---

Hi Mr. Brown,  
Sharing the following public comment on Bob Jorgensen's (cc'd) behalf:

Since I had two heart valves replaced in 2006 I have tried to be more aware of air pollution. I also am having lung issues being 75 and having inhaled polluted air for all those years. Naturally I keep an eye on daily air quality and restrict my activities and travel accordingly. I myself drive an electric vehicle. I had a 2013 Chevy Volt for over 10 years and now drive a Chevy Bolt. I have encouraged others, including East Peoria City Officials, not to idle their vehicles so that no extra pollution is put into the air needlessly. I also helped fund and place NO IDLING street signs at all grade schools in East Peoria. We had them located where parents who are dropping off their students can see them. Hopefully making parents be aware of the extra pollution they are adding to their children's lungs when they idle needlessly.
