cause or contribute to exceedances of such "public health and welfare"-based standards and there is evidence in the record indicating they will. As

such, LRS's application is doomed by its callous failure to even assess whether and how it's proposed expansion will harm public health and welfare in West Chicago through the deleterious impacts on local air quality of the substantial increase in local diesel emissions inherent in its proposed operations.

The operations of LRS's proposed waste transfer would rely on daily visits by diesel garbage trucks to transfer waste. Criterion 1: Narrative, Figures, & Tables at 1-2. LRS claims that the proposed facility will "reduce environmental impacts to the City of West Chicago and the area by decreasing the travel distance…of collection vehicles." Criterion 1: Narrative, Figures, & Tables at 1-3. LRS also claims that "the use of the [proposed waste transfer station] is estimated to eliminate approximately 16.0 million heavy truck miles on area roads, reduce fuel consumption by over 4.5 million gallons, and reduce the carbon footprint by over 100 million pounds of CO2 emissions." Criterion 1: Narrative, Figures, & Tables at 1-49.

As explained in the previous section, LRS improperly focuses on increased efficiency of truck routes over the broader "area," but there is no dispute that if LRS's application is approved, more diesel trucks will drive through West Chicago than do so today. Criterion 1: Narrative, Figures, & Tables at 1-48; Tr. at 68 (Day 1). Indeed, LRS provided a table summarizing the "[p]rojected [i]ncrease in [t]raffic," it foresees in the form of *additional* daily truck trips along West Chicago roads to come into and out of its proposed facility. Criterion 6: KLOA Report & Appendix at 15, Table 4.

There can be no reasonable dispute that diesel trucks emit pollutants that are detrimental to human health, such as nitrogen oxides, sulfur compounds, and other hazardous air pollutants, including particulate matter with a diameter of 2.5 micrometers or smaller ("PM 2.5"). *See, e.g.,* USEPA, *Particulate Matter (PM 2.5) Trends* (Aug. 1, 2022), https://www.epa.gov/air-

trends/particulate-matter-pm25-trends. USEPA, About Diesel Fuels (Apr. 11, 2022), https://www.epa.gov/diesel-fuel-standards/about-diesel-fuels.[2] USEPA has determined that PM 2.5 is an air pollutant under the Clean Air Act, and is therefore subject to National Ambient Air Quality Standards ("NAAQS"). USEPA has set specific NAAQS limits for PM 2.5 at levels where the PM 2.5 "may reasonably be anticipated to endanger public health or welfare." 42 U.S.C.A. § 7408. The current primary NAAQS for PM 2.5 is 12 micrograms per cubic meter ($\mu g/m^3$) of ambient air. 40 CFR § 50.18. However, USEPA is currently proposing to reduce that limit for PM 2.5 to 9 $\mu g/m^3$—or potentially even lower. US EPA, *Proposed Decision for the Reconsideration of the National Ambient Air Quality Standards for Particulate Matter (PM)* (Feb. 3, 2023), https://www.epa.gov/pm-pollution/proposed-decision-reconsideration-national-ambient-air-quality-standards-particulate.

Even though a central feature of LRS's proposed operations would be increased use of pollution emitting trucks, LRS's application did not address the effects of associated increases in PM 2.5 pollution. LRS did not submit any data about local air quality impacts in its application materials for Criterion 2. *See, generally* Criterion 2: Narrative, Figures, & Tables. In its narrative document for Criterion 2, LRS stated that because their proposed facility does not feature any "regulated air emission sources," it did not plan to monitor air quality. Criterion 2: Narrative, Figures, & Tables at 2-35. However, the facility as a building is not the only source of air emissions—the proposed *operations* of the facility rely on the use of diesel trucks; Criterion 2 requires specific consideration of impacts from the applicant's "proposed operations." The

[2] PODER requests that the Hearing Officer take notice of these government agency websites and others cited elsewhere in this filing, as is common practice in Illinois. *See, e.g., Leach v. Dep't of Emp. Sec.*, 2020 IL App (1st) 190299, ¶ 44, 156 N.E.3d 1158, 1172–73 (taking judicial notice of Illinois Job Link website registration); *Kopnick v. JL Woode Mgmt. Co.*, LLC, 2017 IL App (1st) 152054, ¶ 26, 76 N.E.3d 105, 116 (information on the City of Chicago's website was appropriate for judicial notice).

closest LRS comes to addressing local air pollution is to assert that the expanded facility will "reduce fuel consumption by over 4.5 million gallons, and reduce the carbon footprint by over 100 million pounds of CO2 emissions." Criterion 1: Narrative, Figures, & Tables at 1-49. LRS fails to describe the PM 2.5 or other pollutant levels at issue, only projecting gallons of fuel its fleet will save. When describing actual air pollutants, LRS focuses only on greenhouse gasses, which, by definition, have global effects, and LRS makes no mention of particulate matter emissions that damage local public health and welfare. Tr. at 80, l:1-18 (Day 1). That LRS's proposal might marginally reduce LRS's contribution to global warming is fine; it does nothing to ameliorate or even acknowledge LRS's proposed contribution to local respiratory health burdens.

Even though a central feature of LRS's operations is the use of pollution emitting trucks, LRS's application also failed to address how air quality in West Chicago would be affected by its expanded facility. LRS claimed that the facility will allow for decreased truck mileage overall by reducing the number of truck trips by its vehicles. Criterion 1: Narrative, Figures, & Tables, at 1-48 – 1-49. This information conspicuously fails to specify *where* any of these overall reductions would occur. *Id.* Indeed, LRS's expert witness Mr. Hock acknowledged that he did not assess where the reduced mileage would be occurring and could not say that West Chicago would experience decreased mileage by trucks. Tr. at 166, l. 8-13 (Day 1). In fact, in the Criterion 6 application document, LRS acknowledged that daily diesel truck traffic at the facility would increase after expansion. Criterion 6: KLOA Report & Appendix at 15, Table 4.

During the public hearing, LRS witness Hock was asked about air quality data on cross-examination and admitted LRS did not conduct modeling to determine if air emissions would increase or decrease after the expansion. Tr. at 166 (Day 1). He also admitted that "emissions

don't have municipal boundaries...[and] will go where they go." Tr. at 165, l:17-19 (Day 1). PODER raised additional issues related to where emissions will go, seeking information about public health impacts driven by wind patterns in West Chicago, since diesel emissions are not confined to the column of air in which it exited a truck. Tr. at 1254-55 (Day 6). LRS did not address how wind patterns might contribute to air quality impacts from its trucks either in its application or testimony. LRS's testimony at the hearing did nothing to address the lack of any discussion of local air quality in its application.

On the other hand, witnesses for both Protect West Chicago (PWC) and PODER did address air quality impacts in West Chicago. PWC's expert witness, Mr. Powell, used LRS's claims about capacity and truck traffic to create air quality models that evaluated potential emissions. Tr. at 1160 (Day 6). When asked on cross-examination by PODER if it would have "strengthened your analysis to have monitoring of air quality right at the current LRS facility," Mr. Powell replied affirmatively. Tr. at 1177, l:7-10 (Day 6). Subsequently, PODER presented air quality data that demonstrated that the levels of PM 2.5 in the ambient air outside the LRS facility as it is currently operated were already above USEPA limits for PM 2.5.

Ms. Julieta Alcantar-Garcia, a member of PODER, used the commercially-available HabitatMap AirBeam sensor to measure PM 2.5 outside of the current LRS facility on seven separate occasions and outside the nearby Groot waste transfer station on five separate occasions. Tr. at 1257 (Day 6). The AirBeam sensor, which Ms. Alcantar-Garcia was trained to use, communicates particulate matter measurements to the AirCasting application which can be downloaded on smartphones. Tr. at 1256-1259 (Day 6). These measurements were exported from the AirCasting application and summarized in a table presented at the public hearing and admitted into evidence as PODER Exhibit 5. *Id.* At 1265-1272; PODER Exhibit 5. The data

collected are in the same units as and therefore can be compared directly to the NAAQS established by USEPA. That comparison shows that the particulate matter outside both the LRS and Groot facilities on Powis Road already exceeds the current NAAQS of 12 $\mu g/cm^3$. Outside the LRS facility, PM 2.5 readings ranged from 12 $\mu g/m^3$ to 43 $\mu g/m^3$ and outside the Groot facility, PM 2.5 readings ranged from 14 $\mu g/m^3$ to 49 $\mu g/m^3$. PODER Exhibit 5. For all but one data point, the air quality outside these facilities exceeded the NAAQS.

The data for each facility is alarming on its own, but it also highlights that there is a serious issue of cumulative impacts that LRS ignored. LRS's proposed expansion is not coming to a blank slate in West Chicago—in addition to LRS's own current operations, there is already one waste transfer station just up the road and other sources of diesel emissions like interstate highways and railroad operations beyond that. Air pollution is inherently mobile and cumulative and LRS failed to account for or study the larger context of the current situation in West Chicago. In other words, LRS's failure to present evidence on local air quality is twofold: Not only did LRS present no information regarding the anticipated local air quality impacts of truck traffic created by its proposed facility on its own, but LRS also failed to assess what overall levels of diesel pollution would threaten public health and welfare once its proposed truck traffic was added to existing sources of pollution already impacting the public.

As explained above, Illinois courts have held, on appeal of section 39.2 siting application decisions, that the local siting authority must the evidence offered on specific factual issues to determine whether an applicant has met Criterion 2. In many cases, the local siting authority therefore weighs the credibility of the witnesses offered on the specific aspects of "public health, safety, and welfare" being disputed by the parties. *Town & Country Utilities, Inc. v. Illinois Pollution Control Bd.*, 225 Ill. 2d 103, 123-24 (2007) (affirming municipal decision that

Criterion 2 was not met based on relative weighing of competing testimony on and paucity of applicants' data with respect to specific technical issue of characterizing underlying bedrock).

The question becomes, what evidence is on each side of the scale to be weighed? LRS offered no expert testimony as to local air quality impacts; LRS did nothing to directly measure or indirectly model air quality impacts of its proposal on West Chicago. The only direct measurements of air quality on the record were those presented by PODER. Admittedly, Ms. Alcantar-Garcia was not tendered as an expert on air quality and the commercially-available technology she used has not been endorsed in published judicial opinions. Tr. 1273 (Day 6). Nonetheless, the balance to be weighed here on air quality issues is between *no evidence whatsoever* offered by the applicant in contrast to *some expert opinion testimony from PWC witness Powell and direct evidence offered by Ms. Alcantar-Garcia* on the opposing side of the scale. The local siting authority is empowered to weigh competing evidence; it cannot, however, conclude that "no evidence" is of greater weight than "some evidence."

By failing to address local air quality impacts of additional diesel truck traffic in West Chicago, and by failing to address such impacts in the context of actual information regarding existing local air quality, LRS has failed to offer any evidence as to a crucial dimension of the public health and welfare effects of its proposed facility. As LRS's application failed to address a necessary component of protection public health, safety and welfare, LRS has not met its burden under Criterion 2, and therefore its application must be denied.

Should the Hearing Officer nonetheless recommend finding that the LRS application could meet Criterion 2, any approval must contain conditions to ensure local air quality impacts are limited to protect public health and welfare. The emissions and routes taken by its diesel trucks fall squarely within the location and operation of the facility as a waste transfer station.

Since the scant discussion of truck impacts that LRS provided relied on the assumption that trucks using the proposed facility will drive a particular route. *See* Tr. 739-740 (elaborating on routes to be used by trucks as described in *Criterion 6: KLOA Report &Appendix* at 12). LRS should be held accountable to ensure all trucks using its facility do adhere to that specific route. This could be done by LRS being required to monitor by GPS the routes traveled by its trucks, to report regularly on compliance with the route specified, and to explain any deviations from that route. LRS should also be required to investigate any complaints of LRS trucks or third-party trucks traveling through the community off of the presumed route, and to reject any truckload that appears to have traveled to the facility along any other route than that set forth in the application. Although increased emissions are not acceptable, LRS should be required to monitor drivers' routes to prevent emissions from occurring directly within residential neighborhoods.

3. Requiring LRS to Fulfill its Public Declaration to be at the "Forefront of the Transition" to Electric Garbage Trucks Could Address Some Air Quality Concerns.

Switching to an all-electric fleet of garbage and container trucks could alleviate some of the air pollution that would otherwise be caused by an increase in diesel truck traffic at LRS's proposed expanded facility. Both PWC and LRS made statements on the record regarding the benefits of electric trucks and their availability in Illinois. Mr. Powell, PWC's expert witness, testified that "electric vehicles wouldn't have any of these [diesel] emissions" and disagreed with LRS's assertion that electric vehicles were not readily available in Illinois. Tr. at 1174, l:10-11; 1188, l:6-8 (Day 6). During public comment later that day, LRS responded directly to Mr. Powell. LRS's Training and Community Partner, Joy Rifkin, whose described her job at LRS as to "lead…sustainability, diversity, equity, and inclusion and social impact partnerships across the communities [LRS] serve[s]," stated in no uncertain terms that "[w]hen electric trucks are readily

available, environmentally sound, and have a longer battery life, LRS will be at the forefront of that transition." Tr. at 1333, l:14-17; 1336, l:16-18 (Day 6). So there seems no dispute that electric trucks are superior to diesel trucks in terms of avoiding the air pollution that will be created by the diesel trucks LRS currently plans as central to the operation of the proposed facility.

The dispute, it seems, is regarding whether electric trucks are a "readily available" now. Indeed, because an LRS corporate representative put on the record in this proceeding a commitment to be "at the *forefront* of that transition" to electric trucks, the real question is whether such trucks are *beginning to be* a readily available option in Illinois. Fortunately, a state agency in Illinois with jurisdiction both over our electricity system and to implement statutory requirements to electrify vehicle fleets is poised to answer that question in the affirmative in the coming weeks.

Right now, ComEd—the electric utility that serves West Chicago—is awaiting approval of its proposed Beneficial Electrification plan by the Illinois Commerce Commission in ICC Docket Nos. 22-0432 & 0442. *ComEd Beneficial Electrification Plan*, ICC Docket Nos. 22-0432 & 0442 (Docket No. 22-3; ComEd Ex. 1.01) *available at* https://www.icc.illinois.gov/docket/P2022-0432/documents/325766. The Commerce Commission faces a statutory deadline to make its decision on ComEd's Beneficial Electrification plan by March 28, 2023. *Verified Petition for Approval of Statutory Beneficial Electrification Plan and Additional Charging Delivery Classes*, ICC Docket Nos. 22-0432 & 0442 (Docket No. 22-1) *available at* https://www.icc.illinois.gov/docket/P2022-0432/documents/325766 at 12 (explaining that ICC approval is required 270 days after petition, citing 20 ILCS 627/45(d))..

ComEd's proposed Beneficial Electrification plan offers support in the form of rebates and fleet assessment services to assist with the electrification of medium- and heavy-duty trucks. *See generally, ComEd Beneficial Electrification Plan*, ICC Docket Nos. 22-0432 & 0442 (Docket No. 22-3; ComEd Ex. 1.01) *available at* https://www.icc.illinois.gov/docket/P2022-0432/documents/325766 at 34-40 (pages 37-43 of the PDF, laying out programs that will be available for commercial vehicle fleets). The amount of funding a facility can receive depends on the location of the facility and the size of the trucks. For commercial and industrial ("C&I") customers such as LRS, ComEd proposes to provide active technical assistance through third-party fleet electrification assessments, in addition to financial incentives. *See id.* at 40 (PDF page 43). The third-party vendor will analyze fleet operations to determine electrification opportunities, costs, and benefits and help to develop an electrification plan.

Should the Hearing Officer conclude, despite PODER's arguments, that the application could meet Criterion 2, PODER requests that the Hearing Officer recommend approval only on the condition that LRS investigate and pursue funding under the ComEd Beneficial Electrification plan to rapidly transition its fleet to electric trucks. In particular, LRS's application should only be approved on the condition that LRS be required to investigate potential opportunities for electrification of its fleet of trucks and report its proposed course of action to the City Council within a reasonable time not to exceed six months after final Commerce Commission approval of ComEd's Beneficial Electrification plan. Because LRS acknowledged that it can impose equipment requirements on all haulers that will use its proposed facility,[3] LRS should include in its report a proposed date by which to prohibit diesel trucks entirely from its facility.

[3] LRS stated that it was capable of requiring and enforcing specific equipment on and characteristics of all trucks that enter its proposed facility, specifically in the context of requiring particular auto-tarping equipment. Tr. at 710, l.12-20 (Day 4).

If LRS is to fulfill its promise to be at "the forefront of the transition," it should already be planning to be first in line for the forthcoming ComEd technical and financial assistance to electrify its fleet. Any approval of LRS's application should hold it to this commitment. Switching from diesel to electric trucks would decrease emissions of harmful pollutants like PM 2.5, which is important to reduce the facility's negative impact on the air quality, and thereby better protect the public health, safety, and welfare of West Chicago.

4. LRS Failed to Submit Sufficient Evidence to Establish that Employee Safety Will be Adequately Protected.

LRS has not demonstrated that its proposed facility will protect employee health, safety, and welfare. While LRS's application materials for Criterion 2 did address some training and operating practices, LRS did not include any information that specifically addressed the health and safety of the workers in the proposed facility. Criterion 2: Narrative, Figures, & Tables at 2-24–2-25. In a section of its application titled "Facility Staffing and Training," LRS gave descriptions of the duties two types of employees: facility managers and equipment operators. Criterion 2 pdf, section 2.4.2. For each of those employee categories, LRS provided an identical one-sentence statement about training requirements: "training will include operating requirements, safety and emergency response, record keeping and reporting, and identification of unacceptable wastes/load inspections. *Id.* at 2-25. LRS's application focuses far more on what the employees will do for LRS than how LRS will protect their employees.

During the public hearing, PODER member Steve De La Rosa testified on employee safety. Mr. De La Rosa based his testimony on his professional experiences as a manager in food processing facilities, as having worked with ozone filtration, as an employee volunteer fireman at M&M Mars, and as a mechanic. PODER Exhibit 7; Tr. at 1293-97 (Day 6). He completed special training on employee safety, including an OSHA 300 certification course. Tr.

at 1299, l:1-9 (Day 6). While Mr. De La Rosa was not tendered as an expert witness, he based his testimony on his significant and relevant professional experience and his review of LRS's application materials, including observing relevant portions of LRS's hearing presentation. Tr. at 1292-93 (Day 6). Mr. De La Rosa was subjected to adversarial cross-examination by LRS's attorney, including efforts to impeach the experiential and training bases of his testimony. While LRS's counsel did not probe the relevance of Mr. De La Rosa's experience to the issues in this proceeding, Mr. De La Rosa even correctly answered scientific questions of marginal relevance that LRS's counsel found it necessary to ask. Tr. at 1310, l:12-16 (Day 6).

Mr. De La Rosa expressed concern, in his professional opinion, that LRS had not sufficiently addressed in its application how it would protect its employees. He noted that LRS plans to have diesel garbage trucks running their engines indoors with the garage doors shut while they transfer their loads. Tr. at 1304-05, 1307-08 (Day 6). Mr. De La Rosa expressed concern, in his professional opinion, that LRS's proposed ventilation and filtration system. *Id.*; Criterion 2: Narrative, Figures, & Tables at 2-32 – 2-35. He also pointed out that the facility manager also carries responsibilities as a safety officer, an inherent conflict of interest that does not represent best practices for staffing. Criterion 2: Narrative, Figures, & Tables at 2-24 ("The facility manager is responsible for supervision of all activities at the site, including safety and emergency response coordination[.]"); Tr. at 1307-08 (Day 6). Finally, Mr. De La Rosa observed that the application lacked sufficient information about maintaining occupational safety logs. Tr. at 1308, l:5-10 (Day 6). The only reference to recordkeeping that was relevant to employees directly was "training records" and "personnel. Criterion 2: Narrative, Figures, & Tables at 2-35.

LRS has not met its burden to demonstrate that the health, safety, and welfare of its employees will be protected. Although LRS did submit some information in its application about employees, it failed to demonstrate that its employees will be protected from poor indoor air quality and inadequate safety practices, as section 39.2 requires under the rubric of "public health, safety and welfare." PODER asks the Hearing Officer to reject LRS's application for failure to meet the burden of Criterion 2 due to this deficiency among those described in other sections herein. In the alternative, if the Hearing Officer recommends approval of the application, it should be approved only on the condition that LRS submit more detailed plans about employee safety in the facility that address employee safety, indoor air quality, and related recordkeeping, and that such plans include the specific designation of a safety officer independent from the facility manager.

B. Excluding Considerations of Environmental Justice under Criterion 2 Erroneously Results in Improperly Ignoring the Cumulative Health and Welfare Impacts of LRS's Application that will be Borne Disproportionately on the Basis of Race, National Origin, and Income Level.

Environmental justice includes the principle, set forth in state statute, "that no segment of the population, regardless of race, national origin, age, or income, should bear disproportionately high or adverse effects of environmental pollution." 415 ILCS §155/5. The State Legislature has recognized explicitly the connection between environmental justice and public "health," declaring that such "environmental hazards can cause long-term health effects." *Id.* The State Legislature has recognized explicitly that "certain communities in the State may suffer disproportionately from environmental hazards related to facilities with permits approved by the State," *id.*, and local siting approvals under section 39.2 are such "order[s] issued under title X, governing 'permits,'" *see Town & Country Utilities, Inc.,* 225 Ill. 2d at 119. Environmental justice, therefore, provides an essential lens rooted in state statutory text, through which to

interpret the text of section 39.2 and to analyze whether LRS's proposed facility sufficient protects the public health, safety, and welfare of West Chicago under Criterion 2. PODER therefore objects to, and requests reversal of, the Hearing Officer's decision to exclude any evidence or testimony about "environmental justice." Tr. at 1167-68 (Day 6).

Rejecting any consideration of environmental justice in this proceeding contributes to an impermissibly narrow interpretation of the statutory phrase "public health, safety, and welfare," as described above in Section III.A. As a matter of statutory interpretation, the plain meaning of the phrase public health, safety, and welfare is broad and capacious. Various combinations of these words are used frequently throughout the broader Illinois Environmental Protection Act to describe rationales for statutory requirements and the terms are meant to be widely inclusive of different types of harm and impacts.[4] The phrase must be read to require a contextual analysis because assessing "public" "health" is necessarily focused on the particular "public" whose "health" will be impacted; "public health" is community-oriented, in contrast to traditional medicine focused on individual patient. The needs and sensitivities of communities are relevant to public health, safety, and welfare and must be included in any analysis of those terms. To speak of "environmental justice" in this context–which the Hearing Officer forbade–is simply to acknowledge that it is necessary to consider the needs and sensitivities of the particular community whose "welfare" and "health" will be impacted by the proposed facility to determine if the proposal will protect "public health, safety and welfare."

[4] Most relevantly, the Act specifically announces that air pollution—like that from diesel engine emissions—harms public health and welfare. 415 ILCS § 5/8 (finding air pollution constitutes a menace to public health and welfare). *See also* , 415 ILCS § 5/2 (finding hazardous wastes pose a threat to *public health, safety and welfare*); 415 ILCS 5/3.545 (finding water pollution is harmful to *public health, safety and welfare*); 415 ILCS § 5/9.4 (finding that air pollution from municipal waste incineration may constitute a threat to *public health, welfare* and the environment); 415 ILCS § 5/9.5 (finding *public health and welfare* may be endangered by the release of toxic contaminants into the air which are injurious to humans or the environment); 415 ILCS § 5/20 (finding excessive quantities of waste and improper methods of waste disposal is a hazard to *public health and safety*);415 ILCS § 5/25b-1 (finding that emissions of toxic chemicals are a chronic threat to *public health*)..

During the public hearing, both PODER and PWC attempted to introduce evidence and testimony about environmental justice analyses and disproportionate impacts on West Chicago. Tr. at 1167-68, 1170-72, 1274-75. The Hearing Officer chose to exclude all consideration of "environmental justice," stating "I'm not going to hear testimony about environmental justice, I'm not going to have testimony about if this were to impact on persons of whether it's color, income. None of that is relevant to 39.2." Tr. at 1171-72. Accordingly, the Hearing Officer held, "I'm going to sustain the objection that environmental justice is not relevant to [] [section] 39.2 . . . it is not relevant criteria testimony." Tr. at 1168, l:14-19. He also stated that "IEPA has not defined 'environmental justice,' except to say that all people are entitled to a safe environment." Tr. at 1170, l:19-21.

However, the *Legislature has* defined "environmental justice" in the Environmental Justice Act, most recently amended in 2017, which "requires that no segment of the population, regardless of race, national origin, age, or income,[ ] bear disproportionately high or adverse effects of environmental pollution." Environmental justice is defined in state statute as relevant to public health, 415 ILCS §155/5, and statutes on related topics must be read harmoniously. *See, e.g., In re Craig H.*, 2022 IL 126256, ¶ 26, *reh'g denied* (Nov. 28, 2022) ("We presume that statutes relating to the same subject are governed by a single spirit and policy and that they are intended to be consistent and harmonious. Therefore, even when statutes appear to conflict, they must be construed in harmony if reasonably possible").

Section. 39.2 must be read harmoniously with the Legislature's express dictate on environmental justice and, therefore, it is relevant to this proceeding that the "adverse effects of environmental pollution" arising from LRS's proposed operations will be borne disproportionately and inequitably by the less wealthy and less white community of West

Chicago. West Chicago is a predominantly minority community with a painful history of environmental harm. PODER Exhibit 1; *Public Comments of PODER - Immigrant Solidarity DuPage in Opposition to the Application for Local Siting Approval submitted by Lakeshore Recycling Systems, LLC,* at 4-6 (Feb. 17, 2023) (submitted via email, per City instructions). As such, the needs and sensitivities of the specific public of West Chicago will necessarily impact how future harms from LRS's proposed expansion will be borne by that community. Environmental justice demands that this context is incorporated when evaluating public health, safety, and welfare because the exclusion of these factors would lead, and indeed have led, to compounded and disproportionate harm to certain communities. PODER respectfully requests the Hearing Officer reconsider his decision and conclude that applying Criterion 2 must include an evaluation of environmental justice considerations. Applying that proper understanding of the law, LRS did not consider environmental justice in its application or its testimony and therefore has not met its burden under Criterion 2.

C. LRS Has Not Met Its Burden to Demonstrate Its Application is Consistent with the DuPage County SWMP and, Therefore, Fails Criteria 8.

Section 39.2(a)(viii): if the facility is to be located in a county where the county board has adopted a solid waste management plan consistent with the planning requirements of the Local Solid Waste Disposal Act or the Solid Waste Planning and Recycling Act, the facility is consistent with that plan; for purposes of this criterion (viii), the "solid waste management plan" means the plan that is in effect as of the date the application for siting approval is filed.

LRS has failed to show that its proposed facility is consistent with DuPage County's Solid Waste Management Plan (SWMP), and therefore has not provided sufficient evidence to meet the requirements of Criterion 8. The Illinois Solid Waste Planning and Recycling Act requires that certain counties in the state of Illinois adopt a 20-year plan for managing solid waste, to be updated every five years. 415 ILCS §15/4(a); 415 ILCS §15/5(e). DuPage County adopted its SWMP in 1991, with updates provided roughly every five years in 1996, 2001, 2007, 2012, and 2017.

Criterion 8: Narrative & Appendices, Appendix 8-H at 3. For the purposes of Criterion 8, these updates are included in the SWMP. *See* 415 ILCS § 39.2(a)(viii) ("'solid waste management plan' means the plan that is in effect as of the date the application for siting approval is filed"). The SWMP is interpreted according to general rules of statutory interpretation. *See Cnty. of Kankakee v. Illinois Pollution Control Bd.*, 396 Ill. App. 3d 1000, 1020–21(2009), *as corrected* (Jan. 26, 2010) (applying rules of statutory interpretation to county's Solid Waste Management Plan).

West Chicago is currently the home to the only other similar waste transfer station in DuPage County and approving a second waste transfer station in West Chicago would be inconsistent with DuPage County's SWMP and five-year updates. Read together and most naturally, the SWMP and updates explain that if any additional transfer stations are needed in the county, they would be needed in the southern portion of the county, not its northwest corner. DuPage County's original SWMP stated that "the size of DuPage County was shown to not necessarily require the provision of two waste disposal facilities for reasons of local transport effectiveness." *Criterion 8: Narrative & Appendices*, Appendix 8-A at 3-45. The original SWMP went on to conclude that "the placement of just one transfer facility in the county would appear to offer no significant disadvantage from a local waste transport standpoint." *Id.* Future five-year updates to the SWMP would contemplate additional transfer stations, but explicitly stated that an additional transfer station would be appropriate only in the southern portion of the county. For example, the 2012 update to the SWMP, in its discussion of a potential need for another transfer station, explained that "[f]uture conditions may necessitate a new facility in the southern portion of the County." *Criterion 8: Narrative & Appendices*, Appendix 8-G at 5. In addition, the 2007 update to the SWMP relied on an analysis that concluded that "the only areas that might benefit from a waste transfer station are located in the southern portion of the County." *Criterion 8:*

Narrative & Appendices, Appendix 8-F at 3. Reviewed together, the SWMP and its updates show the County's plan to site any new waste transfer station in the portion of the county with the least access to a waste transfer station, specifically the southern portion.

LRS erroneously claims that the 2017 update to the SWMP implicitly overrides the explicit preference in earlier updates for a waste transfer in the southern portion of the county by stating that the County will review applications for new waste transfer stations on a case-by-case basis. *See Criterion 8: Narrative & Appendices*, at 8-14 – 8-16. However, LRS misreads the text of the SWMP updates and ignores important explicit context. The 2017 update states that "[l]arge regions of the County are not optimally served due to the lengthy transportation routes which lead to increased costs and air emissions. To address this the County of DuPage will consider new or expanded facilities handling, treating and recycling waste on a case by case basis." *Criterion 8: Narrative & Appendices*, Appendix 8-H at 16. While the 2017 update does not state specifically which "large regions of the County" suffer from long transportation routes and would benefit from an additional waste transfer station, the previous updates did: the southern portion of the county. *See Criterion 8: Narrative & Appendices*, Appendix 8-F at 3 ("T]he only areas that might benefit from a waste transfer station are located in the southern portion of the County."); *Criterion 8: Narrative & Appendices*, Appendix 8-G at 5 ("Future conditions may necessitate a new facility in the southern portion of the County.") As such, DuPage County's 2017 update to the SWMP shows only that the County was consistently focused on areas in the County without a nearby existing transfer station. Previous updates identify such areas as the southern part of the County. It is inconsistent with that clear and express intent of the SWMP and its updates to now locate a second waste transfer stations in

West Chicago, the specific municipality in the County in which "lengthy transportation routes" to a transfer station is most obviously not an issue.

"The cardinal rule of statutory construction is to ascertain and give effect to the intent of the legislature (here, the County Board)." *Cnty. of Kankakee v. Illinois Pollution Control Bd.*, 396 Ill. App. 3d 1000, 1020, as corrected (Jan. 26, 2010). As an initial matter, that precedent forecloses LRS's suggested reliance on an ambiguous letter drafted by a county employee, who has neither authority nor knowledge to speak on what the County Board intended in 1991, 2007 or 2012. Applicant Ex. 11 at 28 (Slide 55, on page 30 of the PDF file); Tr. 785-789 (Day 4). In this case, the intent of DuPage County in its SWMP is clear from the text the County used: any additional waste transfer stations should be located so as best to serve the southern portions of DuPage County. As West Chicago is in the northern part of the county and already hosts the County's only such facility, the siting of a waste transfer station in West Chicago would be inconsistent with the SWMP, read with its updates. LRS cannot meet its burden to show its application is consistent with the SWMP under Criterion 8.

IV. Approval of LRS's Application is Foreclosed Because the Proceedings Were Not Fundamentally Fair to PODER or Other Citizens of West Chicago.

The proceedings were fundamentally unfair to PODER and other residents of West Chicago because the proceedings were not fully and equally accessible to Spanish speakers, and because PODER's evidence was improperly and unfairly impeached outside the context of cross-examination and based on extra-record material.

The City Council can only approve an application if the proceeding to review it was fundamentally fair. On any appeal of the City Council's siting decision, the Illinois Pollution Control Board will reverse approval if the municipality's review proceeding was not fundamentally fair. 415 ILCS §5/40.1. Fundamental fairness "incorporate[es] minimal standards

of procedural due process, including the opportunity to be heard, the right to cross-examine adverse witnesses, and impartial rulings on the evidence." *Fox Moraine, LLC v. United City of Yorkville*, 2011 Ill. App. 2d 100017, ¶ 60. No matter what the City Council's decision is on the merits of the nine criteria under section 39.2, the fundamental fairness of the proceedings must still be evaluated under section 40.1, and an approval will not stand on appeal if the approval process was fundamentally unfair.

At the outset of this discussion, PODER wishes to acknowledge and appreciate the ways in which the Hearing Officer accommodated its participation in this proceeding. PODER was allowed to register as a party at a time when it did not have legal counsel and to participate during the hearing as a party without counsel. Once PODER was able to secure the undersigned counsel for the purpose of assisting in their direct testimony, the Hearing Officer welcomed counsel to the proceeding, provided procedural information, and permitted counsel to participate the extent feasible under the circumstances.

Nonetheless, there are specific and crucial respects in which the proceedings were not conducted in accordance with fundamental fairness.

First, as explained by PODER's witness, the proceedings failed to provide access and opportunity for participation by Spanish speakers, even though 53% of West Chicago residents do not speak English at home. Tr. 1230-31; 1279-81 (Day 6); PODER Exhibit 1. PODER recognizes that the City maintained a Spanish translation of the website it created to post information about the LRS application process. That is a necessary step, and appreciated, but does not come close to ensuring Spanish-speaking citizens had a meaningful and equal opportunity to participate. While the website itself had an option to translate into Spanish, none of the application materials were translated into Spanish, making meaningful review for Spanish-

speakers impossible. Without the ability to actually review LRS's application, Spanish speakers were deprived any real chance at providing meaningful testimony or public comment, with the result of preventing a large portion of West Chicago from effectively participating.

Further, outreach to the Spanish-speaking community was insufficient. This was particularly true of the opaque process requiring members of the public to register weeks in advance if they wished to provide brief oral comments during the hearing. Indeed, when counsel for PODER communicated a request from individual West Chicagoans to be added to the list of public commenters for a subsequent hearing session, the Hearing Officer denied that request citing the necessity for strict compliance with the City's website's instructions. *See* Email Correspondence from D. Price to R. Weinstock, dated January 12, 2023, at 2:20 p.m. ("My records indicate that none of the persons listed below timely completed the registration for public comment—and accordingly, they will not be permitted to give oral comment.") Even if a West Chicagoan discovered the pre-registration requirement weeks in advance, there was no option to register or make comments in Spanish that would be translated for the audience.[5]

Finally, and most fundamentally unfairly, the public hearing was conducted entirely in English and there were no translation services available, despite the fact that 53% of West Chicagoans do not speak English at home, PODER Exhibit 1, and 43% of West Chicagoans over

[5] Relatedly, PODER lodges here its objection to the submission to the Hearing Officer made by counsel for LRS on February 18, 2023, over a month after LRS closed evidence on its case. Even if this applicant submission of what appear to be proposed exhibits could somehow be considered a "public comment," LRS's counsel's email to the Hearing Officer failed to comply with the express City website instructions as to how to submit public comments. Public Comment, The City of West Chicago, (Feb. 20, 2023, 4:16) https://westchicago.org/transfer-station/#participate ("Public comments may be submitted in writing by delivering to the West Chicago City Hall at 475 Main Street, or by email at aadm@westchicago.org.") Fundamental fairness cannot sustain allowing LRS to introduce information that can only be described as testimony or hearing exhibits a month after the hearing was closed, with no opportunity for cross-examination. The opportunity to cross-examine witnesses is a core requirement of a fundamentally fair hearing. See *Cnty. of Kankakee v. Illinois Pollution Control Bd.*, 396 Ill. App. 3d 1000, 1014, 955 N.E.2d 1, 14 (2009), as corrected (Jan. 26, 2010). Fundamental fairness certainly cannot sustain requiring strict compliance with website instructions of community members while allowing the applicant and its seasoned counsel to ignore the same source of City instructions.

the age of five speak Spanish at home and 21% are considered to have limited English proficiency, American Community Survey 2021 5-Year Estimates: Language Spoken at Home Tables at https://data.census.gov/table?q=West+Chicago+&t=Language+Spoken+at+Home&tid=ACSST5Y2021.S1601. One PODER witness, Ms. Julieta Alcantar-Garcia, was forced to testify in her second language, which is a direct and avoidable barrier to her right and ability to communicate her testimony as easily and effectively as witnesses whose first language was English or if she had been able to testify in Spanish. Tr. at 1231, l:2-6.

Throughout this process, Spanish speakers were denied equal access or an equally meaningful opportunity to contribute to the proceedings.

Second, direct testimony from PODER's witness, Ms. Alcantar-Garcia, was met with improper impeachment based on external material by the Hearing Officer. As discussed above, Ms. Alcantar-Garcia testified to explain how she used commercially-available air quality sensor to record levels of particulate matter outside the existing LRS and Groot facilities on Powis Road. Tr. at 1256. LRS's Counsel objected to Ms. Alcantar-Garcia's testimony regarding her perception of that data, without explanation, and the Hearing Officer sustained the objection. Tr. at 1273, l:3-5. When PODER's counsel asked why the testimony was excluded, the Hearing Officer said:

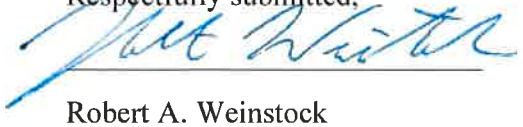
> *You may not ask why, but I'll tell you why. She's not a trained scientist. The app has not been recognized by any court in the land. I just did a search. None of this is scientifically relevant. I appreciate the effort. She did what she did. I can't stop it from coming in as comment or, in this case, testimony. But she is not qualified to talk about—she doesn't even know how the app works. She said so. You just laid that foundation. And she's not shown to be an expert in any of these things.*

Tr. at 1273, l:8-19. While the precise legal ramifications of this statement are somewhat unclear—there was no explanation for the reference to a "scientifically relevant" standard and the Hearing Officer did explicitly admit that he "c[ould]n't stop" the data itself from "coming in" as "testimony"—the practical ramifications of this episode in terms of fundamental fairness are

apparent. In this statement, the Hearing Officer explained that he sustained LRS's counsel's unexplained objection based on the Hearing Officer's independent research, conducted while Ms. Alcantar-Garcia was testifying, and without producing that independent research or any evidence of the credibility of those external sources. Indeed, after this, counsel for LRS chose not to cross-examine Ms. Alcantar-Garcia regarding her air quality data at all, leaving no opportunity for PODER to elicit testimony on re-direct examination regarding the relevance of Ms. Alcantar-Garcia's understanding of the air quality data she provided. PODER was entitled to "impartial rulings on the evidence," *Fox Moraine, LLC*, 2011 Ill. App. 2d 100017, ¶ 60; it was fundamentally unfair for the Hearing Officer to conduct and make evidentiary ruling based on independent outside research conducted during Ms. Alcantar-Garcia's direct testimony.

V. CONCLUSION

PODER respectfully asks the Hearing Officer recommend denial of LRS's application West Chicago because LRS failed to meet its burden under section 39.2 to provide "sufficient details" and "evidence to demonstrate compliance" with every one of the nine statutory criteria. From PODER's perspective, the deficiencies in LRS's application are particularly pernicious with respect to Criteria 2 and 8. For Criterion 2, LRS's refusal to address at all the local air quality harms that will indisputably flow from its proposed fleet of diesel trucks renders it impossible for LRS to demonstrate the proposed facility is "designed, located and proposed to be operated" such that "public health, safety and welfare will be protected." LRS failed to consider viable means to mitigate those harms, through truck electrification, and failed to provide sufficient detail regarding employee safety. Additionally, LRS's failure to apply the State Legislature's definition of "environmental justice" to the Criterion 2 analysis compounded these shortcomings. LRS fails on Criterion 8 because its proposal is inconsistent with the plain language of DuPage County's Solid Waste Management Plan and its updates contemplating the



diversification in county waste transfer locations—not a concentration of such facilities as LRS proposes. Finally, the proceedings were not fundamentally fair to Spanish-speaking citizens of West Chicago and unfairly deprived PODER of impartial rulings on its evidence.

PODER requests that LRS's application be denied for any and all of the reasons above enumerated. In order to reduce the inequitable harm stemming from a failure to protect public health, safety and welfare in the event that the Hearing Officer recommends approval nonetheless, such approval should include conditions requiring that LRS (1) ensure that all truck drivers using the proposed facility comply with the driving routest through West Chicago as specified in the application; (2) review and propose utilization of ComEd's Beneficial Electrification plan for its diesel truck fleet; and (3) submit updated plans for employee safety at the facility as described above. However, these conditions would not fully mitigate the long-term inequality and health and welfare harms to which West Chicagoans will be subjected if LRS's application is approved, and PODER thus asks the Hearing Officer to recommend denial.

At bottom, LRS seeks approval even though it cannot demonstrate that its proposal will not amount to sacrificing the health and welfare of the more largely Latinx, more foreign-born, and lower-income community of West Chicago for benefits spread among the broader area, which is far wealthier, whiter, and less burdened by existing environmental threats. Because LRS has failed to carry its burden under the statute, neither the Hearing Officer nor the City Council should endorse that perpetuation of environmental injustice and inequity based on race, national origin, and income.

RESOLUTION NO. 19-R-0016

A RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A HOST COMMUNITY BENEFIT AGREEMENT BETWEEN THE CITY OF WEST CHICAGO AND LAKESHORE RECYCLING SYSTEMS, LLC FOR A SOLID WASTE TRANSFER FACILITY

BE IT RESOLVED by the City Council of the City of West Chicago, in regular session assembled, that Mayor is hereby authorized to execute a Host Community Benefit Agreement between the City of West Chicago and Lakeshore Recycling Systems, LLC for a Solid Waste Transfer Facility in substantially the form attached hereto and incorporated herein as Exhibit "A".

APPROVED this 1st day of April, 2019

AYES: 11

NAYES: 2

ABSTAIN: _____

ABSENT: _____

PRESENT 1

Mayor Ruben Pineda

ATTEST:

Nancy M. Smith

City Clerk Nancy M. Smith

HOST COMMUNITY BENEFIT AGREEMENT BETWEEN THE CITY OF WEST CHICAGO, DUPAGE COUNTY, ILLINOIS, AND LAKESHORE RECYCLING SYSTEMS, LLC FOR A SOLID WASTE TRANSFER FACILITY

This HOST BENEFIT COMMUNITY AGREEMENT ("Agreement") is made as of the 1st day of April, 2019, between the CITY OF WEST CHICAGO, DuPage County, Illinois ("City") and LAKESHORE RECYCLING SYSTEMS, LLC ("Company").

RECITALS

WHEREAS, the Company currently operates a solid waste management facility, which receives, sorts/ separates, recycles and transfers Construction or Demolition Debris (hereinafter referred to as the C&D Recycling Facility) on the premises legally described in Exhibit A attached hereto and consisting of approximately 27.81 acres (hereinafter referred to as the "Subject Property"); and

WHEREAS, the Company plans to file with the City a request for site location approval for the construction and operation of a new Transfer Facility with sufficient capacity to receive and transfer to landfills an annual average of 1,500 tons per day of non-hazardous Municipal Waste and Hydro Excavation Waste (as those terms are defined below) with ancillary truck parking and storage and maintenance facility combined ("Transfer Facility"); and

WHEREAS, the Company desires to construct the Transfer Facility on the Subject Property and operate the Transfer Facility in conjunction with the C&D Recycling Facility; and

WHEREAS, the City is authorized by State of Illinois law, pursuant to Section 39.2 of the Illinois Environmental Protection Act (415 ILCS 5/39.2) to, among other things, receive, hold hearings, and decide an application for the site location of a pollution control facility proposed to be located in the City of West Chicago; and

WHEREAS, the City Council of the City of West Chicago ("City Council") adopted Pollution Control Facility Site Approval Procedures consistent with Section 39.2 of the Illinois Environmental Protection Act, for the purpose of preparing a comprehensive approach to the site location review process of a solid waste pollution control facility in the City of West Chicago; and

WHEREAS, Section 39.2 of the Illinois Environmental Protection Act acknowledges a local government's power to negotiate and enter into a host community benefit agreement with an applicant for site location of a pollution control facility; and

WHEREAS, the Company desires to provide certain environmental protection and compensation to the City with respect to the Transfer Facility, if the Transfer Facility obtains all required approvals and commences operation; and

WHEREAS, the City is desirous of obtaining such environmental protections and compensation, provided that the City shall have no obligation to grant site location approval of the Transfer Facility unless and until, through the local site location review process, it finds that the Transfer Facility meets or exceeds all criteria required by 415 ILCS 5/39.2. Regardless of whether site location approval is granted, this Agreement survives the local site location review process; and

WHEREAS, the City has not consented to, concurred in or objected to the proposed plans of the Company to develop the Transfer Facility, and nothing in this Agreement shall be deemed by the Company, the City, other public agencies, or the public to indicate that the City has heretofore adopted any position on the potential development of the Transfer Facility; and

WHEREAS, if the City grants site location approval of the Transfer Facility, and if thereafter the Illinois Environmental Protection Agency issues permits for the development and operation of the Transfer Facility, the Company is willing to pay a host community benefit fee, as hereinafter set forth, to the City to assist the City in meeting the costs associated with the Transfer Facility and for other general revenue needs of the City as the City may deem appropriate.

NOW, THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth, the City and the Company agree as follows:

ARTICLE 1
DEFINITIONS AND TERM OF AGREEMENT

Section 1.1 Definitions

"Act" as used in these definitions and this Agreement, shall mean the Illinois Environmental Protection Act, as amended from time to time (415 ILCS 5/1, et seq.).

"Construction or Demolition Debris" whether or not capitalized, means "clean construction or demolition debris" as defined by Section 5/3.160(b) of the Act (415 ILCS 5/3.160(b)), or "general construction or demolition debris," as defined by Section 5/3.160(a) of the Act (415 ILCS 5/3.160(a)).

"Food Scrap" whether or not capitalized and used in any of its grammatical forms, means "food scrap" as defined in Section 5/3.197 of the Act (415 ILCS 5/3.197).

"Hydro Excavation Wastes" means solid/liquid waste such as hydro/vacuum excavation muds, underground excavation material, drilling muds, and other similar materials.

"IAC" as used in these definitions and this Agreement, shall mean the Illinois Administrative Code.

"IEPA" means the Illinois Environmental Protection Agency.

"IPCB" means the Illinois Pollution Control Board.

"Landscape Waste" whether or not capitalized and in any of its grammatical forms, means "landscape waste" as defined by Section 5/3.270 of the Act.

"Municipal Waste" whether or not capitalized and used in any of its grammatical forms, means "municipal solid waste", as defined by Section 5/3.290 of the Act (415 ILCS 5/3.290), except that such waste does not include Construction or Demolition Debris, Recyclables, Unacceptable Waste, or Landscape Waste.

"Recyclables" whether or not capitalized and used in any of its grammatical forms, means any material, which would otherwise be disposed of or discarded, which is separated from Municipal Waste or Construction or Demolition Debris at the source of generation so as to render it useable in a process, or alone, such that it can be returned to the economic mainstream in the form of raw materials or products. Examples of recyclables are newspaper, glass bottles, high density, polyethylene containers, aluminum food and beverage containers, chipboard, and corrugated containers. Recyclables do not include any materials removed or separated from, or containing Unacceptable Wastes.

"Regular Business Hours" of the Transfer Facility shall mean 4:00 a.m. to 12:00 a.m. on weekdays and 4:00 a.m. to 12:00 p.m. on Saturdays, with no operation on Sundays or the six major Federal holidays (New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas), provided that on the Saturday following any Federal holiday Regular Business Hours may be extended by the Company to 12:00 a.m. The Regular Business Hours for accepting Municipal and Hydro Excavation Waste may be extended but only upon the prior approval of the City, such approval being in writing.

"Solid Waste" whether or not capitalized, means Municipal Waste, Landscape Waste, Food Scrap, , and Construction or Demolition Debris, including those materials in these classifications that have received a Beneficial Use Determination (BUD) designation by the IEPA, as those terms are defined in this Section.

"Transfer Facility" whether or not capitalized, means, "Transfer Station" as defined by 5/3.83 of the Act (415 ILCS 5/3.83), including the property on which the Transfer Station is located, and specifically references the Transfer Facility the Company desires to construct and operate located on approximately 27.81 acres at 1655 Powis Road, Illinois, permanent parcel #01-32-101-004 and #01-32-200-001, at the property described on Exhibit A.

"Unacceptable Waste" whether or not capitalized and used in any of its grammatical forms, means (a) "hazardous waste" as defined by Section 5/3.15 of the Act (415 ILCS 5/3.15) or by 35 IAC 721.03; (b) "industrial process waste" as defined by Section 5/3.235 of the Act (415 ILCS 5/3.235), except allowable special waste and such industrial process waste which poses no present or potential threat to human health or the environment and which has no inherent properties which makes its disposal in a landfill difficult to manage by normal means, and which has been specifically approved by the IEPA; (c) "pollution control waste" as defined by Section 5/3.335 of the Act (415 ILCS 5/3.335); (d) "sludge" as defined by Section 5/3.465 of the Act (415 ILCS 5/3.465); (e) "potentially infectious medical waste" as defined by Section 5/3.360 of the Act; (f)

"special waste" as defined by Section 5/3.475 of the Act; (g) "polychlorinated byphenyls" as defined in the Toxic Substances Control Act, 15 U.S.C. Section 2601-2692, or regulations promulgated thereunder; (h) source, special or byproduct nuclear materials, radioactive waste, high-level or low-level radioactive waste, or transuranic waste as defined in the Atomic Energy Act, 42 U.S.C. Sections 2014, et seq., or regulations promulgated thereunder; or (i) "asbestos" as defined in 40 CFR 763.83, except that Unacceptable Waste does not include Hydro Excavation Waste.

Section 1.2 Term

This Agreement commences on the date executed and continues in force and effect until the Transfer Facility ceases to operate and is no longer permitted by the IEPA to accept Muncipal Waste and/or Hydro Excavation Waste. In addition, the City may terminate this Agreement if the Company is in default of this Agreement as provided in Section 4.2. The terms of this Agreement that are specifically extended beyond termination (i.e., as provided in Sections 2.1, 2.2, 2.3, 4.1, 4.6, 4.7, 4.8, 4.9, and 5.2), survive this term provision. The Company, in turn, may, at its sole discretion, terminate this Agreement if it determines that it is no longer economically desirable to operate the Transfer Facility and it rescinds its IEPA permit to operate. The Company agrees that, should this Agreement be terminated, the Company will immediately remove all Muncipal Waste and/or Hydro Excavation Waste from the Transfer Facility and stop its operations and receipt and acceptance of Muncipal Waste and/or Hydro Excavation Waste.

ARTICLE 2
ENVIRONMENTAL PROTECTIONS

Section 2.1 Compliance with Laws

The Company shall comply at all times, in connection with the development and operation of the Transfer Facility, with: all laws, ordinances, and final and non-appealable conditions of this site location (should it be approved by the City); conditions and requirements of any permit that is issued for development or operation of the Transfer Facility; modified or amended rules and regulations and ordinances of any Federal, State or local governmental agency or authority relating to the development, operation, monitoring, remediation, or closure of the Transfer Facility; and, this Agreement. In addition, should the Company obtain approval from the City, pursuant to Section 39.2 of the Act, but contest on appeal, one or more conditions, if any, placed on such approval, the Company agrees that, with respect to such contested condition(s), it will not commence permitting, development, construction or operation of the Transfer Facility, until a final decision has been entered by the IPCB . With respect to the closing of the Transfer Facility, the Company agrees to comply with any government ordinance, rule, law or directive as to post-closure requirements and pay the entire costs associated therewith. This Section 2.1 survives the termination of this Agreement.

Section 2.2 Waste Acceptability

The Company shall only allow Solid Waste and/or Hydro Excavation Waste to be intentionally accepted at, transported to, stored at, or otherwise present at the Transfer Facility. All

Municipal Waste and/or Hydro Excavation Waste, except when being transported to or from the Transfer Facility, must be kept inside (i.e., within a fully enclosed area of) the Transfer Facility. Unacceptable Waste accepted at, transported to, stored at, or otherwise present at, on, or in the Transfer Facility shall be properly removed within 24 hours. Willful violation of this prohibition of Unacceptable Waste is a material breach of this Agreement and enforceable by injunction, or any other legal theory, and the enforceability of this provision survives the termination of this Agreement.

The Company agrees that it shall not receive at the Transfer Facility more than 1,500 tons of Municipal Waste and/or Hydro Excavation Waste per day (calculated on a rolling twelve (12) month average, based on 5.5 days per week), except with the prior written approval of the City. The parties may at any time by mutual agreement modify this provision, and such modification shall not be considered an event which triggers the requirement of local siting approval.

Section 2.3 Defense and Indemnification and Insurance

The Company covenants and agrees at Company's sole cost and expense to defend, indemnify and hold harmless the City, individual members of the City Council, and any and all employees, agents, officers, or representatives of the City (collectively "City Affiliates"), from and against all claims, suits, actions, administrative enforcement proceedings, losses, damages of all kinds, costs, expenses, fines and penalties, attorneys' fees and expenses of litigation, of any nature whatsoever, relating in any way directly or indirectly to the Transfer Facility where the same are caused by the Company's negligence, willful misconduct or breach of this Agreement. This includes, but is not limited to, any condition or occurrence, or any release, discharge or emission at, onto, above, under, through or from the Transfer Facility; or the Company's execution, performance, or non-performance of this Agreement or of any conditions placed on siting (should the facility be approved or the operations of the Company conducted at the Transfer Facility). This includes, but is not limited to, any claims of injury to any person (including, but not limited to death) or property for violation of or non-compliance with any law, ordinance, rule or regulation (including without limitation any environmental, health, antitrust, civil rights, employment or trade law, or statutory or common law obligation or liability). The Company shall with the advice and consent of the City (which consent shall not be unreasonably withheld, conditioned or delayed)assume the defense of all suits, administrative proceedings and disputes of any description with all persons, entities, political subdivisions or government agencies arising out of the matters to be indemnified under this Agreement. In the event of a written offer to settle such matter on monetary terms only, and the Company wishes to accept and pay the same, but the City does not agree to suchsettlement, the Company shall pay the amount to the City and the City shall assume the further defense of the matter, and Company shall have no further liability for defense or indemnification, provided however, that the foregoing shall not apply to any non-monetary terms of an offer, such as where consent to an injunction is stated as a term in the offer to settle.In the event that the City or any of the City Affiliates is/are named as a defendant(s) in any lawsuit arising out of the matters to be indemnified under this Agreement, the Company shall have the right to choose the attorney(s) who represent(s) them in said lawsuit, and the reasonable costs, expenses and fees associated with said attorney(s) in relation to said lawsuit shall be paid by the Company pursuant to the indemnification provisions herein. City shall have the right to reject said choice in the event of actual conflict of interest or if the attorney has a family relationship to any City employee, officer,

or official,.and in any event, the City shall have the right to participate at its own expense in any proceeding, claim, suit or action. Company shall pay, promptly upon entry, any nonappealable order, judgment or other final resolution of any claim or dispute arising out of the matters to be indemnified under this Agreement and shall pay promptly when due any fines, penalties or agreed settlements arising out of the matters to be indemnified under this Agreement. In the event that such payment is not made, the City or any City Affiliate, at their sole discretion, may proceed to file suit against the Company to compel such payment. The City Affiliates shall give reasonable notice of the service of any suit upon them to the Company, and shall give reasonable notice of any claim, action, administrative proceeding, loss or other damages. In the event of a claim or suit against Company arising out of the sole negligence, willful misconduct or breach of this Agreement by the City or any City Affiliate, City shall be obligated to defend and indemnify Company on the terms set forth in this section.. The City shall be responsible on the same terms as the Company's responsibility is based for indemnification of any injury or damage to the extent the same results from the sole negligence, willful misconduct or breach of this Agreement by the City or any City Affiliate. In addition, nothing in this Agreement shall be construed as a waiver of any common law or statutory immunity the City may have to such liability. This Section 2.3 survives termination of this Agreement.

Nothing in this Section shall be construed as a waiver of any rights either party may have with regard to contesting its alleged obligation for defense and indemnification by way of Declaratory Judgment or otherwise.

Further, any defense and indemnity provided herein is independent of and shall not be limited by reason of the enumeration of any insurance coverage which the Company has obtained. In that regard, Company shall purchase and maintain the following types of insurance with the following aggregate coverage limits: (a) General Liability - $5,000,000; (b) Automobile Liability - $5,000,000; and (c) Workers Compensation - $3,000,000. Such insurance shall include the City of West Chicago as an additional insured, except for workers' compensation insurance, on a non-contributory primary basis and, if such coverage is commercially available, shall include "Occurrence" basis wording or provide for other substantially similar coverage that protects the City against the equivalent risks issued by a company or companies qualified to do business in the State of Illinois . A Certificate of Liability Insurance in substantially the form of the sample Certificate of Liability Insurance attached as Exhibit C shall be filed with the City, and this Certificate of Liability Insurance and the insurance policies required by this Section shall contain a provision that coverage afforded under the policies will not be canceled or allowed to expire until at least thirty (30) days prior written notice (ten (10) days in the case of nonpayment of premium) has been given to the City. Company assures the City that a valid Certificate of Insurance will be in the City's possession at all times.

ARTICLE 3
HOST FEES

Section 3.1 Purpose

In consideration of the additional fees and costs to be incurred by the City, should the West Chicago City Council approve the Transfer Facility site location and should the Company build the Transfer Facility and begin accepting Municipal Waste and/or Hydro Excavation Waste, the Company agrees to pay the City the following fees.

Section 3.2 Quantity Based Fees

The Company shall pay to the City a base fee as provided below for each ton of Municipal Waste and/or Hydro Excavation Waste, except landscape waste and recyclables, received at the Transfer Facility (whether received in the same or separate vehicles) from the first date Muncipal Waste and/or Hydro Excavation Waste is received through the termination of this Agreement. In the event the Transfer Facility accepts Food Scraps either in dedicated truckloads or commingled with Landscape Waste, the Company agrees to pay the per ton fee provided for in this section on the Food Scraps accepted at the Transfer Facility. The parties agree to work together to track and implement the mechanisms needed to assure the City payment on Food Scraps. The parties agree that the initial concept for implementing such a program may but need not necessarily be as the following language which is included herein for illustrative purposes only: "in order to determine the amount of Food Scrap accepted at the Transfer Facility that has been commingled with Landscape Waste from residential sources, the Company shall annually weigh and track the amount of Food Scrap it receives during the months of January, February and March when Food Scrap is not commingled with Landscape Waste. The Company shall determine a monthly average based on these three months and shall pay the City the per-ton fee on Food Scraps for those three months and for the remaining nine months of the calendar year based on the monthly average computed for that calendar year. If the Company receives Food Scraps from non-residential sources, for example grocery stores, restaurants and food processing firms, the Company shall pay the City the per ton fee on those Food Scraps based on the actual weights received. The Company shall provide the City with the data and calculations used to compute the monthly average by April 10 of each year and the City shall either accept or reject the monthly average proposed by the Company by April 20 of each year." Beginning on January 1, 2021, the annual increase provision in Section 3.3 will be used to determine the per-ton fee.

Per Ton Fee

The Company shall pay the City a Host Benefit Fee equal to two dollars and forty-five cents ($2.45) per ton of Muncipal Waste and/or Hydro Excavation Waste received at the Transfer Facility. Per-ton fees shall be payable only if, as and when waste is received and accepted at the Transfer Facility.

If the Company is awarded the City contract for curbside and/or alley collection and disposal of refuse, recyclable, and yard waste from all present and future single-family residences and multiple family dwellings of four (4) or less residential dwelling units in the City, the Company shall pay the City a separate Collection Fee of $0.40 for each ton of Municipal Waste received at the Transfer Facility. The Collection shall be paid from the first date Municipal Waste is received at the Transfer Facility pursuant to the City contract through the terminaton of the City contract.

Section 3.3: Annual Increase

Beginning as of January 1, 2021, and as of each January 1 thereafter, the per-ton fees described in Section 3.2 above will be adjusted from the per-ton fees of the previous year by the percentage change during the previous year in the Revised Consumer Price Index for All Urban Consumers (CPI-U) published by the United States Department of Labor – Statistics for the Chicago-Gary-Kenosha area, provided, however, that at no time shall the increase be less than 0% or greater than 4%. If the Consumer Price Index for All Urban Consumers shall cease to be published in the time frame described above, the City and Company shall designate a comparable time frame or index, which shall then be used for determining the annual rate of adjustment.

Section 3.4 Identification and Weight of Receipts

The Company shall weigh all receipts of Solid Waste and/or Hydro Excavation Waste on a certified scale, which is inspected at least once each calendar year by the Company, and a copy of said inspection shall be provided to the City upon request. In addition, the Company shall identify for the City, in writing, a listing of all receipts categorized by date, type of Solid Waste and/or Hydro Excavation Waste and other material in each receipt (if not Solid Waste and/or Hydro Excavation Waste), and weight of Solid Waste and/or Hydro Excavation Waste (or other material if not Solid Waste and/or Hydro Excavation Waste) in each receipt, so that the City can determine by its review of these records the number of incoming vehicles, the type of vehicle and identification of the hauling entity or person (in the case of an individual rather than business hauler), the load weight and total weight of each vehicle, and the type of waste or material contained on each vehicle received at the Transfer Facility each calendar day.

Further, the Company shall keep records of outgoing Solid Waste and/or Hydro Excavation Waste, such that the City can determine by its review of these records the number of outbound vehicles, the type of vehicle, the destination of each vehicle, and the type of waste contained on each vehicle leaving the Transfer Facility each calendar day. In addition, should the City request records concerning the load weight and total weight of each outbound vehicle, the Company agrees to provide that information, from weights measured at the Transfer Facility or at the destination of the vehicles leaving the Transfer Facility, from the time the Company receives the City's request on moving forward basis for any time period(s) designated by the City.

Section 3.5: Auditing

The Company shall keep complete and accurate books and records relating to the determination of the fees described in Article 3, in an auditable form, including those records described in Section 3.4. No more than once per year, the Company shall permit the City and its designated representatives access to such books and records (paper and electronic version) for inspection and copying. In the event that such inspection reveals any underpayment(s) of the fees described in Sections 3.2 and 3.3, the Company shall promptly pay the City the amount(s) of such underpayment(s), and if such underpayment is in excess of $1,500.00, shall reimburse the City for its reasonable costs and expenses of such inspection and, if necessary, collection, including any professional and technical fees (including attorneys' fees) in connection therewith. If any inspection reveals an underpayment in excess of $1,500, the City may inspect again within six months. In the event that such inspection reveals any overpayment(s) of the subject fees, the

Company may credit the amount of such overpayment(s) against the payments of the subject fees in subsequent quarters. The City shall give the Company at least seven (7) days notice before incurring such costs and expenses but nothing in this Agreement or this Section shall limit the City's right and ability to review, inspect, copy and audit the Company's books and records as set forth in this Section.

Section 3.6: Payment Schedule for Fees

The fees described in this Article shall be paid on a quarterly basis. The quarterly payments shall be calculated on a calendar-year basis; that is, they shall be calculated for the three-month periods ending on the last day of March, June, September and December of each year during the term of this Agreement and any extension thereof. The payment shall be made not later than forty-five (45) days after the last day of the preceding quarter and shall be limited to the Solid Waste transferred during the quarter to which it applies. Past due payments of the fees shall be subject to a late charge of one-and-one-half percent (1½ %) per month or fraction of a month for which the payment is late. Payment of such interest shall not otherwise excuse or cure any default by the Company under this Agreement.

Section 3.7: Inspection and Enforcement

If the Company is charged by the City with having violated any City enforceable law, ordinance, rule or regulation, or any of the Company's permit or site location approval conditions, the Company will be given a corrective notice along with a deadline to comply. If the Company fails to come into compliance and correct the violation, the City will proceed to issue a citation that requires the Company to appear at an Administration Adjudication hearing or the City will proceed through the court process. If the Company is found by a court or through the Administration Adjudication process to be guilty of such violation, or if the Company admits guilt or pleads no contest to such violation, the Company shall reimburse the City for all reasonable fees and costs associated with the City's investigation and prosecution of such violation, including, but not limited to, attorneys' fees. Additionally, Company agrees to pay upon a finding or admission of guilt or a plea of no contest to the City $500.00 per day as liquidated damages, for each day after notice of such violation was received until the violation is cured, for the Company's violation of the provisions of this Agreement which require compliance with any City enforceable law, ordinance, rule or regulation, or any of the Company's permit or site location approval conditions or requirements, or siting conditions (such as conditions concerning tarping or untarping of vehicles, pick-up or clean-up of litter, noise control, odor control, vector control, dust control, or random load inspections),. The $500.00 liquidated damages provision shall increase annually, pursuant to the manner and method set forth in Section 3.3 of this Agreement.

ARTICLE 4
MISCELLANEOUS

Section 4.1: Assignment

The Company shall not assign or attempt to sublet this Agreement or any interest in this Agreement or any right or privilege appurtenant to this Agreement without first obtaining the City's written consent, which consent shall not be unreasonably withheld, conditioned or delayed: provided, however, that the Company may assign or transfer its interest in this Agreement to an affiliate of the Company without consent in the event that the affiliate is more than 50% owned by the Company. In addition, no transfer of any ownership or other interest in the Transfer Facility may be made without the prior written approval of the City, which approval shall not be unreasonably withheld, conditioned or delayed. The right to seek assignment or approval may occur only if all payments to the City by the Company have been made and if the Company is not otherwise in default in connection with obligations under this Agreement. If the Company requests the City's consent to an assignment of this Agreement or approval of a transfer of ownership or other interest in the Transfer Facility, the Company shall submit written notice containing at least the following information, plus any information required by the City's ordinance pertaining to such assignment request, should such an ordinance be in existence at the time of the request:

(a) The name of the proposed assignee;

(b) The terms of the proposed assignment except that Company is not required to disclose consideration, price or payment terms

(c) The nature of business of the proposed assignee and the proposed use by the assignee; and

(d) Information relating to the financial responsibility and general reputation in the solid waste field of the proposed assignee that City may require.

In the event of the City's agreement to assignment, the proposed assignee shall agree to the following:

(e) To assume all obligations and duties of the Company under this Agreement and any conditions placed on the site location approval by the City;

(f) To be bound as an original party to this Agreement; and

(g) To make any and all payments due under this Agreement and/or assignment to City directly at its offices, as such payments become due; and

Subject to the provisions of this Agreement limiting the right to assign this Agreement shall be binding on and inure to the benefit of the parties and their heirs and successors. Furthermore, in the event of an approved assignment or transfer, the Company shall remain primarily responsible for all obligations and liabilities of this Agreement which accrue prior to the execution of any approved assignment or transfer. Transfer of a fifty-percent (50%) or greater interest in the Company to another owner or owners shall be deemed an unpermitted transfer under this Section, unless made with the approval of the City. The City may require an additional written commitment from the assignee or transferee to assume and comply with the duties and obligations of this

Agreement. The City shall not unreasonably withhold, condition or delay approval of a proposed assignment or transfer. This Section 4.1 survives termination of this Agreement.

Section 4.2: Default

The occurrence of any one or more of the following constitutes a "default" by the Company under this Agreement. Should the Company be in default of this Agreement, the City may, at its sole discretion, terminate this Agreement.

(a) The failure by the Company to pay any fee due and payable under this Agreement; if the Company does not cure such failures within thirty (30) days after notice thereof from the City to the Company;

(b) The failure by the Company to observe or perform in any material respect pursuant to Section 2.1 of this Agreement or any other provision of this Agreement, if the Company does not cure such failure within thirty (30) days after notice thereof from the City to the Company. In the event such failures cannot reasonably be cured within thirty (30) days, the Company must, before the thirtieth day: notify the City that it cannot complete its cure, present the City with a plan and timeline (which meets with the reasonable approval of the City) for completing the cure and implementing a plan to prevent the same or a similar failure from occurring again, and diligently continue to cure such failures during the initial thirty (30) day cure time period and any additional period beyond the thirty (30) days approved by the City. However, to the extent the Company's default under this Agreement concerns its failure to comply with Section 2.2 (Waste Acceptability), the more restrictive provision (this or Section 2.2) shall control in determining whether the Company is in default of this Agreement;

(c) The Company admits in writing its inability to pay its debts as they mature and makes an assignment for the benefit of creditors or applies for or consents to the appointment of a trustee or receiver for the Company or a major part of its property;

(d) A trustee or receiver is appointed for the Company or for a major part of its property, and it is not discharged within ninety (90) days after such appointment; or

(e) Bankruptcy, reorganization arrangement, insolvency or liquidation proceedings or other proceedings for relief under any bankruptcy law, or similar law, for the relief of debtors are instituted by or against the Company and, if instituted against the Company, are allowed against it or are not dismissed within 180 days after such institution.

Section 4.3: Notice

Any notice to be given hereunder by either party to the other shall be in writing and be sent by personal delivery, by overnight delivery service or by registered or certified mail, postage

prepaid, return receipt requested, and shall be deemed communicated when delivered or three (3) business days from the date of mailing, whichever is earlier. Notices shall be addressed as set forth below, but each party may change its address by written notice to the other in accordance with this Section:

To the City, notice shall be sent to both the City and the City's Attorney at the following addresses:

TO THE CITY AT:

Attention: Michael Guttman, City Administrator
Address: West Chicago City Hall
475 Main Street
West Chicago, Illinois 60185

WITH COPY TO THE CITY'S ATTORNEYS AT:

Attention: Dennis G. Walsh, Esq.
Address: Klein, Thorpe and Jenkins, Ltd.
20 N. Wacker Drive - Suite 1660
Chicago, Illinois 60606-2903

To the Company, notice shall be sent to the Company at the following addresses:

TO THE COMPANY AT:

Attention: Alan Handley
Address: Lakeshore Recycling Systems, LLC
6135 Oakton Street
Morton Grove, Illinois 60053

Section 4.4: Agreement Controls

This Agreement constitutes the entire understanding of the parties hereto relating to the subject matter contained herein, except that it does not, in any way, constitute the City's agreement or obligate the City to approve the Company's site location application. If such application is filed with the City and if such application is approved by the City, this Agreement is to be read as an additional obligation and not as superseding the Company's obligation to comply with any conditions of the City's site location approval and any laws, ordinances, rules or regulations applicable to the site or Transfer Facility.

Section 4.5: Captions

Captions of the Articles, Sections and paragraphs of this Agreement are for convenience or reference only, and the words contained therein shall in no way be held to explain, modify, amplify or aid in the interpretation, construction or meaning of the provisions of this Agreement.

Section 4.6: Enforcement of Siting Conditions

The Company agrees that, should the Transfer Facility receive site location approval pursuant to Section 39.2 of the Act from the City of West Chicago, that any final and non-appealable conditions imposed on the Transfer Facility or Company as part of such approval are enforceable by the City against the Company, in the same manner in which the City's ordinances or this Agreement are enforceable, or pursuant to a City ordinance, should one be in effect at the time of the enforcement. Section 4.6 survives the termination of this Agreement.

Section 4.7: Governing Law and Forum for Litigation

This Agreement shall be governed by and construed in accordance with the laws of the State of Illinois. Any litigation filed by the Company or the City against the other party and involving this Agreement shall be filed in the Circuit Court of DuPage County, Illinois. Section 4.7 survives the termination of this Agreement.

Section 4.8: Severability

The provisions of this Agreement shall be deemed to be severable, and the invalidity or unenforceability of any provision shall not affect the validity and enforceability of the other provisions hereof. Section 4.8 survives the termination of this Agreement.

Section 4.9: Binding Effect

This Agreement shall inure to the benefit of and be binding upon the respective parties hereto, their successors and assigns. However, nothing in this Section should be construed to allow the Company to assign its interest in this Agreement unless done pursuant to Section 4.1 of this Agreement. Section 4.9 survives the termination of this Agreement.

Section 4.10: Force Majeure

Neither party hereto shall be deemed to be in default or to have breached any provision of this Agreement as a result of any delay, failure in performance or interruption of services resulting directly or indirectly from acts of God, acts of civil or military authority, civil disturbance, or war or labor strikes or interruptions, which are beyond the control of such non-performing party.

Section 4.11: No Third-Party Beneficiaries

Nothing in this Agreement, whether expressed or implied, is intended to confer any rights or remedies under or by reason of this Agreement on any person other than the parties and their respective successors and assigns, nor shall any provision give any third persons any right or rights of action against any party to this Agreement.

Section 4.12: Legal and Related Expenses

The Company shall pay the City within 45 days after receiving the appropriate documentation, the reasonable and necessary costs incurred by the City in the pre-filing review process, including, but not limited to, staff review time, engineering and other consultant fees and expenses and attorneys' fees and expenses. The Company shall reimburse the City, within 45 days after receiving the appropriate documentation, for such pre-filing review costs. The City agrees that the pre-filling review costs to be reimbursed by the Company will not exceed $35,000 without prior written agreement from the Company.

The Company agrees to reimburse the City, within 45 days after receiving the appropriate documentation, for the reasonable and necessary fees and costs (including, but not limited to consulting and attorneys' fees and costs and City staff costs) incurred in connection with the drafting and negotiation of this Agreement. The City agrees that the host agreement drafting and negotiation costs to be reimbursed by the Company will not exceed $15,000 without prior written agreement from the Company.

Section 4.13: Records

In addition to those records described in Sections 3.4 and 3.5, above, the Company shall provide to the City, upon the City's request, free of charge and in a timely manner, copies of all of the following documents in any manner connected with the Transfer Facility:

1. Documents submitted or received by the Company, its representatives, agents, attorneys, employees, or consultants to or from any State or Federal government, or any regulatory or administrative agency, including:

(a) those documents and/or records that are to be submitted by the Company and/or its agents, representatives or consultants to any state and/or federal environmental regulatory/compliance agency including but not limited to documents and/or records which involve changes to the construction or operation of the Transfer Facility;

(b) correspondence and/or other communications of any type, kind or sort with any state and/or federal environmental regulatory/ compliance agency;

(c) those documents not otherwise subject to attorney client privilege or work product privilege, and/or records filed with or received from any state or federal regulatory agency relevant to investigations, inquiries, charges, complaints, citations or notices of violations made and/or issued by any such governmental authority with respect to the Company's conduct and/or activity on or related to the Transfer Facility. Draft settlement decrees and orders, shall not be subject to disclosure to the City.

All such documents and/or records described herein shall be provided to the City prior to, if reasonably possible, or otherwise contemporaneously with their anticipated submittal by the Company and/or its agents and consultants to any state and/or local federal regulatory agency, and the City shall have a reasonable opportunity to review such anticipated submittals and make comments and/or suggested changes and modifications to the same, which the Company is neither required to respond to or accept. The Company shall provide the City with any documents and/or records received by the Company from any state, local and/or federal regulatory agency within ten (10) days of receipt thereof.

2. . Subject to the limitation in Section 4.13 (1)(c), documents not otherwise subject to attorney client privilege of work product privilege submitted or received by the Company, its representatives, agents, employees, or consultants to or from any citizen pertaining to the development or operations of the Transfer Facility, particularly comments or complaints concerning such development or operations and including but not limited to the inbound or outbound vehicles to the Transfer Facility.

3. The Company shall maintain on a daily basis books and records pertaining to the weight and volume of Solid Waste at the Transfer Facility and the daily traffic count of vehicles utilizing the Transfer Facility (setting forth the truck number of each vehicle, the weight of waste each vehicle contains, the classification of waste and its origin). The City, its authorized agents and representatives shall be permitted to inspect such books and records which the Company shall maintain. The City shall also be permitted to inspect any and all books, records, data, documents and reports maintained by the Company concerning compliance with any and all applicable federal, state and local laws, statutes, regulations, rules and/or ordinances relating to the operation of the Transfer Facility and the waste handling/disposal activities described herein.

The Company shall maintain a true and accurate copy of any and all books, records, data, information, documents and reports noted herein at the Transfer Facility.

Section 4.14: Access

The Company shall allow any agent duly authorized by the City:

(a) Except in case of emergency, all entries under this 4.14 shall be upon at least one day notice, and all City representatives entering shall be escorted at all times by designated Company personnel. Entries pursuant to 4.14(f) shall be only upon probable cause, as set forth in written notice of the proposed entry, to believe that a material term of this Agreement has been or is being violated; provided, however, nothing in this section or this Agreement shall limit in any way the City's rights under any of its codes and/or ordinances, including but not limited to any rights of inspection.

(b) To enter the Transfer Facility at reasonable times. For purposes of this Section, "reasonable times" means any time during Regular Business Hours and any time not during Regular Business Hours when persons are at the Transfer Facility and/or operations are being conducted and/or the City wants to assure that any siting conditions, local ordinances or contractual provisions between the Company and City are not being violated during non-operational hours (e.g., if there is a siting condition or law or regulation prohibiting overnight storage of waste and the Transfer Facility stops operating at 6:00 p.m., the Company must provide access for the City to enter the Transfer Facility at any time after 6:00 p.m., if the City desires to verify the Company's compliance with the overnight storage restriction);

(c) To have access to and copy at reasonable times any records required to be kept under the terms and conditions of this Agreement or any local ordinance

(d) To inspect no more than four times per year during Regular Business Hours of equipment constructed or operated under this Agreement or pursuant to a siting condition. If such inspection reveals any violation of this Host Agreement or a siting condition, the City may inspect again within two weeks;

(e) To obtain and remove no more than once per year during Regular Business Hours samples of any discharge or emission of contaminants or suspected contaminants. As used in this Section "contaminants" is defined pursuant to Section 3.06 of the Act (415 ILCS 5/3.06). Any samples obtained shall be split samples and shared with the Company;

(f) To enter at reasonable times and utilize any photographic, recording, testing, monitoring or other equipment for the purpose of preserving, testing, monitoring, or recording any activity, discharge, or emission authorized or prohibited by this Agreement.

Section 4.15 City's Use of Transfer Facility

Subject to the force majeure provisions of this Agreement, upon written request of the City, the Company shall arrange for disposal capacity for all of the residential waste generated within the City's boundaries which Company is permitted to receive for storage and transfer. The Company's obligation to secure disposal capacity shall extend only to residential waste which is initially abandoned or discarded within the City.

The Company agrees that its charges to the City or its contractor for storage, transfer and off-site treatment, recycling and/or disposal of Municipal Waste will be no greater than the lowest charges the Company charges any other non-affiliated, non-trans-load, non-swap solid waste customer with similar volume. If requested by the City, the Company agrees to demonstrate to the City's satisfaction that the Company has and is complying with this Section 4.15 including providing access to all documents and/or records, which may be redacted to avoid disclosure of customer identities, reflecting the amounts and types of waste accepted by the Transfer Facility as well as any and all documents, which may be redacted to avoid disclosure of customer identities, affecting charges assessed to customers and/or users of the Transfer Facility. The City acknowledges that this is proprietary information and will not disclose the same to any other person or entity except as required by law.

In addition, upon issuance of an operating permit by the IEPA for the Transfer Facility and upon the Transfer Facility beginning to accept Municipal Waste and for a period extending through the term of this Agreement for as long as the Transfer Facility continues to accept Municipal Waste, City employees may dump up to 2,500 tons per year of the following items: Municipal Waste (maximum of 800 tons);wood chips, stumps and logs; Construction or Demolition Debris, and cement or asphalt materials at the Transfer Facility at no cost to the City.

Contractor shall annually provide up to a total of twenty (20) 1-1/2 cubic yard dumpsters or up to sixty (60) 90 gallon carts (or a combination of dumpsters and carts up to the total proportionate amounts) for one-time pick up each at special events and/or City use, at no cost where ease and frequency of collection is deemed to be in the best interest of the City.

Section 4.16 Preference for City Residents and Firms

The Company agrees that it shall give preference to suitably skilled applicants residing in the City before hiring applicants residing in other communities for work at the Transfer Facility, to the extent that such preference does not violate any state or federal employment, civil rights or similar laws, or union contracts, but the ultimate decision will be left with the Company. Further, the Company agrees that, for all work performed at the Transfer Facility, it shall require its contractors to give preference to hiring new employees from suitably skilled applicants residing in the City before hiring applicants residing elsewhere. The Company further agrees that it shall give preference to firms and businesses located in the City which provide a competitive price or bid

(where bidding is required) and which are capable of performing the required work before contracting with or otherwise retaining firms and businesses headquartered elsewhere.

The Company, at the written request of the City, will notify the City promptly of each job opening and contract opportunity at the Transfer Facility, and shall use reasonable efforts to provide such notice not less than forty-eight (48) hours before the Company publicly announces such opening or opportunity.

The Company agrees to incorporate a courtesy drop-off area into the facility design, for the convenient use and benefit of the citizens of the City. The drop-off area will accept, at no charge to the residents of the City subject to providing proof of residency at the time of drop off, up to two discarded electrical or electronic devices per household per year commonly known as electronic waste or e-waste, excluding CRT monitors or big screen televisions. CRT monitors or big screen televisions would be accepted for a fee of $35 per item. If the Company is awarded the City contract for curbside and/or alley collection and disposal of refuse, recyclable, and yard waste from all present and future single-family residences and multiple family dwellings of four (4) or less residential dwelling units in the City, CRT monitors and big screen televisions shall be accepted at no charge subject to the two devices per household per year limitiation and subject to providing proof of residencey at the time of drop off. The acceptance of the CRT monitors and big screen televisions for free shall occur from the first date Municipal Waste is received at the Transfer Facility pursuant to the City contract through the terminaton of the City contract.

Section 4.17 Traffic Control

All transfer trailer truck traffic entering and existing this site must utilize Powis, Kress and Roosevelt Roads and North Avenue (IL 64). Site plan and off-site road improvements are subject to final engineering approval of the Public Works Department and must meet all applicable codes and ordinances in affect at the time of permitting.

Section 4.18 Transfer Facility Control Measures

The Company shall seek to prevent any waste, litter or debris from being discarded onto public traveled roads due to the Company's operation of the Transfer Facility and shall abide by a litter control plan as approved by the City as a result of the siting process. Should the waste, litter or debris from such operation pose a problem in the reasonable opinion of the City, the City, at its option, may require the Company to sweep or otherwise clean Powis Road in the City of West Chicago, as needed. The Company shall keep the Transfer Facility and all buildings and other improvements built or utilized by the Company in good condition and repair for the term of this Agreement. In addition:

a. All tipping of Municipal Waste at the Transfer Facility shall be on the tipping floor inside the transfer building, and, except as provided in Subsection b. below, the Company shall have the tipping floor free of waste and cleaned with a mechanical street sweeper by the end of each operating day;

b. No Municipal Waste shall be left on the tipping floor inside the transfer building or outside the transfer building on the Transfer Facility property overnight, except:

i. In transfer trailers, provided that such trailers are suitably covered and staged at least 500 feet from Powis Road right-of-way;

ii. In the event of an emergency, the IEPA or person previously appointed by the City Council or, in the absence of such an appointment, the Mayor has given prior approval of temporary overnight storage on the tipping floor inside the transfer building; and

c. Empty waste collection containers and empty transfer trailers may be stored outside the transfer building at least 500 feet from Powis Road right-of-way;

d. The Company shall conduct all operations in a manner that is protective of the public health, safety, welfare, groundwater resources and the environment. The Company shall comply with all City ordinances and all applicable laws, ordinances, rules and regulations, including but not limited to IPCB regulations and the City code.

e. At a minimum, the Company shall provide a street sweeper to remove mud, dirt and dust tracked on to hard surfaces inside and outside the Transfer Facility property including onto Powis Road within three-fourths (3/4) mile of the Transfer Facility property on an as needed basis, but not less frequently than daily except during severe weather conditions (e.g., heavy rains, winter conditions when salt has been applied to the roadway). All access drives, parking areas, storage areas and vehicle maneuvering areas of the Transfer Facility property shall be paved and swept with a street sweeper as needed, but not less frequently than daily;

f. The Transfer Facility and any area used for the outdoor storage of any material or equipment will be fenced and visually screened from viewing from off the Transfer Facility property by means of said fence and appropriate landscaping as approved by the City.

g. For odor control the Company agrees to the following.

i. conduct all Municipal Waste handling and transfer operations completely indoors.

ii. Municipal Waste will be delivered primarily in enclosed vehicles, and tarps will be required on all non-enclosed loads.

iii. Unloading, transferring, and loading operations for Municipal Waste will be performed within the building.

iv. Municipal Waste will be removed from the tipping floor with a frequency adequate to greatly minimize the generation of odors.

v. The Municipal Waste tipping floor areas will be cleaned with a pressure washer as needed.

vi. If malodors are detected off-site, the source of odor generation will be removed from the Site, and the off-site condition will be monitored by Transfer Facility

personnel to insure against reoccurrence. If a continuous source of odorous materials is identified, the generator will be contacted and advised that the materials must be effectively treated for odor control or the service will be discontinued and the materials no longer brought to the Transfer Facility.

Nothing in this subsection shall limit the Company's ability to implement new odor control technologies.

h. The Company agrees to keep the truck doors to the Transfer Facility closed, except for emergencies and to allow trucks to enter and exit the facility, during Regular Business Hours.

Section 4.19 Community Relations/Complaint Resolution

As of the date of commencement of development of the Transfer Facility, and for the balance of the operating life of the Transfer Facility, the Company shall assign and designate a telephone number and representative which shall be responsible for receipt of inquiries, complaints and calls which may arise from the public relative to the operation of the Transfer Facility as outlined in this Agreement. This telephone number will be answered by a person employed or retained by the Company during Regular Business Hours. The Company shall also provide a voice mail telephone number and a website for public inquiries and complaints. All complaints shall be initially investigated by the Company within forty-eight (48) hours. All such complaints and inquiries received from the public shall be responded to and addressed promptly. The Company shall also keep a log of the date and time such complaint, inquiry or communication was received, the nature of the complaint, inquiry or communication, the name of the person initiating such contact, the date and time which response was made to such complaint, inquiry or communication, as well as the method in which any such complaint, inquiry or communication was addressed and or resolved. The Company shall supply the same information as from time to time requested by the City. In addition, the Company shall provide the City with an emergency telephone number for contacting the Transfer Facilty Manager after Regular Business Hours in the event of an emergency.

Section 4.21 Site Location Decision

The City has not, by entering into this Agreement with the Company, predetermined whether it will grant or deny site location approval for the Transfer Facility or whether the Company can (or cannot) establish any of the criteria related to site location approval. The City shall review the Company's application for site location approval for the Transfer Facility on the Transfer Facility Site in accordance with the criteria set forth by Illinois law as provided for in 415 ILCS 5/39.2.

Section 4.22 Siting Application and Pre-Filing Review

The Company shall provide a siting application consistent with the terms of this Agreement and the requirements of Section 39.2 of the Act and the City of West Chicago's Siting Procedures. Prior to filing the siting application with the City the Company agrees to provide the City an

opportunity to conduct a pre-filing review of the siting application. The pre-filing review shall consist of the Company submitting a final draft of the siting application to the City for its review and comment. The Company agrees to reimburse the City for its pre-filing review costs in accordance with Section 4.12 of this Agreement.

Section 4.23 Green Building Principles

The Company shall consider utilizing green building principles in the design and operation of the Transfer Facility. These green building principles used for the design and operation of the Transfer Facility shall be documented to the City in a memorandum as part of the Pre-Filing review to be conducted pursuant to Section 4.22 of this Agreement.

City and Company acknowledge that solid waste hauling, transfer and disposal are subject to possible improvements due to ongoing technological developments. Company agrees to monitor technological developments relevant to its business, and the parties will periodically discuss the feasibility and cost effectiveness of incorporating such developments into the Transfer Facility.

Section 4.24 **Fees**

The Fee, as described in Article VII, Section 14-93(a)(3) of the City's Code of Ordinances must be paid by the Applicant at the time an application is filed and additional payments must be made as required by Article VII, Section 14-93(a)(3) of the City's Code of Ordinances, before the application may be considered

ARTICLE 5
AUTHORITY AND GUARANTY OF PAYMENT

Section 5.1: Authority to Enter Into Agreement

The Company hereby represents and warrants that it is a valid and existing Illinois corporation, in good standing, authorized to do business in the State of Illinois, and that individuals executing this Agreement have been duly authorized by the Company to act on its behalf and enter into this Agreement. In addition, the Company agrees to provide the City, at the time of execution of the Agreement, with a copy of the corporate resolution authorizing the execution of this Agreement.

The Company, by its signature on this Agreement, certifies that it has not been barred from contracting with a unit of local government as a result of a violation of Section 33E-3 or 33E-4 of the Illinois Criminal Code (720 ILCS 5/33E-3, 5/33E-4).

Section 5.2: Guaranty of Payment

As additional consideration for and assurance of performance of this Agreement, the Company and _____ tender to the City and the City accepts, the Guaranty of Performance and Payment attached to this Agreement as Exhibit B. This Guaranty of Performance and Payment survives termination of this Agreement.

Section 5.3: Covenants Run with the Land

The parties agree that the covenants, agreements and understandings contained in this Agreement, which expressly survive its termination touch and concern the Subject Property, and that such covenants, agreements and understandings shall run with the Subject Property. The Company agrees that the City may prepare, and the Company shall promptly execute duplicate originals of an instrument, in recordable form, which will constitute a memorandum of Host Community Benefit Agreement, attaching an executed copy of this Agreement as an exhibit, and record such Memorandum in the Office of the DuPage County, Illinois Recorder of Deeds.

Section 5.4: Financial Assurance

The Company shall to provide, if reasonably feasible, a minimum of six (6) months notice to the City prior to ceasing operations at the Transfer Facility. Regardless of the foregoing, the Company shall provide to City within seven (7) days notice of any final internal decision to close the facility. Not less than three (3) months prior to ceasing operations, the Company, at its sole cost, shall provide to the City financial assurance, in a form reasonably acceptable to the City, sufficient (as agreed to by the Parties) to cover the costs of properly closing the Transfer Facility, which financial assurance shall be maintained until the Transfer Facility has been closed in accordance with all applicable legal requirements. Such financial assurance shall be in the form of a letter of credit, escrow account, policy of insurance or a guaranty from a creditworthy guarantor.

IN WITNESS WHEREOF, the parties hereto have executed this instrument on the day and year first written above.

EN-R-0266-20

SECONDARY HOST COMMUNITY BENEFIT AGREEMENT BETWEEN DUPAGE COUNTY, ILLINOIS AND LAKESHORE RECYCLING SYSTEMS, LLC FOR A SOLID WASTE TRANSFER FACILITY

WHEREAS, the Illinois General Assembly has granted the County of DuPage ("County") authority to enter into agreements and do all other acts in relation to the concerns of the County necessary to the exercise of its corporate powers (55 ILCS 5/5-1005), including specific authority relative to the disposal of solid wastes (55 ILCS 5/5-15, *et seq.*); and

WHEREAS, the Lakeshore Recycling Systems. LLC ("Company") currently operates a solid waste management facility, which receives, sorts, separates, recycles and transfers Construction or Demolition Debris on a parcel in DuPage County of approximately 27.81 acres; and

WHEREAS, the Company plans to file with the City of West Chicago a request for site location approval for the construction and operation of a new municipal solid waste transfer facility ("Transfer Facility") with sufficient capacity to receive and transfer to landfills an annual average of 1,500 tons per day; and

WHEREAS, the Illinois General Assembly has authorized the County, pursuant to the Illinois Environmental Protection Act, (415 ILCS 5/39.2), to negotiate and approve a secondary host agreement for the pollution control facility proposed to be located in the City of West Chicago; and

WHEREAS, the County has not consented to, concurred in or objected to the proposed plans of the Company to develop the Transfer Facility, and nothing in the attached Agreement shall be deemed by the Company, the County, other public agencies, or the public to express or indicate that the County has adopted any position relative to the proposed development of the Transfer Facility; and

WHEREAS, in the event the City of West Chicago grants site location approval for the Transfer Facility, and if, thereafter, the Illinois Environmental Protection Agency issues permits for the development and operation of the Transfer Facility and operations commence, the Company is willing to pay a secondary host community benefit fee, as set forth in the attached Agreement, to the County; and

WHEREAS, any fees received by the County pursuant to the attached Agreement shall be applied to assist the County in meeting its costs associated with the Transfer Facility and for County's responsibility to plan for the management of municipal solid waste including providing recycling and reuse programs.

NOW, THEREFORE, in consideration of the mutual covenants and agreements stated herein, the Agreement between the County and Company is hereby accepted and approved and that the Chairman of the DuPage County Board is hereby authorized and directed to execute the attached AGREEMENT on behalf of the COUNTY; and

Resolution

EN-R-0266-20

BE IT FURTHER RESOLVED that the DuPage County Clerk be directed to transmit certified copies of this Resolution and the attached AGREEMENT to Lakeshore Recycling Systems, LLC, Attn. Alan Handley, 6135 Oakton St., Morton Grove, IL 60053.

Enacted and approved this 10th day of March, 2020 at Wheaton, Illinois.

SECONDARY HOST COMMUNITY BENEFIT AGREEMENT BETWEEN DUPAGE COUNTY, ILLINOIS, AND LAKESHORE RECYCLING SYSTEMS, LLC FOR A SOLID WASTE TRANSFER FACILITY

This HOST BENEFIT COMMUNITY AGREEMENT ("Agreement") is made as of the 10th day of March, 2020, between DuPage County, Illinois ("County") and LAKESHORE RECYCLING SYSTEMS, LLC ("Company").

RECITALS

WHEREAS, the Company currently operates a solid waste management facility, which receives, sorts/ separates, recycles and transfers Construction or Demolition Debris (hereinafter referred to as the C&D Recycling Facility) on the premises legally described in Exhibit A attached hereto and consisting of approximately 27.81 acres (hereinafter referred to as the "Subject Property"); and

WHEREAS, the Company plans to file with the City of West Chicago a request for site location approval for the construction and operation of a new Transfer Facility with sufficient capacity to receive and transfer to landfills an annual average of 1,500 tons per day of non-hazardous Municipal Waste and Hydro Excavation Waste (as those terms are defined below) with ancillary truck parking and storage and maintenance facility combined ("Transfer Facility"); and

WHEREAS, the Company desires to construct the Transfer Facility on the Subject Property and operate the Transfer Facility in conjunction with the C&D Recycling Facility; and

WHEREAS, the County is authorized by State of Illinois law, pursuant to the Illinois Environmental Protection Act to negotiate and approve a secondary host agreement for the pollution control facility proposed to be located in the City of West Chicago; and

WHEREAS, the Company desires to provide certain environmental protection and compensation to the County with respect to the Transfer Facility, if the Transfer Facility obtains all required approvals and commences operation; and

WHEREAS, the County has not consented to, concurred in or objected to the proposed plans of the Company to develop the Transfer Facility, and nothing in this Agreement shall be deemed by the Company, the County, other public agencies, or the public to indicate that the County has heretofore adopted any position on the potential development of the Transfer Facility; and

WHEREAS, if the City of West Chicago grants site location approval of the Transfer Facility, and if thereafter the Illinois Environmental Protection Agency issues permits for the development and operation of the Transfer Facility, the Company is willing to pay a secondary host community benefit fee, as hereinafter set forth, to the County to assist the County in meeting the costs associated

with the Transfer Facility and for other general revenue needs of the County as the County may deem appropriate.

NOW, THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth, the County and the Company agree as follows:

ARTICLE 1
DEFINITIONS AND TERM OF AGREEMENT

Section 1.1 Definitions

"Act" as used in these definitions and this Agreement, shall mean the Illinois Environmental Protection Act, as amended from time to time (415 ILCS 5/1, et seq.).

"Construction or Demolition Debris" whether or not capitalized, means "clean construction or demolition debris" as defined by Section 5/3.160(b) of the Act (415 ILCS 5/3.160(b)), or "general construction or demolition debris," as defined by Section 5/3.160(a) of the Act (415 ILCS 5/3.160(a)).

"Food Scrap" whether or not capitalized and used in any of its grammatical forms, means "food scrap" as defined in Section 5/3.197 of the Act (415 ILCS 5/3.197).

"Hydro Excavation Wastes" means solid/liquid waste such as hydro/vacuum excavation muds, underground excavation material, drilling muds, and other similar materials.

"IAC" as used in these definitions and this Agreement, shall mean the Illinois Administrative Code.

"IEPA" means the Illinois Environmental Protection Agency.

"IPCB" means the Illinois Pollution Control Board.

"Landscape Waste" whether or not capitalized and in any of its grammatical forms, means "landscape waste" as defined by Section 5/3.270 of the Act.

"Municipal Waste" whether or not capitalized and used in any of its grammatical forms, means "municipal solid waste", as defined by Section 5/3.290 of the Act (415 ILCS 5/3.290), except that such waste does not include Construction or Demolition Debris, Recyclables, Unacceptable Waste, or Landscape Waste.

"Recyclables" whether or not capitalized and used in any of its grammatical forms, means any material, which would otherwise be disposed of or discarded, which is separated from Municipal Waste or Construction or Demolition Debris at the source of generation so as to render it useable in a process, or alone, such that it can be returned to the economic mainstream in the form of raw materials or products. Examples of recyclables are newspaper, glass bottles, high density, polyethylene containers, aluminum food and beverage containers, chipboard, and corrugated

containers. Recyclables do not include any materials removed or separated from, or containing Unacceptable Wastes.

"Regular Business Hours" of the Transfer Facility shall mean 4:00 a.m. to 12:00 a.m. on weekdays and 4:00 a.m. to 12:00 p.m. on Saturdays, with no operation on Sundays or the six major Federal holidays (New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas), provided that on the Saturday following any Federal holiday Regular Business Hours may be extended by the Company to 12:00 a.m. The Regular Business Hours for accepting Municipal and Hydro Excavation Waste may be extended but only upon the prior approval of the City of West Chicago, such approval being in writing.

"Solid Waste" whether or not capitalized, means Municipal Waste, Landscape Waste, Food Scrap, , and Construction or Demolition Debris, including those materials in these classifications that have received a Beneficial Use Determination (BUD) designation by the IEPA, as those terms are defined in this Section.

"Transfer Facility" whether or not capitalized, means, "Transfer Station" as defined by 5/3.500 of the Act (415 ILCS 5/3.83), including the property on which the Transfer Station is located, and specifically references the Transfer Facility the Company desires to construct and operate located on approximately 27.81 acres at 1655 Powis Road, Illinois, permanent parcel #01-32-101-004 and #01-32-200-001, at the property described on Exhibit A.

"Unacceptable Waste" whether or not capitalized and used in any of its grammatical forms, means (a) "hazardous waste" as defined by Section 5/3.15 of the Act (415 ILCS 5/3.15) or by 35 IAC 721.03; (b) "industrial process waste" as defined by Section 5/3.235 of the Act (415 ILCS 5/3.235), except allowable special waste and such industrial process waste which poses no present or potential threat to human health or the environment and which has no inherent properties which makes its disposal in a landfill difficult to manage by normal means, and which has been specifically approved by the IEPA; (c) "pollution control waste" as defined by Section 5/3.335 of the Act (415 ILCS 5/3.335); (d) "sludge" as defined by Section 5/3.465 of the Act (415 ILCS 5/3.465); (e) "potentially infectious medical waste" as defined by Section 5/3.360 of the Act; (f) "special waste" as defined by Section 5/3.475 of the Act; (g) "polychlorinated byphenyls" as defined in the Toxic Substances Control Act, 15 U.S.C. Section 2601-2692, or regulations promulgated thereunder; (h) source, special or byproduct nuclear materials, radioactive waste, high-level or low-level radioactive waste, or transuranic waste as defined in the Atomic Energy Act, 42 U.S.C. Sections 2014, et seq., or regulations promulgated thereunder; or (i) "asbestos" as defined in 40 CFR 763.83, except that Unacceptable Waste does not include Hydro Excavation Waste.

Section 1.2 Term

This Agreement commences on the date executed and continues in force and effect until the Transfer Facility ceases to operate and is no longer permitted by the IEPA to accept Muncipal Waste and/or Hydro Excavation Waste. In addition, the County may terminate this Agreement if the Company is in default of this Agreement as provided in Section 4.2. The Company, in turn, may, at its sole discretion, terminate this Agreement if it determines that it is no longer economically desirable to operate the Transfer Facility and it rescinds its IEPA permit to operate. The Company agrees that,

should this Agreement be terminated, the Company will immediately remove all Muncipal Waste and/or Hydro Excavation Waste from the Transfer Facility and stop its operations and receipt and acceptance of Muncipal Waste and/or Hydro Excavation Waste.

ARTICLE 2
ENVIRONMENTAL PROTECTIONS

Section 2.1 Compliance with Laws

The Company shall comply at all times, in connection with the development and operation of the Transfer Facility, with: all laws, conditions and requirements of any permit that is issued for development or operation of the Transfer Facility; modified or amended rules and regulations and ordinances of any Federal or State agency or authority relating to the development, operation, monitoring, remediation, or closure of the Transfer Facility. With respect to the closing of the Transfer Facility, the Company agrees to comply with any government ordinance, rule, law or directive as to post-closure requirements and pay the entire costs associated therewith.

Section 2.2 Waste Acceptability

The Company shall only allow Solid Waste and/or Hydro Excavation Waste to be intentionally accepted at, transported to, stored at, or otherwise present at the Transfer Facility. All Municipal Waste and/or Hydro Excavation Waste, except when being transported to or from the Transfer Facility, must be kept inside (i.e., within a fully enclosed area of) the Transfer Facility. Unacceptable Waste accepted at, transported to, stored at, or otherwise present at, on, or in the Transfer Facility shall be properly removed within 24 hours.

Section 2.3 Defense and Indemnification

The Company covenants and agrees at Company's sole cost and expense to defend, indemnify and hold harmless the County, individual members of the County Board, and any and all employees, agents, officers, or representatives of the County (collectively "County Affiliates"), from and against all claims, suits, actions, administrative enforcement proceedings, losses, damages of all kinds, costs, expenses, fines and penalties, attorneys' fees and expenses of litigation, of any nature whatsoever, relating in any way directly or indirectly to the Transfer Facility where the same are caused by the Company's negligence, willful misconduct or breach of this Agreement. This includes, but is not limited to, any condition or occurrence, or any release, discharge or emission at, onto, above, under, through or from the Transfer Facility; or the Company's execution, performance, or non-performance of this Agreement or of any conditions placed on siting (should the facility be approved or the operations of the Company conducted at the Transfer Facility). This includes, but is not limited to, any claims of injury to any person (including, but not limited to death) or property for violation of or non-compliance with any law, ordinance, rule or regulation (including without limitation any environmental, health, antitrust, civil rights, employment or trade law, or statutory or common law obligation or liability). The Company shall assume the defense of all suits, administrative proceedings and disputes of any description with all persons, entities, political subdivisions or government agencies arising out of the matters to be indemnified under this Agreement. Company

shall pay, promptly upon entry, any nonappealable order, judgment or other final resolution of any claim or dispute arising out of the matters to be indemnified under this Agreement and shall pay promptly when due any fines, penalties or agreed settlements arising out of the matters to be indemnified under this Agreement. In the event of a claim or suit against Company arising out of the sole negligence, willful misconduct or breach of this Agreement by the County or any County Affiliate, County shall be obligated to defend and indemnify Company only to the extent permitted by law. In addition, nothing in this Agreement shall be construed as a waiver of any common law or statutory immunity the County may have to such liability. This Section 2.3 survives termination of this Agreement.

Nothing in this Section shall be construed as a waiver of any rights either party may have with regard to contesting its alleged obligation for defense and indemnification by way of Declaratory Judgment or otherwise.

ARTICLE 3
HOST FEES

Section 3.1 Purpose

In consideration of the additional fees and costs to be incurred by the County's Environmental Division and the County's responsibility to plan for the management of municipal solid waste including providing recycling and reuse programs, the Company agrees to pay the County the following fees should the West Chicago City Council approve the Transfer Facility site location and should the Company build the Transfer Facility and begin accepting Municipal Waste and/or Hydro Excavation Waste. The Company agrees to pay the County the following fees.

Section 3.2 Quantity Based Fees

The Company shall pay to the County a base fee as provided below for each ton of Municipal Waste and/or Hydro Excavation Waste, except landscape waste and recyclables, received at the Transfer Facility (whether received in the same or separate vehicles) from the first date Muncipal Waste and/or Hydro Excavation Waste is received through the termination of this Agreement. In the event the Transfer Facility accepts Food Scraps either in dedicated truckloads or commingled with Landscape Waste, the Company agrees to pay the per ton fee provided for in this section on the Food Scraps accepted at the Transfer Facility, in accordance with the methodology and calculations agreed to between the Company and the City of West Chicago.

Per Ton Fee

The Company shall pay the County a Host Benefit Fee equal to $.58 per ton of Muncipal Waste and/or Hydro Excavation Waste received at the Transfer Facility. Per-ton fees shall be payable only if, as and when waste is received and accepted at the Transfer Facility.

Section 3.3: Annual Increase

Beginning as of January 1, 2021, and as of each January 1 thereafter, the per-ton fees described in Section 3.2 above will be adjusted from the per-ton fees of the previous year by the percentage change during the previous year in the Revised Consumer Price Index for All Urban Consumers (CPI-U) published by the United States Department of Labor – Statistics for the Chicago-Gary-Kenosha area, provided, however, that at no time shall the increase be less than 0% or greater than 4%. If the Consumer Price Index for All Urban Consumers shall cease to be published in the time frame described above, the County and Company shall designate a comparable time frame or index, which shall then be used for determining the annual rate of adjustment.

Section 3.4 Identification and Weight of Receipts

The Company shall weigh all receipts of Solid Waste and/or Hydro Excavation Waste on a certified scale, which is inspected at least once each calendar year by the Company, and a copy of said inspection shall be provided to the County upon request.

Further, the Company shall keep records of outgoing Solid Waste and/or Hydro Excavation Waste, such that the County can determine by its review of these records the number of outbound vehicles, the type of vehicle, the destination of each vehicle, and the type of waste contained on each vehicle leaving the Transfer Facility each calendar day. In addition, should the County request records concerning the load weight and total weight of each outbound vehicle, the Company agrees to provide that information, from weights measured at the Transfer Facility or at the destination of the vehicles leaving the Transfer Facility, from the time the Company receives the County's request on moving forward basis for any time period(s) designated by the County.

Section 3.5: Auditing

The Company shall keep complete and accurate books and records relating to the determination of the fees described in Article 3, in an auditable form, including those records described in Section 3.4. No more than once per year, the Company shall permit the County and its designated representatives access to such books and records (paper and electronic version) for inspection and copying. In the event that such inspection reveals any underpayment(s) of the fees described in Sections 3.2 and 3.3, the Company shall promptly pay the County the amount(s) of such underpayment(s). In the event that such inspection reveals any overpayment(s) of the subject fees, the Company may credit the amount of such overpayment(s) against the payments of the subject fees in subsequent quarters.

Section 3.6: Payment Schedule for Fees

The fees described in this Article shall be paid on a quarterly basis. The quarterly payments shall be calculated on a calendar-year basis; that is, they shall be calculated for the three-month periods ending on the last day of March, June, September and December of each year during the term of this Agreement and any extension thereof. The payment shall be made not later than forty-five (45) days after the last day of the preceding quarter and shall be limited to the Solid Waste transferred

during the quarter to which it applies. Past due payments of the fees shall be subject to a late charge of one-and-one-half percent (1½ %) per month or fraction of a month for which the payment is late. Payment of such interest shall not otherwise excuse or cure any default by the Company under this Agreement.

ARTICLE 4
MISCELLANEOUS

Section 4.1: Assignment

The Company shall not assign or attempt to sublet this Agreement or any interest in this Agreement or any right or privilege appurtenant to this Agreement without first obtaining the County's written consent, which consent shall not be unreasonably withheld, conditioned or delayed: provided, however, that the Company may assign or transfer its interest in this Agreement to an affiliate of the Company without consent in the event that the affiliate is more than 50% owned by the Company. In addition, no transfer of any ownership or other interest in the Transfer Facility may be made without the prior written approval of the County, which approval shall not be unreasonably withheld, conditioned or delayed. The right to seek assignment or approval may occur only if all payments to the County by the Company have been made and if the Company is not otherwise in default in connection with obligations under this Agreement.

Subject to the provisions of this Agreement limiting the right to assign this Agreement shall be binding on and inure to the benefit of the parties and their heirs and successors. Furthermore, in the event of an approved assignment or transfer, the Company shall remain primarily responsible for all obligations and liabilities of this Agreement which accrue prior to the execution of any approved assignment or transfer. Transfer of a fifty-percent (50%) or greater interest in the Company to another owner or owners shall be deemed an unpermitted transfer under this Section, unless made with the approval of the County. The County may require an additional written commitment from the assignee or transferee to assume and comply with the duties and obligations of this Agreement. The County shall not unreasonably withhold, condition or delay approval of a proposed assignment or transfer. This Section 4.1 survives termination of this Agreement.

Section 4.2: Default

The occurrence of any one or more of the following constitutes a "default" by the Company under this Agreement. Should the Company be in default of this Agreement, the County may, at its sole discretion, terminate this Agreement.

(a) The failure by the Company to pay any fee due and payable under this Agreement; if the Company does not cure such failures within thirty (30) days after notice thereof from the County to the Company;

(b) The Company admits in writing its inability to pay its debts as they mature and makes an assignment for the benefit of creditors or applies for or consents to the appointment of a trustee or receiver for the Company or a major part of its property;

(c) A trustee or receiver is appointed for the Company or for a major part of its property, and it is not discharged within ninety (90) days after such appointment; or

(d) Bankruptcy, reorganization arrangement, insolvency or liquidation proceedings or other proceedings for relief under any bankruptcy law, or similar law, for the relief of debtors are instituted by or against the Company and, if instituted against the Company, are allowed against it or are not dismissed within 180 days after such institution.

Section 4.3: Notice

Any notice to be given hereunder by either party to the other shall be in writing and be sent by personal delivery, by overnight delivery service or by registered or certified mail, postage prepaid, return receipt requested, and shall be deemed communicated when delivered or three (3) business days from the date of mailing, whichever is earlier. Notices shall be addressed as set forth below, but each party may change its address by written notice to the other in accordance with this Section:

To the County, notice shall be sent to both the County and the County's Attorney at the following addresses:

TO THE COUNTY AT:

Attention: DuPage County
Daniel J. Cronin, Chairman
421 N. County Farm Rd.
Wheaton, IL 60187

WITH COPY TO THE COUNTY's ATTORNEYS AT:

Attention: DuPage County State's Attorney
Honorable Robert Berlin
Judicial Office Facility Annex
503 N. County Farm Rd.
Wheaton, IL 60187

To the Company, notice shall be sent to the Company at the following addresses:

TO THE COMPANY AT:

Attention: Alan Handley
Address: Lakeshore Recycling Systems, LLC
6135 Oakton Street
Morton Grove, Illinois 60053

Section 4.4: Agreement Controls

This Agreement constitutes the entire understanding of the parties hereto relating to the subject matter contained herein.

Section 4.5: Captions

Captions of the Articles, Sections and paragraphs of this Agreement are for convenience or reference only, and the words contained therein shall in no way be held to explain, modify, amplify or aid in the interpretation, construction or meaning of the provisions of this Agreement.

Section 4.6: Governing Law and Forum for Litigation

This Agreement shall be governed by and construed in accordance with the laws of the State of Illinois. Any litigation filed by the Company or the County against the other party and involving this Agreement shall be filed in the Circuit Court of DuPage County, Illinois. Section 4.6 survives the termination of this Agreement.

Section 4.7: Severability

The provisions of this Agreement shall be deemed to be severable, and the invalidity or unenforceability of any provision shall not affect the validity and enforceability of the other provisions hereof. Section 4.7 survives the termination of this Agreement.

Section 4.8: Binding Effect

This Agreement shall inure to the benefit of and be binding upon the respective parties hereto, their successors and assigns. However, nothing in this Section should be construed to allow the Company to assign its interest in this Agreement unless done pursuant to Section 4.1 of this Agreement. Section 4.8 survives the termination of this Agreement.

Section 4.9: Force Majeure

Neither party hereto shall be deemed to be in default or to have breached any provision of this Agreement as a result of any delay, failure in performance or interruption of services resulting directly or indirectly from acts of God, acts of civil or military authority, civil disturbance, or war or labor strikes or interruptions, which are beyond the control of such non-performing party.

Section 4.10: No Third-Party Beneficiaries

Nothing in this Agreement, whether expressed or implied, is intended to confer any rights or remedies under or by reason of this Agreement on any person other than the parties and their respective successors and assigns, nor shall any provision give any third persons any right or rights of action against any party to this Agreement.

Section 4.11: Access

The Company shall allow any agent duly authorized by the County to enter the Transfer Facility at reasonable times. For purposes of this Section, "reasonable times" means any time during Regular Business Hours and any time not during Regular Business Hours when persons are at the Transfer Facility.

Section 4.12 Traffic Control

All transfer trailer truck traffic entering and existing this site must utilize Powis, Kress and Roosevelt Roads and North Avenue (IL 64). Site plan and off-site road improvements are subject to final engineering approval of the Land Use or Zoning Department and must meet all applicable codes and ordinances in affect at the time of permitting.

Section 4.13 Transfer Facility Control Measures

The Company shall seek to prevent any waste, litter or debris from being discarded onto public traveled roads due to the Company's operation of the Transfer Facility and shall abide by a litter control plan as approved by the City of West Chicago as a result of the siting process.

a. All tipping of Municipal Waste at the Transfer Facility shall be on the tipping floor inside the transfer building, and, except as provided in Subsection b. below, the Company shall have the tipping floor free of waste and cleaned with a mechanical street sweeper by the end of each operating day;

b. Empty waste collection containers and empty transfer trailers may be stored outside the transfer building at least 500 feet from Powis Road right-of-way;

c. The Company shall conduct all operations in a manner that is protective of the public health, safety, welfare, groundwater resources and the environment. The Company shall comply with all applicable laws, ordinances, rules and regulations, including but not limited to IPCB regulations.

d. At a minimum, the Company shall provide a street sweeper to remove mud, dirt and dust tracked on to hard surfaces inside and outside the Transfer Facility property including onto Powis Road within three-fourths (3/4) mile of the Transfer Facility property on an as needed basis, but not less frequently than daily except during severe weather conditions (e.g., heavy rains, winter conditions when salt has been applied to the roadway). All access drives, parking areas, storage areas and vehicle maneuvering areas of the Transfer Facility property shall be paved and swept with a street sweeper as needed, but not less frequently than daily;

e. The Transfer Facility and any area used for the outdoor storage of any material or equipment will be fenced and visually screened from viewing from off the Transfer

Facility property by means of said fence and appropriate landscaping as approved by the City.

f. The Company agrees to keep the truck doors to the Transfer Facility closed, except for emergencies and to allow trucks to enter and exit the facility, during Regular Business Hours.

Section 4.14 Green Building Principles

The Company shall consider utilizing green building principles in the design and operation of the Transfer Facility.

Section 4.15 Drop Off Area for Recyclables from Residents

The Company shall establish a recycling drop-off for recyclables including but not limited to bottles, cans, cardboard, paper generated by residents and small businesses, at the Transfer Facility property. The recyclables will be accepted at no cost to the resident. The list of acceptable recyclables may be amended by agreement between the County and the Company.

Section 4.16 Household Hazardous Waste Collection

The Company will partner with the County on an application(s) to the Illinois EPA for the funding of household hazardous waste collection(s) at the Transfer Facility at the request of the County. The Company's sole responsibility will be to provide the location for each event.

ARTICLE 5
AUTHORITY AND GUARANTY OF PAYMENT

Section 5.1: Authority to Enter Into Agreement

The Company hereby represents and warrants that it is a valid and existing Illinois corporation, in good standing, authorized to do business in the State of Illinois, and that individuals executing this Agreement have been duly authorized by the Company to act on its behalf and enter into this Agreement. In addition, the Company agrees to provide the County, at the time of execution of the Agreement, with a copy of the corporate resolution authorizing the execution of this Agreement.

The Company, by its signature on this Agreement, certifies that it has not been barred from contracting with a unit of local government as a result of a violation of Section 33E-3 or 33E-4 of the Illinois Criminal Code (720 ILCS 5/33E-3, 5/33E-4).

Section 5.2: Covenants Run with the Land

The parties agree that the covenants, agreements and understandings contained in this Agreement, which expressly survive its termination touch and concern the Subject Property, and that such covenants, agreements and understandings shall run with the Subject Property. The Company agrees that the County may prepare, and the Company shall promptly execute duplicate originals of an instrument, in recordable form, which will constitute a memorandum of Host Community Benefit Agreement, attaching an executed copy of this Agreement as an exhibit, and record such Memorandum in the Office of the DuPage County, Illinois Recorder of Deeds.

IN WITNESS WHEREOF, the parties hereto have executed this instrument on the day and year first written above.

FACILITY USE AGREEMENT

This Facility Use Agreement is entered into and made between WHEATON ACADEMY, a Non-profit Corporation in the State of Illinois, and Sponsor Name hereinafter referred to as "Event Sponsor", for Event. This Facility Use Agreement and the Facility Reservation Request and Agreement are hereinafter collectively referred to as "Agreement." Any and all associated with this event shall be referred to as participants.

Wheaton Academy is an Illinois Not-For-Profit Corporation, engaged exclusively in educational and religious activities and is recognized by the United States Internal Revenue Service as being tax-exempt under Section 501(c)(3) of the Internal Revenue Code of 1986.

Wheaton Academy does not make its facilities available to the general public, but allows its facilities to be used by others for purposes that are consistent with the educational and religious purposes of Wheaton Academy.

Both parties understand that this Agreement is designed to encourage the common educational and religious objectives of each party and to jointly serve the needs of the community.

Wheaton Academy desires to make its facilities available to the Event Sponsor on the terms and conditions set forth in this Agreement.

This Agreement must be signed by the participant and received by the Wheaton Academy Operations and Facilities Coordinator along with the Security Deposit within 14 days of this Agreement's postmark. Agreements not returned within 14 days will result in cancellation of the event. This Agreement is not valid until it is signed by an authorized representative of Wheaton Academy.

If you are tax exempt you must provide a copy of your current tax letter for the State of Illinois.

Wheaton Academy agrees to provide facilities and services as listed above and the Event Sponsor agrees that those facilities and services will be provided in accordance with the terms and conditions of the document attached to this permit.

SIGNATURES

Designated as those with the authority to sign documents, which are legally binding upon Wheaton Academy and the Event Sponsor, we, the undersigned do hereby enter into this contract, as witnessed by our signatures below:

AGREEMENT FOR USE OF SCHOOL FACILITIES

Date of Request: 10/3/2022

City of West Chicago requests permission to use the following facilities:
(Name of Person/Organization)

Date of Use: January 12th **Day of Use:** Thursday

Facility Area: Commons (cafeteria)

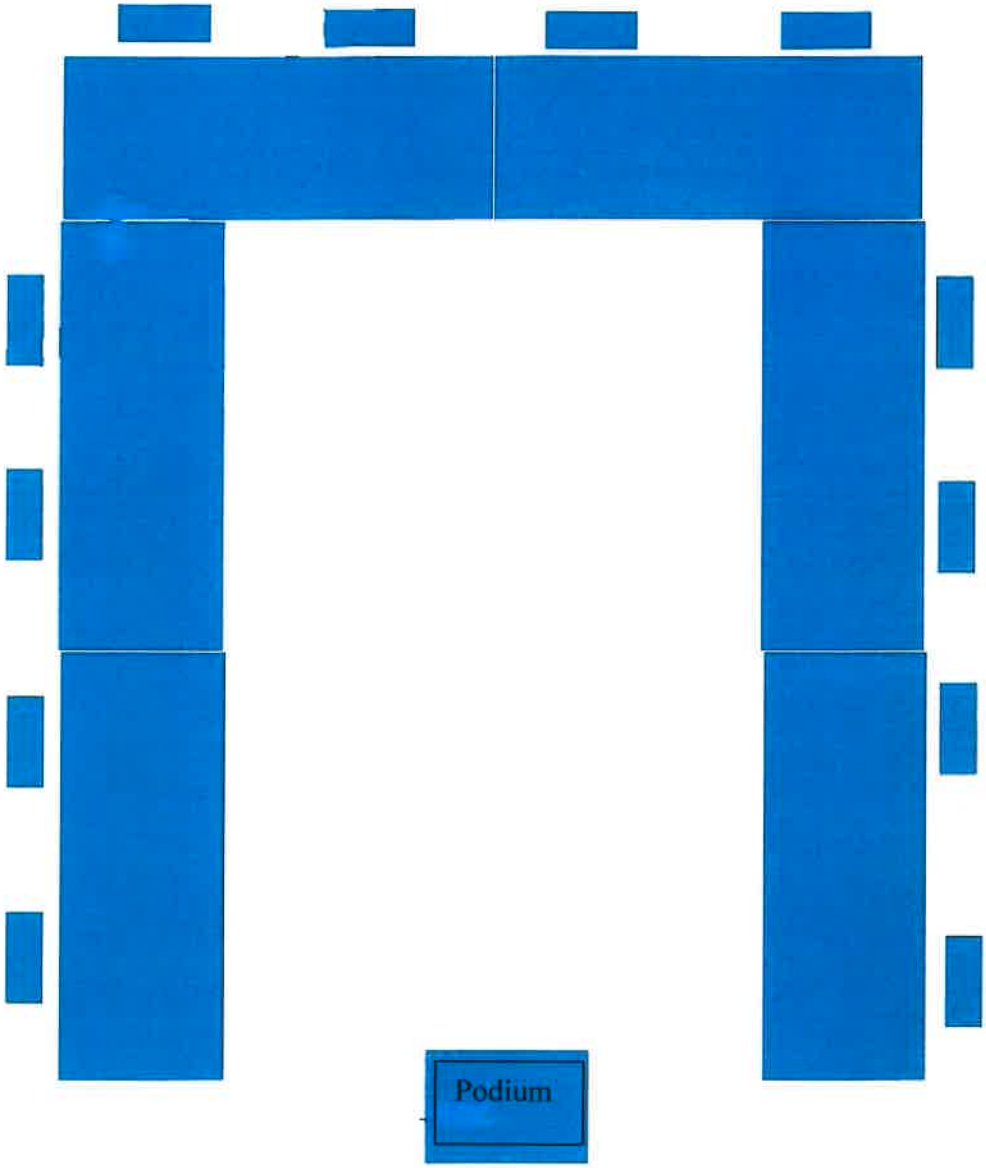
Purpose for Use: Lakeshore Recycling Systems Waste Transfer Station Application Hearing

Name of Adult in Charge: Valeria Perez
Enter Building at: 5:30 PM Charge Admission: NA
Vacate Building at 10:00 PM Entrance requested Entrance H

If facility is to be used over a season, see attached schedule:
Beginning day & date: _____ Enter Building at: _____
Ending day & date: _____ Vacate Building at: _____

Expected Attendance approximately **about 100** attendees.

Expected attendance by children: **0**



IT IS UNDERSTOOD that West Chicago Community High School activities have preference over outside activities in use of the School buildings, and also that facilities are available only by special arrangement. No use shall interfere in any way with scheduled school activities or be held at a time to compete with school events. If a conflict in date arises, the school's activity will take precedence. The School reserves the right to cancel any previously granted permission or contract upon 24 hours' notice, but will not exercise this right in an arbitrary or capricious manner. If this permission is granted, the person/organization that is granted use of the School facilities agrees that such person/organization will:

1. Save, defend, indemnify and otherwise hold West Chicago Community High School, its District board members, officers, employees and representatives harmless for any claims by any person, partnership, corporation, association or other entity, for any injuries, damage or loss to persons or property arising out of the use of the School facilities, and all attorneys' fees, costs, and expenses incurred by, or on behalf of, the School arising out of any such claim.
2. **FURNISH A CERTIFICATE OF INSURANCE (PUBLIC LIABILITY AND PROPERTY DAMAGE)** to guarantee payment of any claims for injuries or damage to persons or property that occur during, or arise from, use of the premises by the renting organization. Said coverage shall insure the renting organization in an amount not less than $100,000 for injuries to one person and $300,000 for injuries to more than one person and $25,000 for property damage, including damage to school property. The certificate of insurance shall name ***West Chicago Community High School*** as an additional insured without limitation and with full coverage under the policy, and shall be furnished before the renting organization enters upon school facilities under the terms of the rental agreement. The insurance shall be with a company and in form satisfactory to the designated school official.
3. Pay for any damage to School property, real or personal.

4. Not permit the selling, giving, or drinking of any alcoholic beverage, or gambling of any form on School premises.
5. Not permit smoking in the School buildings or on School grounds.
6. Not begin activities prior to 6:00 a.m. (8:00 a.m. if outdoors) and vacate the property by 11:00 p.m. on weekdays and Saturdays, and 6:00 p.m. on Sundays unless otherwise noted.
7. Seek and receive prior approval from the designated school official for the sale of concessions or any other commodity.
8. Reach an agreement with school officials prior to the date of use regarding the distribution of literature, posting of signs on the school grounds, and attaching signs to walls and banners from ceilings.
9. Confine the attending group to the area rented by the person/organization and use of requested entrances.
10. Strictly observe the time limits in the contract.
11. For activities involving children, provide adult supervision, with a minimum of one adult for every fifteen children. These adult supervisors are responsible for maintaining order and control of the children during the activity. All supervisors must be at least 21 years old and must not be a convicted child sex offender.
12. School facilities will be allowed for games of chance only after any necessary license is obtained and provided to the School.
13. Parking is allowed in designated parking spaces only. Parking is prohibited in driveways, fire lanes or other areas not designated as parking areas. If the supervision of parking lots is required for an activity, the renting person/organization must arrange for, and pay for, such service. Neither the renting person/organization nor its agents may charge money for parking on School property.
14. The use of the cafeteria kitchen facilities is prohibited unless prior arrangements are made with the cafeteria director, and only with the necessary personnel present.
15. **Use of the Concession facilities must be approved by the Activities Director.**
16. Approval is required for the organization to set up any tents, booths, outdoor cooking equipment, etc. on the school grounds.
17. The renting organization shall ensure that any person involved in food handling or preparation is free of tuberculosis or any other communicable disease and to provide written proof to the School, if requested.
18. Observe posted capacity limits for areas used.
19. Users shall observe all city, state and federal ordinances and laws.
20. Adult in charge or additional named designee shall be present at all times during the event.
21. Attendance and/or participation shall not be restricted due to race, creed, color or sex.
22. If the School determines that additional security is needed due to the nature of the event, users must contract with the WC Police Department or an outside security agency approved by the School.
23. In providing facilities, the School is not assuming responsibility or jurisdiction over the organization's authority over, relationship with, or benefits to its participants.

Additional Insured Status:

The West Chicago Community High School is named as an additional insured on the general liability, but only with respect to the City's liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by the City's acts or omissions or the acts or omission of those acting on the City of West Chicago's behalf.

The coverage afforded the additional insured only applies to the extent permitted by law; and if the coverage provided to the additional insured is required by contract or agreement, the coverage afforded to the additional insured will not be broader that than which is required by the contract or agreement to provide to the additional insured. The most we will pay on behalf of the additional insured is the amount of coverage required by the contract or agreement or the limit available under the applicable Limits of Coverage shown in the Declarations, whichever is less.

This certificate does not increase the applicable Limits of Coverage shown in the Declarations.

ACORD®

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 2/13/2023

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).
