Mr. Brown:

I am a 57-year old life-long citizen of Illinois and believe that the Advanced Clean Trucks (ACT) legislation is extremely important to help our state meet climate change mitigation and clean energy goals. We need strong laws to help us get there, and the proposed rules would boldly move us forward. It is my opinion that the impacts of climate change are and will be a crisis for the entire world and for my home state for many years in the future. I recognize this is based on the research of many climate scientists. We can continue our response by cleaning up our transportation sector..

Most importantly, ACT will help Illinois residents have cleaner air to breathe. This is crucial, especially for young children, elderly, those who suffer from asthma and other chronic breathing disorders. I have experienced pollen, mold and other seasonal allergies most of my life and I am convinced that air pollution is exacerbating my symptoms. So, I am motivated to do all I can to push Illinois government to protect our clean air resources.

I am in favor of enacting the ACT legislation.

Sincerely,

Tim J. Dever

Swansea, IL 62226
