RESPONDENT WASTE MANAGEMENT OF ILLINOIS, INC.'S MOTION FOR SUMMARY JUDGMENT

Respondent Waste Management of Illinois, Inc. ("WMII") by its attorneys, Pedersen & Houpt, moves the Illinois Pollution Control Board ("IPCB") to enter summary judgment in its favor and against Petitioner Village of South Elgin ("Village") because there is no genuine issue of material fact as to the meaning of Condition 4 in Kane County Resolution 88-155 dated September 13, 1988 ("Resolution 88-155"). In support of this motion, WMII states the following:

INTRODUCTION

On January 16, 2003, the Village filed a complaint against WMII seeking to enforce two special conditions of a site location approval granted by the Kane County Board for the expansion of the Woodland Sanitary Landfill ("Woodland Landfill"). (See Resolution No. 88-155, pp. 3-5). Condition 4 of that approval provides that the Woodland Landfill site "shall not be expanded further."

The Village claims that Condition 4 prohibits any further development at the Woodland Landfill site other than as a passive recreational use. According to the Village, this would include any proposal to develop a waste transfer station on any portion of the Woodland Landfill site. However, the plain language of Condition 4 states that there shall be no further <u>expansions</u> of the Woodland Landfill site. There is no language in Condition 4 that prohibits the development of a waste transfer station, nor is there any intent or understanding behind the plain language of Condition 4 that it was meant to prohibit the development of a waste transfer station on the Woodland Landfill site. There is no reference or suggestion in any of the conditions contained in Resolution 88-155 that a waste transfer station would be prohibited on the Woodland Landfill site. Hence, a proposal to develop a waste transfer station is not proscribed.

FACTUAL BACKGROUND

The Woodland Landfill was established by WMII in 1976 and was subsequently expanded in 1982 and 1988. (Complaint, ¶2.) The entire Woodland Landfill is located on 213 acres of property and is owned by WMII ("Woodland Landfill Site"). (Complaint, ¶2). The Woodland Landfill waste footprint was initially permitted for 55 acres by the Illinois Environmental Protection Agency ("IEPA") in 1976 ("Woodland I"). (Complaint, ¶2). The waste footprint was expanded in 1982 and permitted for an additional 48 acres by the IEPA ("Woodland II"). (Complaint, ¶2).

On April 7, 1988, WMII filed an Application for Site Location Approval for a Non-Hazardous Solid Waste Management Site with the Kane County Board to expand Woodland I and II. ("Woodland III Application"). In April, 1988, the total permitted waste footprint of Woodland I and II was 103 acres. (See Woodland III Application, Executive Summary). The expansion proposed by the Woodland III Application included a vertical expansion of 20 acres of Woodland II, and a 28-acre horizontal footprint expansion between Woodland I and Woodland II ("Woodland III"). (See Woodland III Application, Executive Summary). The total waste

footprint of the Woodland Landfill, with the approval of Woodland III, was 121 acres on the 213-acre site. (See Woodland III Application, Executive Summary).

Prior to the local siting hearing for Woodland III, WMII sent a letter to the Village dated July 8, 1988 ("July 8 letter"). (Complaint, Ex. 1). In the July 8 letter, WMII stated that in the event that Kane County granted siting approval and the IEPA issued an operating permit for Woodland III, Woodland III would be the last expansion of the Woodland Landfill that WMII would attempt to get approved. (Complaint, Ex. 1).

At the public hearing held on July 26, 1988, WMII made certain representations, including the statements contained in the July 8 letter, which were read into the record by WMII attorney Donald Moran. (Complaint, ¶8). However, the July 8 letter contained no statements, representations or references to any end use for the Woodland Landfill Site.

On September 13, 1988, Kane County granted site location approval for the Woodland III expansion, subject to certain conditions. The Approval and conditions were contained in Resolution 88-155, which provided, in part:

1. For purposes of these conditions, Waste Management means Waste Management of Illinois, Inc. and any successor thereto or assignee thereof. "Woodland" or "the Woodland Site" means the area comprised of the Woodland I, II, and III landfill sites. "Village" means the Village of South Elgin, Illinois.

2. That the site will be developed and operated in a manner consistent with the representations made at the public hearing in this matter held on July 26, 1988 and to all applicable laws, statutes, rules and regulations of the Illinois Environmental Protection Agency, and the Illinois Pollution Control Board, or their successors, as may be now or hereafter in effect and which are applicable to this site.

4. The site, commonly known as the Woodland site, shall not be expanded further.

(Complaint, Ex. 1).

The statement in the July 8 letter, and made on the record at the July 26, 1988 public hearing, that the proposed expansion of Woodland III would be the last expansion of the Woodland Landfill, was the basis for the inclusion of Condition 4 in Resolution 88-155.

On June 14, 2002, WMII filed with Kane County a Site Location Application for Woodland Transfer Facility ("Transfer Facility Application"). (Complaint, ¶4). The Transfer Facility Application requested site location approval for a waste transfer facility on an approximate 9-acre portion at the southern end of the Woodland Landfill Site ("Woodland Transfer Facility"). (Complaint, ¶4). The Transfer Facility Application <u>did not</u> seek to expand the Woodland Landfill, <u>i.e.</u>, Woodland I, II or III.

An expansion of a landfill involves the increase of disposal capacity through a vertical and/or horizontal extension of the waste footprint in order to extend the period the landfill would continue to receive and dispose of waste. An expansion may also involve the lateral extension of the landfill property boundaries. Because the Transfer Facility Application did not request an increase in the size, capacity or waste footprint of Woodland I, II, or III, it was not a request to further expand the Woodland Landfill.

The Transfer Facility Application was ultimately denied by Kane County on December 10, 2002 for reasons unrelated to any of the conditions contained in Resolution 88-155. On January 14, 2003, WMII filed a Petition for Review with the IPCB pursuant to Section 40.1(a) of the Illinois Environmental Protection Act ("Act"). On June 19, 2003, the IPCB affirmed Kane County's denial in a written decision in <u>Waste Management of Illinois, Inc. v. County Board of</u>

Kane County, Illinois, No. PCB 03-104, slip op. (June 19, 2003). No appeal of that decision was filed.

Condition 4 of Resolution 88-155 was based on the statement in the July 8 letter, which was represented at the July 26, 1988 public hearing, that "the Woodland site would not be expanded further." Hence, the meaning of that statement in the July 8 letter established the meaning of Condition 4.

In March 2004, in connection with this enforcement action, the sender and recipient of the July 8 letter testified at depositions concerning the meaning of the statement that "the Woodland site would not be expanded further." On March 16, 2004, Mr. Donald Price, the WMII vice president who signed the July 8th letter, stated that the waste footprint of Woodland III was configured to allow for the possible future development of a transfer station on a portion of the Woodland Site. (Price Tr. at 19-24)¹. By excluding an area on the southern portion of the Woodland Site from the expanded waste footprint of Woodland III, WMII intended to permit the development of a transfer station. (Price Tr. at 21-24). Thus, Mr. Price did not intend or state in the July 8 letter that the agreement not to expand the Woodland Landfill Site a third time was an agreement not to develop a waste transfer station.

The testimony of Mr. Thomas Rolando, who was the mayor of the Village of South Elgin in 1988, at his March 19, 2004 deposition confirmed that meaning. His discussion with the Village Board established that the understanding of WMII's statement was that WMII would not ask again to operate a landfill at the Woodland site. ("Rolando Tr. at 27")². He acknowledged

¹ The deposition transcript of Donald Price will be cited to herein as "(Price Tr. at ____)." The Price Deposition Transcript is attached as Exhibit A.

² The deposition transcript of Thomas S. Rolando will be cited to herein as "(Rolando Tr. at __)." The Rolando Deposition Transcript is attached as Exhibit B.

that the plain language of the July 8 letter stated that WMII would agree to no more expansions of the Woodland Landfill site. (Rolando Tr. at 39-40). There was no reference in the July 8 letter to any agreement not to develop a transfer station on the Woodland site. (Rolando Tr. at 38-39). Indeed, as the matter was never raised, neither Mr. Rolando nor the Village Council understood that WMII's agreeing not to further expand the Woodland landfill included an agreement not to develop a waste transfer station. (Rolando Tr. at 40-41, 59-60).

In accordance with Condition 4, WMII has not sought a further expansion of the Woodland Landfill site. (Rolando Tr. at 44-45). Condition 4 does not prohibit WMII from seeking to develop a waste transfer station on the Woodland Site. Thus, a request for site location approval of a waste transfer station on the Woodland Site does not violate Condition 4.

UNDISPUTED FACTS

 Woodland Sanitary Landfill was initially permitted for a 55-acre waste footprint on a 213-acre site by the Illinois Environmental Protection Agency in 1976 ("Woodland I"). (Complaint, ¶2).

2. The waste footprint was permitted for an additional 48 acres within the 213-acre site by the Illinois Environmental Protection Agency in 1982 ("Woodland II"). (Complaint, ¶2).

3. On April 7, 1988, WMII filed an Application for Site Location Approval for a Non-Hazardous Solid Waste Management Site with the Kane County Board to expand Woodland I and II ("Woodland III").

4. Woodland III included a vertical expansion of 20 acres of Woodland II, and a 28acre horizontal expansion of the waste footprint between Woodland I and Woodland II, within the 213-acre site.

5. The total waste footprint of the Woodland Sanitary Landfill, with the approval of Woodland III, was 121 acres on the 213-acre site.

6. WMII had communications with the Village of South Elgin in 1987 and 1988 concerning Woodland III. (Price Tr. at 16; Rolando Tr. at 23-29).

7. The principal concern expressed by the Village of South Elgin concerning Woodland III related to the possible danger to the Village water supply and the potential threat of groundwater contamination. (Rolando Tr. at 24-25).

8. Based upon its discussions with the Village of South Elgin in 1987 and 1988, WMII sent a letter to the Village dated July 8, 1988. (Complaint, Ex. 1; Rolando Tr. at 43).

9. The July 8 letter stated a number of conditions that WMII would agree to in the event the Kane County Board granted site location approval and the Illinois Environmental Protection Agency issued an operating permit for Woodland III. (Complaint, Ex. 1)

10. The July 8 letter included conditions that would obligate WMII to (1) advance remediation costs in the event the two closest municipal wells were contaminated, (2) extend the existing groundwater monitoring program to include quarterly sampling and analysis for 31 volatile organic parameters, and (3) allow the Village to obtain groundwater samples from any monitoring well at any time and inspect any phase of landfill construction. (Complaint, Ex. 1).

11. The July 8 letter included a condition that Woodland III "will be the last expansion that we will attempt to do on this site which is commonly known as the Woodland Landfill site." (Complaint, Ex. 1).

12. The public hearing on the site location approval application for Woodland III was held by the Kane County Board on July 26, 1988. (Complaint, ¶8).

13. The July 8 letter was read into the record by WMII at the July 26 public hearing.(Complaint, ¶8).

14. Paragraph three of the July 8 letter was presented at the public hearing as follows: "Waste Management of Illinois, Inc., agrees and stipulates that this expansion will be the last expansion that we will attempt to do on this site which is commonly known as the Woodland Landfill site." (Complaint, Ex. 5).

15. On September 13, 1988 the Kane County Board granted site location approval for Woodland III in its Findings and Order, Kane County Resolution No. 88-155. ("September 13 Order"). (Complaint, Ex. 1).

16. In the September 13 Order, the Kane County Board incorporated conditions based upon the statements presented in the July 8 letter. (Complaint, Ex. 1).

17. Condition 4 of the September 13 Order provided that "(t)he site, commonly known as the Woodland site, shall not be expanded further." (Complaint, Ex. 1).

18. The September 13 Order defined the "Woodland Site" as "the area comprised of the Woodland I, II and III landfill sites." (Complaint, Ex. 1).

19. Condition 4 of the September 13 Order provides that the Woodland I, II and III landfill sites shall not be expanded further. (Complaint, Ex. 1).

20. Condition 4 of the September 13 Order contains no language or provisions that refer to the development of a waste transfer station on the Woodland site.

21. Condition 4 of the September 13 Order contains no language or provisions that prohibit the development of a waste transfer station on the Woodland site.

22. A sanitary landfill is defined in the Illinois Environmental Protection Act.415 ILCS 5/3.445 (2000).

23. A waste transfer station is defined in the Illinois Environmental Protection Act.415 ILCS 5/3.500 (2000).

24. A sanitary landfill is not the same activity as a waste transfer station. 415 ILCS 5/3.445, 3.500 (2000).

25. The expansion of a landfill is not equivalent to the development of a waste transfer station.

26. The prohibition of any further Woodland landfill expansion in Condition 4 of the September 13 Order is not a prohibition of the development of a waste transfer station on the Woodland site.

ARGUMENT

Summary judgment is appropriate when the pleadings, depositions, affidavits and other items in the record disclose no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. <u>Dowd & Dowd, Ltd. v. Gleason</u>, 181 Ill. 2d 460, 483, 693 N.E.2d 358, 370 (1998); <u>People v. Jersey Sanitation Corporation</u>, No. PCB 97-2, 2002 Ill. Env. LEXIS 197 (April 4, 2002). There are no disputed issues of fact regarding the meaning of Condition 4 of Resolution 88-155. Based on the clear and unambiguous language of Condition 4, WMII is prohibited only from seeking further expansion of the Woodland Landfill, not from seeking to develop a waste transfer station. The parties to the July 8 letter confirmed that they did not intend the prohibition of further expansions of the Woodland Landfill to apply in any way to the development of a waste transfer station on the Woodland Landfill Site. Moreover, pursuant to the Act, developing a waste transfer station is a separate and distinct activity from expanding a sanitary landfill. Therefore, WMII's attempt to site a waste transfer station does not constitute a

violation of Condition 4, or any other condition contained in Resolution 88-155. Based on the undisputed facts of this case, WMII is entitled to summary judgment as a matter of law.

I. The Clear and Unambiguous Language of Condition 4 Prohibits Only the Further Expansion of Woodland Landfill, not the Development of a Waste Transfer Station

The language in Condition 4 should be reviewed so as to determine and give effect to the intentions of the parties. <u>See e.g.</u>, <u>In re Marriage of Hasabnis</u>, 322 Ill. App. 3d 582, 594-95, 749 N.E.2d 448, 458 (1st Dist. 2001) (the rules of statutory construction require that the legislature's intent be given effect). The most reliable indicator of intent is the plain and ordinary meaning of the language to be interpreted. <u>Id.</u> Therefore, every word in Condition 4 should be given a reasonable meaning within the context of the other related conditions in Resolution 88-155. Id.

Condition 4 states: "The site, commonly known as the Woodland site, shall not be expanded further." Condition 1 defines the term "Woodland site" as "the area comprised of the Woodland I, II, and III landfill sites." Thus, the plain and unambiguous language of Condition 1 and 4 of Resolution 88-155 clearly states that the only limitation placed on WMII with respect to the Woodland Landfill concerns the further expansion of the sanitary landfill.

Mr. Price and Mr. Rolando testified that the plain language used therein, and later made into Condition 4, was a true indicator of their intent. In stating that WMII was prohibited from seeking further expansions of the Woodland Landfill, Mr. Price and Mr. Rolando did not intend for that prohibition to apply in any way to the development of a waste transfer station.

In light of the plain language of Condition 4, in conjunction with the testimony of Mr. Price and Mr. Rolando, there are no disputed issues of fact regarding the meaning of Condition

4. The facts show that Condition 4 prohibits any further expansion of the Woodland Landfill, but does not contain any prohibitions with respect to the development of a waste transfer station.

II. A Landfill Expansion is Distinct from the Development of a Waste Transfer Station as a Matter of Law

The Village erroneously contends in this action that WMII's attempt to site the Woodland Transfer Facility equates to an expansion of the Woodland Landfill. However, a waste transfer station and a sanitary landfill are not treated synonymously under the Act. Rather, a transfer station is a fundamentally different activity than a landfill. <u>See</u> 415 ILCS 5/3.445 (sanitary landfill) and 5/3.500 (transfer station).

Likewise, the development of a waste transfer station does not constitute an expansion of an existing landfill. The Act defines an "expansion" as the area "beyond the boundary of a currently permitted" sanitary landfill. 415 ILCS 5/3.330(b)(2). As such, an expansion of a landfill involves the increase of disposal capacity through a vertical and/or horizontal extension of the waste footprint in order to extend the period the landfill would continue to receive and dispose of waste. An expansion may also involve the lateral extension of the landfill property boundaries. In other words, an expansion is an increase in the size or disposal capacity of an existing landfill facility. <u>M.I.G. Investments, Inc. v. EPA</u>, 122 Ill. 2d 392, 523 N.E.2d 1 (1988) (expansion not limited to lateral expansion, but includes vertical expansion, of currently permitted facility).

WMII attempted to site a waste transfer station on an approximate 9-acre portion of the Woodland Landfill Site that is separate and apart from the 121-acre waste footprint on which the landfill was operated. While Condition 4 of Resolution 88-155 prohibits the further expansion of the Woodland Landfill, it does not prohibit the development of a transfer station on the Woodland Landfill Site. Because the Transfer Facility Application did not request an increase in

the size, capacity or waste footprint of Woodland I, II, or III, it was not a request to further expand the Woodland Landfill. Therefore, WMII's attempt to site a waste transfer station on a parcel of land apart from the actual Woodland Landfill cannot constitute a violation of Condition 4 of Resolution 88-155.

CONCLUSION

For all of the foregoing reasons, Respondent Waste Management of Illinois, Inc. requests the entry of summary judgment in its favor and against Petitioner Village of South Elgin, and for any further relief in its favor that this IPCB deems fair and equitable.

Respectfully submitted,

WASTE MANAGEMENT OF ILLINOIS, INC. By: One of Its Aftorneys

When you submitted the application under your cover letter and signed it, was it the intent of Waste Management that the Kane County Board could rely on the representations made in the application? 	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	And in fact when you look at the footprint, if the intent was to have just a landfill, we wouldn't incorporate all the way up to the road because then you could see everywhere we went we incorporated square footage of space for development of a site to take advantage of the airspace. Whether that was communicated or not, obviously it wasn't. But I know what the intent was from a region's perspective. Q. What in the diagram that you traced with your finger indicates an area that's being reserved for a transfer station? A. We kept this is the entrance area. We thought the logical spot would be right in the this area here (indicating). Q. The area where there is indicated to be a walking path, would be the A. Well, right now, is that a walking path, is that what that is? Q. Yeah.
