Subject: [External] Illinois should adopt ACCII, ACT and HDO!
Date: Tuesday, March 4, 2025 12:35:44 PM

Dear Clerk of the Board Don Brown,

Breathing clean air is very important to me. We all deserve clean air. Since 2019, transportation has been the dirtiest sector in the state, even surpassing coal as the biggest polluter.

In order to achieve Illinois' goals of reducing health- and climate-harming emissions, the state will have to enact effective regulations. The Advanced Clean Cars II (ACCII) program can do that by putting the state on a path toward 100% new electric vehicle sales by 2035.

Illinois must also adopt the Advanced Clean Trucks (ACT) and Heavy-Duty Low-NOx Omnibus (HDO) rules, so more clean trucks will be on our roads. We must establish strong yet feasible emission standards for new fossil fuel trucks that will continue to be sold and increasing sales targets for new electric trucks.

I really want electric vehicles to become the norm - it is just commonsense to do this. It is also commonsense to require emissions standards for non-electric vehicles.

I ask that the Illinois Pollution Control Board moves forward with adopting ACCII, ACT, and HDO.

Sincerely,
Laurel Kaczor
Palatine, IL 60074-6488
