Hello,

I have been reviewing previously dismissed cases as I refer them to Law Enforcement and OIG.

And I realized, by sending falsified professional credentials via the computer to achieve DECI Certification and the right to inspect sites in Lake County Illinois, Earthworks Environmental engaged in wire fraud.

So, this case will be submitted for the federal environmental violations, but also wire fraud.

I look forward to understanding how these people are still credentialed inspectors. And rectifying this oversight.

Paul Pratapas
