My husband and I retired
in a lovely home on
the lake in Lake Kellarny
almost 7 years ago. It's
a quiet, beautiful lake,
very relaxing and our
deck and we felt that
we made a good decision
in purchasing our
retirement home until the
hair brained idea of a
waste transfer station
came up.

We don't want to smell
garbage. If we want to
smell garbage we can put
our heads into our own
garbage can!

We don't need more traffic
on Hwy 14 plus wear and
tear on the road.

Most of all we don't care
to lose property value on
our wonderful retirement
home that we love very
much.

The transfer station is a
bad dream.

PLEASE DON'T LET IT
HAPPEN in our residential
community.

Think hard about losing
things you love at your
retirement age.
