Those hearing costs shall be assessed in addition to the statutory civil penalty.

Pursuant to Section 31.1(d)(1) of the Act, 415 ILCS 5/31.1(d)(1) (2002), if Respondents fail to petition or elect not to petition the Illinois Pollution Control Board for review of this Administrative Citation within thirty-five (35) days of the date of service, the Illinois Pollution Control Board shall adopt a final order, which shall include this Administrative Citation and a finding of violation as alleged herein, and shall impose the statutory civil penalty specified above.

When payment is made, Respondents' check shall be made payable to the Illinois Environmental Protection Trust Fund and mailed to the attention of Fiscal Services, Illinois Environmental Protection Agency, 1021 North Grand Avenue East, P.O. ## Narrative

On May 26, 2004, I (Jeff Port) performed a Solid Waste Landfill Inspection at the Knox County Landfill #3 located in rural Knox County, near Wataga. The facility is an 814 Subpart C landfill with authorization under Permit #1994-105-LFM issued on September 29, 1994. The most recent modification, #19 was issued on November 19, 2003.

I arrived at the site at 5:25 AM. I was accompanied by Dawn Ingold, DLPC/FOS Peoria. The entrance gate to the facility was locked but the exit gate was open, so we proceeded through the exit gate. We went to the office but the door was locked. We then went to the maintenance building. Someone was working under one of the vehicles. I asked if Mr. Ingle was present. The man under the vehicle said that he was not. I introduced myself and explained that I needed to perform an inspection. I asked the man where the previous day's active area was. The man directed me to the active area. We then proceeded to this area.

Photographs P1 through P5 show the previous day's active area located in Cell 3. Uncovered refuse can be seen here. Photographs P6 through P8 were taken around the perimeter of Cell 3. Photographs P9 and P10 show the northern perimeter of Cells 4/5. After examining this area, we went to Cells 1/2.

Photograph P11 shows the eastern slope of Cells 1/2. Photographs P12 through P15 show uncovered refuse present in erosion ruts on the eastern edge of Cells 1/2. Photograph P16 shows leachate present in one of the erosion ruts. Photographs P17 through P19 were taken at the southeast corner of Cells 1/2 and show the area looking toward the southeast, north, and west respectively. Photograph P20 taken near the junction of Cells 1/2 and 4/5 show the site looking toward the west.

Photographs P21 and P22 show erosion ruts with exposed refuse on the eastern border of Cells 4/5. Photograph P23 taken near the northern border of Cells 4/5 show this area looking toward the southwest. Photograph P24 shows a pile of waste on the northern border of Cell 4/5. After photographing the active portion of the landfill, we proceeded to the newly developed Cell 9 where I performed a Pre-operational Inspection.

Photographs P25 through P28, P30, P31, P36, and P37 show exposed waste on the southeast corner of Cell 9. At this location, Cell 9 intersects with Cells 4/5. Waste has been sloughing off from this area into the new unpermitted cell. Leachate has also been generated in this area as water comes into contact with the waste and runs down into the new cell. Leachate has accumulated in this area and can be seen in the photographs. Photograph P29 shows vegetation growing on the sand layer of Cell 9. Photographs P32 through P34 taken from the eastern edge of Cell 9 show the cell looking toward the west. Photograph P35 shows the eastern edge of the new cell looking toward the north, from the southeast corner. Photographs P38 through P40 were taken from the southwest corner of Cell 9. Several areas of ponding were present here. Photographs P41 through P44 were taken at the northwest corner of Cell 9. Blown litter from the active area can be seen in standing water here. Drainage problems appear to be present in this

area, as leachate had flowed over the berm and down the side of the cell, impacting the waters of the state. Sand had also washed away in this area, exposing the liner. It does not appear that Cell 9 is in a condition to accept waste. After examining and photographing this area, an inspection was performed on Knox County Landfill #2 and the Compost facility. Those inspections are under their own covers.

Mr. Ingle had joined us during the inspection for site #2. We went to the office where I reviewed facility records. Mr. Ingle stated that the compactor had caught on fire on May 12 and that the load checks had been stored inside it. He sent one of the employees to the compactor to retrieve the load checks. He said that the facility was operating as best as it could without the compactor, by driving over the waste to help compact it. I examined the load checks that were brought back to the office. I also examined the load checks that had been logged in after the fire. These items appeared to be in order. After further discussion with Mr. Ingle, we left the site at 9:05 AM.

Photograph locations are depicted on the accompanying site map. Based upon this inspection, the following violations were observed and are indicated on the accompany checklist.
