**Subject:** [External] Adopting Clean Vehicle Standards R24-17 will lead to major benefits, including clean air  
**Date:** Monday, March 10, 2025 1:45:02 PM

---

Dear Board Clerk Don Brown,

As an Illinois resident, and as a scientist who has made an extensive study of the environmental and economic benefits of the ongoing transition to zero emissions, I am asking that you support the adoption of the Clean Vehicle Standards for clean air: the Advanced Clean Trucks, Advanced Clean Cars, and Heavy-Duty Omnibus rules.

The transition to zero emission vehicles is happening. In addition to major benefits (environmental, health and financial) to consumers, it also provides market advantages to the commercial sector. The only remaining question is how quickly this transition will occur and whether Illinois will be left behind.

Although the transition *\*will\** occur, the market contains inefficiencies (for example, entrenched manufacturers, or companies that simply "have always done things this way") and does not always respond to innovations in the fastest manner. It is the duty of policy makers to provide carrots and sticks to help the market act in the most effective manner to improve the lives of our citizens both now and in the future.

Please vote in favor of Illinois adoption of the Clean Vehicle Standards. Thank you for your time and consideration.

Sincerely,  
Geza Gyuk  
Glenview, IL
