Hi Dorothy,

RECEIVED
CLERK'S OFFICE

AUG 22 2003

STATE OF ILLINOIS
Pollution Control Board

1704 10 C-
Case #
P.C. 36 PCB03-221

I'm writing to let the IPCB know I support the McHenry County Board's decision. I can't believe that Mr. Love has no compassion for his neighbors and the surrounding nature mainly the Hollow and the lake that backs against his property and the neighborhood that's just over 1,000 feet away. There are young people who walk, ride their bikes to the Hollow. We all need to be able to get to the Hollow to find peace without having to fight to find peace. McHenry County has so many open land that are more appropriate for this kind of operation. For Mr. Love to put the operation behind his existing business would definitely cause more hazardous working environment for everyone inside and out. The location is one quarter mile from a busy intersection. All those trucks from both businesses would rack havoc with already ^{heavy} traffic. The children would not be able to come to the Hollow to fish. Accidents would most likely to occur there because of the (over)

trucks competing to get in and out
out of that location. Many people
and businesses would be offended by
the smell. Who would want to be outside
with that smell. There would be potential
for groundwater pollution, since there is
a lake that ^{touches} butts against his property, and
after that, the proposed new neighborhood
with the existing neighborhood ^{right} by.
What upset me the most is that there are
lots of open land near by that would
not be an issue to anyone else. Isn't
there a law on ^{how} many business **per**
square footage? The facility is incompatible
with the ~~surrounding area~~ character of the
surrounding area. This is our home. It
isn't Mr. Lowe's that why he doesn't care
how he is trying to trash the area. Please
be concern for our health and our homes
along with the Hollow next door!

Thank you.
